

# First Trust Germany AlphaDEX® UCITS ETF

The Fund is a passively managed index-tracking fund that seeks to provide investors with investment results that correspond generally to the price and yield of the NASDAQ AlphaDEX® Germany Index (the "Index"), before fees and expenses. The Index is a modified equally-weighted index that employs the unique AlphaDEX® stock selection methodology, using fundamental growth and value factors to objectively select stocks from the NASDAQ German Index, with the aim to generate positive alpha relative to traditional passive indices.

- The NASDAQ AlphaDEX® Germany Index is an “enhanced” index created and administered by Nasdaq, Inc. (“Nasdaq”) which employs the AlphaDEX® stock selection methodology to select stocks from the NASDAQ Germany Index that meet certain criteria.
- Nasdaq constructs the NASDAQ AlphaDEX® Germany Index by ranking the eligible stocks from the NASDAQ Germany Index on growth factors including 3-, 6- and 12-month price appreciation, sales to price and one year sales growth, and separately on value factors including book value to price, cash flow to price and return on assets. All stocks are ranked on the sum of ranks for the growth factors and, separately, all stocks are ranked on the sum of ranks for the value factors. A stock must have data for all growth and/or value factors to receive a rank for that style.
- Each stock receives the best style rank from the previous step as its selection score.
- The top 40 stocks based on the selection score determined in the previous step comprise the “selected stocks”.
- The selected stocks are divided into quintiles based on their rankings and the top ranked quintiles receive a higher weight within the index. The stocks are equally-weighted within each quintile.
- Each stock is then tested in order of its selection score rank to check if the weight assigned to that stock is outside the sector weighting constraints, which are set at 15% above the benchmark weight.
- If the weight assigned to the stock, when added with the weight assigned to all higher ranking stocks in its sector, is greater than the constraint, then the stock’s weight is lowered to the highest rank in the next quintile. Stocks previously lower in rank then move up one rank. Such stocks in the lowest quintile that violate a constraint are removed from the portfolio and replaced by the highest scoring stock not originally selected, subject to sector constraints. This process continues until all the sector weightings meet the constraint.
- The Index is reconstituted and rebalanced semi-annually.

## Risks

- The Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.
- See also the description of the risks applicable to the Fund in "Risk Factors" in the prospectus.
