<sup>1</sup> The ETP's NAV U.S. dollar value is determined at 4:00 pm CET of each business day, and represents the value of one unit; it is calculated by using the relevant spot price of the underlying digital asset. The value is not necessarily the same as the ETP's intraday trading price. Investors should not expect to buy or sell the ETP at the determined NAV value.

<sup>2</sup> Please consult the Prospectus for a comprehensive explanation of all fees

<sup>3</sup> Your broker may charge commissions to buy and sell the ETP

## Bitwise Aptos Staking ETP

Bitwise<sup>®</sup>

The Bitwise Aptos Staking ETP seeks to provide investors with exposure to the performance of the APT token and to capture additional staking rewards that accrue daily within the ETP. The product is fully backed by APT tokens held in professional cold-storage custody and is benchmarked against the CF APT Staked Return Index Blends (90/10), net of fees and expenses.

*Investments in digital assets involve significant risks, including high volatility and the potential loss of the entire invested capital. Staking rewards are variable and not guaranteed.*

### ETP Overview

- Trade Like Shares.** Tradable on stock exchanges through standard securities accounts, similar to shares or ETFs. No crypto wallet is required. Platform availability may vary.
- Staking Rewards.** Realised staking rewards are added to the ETP on a daily basis, net of a staking service fee retained by the issuer to cover operational costs. Further information is available in the staking section on this page.
- Benchmark.** The CF APT Staked Return Index Blends (90/10) allows for clear assessment of performance against the current APT staking rewards market rate.
- Liquidity.** Investors in APT<sup>B</sup> enjoy daily liquidity on the stock exchange without lock-up periods or the technical challenges of crypto staking.
- Cold-Storage Custody.** Assets are held with a regulated custodian, segregated from the issuer's own assets. A trustee oversees custody arrangements and helps protect investor claims in the event of issuer default.
- Regulatory Framework.** With a base prospectus approved by the German financial authority, the ETP is listed and tradable on one or more European stock exchanges. Investors should note that while the ETP is listed on regulated exchanges, the underlying cryptoassets are not regulated.
- Proof of Holdings.** Weekly balance reports by an independent administrator provide investors with full transparency into assets held in custody. [Learn more](#)

## Staking Aptos (APT)

APT Staking Market Rate <sup>1</sup>	5.27%
Net Staking Reward <sup>2</sup>	3.53%
Target Benchmark Percentage of Assets Staked <sup>3</sup>	90.00%

<sup>1</sup> This represents the potential return generated before any fees, based on the current network staking market rates. Various factors can influence staking rewards, including:

- Protocol-specific rules
- The number of active validators
- Asset price fluctuations
- Network conditions and usage levels
- Transaction fees paid to validators

Note: This rate is variable and may change periodically based on market conditions.

<sup>3</sup> The Target Benchmark Staking Rate of 90% represents the proportion of staking rewards incorporated into the index, net of protocol and provider fees, and may differ from the total rewards available on the Aptos network. For more information on the benchmark methodology of the ETP, please refer to the [CF Staking Series methodology](#) for the CF APT Staked Return Index Blends (90/10).

<sup>2</sup> The Net Staking Reward represents the return that is targeted from staking the ETP's assets in line with the benchmark, after deduction of the Staking Service Fee but before the annual management fee (TER 0.65% p.a.) is applied.

The issuer retains 33% of the total staking rewards generated as a Staking Service Fee. This fee is used to cover the operational costs of maintaining the ETP's staking infrastructure, including charges from staking service providers, and to support the ongoing management of the staking process.

Rewards are credited to the ETP on a daily basis and reinvested automatically, which increases the cryptocurrency entitlement per ETP unit over time. The staking rate may vary depending on network conditions, reward levels, and overall market dynamics.

Disclaimer: The stated staking reward is not a guarantee of future returns. Actual outcomes can differ due to factors such as protocol rules, validator participation, market volatility, network performance, usage, and validator transaction fees. Staking involves risks, including the potential loss of staked assets and accrued rewards in the event of slashing, penalties, smart contract vulnerabilities, protocol exploits, or other operational issues.

## RISK WARNINGS

Investors should be aware that investing in crypto assets involves significant risks, including but not limited to:

- Volatility Risk: The price of crypto assets and crypto exchange traded products (ETPs) can fluctuate significantly.
- Liquidity Risk: Market depth and trading volumes may vary, affecting execution.
- Custody Risk: Despite institutional-grade custody, digital assets may be vulnerable to cyber threats.
- Regulatory Risk: Crypto assets and their treatment are subject to evolving regulatory frameworks.
- Market Risk: Broader market movements can impact the value of the ETP.
- Lock-up periods where assets may not be immediately redeemable.
- Slashing risk, where misbehavior or validator error may result in partial loss of staked funds.
- Network or protocol changes that may affect staking rewards or availability.

While there may be potential for significant gains, you are at risk of losing part of or your entire capital invested. For complete information please refer to the relevant Final Terms and the Base Prospectus.

Investing in crypto-linked products is high risk and you could lose some or all of your investment. Crypto markets are highly volatile and prices can move sharply and unpredictably. Liquidity may be limited, which can affect your ability to buy or sell at the price you expect. There are additional risks relating to the product structure (including issuer/credit risk), custody and operational risks, and evolving regulation. A Key Information Document (KID) is available and should be read before making any investment decision. The prospectus, KID and final terms are available at <https://bitwiseinvestments.eu/resources/> and contain further information on risks and product features.

### PRIOR TO ANY INVESTMENT IN AN ETC ANY POTENTIAL INVESTORS MUST NOTE THAT:

Any potential investors should seek independent advice and should consider the relevant information provided in the base prospectus and final terms relating to the ETCs, in particular the risk factors set out therein.

The invested capital is at risk and losses up to the total invested amount possible. The product is subject to inherent counterparty risk associated with the issuer of the ETCs and may suffer losses, including a total loss, if the issuer fails to fulfill its contractual obligations.

The legal structure of the ETC is that of a debt security. ETCs are traded on stock exchanges, just as other securities. Market prices may differ from the net asset value of the ETC.

The ETC discussed herein is issued by Bitwise Europe GmbH under its Programme for the issuance of Bonds secured by Cryptocurrencies. The relevant base prospectus has been approved by the German Bundesanstalt für Finanzdienstleistungsaufsicht as competent authority under the Prospectus Regulation, whereby such approval should not be construed as an endorsement of the ETC.

The information contained in this fact sheet is provided solely for informational and marketing purposes. Such provision of information does not constitute an offer to sell securities, nor is it an advice, a recommendation or a solicitation of an offer to buy securities.

### INVESTORS IN THE U.S., THE UNITED KINGDOM, OR CANADA

The ETC is not intended to be offered and shall not be offered to any retail investor in the United Kingdom.

This fact sheet does not constitute an offer of securities for sale in the United States and the ETC referred to in this fact sheet may not be offered or sold in the United States absent registration or an exemption from registration.

Information contained in this fact sheet is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering in the United States or Canada, or any state, province or territory thereof, where neither the issuer nor its products are authorised or registered for distribution or sale and where no prospectus of the issuer has been filed with any securities regulator. Neither this document nor information in it should be taken, transmitted or distributed (directly or indirectly) into the United States.

The statements made in this fact sheet are based on evaluations, economic data, own assessments and forward looking statements at the time of the preparation of the fact sheet and are subject to ongoing changes.
