WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the Product for 5 years.

You may not be able to sell your Product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. The risk category is justified by the active investment in different asset classes while seeking to maintain the risk profile between predefined boundaries.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product not included in the summary risk indicator:

- **Counterparty Risk:** this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
 - **Risk linked to derivatives:** the use of derivatives can amplify fluctuations in the value of investments, thus increasing the volatility of returns.
- For additional details regarding the risks, please refer to the prospectus.
- This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. WHAT HAPPENS IF BNPP AM LUXEMBOURG IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM Luxembourg. In the event BNPP AM Luxembourg would default, the assets of the Product/SICAV, held by a depositary, would not be affected by this default.
 In case of default of the depositary, the risk of financial loss of the Product/SICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/SICAV.
