What is this product?

Type: Units of AMUNDI ETF MSCI EMU HIGH DIVIDEND UCITS ETF, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Eurozone country equities

Objectives: AMF (Autorité des Marchés Financiers) classification: Eurozone country equities.

By subscribing to AMUNDI ETF MSCI EMU HIGH DIVIDEND UCITS ETF, you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the MSCI EMU High Dividend Yield strategy index (the "**Benchmark**"), regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the change in the net asset value of the Fund and that of the Benchmark countervalued in euro is 2%.

The Fund's Benchmark, net dividends reinvested (dividends, net of tax, paid by the equities in the Benchmark are included in the Benchmark calculation), denominated in US dollars and countervalued in euro, is calculated and published by the index provider MSCI.

The equities included in the Benchmark are derived from the universe of the most significant securities on the markets of 10 countries in the European Economic and Monetary Union, and with the highest dividend rates in their respective countries.

More information on the composition and operating rules of the Benchmark can be found in the prospectus and on msci.com.

The Benchmark is available via Reuters (.dMYEM00000NUS) and Bloomberg (M1EMHDVD).

In order to replicate the Benchmark, the Management Company employs "passive" management using the direct replication method consisting of investing in financial securities that are part of the Benchmark in proportions that are extremely close to those of the Benchmark.

The Management Company may decide to use the "sampling" technique consisting of investing in a selection of representative securities that make up the Benchmark (and not all securities), in proportions different from those of the Benchmark or even to invest in securities not included in the Benchmark. Eligible forward financial instruments and/or temporary purchases and sales of securities may be used for hedging and/or exposure purposes.

You will have a permanent investment, via the Fund's assets, of at least 75% in securities eligible for the French Equity Savings Plan (PEA, a savings plan reserved for French investors).

Net income and net capital gains realised by the Fund are systematically reinvested.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Intended retail investors: This product is intended for investors with a basic knowledge and/or no or limited experience of investing in funds, who are seeking to increase the value of their investment over the recommended holding period and who are able to bear a loss of up to the full amount invested.
