## RIZE CYBERSECURITY AND DATA PRIVACY UCITS ETF

### FUND DESCRIPTION

The Rize Cybersecurity and Data Privacy UCITS ETF ("CYBR") seeks to invest in companies that potentially stand to benefit from the increased adoption of cybersecurity products and services, such as those providing security protocols that help defend computers, servers, mobile devices, electronic systems, networks and data from malicious attacks. CYBR seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Foxberry Tematica Research Cybersecurity & Data Privacy Index.

### WHY INVEST IN CYBR?

**Favourable Growth Prospects:** CYBR is Europe's first cybersecurity and data privacy ETF, and provides investors with exposure to a booming industry propelled by fresh concerns for data privacy around the world.

**Powered by Tematica Research®:** CYBR is purpose-built in collaboration with Tematica Research, a thematic research firm based in Washington, D.C., and leverages their unique insights and proprietary classification system of companies that have demonstrable revenues from the cybersecurity and data privacy sector.

**Unconstrained Approach:** CYBR's composition transcends classic sector, size and geographic classifications by tracking an emerging theme.

**ETF Efficiency:** In a single trade, CYBR delivers across dozens of companies that are favourably positioned to ride the tailwinds of the cybersecurity and data privacy theme.

## RISK FACTORS

- All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
- As many of the companies invested in by CYBR are technology-focussed, CYBR is vulnerable to a cyclical decline in the value of the technology sector as a whole. Individual companies are subject to intense competition that may negatively impact their revenues and market values and therefore CYBR's value.
- CYBR also invests in small publicly-traded companies which may be less mature and therefore more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies, the technology sector or stock market as a whole.
- CYBR invests in global equity securities. As such, there is a risk of loss arising from exchange rate fluctuations or exchange control regulations.
- Other: (1) Third-party service providers (such as the ICAV's depository) may go bankrupt and fail to pay money due to CYBR or return property belonging to CYBR. (2) If the Index provider stops calculating the Index or if CYBR's license to replicate the Index is terminated, CYBR may have to be closed. (3) It may not always be possible to buy and sell CYBR's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of CYBR and investors can lose all the capital invested in CYBR. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.
