What is this product?

Type: The Fund is a sub-fund of iShares V plc, an umbrella company incorporated in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities ("UCITS"). The Fund is a UCITS exchange-traded fund, a UCITS ETF.

Term: The Fund has a fixed maturity date of 02/12/2026 and shares in the Fund will be redeemed the next day. The Fund may be unilaterally terminated early in certain circumstances as described in the Fund's prospectus. Prior to investing during or in the run up to the final year, please note specific risks in the Fund's prospectus.

Objectives

- The Share Class is a share class of a Fund, which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the ICE 2026 Maturity Italy UCITS Index, the Fund's benchmark index (Index).
- The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index and comply with its credit rating requirements.
- The Index measures the performance of euro-denominated bonds issued by the government of Italy with maturities between 01/01/26 and 02/12/26, inclusive. To be eligible for inclusion in the Index securities must have a fixed coupon schedule and an amount outstanding of at least €1 billion. Inflation-linked debt is excluded from the Index. Italian Government bills are not eligible for inclusion in the Index except during the cash reinvestment period in the maturity year as described below. Securities issued or marketed primarily to retail investors are not eligible for inclusion in the Index.
- The Fund uses optimising techniques to achieve a similar return to its Index. These may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- The Index is market capitalisation weighted and rebalances on a monthly basis. Index constituents are market capitalisation weighted based on amounts outstanding, times price, plus accrued interest.
- The Fund may also engage in short term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index. This Fund may not be appropriate for investors who plan to withdraw their money before 02/12/26.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the iShares V plc. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the iShares website at: www.ishares.com or by calling +49 89427295800 or from your broker or financial adviser.
- Your shares will be distributing shares (i.e. income will be paid on the shares quarterly).
- Your shares will be denominated in Euro, the Fund's base currency.
- The shares are listed and traded on various stock exchanges. In normal circumstances, only authorised participants may buy and sell shares directly with the Fund. Investors who are not authorised participants (e.g. select financial institutions) can generally only buy or sell the shares on the secondary market (e.g. via a broker on a stock exchange) at the then prevailing market price. The value of the shares are related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below). The prevailing market price at which the shares trade on the secondary market may deviate from the value of the Shares. Indicative net asset value is published on relevant stock exchanges websites.

Intended retail investor: The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see "How long should I hold it and can I take my money out early?").

Insurance benefits: The Fund does not offer any insurance benefits.

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
The risk indicator assumes you keep the product for 11 months. The actual risk can vary significantly if you cash in at an early stage and you may get back less.						

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 2 out of 7, which is a low risk class. This classification rates the potential losses from future performance at a low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- **Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, State Street Custodial Services (Ireland) Limited (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time: The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- EUR 10,000 is invested.

	If you exit after recommended holding period
Total costs	12 EUR
Cost impact (*)	0.1%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Such charges can be obtained on exchanges where the shares are listed and traded, or from stock brokers. Authorised participants dealing directly with the Fund or the Management Company will pay related transaction costs.

How long should I hold it and can I take money out early? Recommended Holding Period: 11 months

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Fund and the time frame in which it is expected that the Fund will achieve a return on your investment with an asset allocation that changes over time, however the Product is designed to be held until its maturity date. Any investment should be considered against your specific investment needs and appetite for risk. BlackRock has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Fund to your needs you should seek appropriate professional advice. Details of dealing frequency can be found under "What is this product?". You may receive less than expected if you cash in earlier than the RHP. The RHP is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. Please see the "What are the costs?" section for details of any exit fees.
