SUPPLEMENT

Dated 27 March 2024

in respect of

(a sub-fund of the ICAV, the “Fund”)

The Directors of the ICAV, whose names appear in the Directory in the Prospectus, accept responsibility for the information contained in this Supplement. THE FUND

Investment Objective

The investment objective of the Fund is to provide exposure to publicly-listed companies from across the world that are involved in the cybersecurity and data privacy industry.

Investment Policy

In order to achieve this investment objective, the Fund will seek to replicate the performance of the Foxberry Tematica Research Cybersecurity & Data Privacy USD Net Total Return Index (the “**Index**”), subject to the deduction of the TER and other expenses associated with operating the Fund as further described in the “Fees and Expenses” section of the Prospectus. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and **may have exposure to or invest directly up to 20% of its Net Asset Value in shares issued by the same body, which limit may be raised to 35% for a single issuer in exceptional market conditions, including (but not limited to) circumstances in which such issuer occupies a dominant market position.**

Where it is not possible or practicable for the Fund to invest directly in or continue to hold all of the component securities of the Index (for reasons such as, but not limited to, where this would involve difficulties or substantial costs, where one or more securities in the Index becomes temporarily illiquid or unavailable, or as a result of legal restrictions or regulatory limitations that apply to the Fund but not the Index) and/or where consistent with its investment objective, the Fund may also invest in the following additional assets subject to the conditions and within the limits laid down by the Central Bank:

- Depositary Receipts relating either to component securities of the Index or to equity securities of the type referred to in the bullet point immediately above; and
- FDIs – namely, total return “unfunded” OTC Swaps and exchange-traded equity futures – which may be used for investment purposes (such as gaining exposure to the Index and/or any particular constituents of the Index) in accordance with the terms set out in the sections entitled “Fund Investments”, “Unfunded OTC Swap Model” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in total return “unfunded” OTC Swaps, it is not expected that this flexibility will be used. The Fund will only invest in FDIs as provided for in the RMP prepared by the Investment Manager in respect of the Fund and filed with the Central Bank.

The Fund may also enter into transactions in FDI – specifically, FX forwards and FX non-deliverable forwards - in order to hedge against movements of the Class Currency relative to the currencies in which the Fund's assets are denominated, where different. Any such Class hedging transactions will be undertaken in accordance with the ICAV's currency hedging policy as set out in the section entitled “**Currency Hedging Policy - Hedging at Class Level**” in the Prospectus and in accordance with Schedule III of the Prospectus.

The equity securities and FDI investments of the Fund will be listed, traded and dealt with on one or more of the Regulated Markets set out in Schedule 1 to the Prospectus.

The Fund may, in addition, employ other techniques relating to transferable securities, including entering into securities lending transactions, investing in repurchase and reverse repurchase transactions and short term money market collective investment schemes, for the purpose of efficient portfolio management only, in accordance with the terms set out in the section entitled “**Efficient Portfolio Management Techniques**” and Schedule III of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in repurchase and reverse repurchase transactions it is not expected that this flexibility will be used.

The maximum proportion of the Net Asset Value of the Fund that can be subject to securities lending is 49%. The proportion of the Net Asset Value of the Fund that will be subject to securities lending is expected to range from 0% to 49%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to repurchase transactions is 20%. The proportion of the Net Asset Value of the Fund that will be subject to repurchase transactions is expected to be 0%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to reverse repurchase transactions is 20%. The proportion of the Net Asset Value of the Fund that will be subject to reverse repurchase transactions is expected to be 0%.

The maximum proportion of the Net Asset Value of the Fund that can be subject to total return swaps is 49%. The proportion of the Net Asset Value of the Fund that will be subject to total return swaps is expected to be 0%.

As at the date of this Fund Supplement, to the extent the Fund undertakes securities lending, the Fund will receive 62.5% of the associated revenue generated from securities lending activities and the remaining 37.5% will be retained by the Manager (representing the attendant direct and indirect operational costs and fees of the securities lending).

Base Currency

The Base Currency of the Fund is USD.

Investment Manager

The Investment Manager of the Fund is Davy Global Fund Management Limited.

There is no guarantee that the Fund will achieve its investment objective.

It is recommended that an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

SUSTAINABILITY

The Fund is an Index Tracking ESG Fund, as per the requirements of Article 8 of SFDR and promotes certain environmental and social characteristics. As the investment objective of the Fund is to replicate the performance of the Index which it uses for investment purposes, the Fund will promote the relevant environmental and social characteristics incorporated into the Index and so the environmental and social characteristics promoted by the Fund and the Index are consistent. The methodology of the Index describes how environmental, social and governance characteristics are incorporated into the selection of securities in the Index.

Accordingly, the disclosure outlined in the section entitled “**Sustainable Finance**” in the Prospectus applicable to “**Index Tracking ESG Funds**” applies to the Fund on the basis that it is an Index Tracking ESG Fund for the purpose of that section.

Prospective investors should refer to the annex to this Supplement regarding the Fund’s environmental and/or social characteristics.

THE INDEX

General Description

The Index is designed to provide exposure to publicly-traded companies involved in the global cybersecurity and data privacy sector, including Product providers and Service providers. Product providers are companies whose products are defined as hardware and/or software that are installed locally (at the customer location) and, in the case of software, the majority of the computing power (processing) is provided by the end-customer. Service providers are companies who provide services in the form of hardware and/or software that are accessed remotely by the end-customer and, in the case of software, the majority of the computing power (processing) is provided by the service provider. To be eligible for inclusion in the Index, companies must have a free-float market capitalisation of at least USD 100 million and a trailing three-month average daily value traded of at least USD 1 million

and their shares must be listed on one or more eligible stock exchanges as listed in the Index Methodology. The companies are each assigned an initial weight by reference to their respective thematic scores, these scores are determined by reference to the proportion of a company's revenues or operating profits derived from the cybersecurity and data privacy sector (the "**Initial Weights**"). Only companies that derive a significant proportion of their reported revenues or operating profits from the sector are eligible for inclusion, in the first instance, and the greater the proportion of a company's revenue or operating profits which it derives from the sector, the higher its thematic score. The weights of the companies are then subject to a final liquidity adjustment to ensure that less liquid companies are not overly represented in the Index (the "**Final Weights**").

Index Rebalancing

The Index shall be rebalanced on a semi-annual basis in June and December in accordance with the weighting methodology described above. It is possible that additional companies not presently represented in the Index will be added and that one or more companies presently represented will be removed at the time of the June and December rebalance dates.

Investors should note that the respective weights of each of the constituents of the Index are expected to fluctuate in-between the periodic rebalance dates of the Index. Please see the Prospectus section entitled "*Circumstances where the weighting of an Index constituent exceeds the applicable concentration limits prescribed by the UCITS Regulations*" for details of the procedure to be adopted when the weighting of any constituent of the Index exceeds the permitted investment restrictions.

Index Provider and website

The Benchmark Administrator is Foxberry Ltd and the Index is calculated by Solactive AG.

The information set out above is a summary of the principal features of the Index and does not purport to be an exhaustive description. Further information can be found in the "*Foxberry Tematica Research Cybersecurity & Data Privacy Index Rules*" (the "**Index Methodology**") which is available, along with the constituents and weights of the Index at:

FEES AND EXPENSES

A TER will be paid out of the assets of each Class to the Manager. The TER for each for each Class is set out under the heading "TER" in the table included under the heading "**Share Classes**".

This section should be read in conjunction with the section headed "**Fees, Costs and Expenses**" in the Prospectus.

RISK FACTORS

Investment in the Fund carries with it a degree of risk including, but not limited to, the risks described in the "**Risk Factors**" section of the Prospectus.

The Fund may be subject to the risks associated with companies operating in the cybersecurity and information technology sector including, but not limited to, rapidly changing technologies and obsolescence of existing products; fierce competition from competitors with lower costs; aggressive pricing and reduced profit margins; the loss of patent, copyright and trademark protections; cyclical market patterns; evolving industry standards; and frequent new product introductions. Cybersecurity and information technology companies may be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. Cybersecurity and information technology companies may experience extreme price and volume fluctuations that are often unrelated to their operating performance.

The Index is typically comprised of a mix of micro, small, mid and large capitalisation companies. Micro and small capitalisation companies may be more vulnerable to adverse business or economic events than larger, more established companies and may underperform other segments of the market or the equity market as a whole. Securities of micro and small capitalisation companies generally trade in lower volumes, are less liquid and are often more vulnerable to market volatility and greater and more unpredictable price changes than larger capitalisation stocks or the stock market as a whole.

RISK MANAGEMENT

The Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, shall be calculated on at least a daily basis using the commitment approach and, in accordance with the requirements of the Central Bank, may at no time exceed 100% of the Fund's Net Asset Value. As noted in the "Investment Policy" section above, the Fund's use of FDI is an ancillary element of the investment policy in that it is an alternative means of gaining exposure to the Index, or one or more of the constituents of the Index, in circumstances where direct investment in the constituents of the Index is not possible, practicable or desirable. Regardless of whether exposure to the underlying constituents is obtained by direct investment in the constituents, or by gaining exposure to the constituents through the use of FDI, the same notional value shall be committed to the investment by the Fund. Accordingly, it is not expected that the Fund will be leveraged.
