Investment Objective	
Investment Objective	The Fund seeks investment results that correspond generally to the price and yield, before the Fund’s fees and expenses, of Indxx Global Advanced Aerospace & Defence Index (the “Index”). There is no guarantee that the Fund will achieve its investment objective.
Tracking Error	The Investment Manager will regularly monitor the Fund’s tracking accuracy and will seek to maintain at least a 95% correlation between the return of the Index and the return of the Fund. It is expected that the level of tracking error will be 0-2% in normal market conditions.

Fund Characteristics

Index	The description below is a summary of information provided by the Index Provider on the methodology for the construction of the Index. For details of the exact composition of the Index, please follow the link [here]. The Index is constructed from the Indxx Global Advanced Aerospace & Defence Index from which companies that are listed and domiciled in a ‘developed’ or ‘emerging’ market as defined by Indxx in its ‘Country Classification and Investability Requirements’ document, with a worldwide free float market capitalization of \$500 million, a 6-month average daily turnover greater than or equal to \$2 million and a minimum free float equivalent to 10% of shares outstanding are selected (the “Eligible Universe”). To view the Country Classification and Investability Requirements document, please refer to the Index Provider’s website. The exposure to ‘emerging’ markets is not expected to be more than 5% of the Fund’s net assets. Indxx has defined Indxx Global Aerospace & Defence into the following sub-themes: Advanced Aerospace & Defence and Traditional Aerospace & Defence. Companies from the Eligible Universe that derive greater than or equal to 50% of their revenue from these sub-themes are considered as ‘Pure-Play’ companies. The top 50 ‘Pure-Play’ companies by market capitalization will form the final index. All ‘Pure-Play’ companies shall be part of the final composition in the event that there are less than 50 ‘Pure-Play’ companies. The aggregated weight of securities that are domiciled in US is capped at 60% and the extra weight is proportionally distributed by reference to market capitalization, subject to the limit of 4.5% allocated to any company. The Fund is subject to tracking error risk, which is the risk that its returns may not track exactly those of the Index. The Index is rebalanced quarterly in January, April, July, and October and reconstituted semi-annually in April and October.
