What is this product?

Type

This product is an investment fund. It is organised under Luxembourg law as a société anonyme qualifying as a société d'investissement à capital variable. It is authorised under Part I of the Luxembourg Law of 17 December 2010 and qualifies as an Undertaking for Collective Investments in Transferable Securities (UCITS).

Objectives, Process and Policies

Objective To achieve a return in excess of the benchmark by investing opportunistically in an unconstrained portfolio of debt securities (positively positioned towards Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics) and currencies, using derivatives where appropriate. Debt Securities with positive E/S characteristics are those that the Investment Manager believes have been issued by companies and countries that demonstrate effective governance and superior management of environmental and/or social issues (sustainable characteristics).

Investment Process

Investment Approach

- Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.
- Uses an unconstrained approach to find the best investment ideas across multiple fixed income sectors and countries, with a focus on generating long-term total returns.
- Dynamically shifts among sectors and countries and adjusts duration depending on market conditions.
- Seeks to provide the majority of its returns through Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics by incorporating ESG factors and exclusions and positioning the portfolio positively towards issuers with above average ESG scores.

Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed without reference or constraints relative to its benchmark.

Main investment exposure Invested either directly or through derivatives, in a portfolio of debt securities positively positioned towards Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics including, but not limited to, debt securities issued by governments and their agencies, state and provincial governmental entities and supranational organisations, corporate debt securities, MBS/ABS, covered bonds and currencies. Issuers may be located anywhere in the world, including emerging markets.

The Sub-Fund is expected to invest up to 30% of its assets in mortgage-backed securities (MBS) and/or asset-backed securities (ABS) of any credit quality, however, due to the unconstrained investment approach, the actual investment level may vary. MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases. The Sub-Fund may have significant exposure to below investment grade securities but will not invest in distressed debt securities (at the time of purchase). The Sub-Fund may hold up to 10% in convertible securities and up to 10% in contingent convertible bonds.

The Sub-Fund may use long and short positions (through derivatives) to vary exposure to countries, sectors, currencies and credit ratings which may be concentrated from time to time.

The Sub-Fund may invest in onshore debt securities issued within the PRC through China-Hong Kong Bond Connect.

The Sub-Fund will typically maintain an average asset-weighted MSCI ESG score above the average MSCI ESG score of the fixed income universe weighted to match the Sub-Fund's sector allocation, excluding cash holdings and currencies. The Sub-Fund's average asset-weighted MSCI ESG score will be calculated as the total of each security's market value by its MSCI ESG score. The average MSCI ESG score of the fixed income universe will be calculated using the ESG scores of relevant industry sector indices, weighted to reflect the sector exposure in the Sub-Fund. The average asset-weighted ESG score will not include those securities held by the Sub-Fund that do not have an MSCI ESG score, such as certain MBS/ABS securities. For those securities without an MSCI ESG score, the majority will be sustainable or demonstrate improving sustainable characteristics as determined by the Investment Manager.

The Sub-Fund excludes certain sectors, companies / issuers or practices from the investment universe based on specific values or norms-based screening policies. These policies set limits or full exclusions on certain industries and companies based on specific ESG criteria and/or minimum standards of business practice based on international norms.

To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. Third party data may be subject to limitations in respect of its accuracy and / or completeness. The exclusions policy for the Sub-Fund can be found on the Management Company's Website

(www.jpmanassetmanagement.lu). The Investment Manager may invest in certain green bonds where proceeds are directed to the transition to a sustainable economy. As a result, the Sub-Fund may invest in bonds issued by issuers that would otherwise be excluded. The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on at least 90% of securities purchased (excluding cash).

The Sub-Fund invests at least 25% of assets in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives

The Sub-Fund excludes the bottom 20% of corporate debt securities from its investable universe based on its ESG criteria.

The Sub-Fund may invest in Deposits with Credit Institutions, money market instruments and money market funds for investment purposes. The Sub-Fund may hold up to 100% of its assets in these instruments on a temporary basis for defensive purposes.

Other investment exposure Up to 20% in unrated debt, up to 10% in equities, typically as a result of events relating to its debt holdings such as conversions or restructures; equity derivatives for managing equity exposure and the Sub-Fund's correlation to equity markets.

Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.

SFDR Classification Article 8

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and who understand the risks of the Sub-Fund, including the risk of capital loss, and:

- seek investment return through an unconstrained portfolio of Sustainable Debt Securities and currencies;
- understand the portfolio may have significant exposure to higher risk assets (such as high yield, emerging market debt and MBS/ABS) and are willing to accept those risks in search of potential higher returns;
- seek an investment that embeds ESG principles;
- are looking to use it as part of an investment portfolio and not as a complete investment plan.

Term The product does not have a maturity date. The Board of Directors of the Fund may unilaterally liquidate the product under certain circumstances and the manufacturer would facilitate such a liquidation.

What are the risks and what could I get in return?

Risks

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the Prospectus, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2021 and 2025.

Moderate: this type of scenario occurred for an investment between 2019 and 2024.

Favourable: this type of scenario occurred for an investment between 2016 and 2021.

Recommended holding period		5 years	
Example Investment		\$ 10,000	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)

What happens if JPMorgan Asset Management (Europe) S.à r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à r.l. is responsible for administration and management of the Fund, and does not hold assets of the Fund (assets that can be held by a depository are, in line with applicable regulations, held with a depository in its custody network). JPMorgan Asset Management (Europe) S.à r.l., as the manufacturer of

this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depository is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- \$ 10,000 is invested.

Example Investment \$ 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	\$ 98	\$ 558
Annual cost impact*	1.0%	1.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.8% before costs and 2.8% after costs.

Composition of costs
