## What is this product?

### Type

This product is a UCITS exchange traded fund or "UCITS ETF". It is a sub-fund of JPMorgan ETFs (Ireland) ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between its sub-funds and authorised by the CBI pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

### Objectives, Process and Policies

**Objective** The Sub-Fund aims to achieve a return through investing in companies with exposure to the theme of climate change solutions.

**Share Class Benchmark** MSCI All Country World Index (Total Return Net)

**Investment Policy** The Sub-Fund pursues an actively managed investment strategy without reference or constraints relative to the Benchmark.

The Sub-Fund will invest in companies that have been identified by the Investment Manager, at the time of purchase, as best positioned to develop solutions to address climate change, by being significantly engaged in developing climate change solutions, whilst not significantly harming any environmental or social objectives and following good governance practices.

Companies are selected in relation to key sub-themes of climate change solutions, which may change from time to time, such as sustainable transport, sustainable construction, sustainable food & water, renewable energy and recycling and re-use. The Investment Manager considers that these investments qualify as "sustainable investments" for the purposes of SFDR and will invest a minimum of 90% of the Sub-Fund's Net Asset Value in these "sustainable investments". Investments are evaluated and deemed sustainable investments via the following process.

Significant engagement in developing climate change solutions will be measured through metrics such as revenue or potential revenue generated by companies through such solutions or other metrics applied by the Investment Manager which may change from time to time in relation to the key sub-themes as described above.

In order to qualify for inclusion in the portfolio, a company must generate at least 20% of its revenue from one of the identified sub-themes. If a security does not generate at least 20% of its revenue from an identified sub-theme, it may still be eligible for inclusion based on a qualitative assessment of future revenue potential, based on metrics such as capital expenditure.

The process to identify companies with exposure to the theme of climate change solutions has three steps.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Website ([www.jpmorganassetmanagement.ie](http://www.jpmorganassetmanagement.ie)).

Identify companies aligned to the sub-themes using the ThemeBot which is a proprietary natural language processing tool that:

- identifies and determines the relevance of key words and concepts related to the climate change solutions sub-themes; and
- evaluates public documentation such as regulatory filings, broker reports, news reports or company profiles to identify those companies providing the highest exposure to these sub-themes.

The Investment Manager analyses the results of the Themebot to select the companies from this core universe best placed to achieve the Sub-Fund's objective. This analysis is based on fundamental analysis and ongoing engagement with companies to understand how they are positioned to develop solutions currently and in the future to address climate change.

Fundamental analysis is used to better understand sustainability risks and opportunities that may impact a company and is also an important driver behind active company engagement when seeking to positively influence business practices to improve sustainability. As part of this analysis, the Investment Manager may make use of a proprietary ESG framework which assesses each company's exposure to material sustainability issues however the focus is to identify companies aligned to the theme of climate change solutions.

The Investment Manager has ultimate discretion over the construction of the portfolio and may add companies that have not been identified by the Themebot.

If a company ceases to qualify, the Investment Manager will engage with the company to determine the circumstances for ceasing to qualify. If the company can resolve the matter in the short-term it may continue to be held in the portfolio. However, if not, the security will be sold as soon as reasonably practicable taking into account the best interests of Shareholders in the Sub-Fund.

The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on all of securities purchased excluding any securities for cash management or EPM.

The Sub-Fund follows a sustainable thematic ESG approach. Thematic is an investment style with a thematic focus on a UN Sustainable Development Goal or other specific ESG theme (in this case climate change solutions). The term "Thematic" defines the category of this Sub-Fund and applicable investment criteria. The Sub-Fund seeks to achieve its Investment Objective through a forward looking investment approach, active engagement with companies where possible, and by seeking to positively influence business practices to improve sustainability. This investment style aims to deliver long term sustainable financial returns while also serving as the foundation to align investment decisions with investor values. The Sub-Fund aims to deliver a sustainability related theme of climate change solutions with intentional environmental/social outcome. The thematic approach ensures portfolio positions are issued by thematically selected issuers. The Sub-Fund has sustainable investment as its objective and intends to use third party data providers and to the extent possible, in-house research and direct assessment of corporate reporting and data to determine the extent of investments in accordance with the EU criteria for environmentally sustainable economic activities.

While there are investments in the Sub-Fund that contribute to an environmental objective and may be eligible to be assessed against the criteria, this is an evolving assessment subject to regulatory rules yet to be fully implemented and highly dependent on the availability of sufficient, reliable, timely and verifiable data from investee companies. In this regard, the Investment Manager is not currently in a position to quantify the extent of investments in economic activities that qualify with the criteria.

The Sub-Fund will invest globally, including, without limits, in emerging markets.

The Sub-Fund may invest in companies of all capitalisation levels, including, without limits, in small capitalisation companies and may have significant positions in specific sectors or markets from time to time.

The Benchmark is a global equity index designed to represent the performance of large and mid-capitalisation equity securities issued in both developed markets and emerging markets.

For the avoidance of doubt, investors should note that the Sub-Fund will not seek to track the performance of, or replicate the Benchmark, rather the Sub-Fund will use the Benchmark as a performance comparator. The Sub-Fund may invest in assets denominated in any currency and currency exposure will not typically be hedged.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

All data is sourced by J.P. Morgan Asset Management and is correct as at the date of this commentary unless otherwise stated.

The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund's holdings and full disclosure policy may be found on [www.jpmmorganassetmanagement.lu](http://www.jpmmorganassetmanagement.lu).

**Redemption and Dealing** Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

**Distribution Policy** This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.

**SFDR Classification** Article 9

**Intended retail investor**

This product is intended for investors who plan to stay invested for at least 5 years.

- Investors should be seeking long term capital growth and a higher risk, thematic equity investment that embeds ESG principles.
- Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan.
- Typical investors in the Sub-Fund are expected to be those who seek exposure to the markets covered by the Benchmark and seek to invest in companies best positioned to develop solutions to address climate change, by being significantly engaged in developing climate

change solutions, whilst not significantly harming any environmental or social objectives and following good governance practices.

**Term** This product does not have a fixed maturity date and may be liquidated in certain circumstances, as further detailed in the Prospectus.

**What are the risks and what could I get in return?**

**Risks**

 The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the relevant supplement, available free of charge at [www.jpmmorganassetmanagement.lu](http://www.jpmmorganassetmanagement.lu).

**Performance scenarios**

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between 2024 and 2026.

**Moderate:** this type of scenario occurred for an investment between 2019 and 2024.

**Favourable:** this type of scenario occurred for an investment between 2016 and 2021.

Recommended holding period		5 years	
Example Investment		\$ 10,000	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Minimum return</b>	There is no minimum guaranteed return. You could lose some or all of your investment.

**What happens if JPMorgan Asset Management (Europe) S.à.r.l. is unable to pay out?**

JPMorgan Asset Management (Europe) S.à r.l. is responsible for administration and management of the Sub-Fund and does not hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). JPMorgan Asset Management (Europe) S.à r.l., as

the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

**What are the costs?**

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time**

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- \$ 10,000 is invested.

Example Investment \$ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>\$ 79</b>	<b>\$ 575</b>
<b>Annual cost impact*</b>	<b>0.8%</b>	<b>0.8%</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.2% before costs and 9.4% after costs.

**Composition of costs**
