What is this product?

Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank of Ireland as a UCITS.

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The investment objective of the Fund is to track the performance of European large, mid and small-sized companies engaged in defense-related activities.

Investment policies The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index is comprised of a minimum of 30 European domiciled companies across developed and emerging markets in Europe (excluding Russia) engaged in defense-related activities. This includes i) pure-play defense companies specializing in weapons systems, military equipment, and defense services, ii) other industrial businesses contributing to defense supply chains through activities including naval shipbuilding, production of armoured vehicles, and construction of military facilities and infrastructure, and iii) technology providers delivering secure communications, cybersecurity solutions, and advanced IT systems supporting military operations.

Companies which fulfil the domicile, liquidity, size and sector criteria are eligible for selection for inclusion in the Index. Each eligible company is assigned an "Exposure Score" (ranging from 0-1) based on their revenue exposure to defense-related activities. Companies with an Exposure Score of 0 are deemed to have little or no exposure to defence-related activities and are excluded.

Index constituents are selected based on their revenue exposure to defense-related activities, and weighted based on the product of their floated-adjusted market capitalisation and the Exposure Score.

Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index.

Although the Index is generally well diversified, because of the market it reflects it may, depending on market conditions, contain constituents issued by the same body that may represent more than 10% of the Index. In order for the Fund to track the Index accurately, the Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations. These limits permit the Fund to hold positions in individual constituents of the Index issued by the

same body of up to 20% of the Fund's Net Asset Value.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the replication strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The equity securities in which the Fund invests will be primarily listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations. Details of the Fund's portfolio and the indicative net asset value per Share for the Fund are available on the Website daily.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the EUR Class are issued in Euro.

What are the risks and what could I get in return?

Risks

The risk category above shows how likely the fund is to lose money because of movements in the markets or because we are not able to pay you. The Fund's risk category is not guaranteed and may change in the future.

Performance scenarios

The figures shown include all the costs of the Fund other than the costs that you may need to pay to your advisor, distributor or other intermediary. The figures do not take into account your personal tax situation, which may also affect your return.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2017 and September 2022.

Moderate: this type of scenario occurred for an investment between August 2018 and August 2023.

Favourable: this type of scenario occurred for an investment between September 2020 and September 2025.

What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	23 EUR	184 EUR
Annual cost impact*	0.2%	0.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.6% before costs and 9.3% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00% The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of costs are already included in the price. This includes the costs of distribution of your product.	0 EUR
