Competent Authority:	The Central Bank of Ireland is responsible for supervising First Trust Global Portfolios Management Limited in relation to this Key Information Document. First Trust Global Portfolios Management Limited is authorised in Ireland and regulated by the Central Bank of Ireland.

This Key Information Document is valid as at 15 October 2025.

WHAT IS THIS PRODUCT?

Type: This product is a sub-fund of First Trust Global Funds plc (the "Company"), an open-ended investment fund established as a public limited company with segregated liability between sub-funds. The product is an exchange-traded fund.

Term: This product is not subject to any fixed term. The Company is open-ended, however, the shares of the Fund or a class may be redeemed by the Company with notice to shareholders in the circumstances described in the Prospectus.

Objectives:

- The fund seeks to provide investors with investment results that correspond generally to the price and yield of an equity index called the NASDAQ US High Equity Income Index (the "Index").
- The fund invests primarily in equity securities that are included in the Index. The fund attempts to replicate, before fees and expenses, the performance of the Index.

It is intended to declare dividends on a quarterly basis.

You may sell your shares usually on each business day (a day on which the London Stock Exchange is open) by sending your request to the administrator.

Intended Retail Investor:

The product is intended for retail investors who: (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for capital guarantee; (ii) have specific knowledge or experience of investing in similar products and in financial markets; and (iii) seek a product offering exposure to the performance of the underlying index and have an investment horizon in line with the recommended holding period stated below.

Depositary: The Bank of New York Mellon SA/NV, Dublin Branch

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5 Years.

Risk indicator

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Prospectus available at www.ftgportfolios.com.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period: 5 Years Example Investment: 10 000 USD			
Scenarios		If you exit after 1 Year	If you exit after 5 Years (recommended holding period)
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	USD 640	USD 440
	Average return each year	- 93.6%	- 46.5%
Unfavourable scenario	What you might get back after costs	USD 6 720	USD 8 970
	Average return each year	- 32.8%	- 2.1%
Moderate scenario	What you might get back after costs	USD 10 590	USD 14 310
	Average return each year	5.9%	7.4%
Favourable scenario	What you might get back after costs	USD 19 100	USD 17 560
	Average return each year	91%	11.9%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

- Unfavourable: This type of scenario occurred for an investment (and benchmark) between April 2015 and March 2020.
- Moderate: This type of scenario occurred for an investment (and benchmark) between March 2019 and February 2024.
- Favourable: This type of scenario occurred for an investment (and benchmark) between June 2016 and May 2021.

The return is not guaranteed.

WHAT HAPPENS IF FIRST TRUST GLOBAL PORTFOLIOS MANAGEMENT LIMITED IS UNABLE TO PAY OUT?

You will not face financial loss should the Manager default on its obligation. In the event of insolvency of the Depositary, the fund's assets are protected and are not subject to a claim by the Depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, such loss.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested

Investment: 10 000 USD	If you exit after 1 Year	If you exit after 5 Years (recommended holding period)
Total Costs	USD 61	USD 438
Annual Cost Impact (*)	0.6% each year	0.6% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.1% before costs and 7.4% after costs.

Composition of Costs
