What is this product?

Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank of Ireland as a UCITS.

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The objective of the Fund is to track the performance of large sized U.S. energy companies in the S&P 500 Index.

The Fund seeks to track the performance of the S&P Energy Select Sector Daily Capped 35/20 Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

Investment policies The Fund invests primarily in securities included in the Index. These securities include equity securities issued by large sized U.S. energy companies, which are included in the S&P 500 Index and have been classified as falling within the Energy sector in line with the Global Industry Classification Standard (GICS).

Although the Index is generally well diversified, to enable the Fund to track the Index accurately, the Fund will make use of the increased diversification limits available under the UCITS Regulations, which permit it to hold positions in individual constituents of the Index issued by the same body of up to 20% and a position of up to 35% of the Fund's net asset value in constituents of the Index issued by the same body due to exceptional market conditions (i.e. the issuer represents an unusually large portion of this market measured by the Index).

The Fund seeks to hold all the securities of the Index with the approximate weightings as in that Index. The Fund will use a replication strategy to create a near mirror-image of the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund's maximum exposure to securities lending as a percentage of its Net Asset Value will not exceed 40%.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.
