The Manager is authorised in Ireland and regulated by the Central Bank of Ireland (the “CBI”) and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

More information is available at **www.blackrock.com** or by calling **+44-207-743-2030**. This document is dated 12 August 2025.

What is this product?

Type: The Fund is a sub-fund of iShares V plc, an umbrella company incorporated in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities (“UCITS”). The Fund is a UCITS exchange-traded fund, a UCITS ETF.

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

Objectives

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund’s assets, which reflects the return of the MSCI World Consumer Staples Advanced Select 20 35 Capped Index, the Fund’s benchmark index (Index).
- The Share Class, via the Fund, is passively managed and aims to invest in equity securities (e.g. shares) that, so far as possible and practicable, make up the Index.
- The Index measures the performance of companies included in the MSCI World Consumer Staples Index (the “Parent Index”) and excludes issuers based on the index provider’s environmental, social and governance (ESG) exclusionary criteria as described in the prospectus. Issuers may be excluded if they are involved in controversial, nuclear and conventional weapons, civilian firearms, tobacco, thermal coal, oil sands and companies that are classified as violating the United Nations Global Compact principles. The Index also excludes companies based on their involvement in very severe ESG related controversies. The remaining companies are weighted using an optimisation process which aims to reduce the carbon emissions intensity and potential, increase the ESG score and minimise the tracking error, relative to the Parent Index.
- The Parent Index measures the performance of large and mid capitalisation stocks across developed market countries which comply with MSCI’s size, liquidity, and free-float criteria within the Global Industry Classification Standard (GICS) consumer staples sector as described in the prospectus.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund’s investment objective.
- The Fund adopts a binding and significant ESG optimisation approach to sustainable investing i.e. the Fund will integrate ESG information into investment processes to optimise exposure to issuers to achieve a higher ESG rating.
- The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments which in turn may affect the value of your investment.
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see “How long should I hold it and can I take my money out early?”).
- The depositary of the Fund is State Street Custodial Services (Ireland) Limited.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the iShares V plc. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the iShares website at: www.ishares.com or by calling +44-207-743-2030 or from your broker or financial adviser.
- Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- Your shares will be denominated in US Dollar, the Fund’s base currency.
- The shares are listed and traded on various stock exchanges. In normal circumstances, only authorised participants may buy and sell shares directly with the Fund. Investors who are not authorised participants (e.g. select financial institutions) can generally only buy or sell the shares on the secondary market (e.g. via a broker on a stock exchange) at the then prevailing market price. The value of the shares are related to the value of the underlying assets of the Fund, less costs (see “What are the costs?” below). The prevailing market price at which the shares trade on the secondary market may deviate from the value of the Shares. Indicative net asset value is published on relevant stock exchanges websites.

Intended retail investor: The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see “How long should I hold it and can I take my money out early?”).

Insurance benefits: The Fund does not offer any insurance benefits.

What are the risks and what could I get in return?

Risk Indicator

Lower risk Higher risk						
1	2	3	4	5	6	7
 The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 3 out of 7, which is a medium low risk class. This classification rates the potential losses from future performance at a medium low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, State Street Custodial Services (Ireland) Limited (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time: The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	23 USD	157 USD
Annual cost Impact (*)	0.2%	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.5% before costs and 6.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

¹Not applicable to secondary market investors. Investors dealing via stock exchanges will pay fees charged by stock brokers. Such charges can be obtained on exchanges where the shares are listed and traded, or from stock brokers. Authorised participants dealing directly with the Fund or the Management Company will pay related transaction costs.

How long should I hold it and can I take money out early? Recommended Holding Period: 5 years

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Fund and the time frame in which it is expected that it will be possible to achieve the investment objective of the Fund. Any investment should be considered against your specific investment needs and appetite for risk. BlackRock has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Fund to your needs you should seek appropriate professional advice. Details of dealing frequency can be found under "What is this product?". You may receive less than expected if you cash in earlier than the RHP. The RHP is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. Please see the "What are the costs?" section for details of any exit fees.
