- The Index begins with the stocks in the Nasdaq US Mid Cap™ Index and the Nasdaq US Small Cap™ Index and eliminates those companies classified as a Real Estate Investment Trust by the Industry Classification Benchmark.
- To be eligible for inclusion in the Index, companies must have: i. a minimum market capitalisation of USD 1 billion; ii. a three-month average daily traded volume of at least USD 2 million; iii. paid a dividend in the trailing 12-month period greater than the dividend paid in the trailing 12-month period three and five years ago; iv. positive earnings per share in the most recent fiscal year greater than the earnings per share three fiscal years prior; v. a cash-to-debt ratio greater than 25%; and vi. a trailing 12-month period payout ratio no greater than 65%.
- The Index comprises four sub-portfolios. The securities in each sub-portfolio are then ranked by a combined factor of dollar dividend increase over the previous five-year period, current dividend yield, and payout ratio.
- These ranks are then aggregated across sub-portfolios and up to 125 securities with the lowest (most favourable) aggregated rank are selected for inclusion in the Index.
- The Index may only comprise a maximum of 37 securities from any one ICB sector and a maximum of 93 securities from either the Nasdaq US Mid Cap™ Index and the Nasdaq US Small Cap™ Index.
- Each sub-portfolio is reconstituted and rebalanced annually, resulting in at least a part of the Index being reconstituted and rebalanced each quarter in March, June, September and December.
