What is this product?

Type

UBS (Irl) ETF Plc is an umbrella investment company with variable capital and segregated liability between sub-funds incorporated in Ireland and authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the UCITS Regulations. The fund is a UCITS ETF.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.
The recommended holding period (RHP) is displayed in the section "How long should I hold it and can I take money out early?".

Objectives

The Fund is passively managed and seeks to track performance of the Solactive Global Pure Gold Miners Net Total Return Index (the 'Index'). The Index is designed to measure the performance of large companies which are listed on stock markets globally and which generate at least 90% of their revenues from gold mining.
The Fund will seek to hold all of the shares of the Index, in the same proportions as the Index, so that essentially the portfolio of the Fund will be a near mirror image of the Index. In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may, for the purpose of reducing risk, reducing costs or generating additional capital or income, use derivative instruments. The use of derivative instruments may multiply the gains or losses made by the Fund on given investment or on its investments generally.
Currency hedged share classes may also be available in the Fund.
The Fund may enter into securities lending transactions. Sustainability risks are not systematically integrated as they are not considered as part of the Index selection process.
The return of the fund depends mainly on the performance of the tracked index.
This class distributes its net income in order to maintain the maximum tracking accuracy of the Solactive Global Pure Gold Miners Net Total Return Index.

Intended retail investor

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to State Street Custodial Services (Ireland) Limited as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost.
