What is this product?

Type
This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term
This product has no fixed term.

Objectives
The investment objective of the fund is to seek to maximise total return, consistent with prudent investment management.

Investment Policy
The fund will seek to achieve its investment objective by investing, under normal circumstances, at least 80% of its assets in a diversified portfolio of Euro denominated high yield fixed income instruments.
The fund may hold both non-EUR denominated currency positions and non-EUR denominated fixed income instruments. Non-EUR denominated fixed income instruments are limited to 20% of total assets. Non-EUR denominated currency exposure is limited to 5% of total assets. Therefore, movements in both non-EUR denominated fixed income instruments and non-EUR denominated currencies can influence the fund's return. The fund's exposure to currencies may be actively managed where the investment advisor believes it would be beneficial to do so. Any active currency positions and currency hedging will be implemented using instruments such as forward foreign exchange contracts and currency futures, options and swaps in accordance with the Central Bank's requirements.
No more than 25% of the fund's assets may be invested in securities that are convertible into equity securities (including up to 10% in contingent convertible securities which are described in further detail in the Prospectus under the heading "Contingent Convertible Instruments").
No more than 10% of the fund's total assets may be invested in equity securities and equity related securities (such as warrants and preferred stock). The fund may also invest up to 10% of its net assets in aggregate in illiquid securities (including bonds and other fixed income instruments as set out in this investment policy, which are illiquid) which are described in further detail in the Prospectus under the heading "Transferable Illiquid Securities" and in loan participations and loan assignments which constitute money market instruments.
The average portfolio duration of the fund will normally remain within +/- 1 year of the ICE BofA 0-5 Year Euro Developed Markets High Yield 2% Constrained Index (the "Index"). The fund will seek to achieve returns in excess of the Index over the medium to long term after the deduction of all fees and expenses. The fund is considered to be actively managed in reference to the Index by virtue of the fact that it seeks to outperform the Index and the Index is used for duration measurement, calculating the global exposure of the fund using the relative VaR methodology and for performance comparison purposes. While the fund is actively managed, due to the investment universe represented by the Index and the intended investment universe of the fund (as selected in accordance with the investment advisor's investment strategy outlined herein), deviation from the Index is expected to be limited whereby volatility of the difference between the return of the fund and the return of the Index is anticipated to be low. The fund's securities may be components of and may have similar weightings to the Index. However, the Index is not used to define the portfolio composition of the fund. The Index tracks the performance of short maturity developed markets EUR denominated below investment grade corporate debt. Further details on the Index are available from the investment advisor on request.
In accordance with Article 8 of SFDR, the fund will promote environmental and social characteristics but does not have sustainable investment as its objective. The fund will promote environmental and social characteristics by operating an exclusion strategy.
Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Portfolio Holdings In accordance with the requirements of the Central Bank the portfolio holdings as at the end of each calendar quarter are disclosed publicly on www.pimco.com i.e. within 30 business-days of the end of the quarter.

Intended retail investor
Typical investors in the Fund will be investors looking for exposure to short term EUR denominated below investment grade corporate debts publicly issued in the Euro domestic market or Eurobonds markets with a medium investment time horizon and volatility.

What are the risks and what could I get in return?

Risk Indicator

Lower risk ← → **Higher risk**

1	**2**	3	4	5	6	7

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Credit and Default Risk, Interest Rate Risk and Index Tracking Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 3 years Investment: EUR 10,000

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depositary to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depositary, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: EUR 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	63 EUR	198 EUR
Annual cost impact (*)	0.6%	0.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.8% before costs and 2.1% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee. *	0 EUR
Exit costs	We do not charge an exit fee. *	0 EUR
Ongoing costs taken each year		**If you exit after 1 year**
Management fees and other administrative or operating costs	0.45% of the value of your investment per year. This is an estimate based on actual costs over the last year.	45 EUR
Transaction costs	0.18% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	18 EUR
Incidental costs taken under specific conditions		**If you exit after 1 year**
Performance fees	This product does not have any performance fees.	0 EUR

* Because the fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. Secondary market investors may incur brokerage and/or transaction fees related to their dealings and may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your financial advisor or broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal. Authorised Participants dealing directly with the fund may pay an entry charge up to a maximum of 3% and an exit charge up to a maximum of 3%.

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This product has no required minimum holding period but is designed for medium term investment; you should be prepared to stay invested for at least 3 years.The fund's net asset value is calculated daily and the fund is open for redemptions on each day the Deutsche Börse AG and banks in London are open for business. Please refer to the prospectus for further information. The fund shares are listed on one or more Stock Exchanges. As the fund is an exchange traded fund (“ETF”), in normal market conditions typically only authorised participants may subscribe or redeem shares directly with the fund. Other investors can buy or sell shares daily through an intermediary directly or on stock exchanges on which then shares are traded, i.e. on the secondary market. In exceptional circumstances, other investors will be permitted to redeem their shares directly from the Company in accordance with the redemption procedures set out in the prospectus, subject to applicable laws and any relevant charges.
