### Composition

## Advantages of ZETH

### Simple and Reliable

Buy and sell like any stock or ETF through your regular securities account. No new account or crypto wallet needed.

### Physical ETP Structure

100% fully backed, with a physical redemption feature and an independent administrator providing oversight and control.

### Institutional-Grade Custody

Assets backing the ETP are kept in cold-storage custody and are secured by an independent trustee, thus mitigating issuer default risk.

### Tier 1 Regulatory Framework

Issued and domiciled in Germany, tradable on XETRA and many additional platforms, and with German financial authority approved base prospectus.

### Proof of Holdings

Weekly balance reports and on-chain wallet verification by an independent administrator provide investors with full transparency into assets held in custody. [Learn more](#)

## Risk Warnings

Investors should be aware that investing in crypto assets involves significant risks, including but not limited to:

1. Volatility Risk: The price of crypto assets and crypto exchange traded products (ETPs) can fluctuate significantly.
2. Liquidity Risk: Market depth and trading volumes may vary, affecting execution.
3. Custody Risk: Despite institutional-grade custody, digital assets may be vulnerable to cyber threats.
4. Regulatory Risk: Crypto assets and their treatment are subject to evolving regulatory frameworks.
5. Market Risk: Broader market movements can impact the value of the ETP.

While there may be potential for significant gains, you are at risk of losing part of or your entire capital invested. For complete information please refer to the relevant Final Terms and the Base Prospectus.

NAV

The net asset value (NAV) of an ETC represents the net \$ value per underlying cryptocurrency

Last updated:

Ticker	ZETH	NAV daily change	+1.62% / +\$0.45
Base currency	USD	NAV YTD change	-12.63%
NAV (USD)	28.49	NAV since inception date	+85.98%

The ETCs' NAV value is determined at 4.00 pm CET of each business day, and represents the value of one unit; it is calculated by using the relevant spot price of the underlying digital asset. The value is not necessarily the same as the ETCs' intraday trading price. Investors should not expect to buy or sell the ETC at the determined NAV value.

Performance quoted represents past net performance. Current performance may be lower or higher than average annual returns shown. NAV performance is displayed in base currency (USD), price performance is displayed in trading currency (e.g. EUR). Brokerage or transaction fees will apply. Past performance is no guarantee of future performance, and your invested capital may be at risk.
