

# NORTHERN TRUST LISTED PRIVATE EQUITY UCITS ETF

## OBJECTIVE AND STRATEGY

The investment objective of the ETF is to closely match the risk and return characteristics of the Foxyberry Listed Private Equity SDG Screened USD Net Total Return Index (the "Index"), less the fees and expenses of the Fund.

The Fund invests in transferable securities that as far as possible and practicable consists of the component securities of the Index. Such transferable securities may include common stock, depositary receipts, preferred shares, listed closed-ended funds and convertible securities.

**Target Market:** This Fund is appropriate for investors who plan to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s).

The Fund is an index tracking Fund and seeks to track the risk and return characteristics of the Index by buying all or most of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the Fund may not match the Index performance.

The Index is a custom index which is designed to track a universe of securities that provide exposure to the leading listed private equity companies in developed markets.

## PERFORMANCE % — IN USD AS OF 30 JANUARY 2026

### Past Performance does not predict future returns

	1 Month	3 Month	YTD	1 Year	3 Year*	Since Inception*
Fund Performance	-2.80	-1.11	-2.80	-3.46	18.64	7.59

Performance is calculated from the inception of the share class. All data shown is net of fees. Please refer to the Fund prospectus for pricing information.

\* Performance shown annualized for periods greater than 1 year.

### 12 Month Performance Periods – To Last Month End in USD

	31/01/2025 31/01/2026	Calendar Year 2025	Calendar Year 2024	Calendar Year 2023	Calendar Year 2022	Calendar Year 2025
Fund Performance	-3.46	37.39	25.92	-14.69	-	5.89
Index Performance	-3.67	37.32	25.63	-14.77	-	5.67

## RISK PROFILE

**Liquidity Risk** –Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

**Private Equity Risk** –The Fund may invest in listed private equity companies including, listed closed-ended funds. Market conditions, such as a decrease in market liquidity and/or market volatility, may make it difficult to buy or sell such securities.

**Investment Risk** –The Fund may not achieve its investment objective. An investment in any Fund involves investment risks including possible loss of the amount invested.

**Counterparty Risk** -In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

**Derivative Risk** -Derivatives may result in gains or losses that are greater than the original amount invested.

**Valuation Risk** -A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

**Currency Risk** -Changes in currency exchange rates could reduce or increase investment gains or investment losses.

## GLOSSARY

**ISIN:** International Securities Identification Number. It is a 12-digit alphanumeric code that uniquely identifies a specific security.

**Ongoing Charge:** is a figure representing all annual charges and other payments taken from the fund.

**Price-to-Book Ratio:** is used to compare a firm's market capitalization to its book value. It's calculated by dividing the company's stock price per share by its book value per share. Book value is calculated as follows: (total asset - total liabilities) / number of shares outstanding.

**SRRI:** Synthetic Risk and Reward Indicator is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the fund.

**Trailing 12-month price-to-earnings ratio:** is a relative valuation multiple based on the last 12 months of actual earnings, calculated by dividing the current stock price by the trailing EPS for the previous year.

**Weighted Average Market Cap:** refers to a type of stock market index construction that is based on the market capitalization of the index's constituent stocks.

**Private equity** is defined as entities involved in investing in other companies or engaging in either a leveraged buyout or management buyout. Such entities further must be self-classified or classified in various industry taxonomies as 'private equity'.

UCITS ETF's units purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them.

**Investing involves risk – no investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment.**
