### **GENERAL INFORMATION**

Franklin Templeton ICAV (the "Fund" or the "ICAV") is an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Sub-Funds with registration number C167746. The ICAV was registered on 11 July 2017. The ICAV has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) (together the "UCITS Regulations"). All capitalised terms used but not defined herein shall have the meaning ascribed thereto in the ICAV's Prospectus dated 1 December 2022 (the "Prospectus").

The ICAV has been registered in accordance with the ICAV Act for the purpose of investing in transferable securities in accordance with the UCITS Regulations.

The ICAV has been structured as an umbrella fund consisting of different Sub-Funds (please see Sub-Funds and share classes below), each comprising of one or more classes of shares. The Directors may from time to time, with the prior approval of the Central Bank, create different series of shares representing separate portfolios of assets, each such series comprising a Sub-Fund. Each Sub-Fund will bear its own liabilities and, under Irish law, none of the ICAV, the service providers appointed to the ICAV, the Directors, any receiver, examiner nor liquidator, nor any other person will have access to the assets of a Sub-Fund in satisfaction of a liability of any other Sub-Fund.

The ICAV has appointed Franklin Templeton International Services S.à.r.l. as Management Company (the "Management Company").

The Management Company of the ICAV has appointed Franklin Advisory Services LLC and Franklin Templeton Investment Management Limited as Investment Manager for all Index Tracking Sub-Funds (as defined below), with the exception of Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF, which has only Franklin Templeton Investment Management Limited as Investment Manager.

The Management Company of the ICAV has appointed Franklin Templeton Investment Management Limited as Investment Manager in relation to Franklin Euro IG Corporate UCITS ETF, Franklin Sustainable Euro Green Bond UCITS ETF, Franklin Sustainable Euro Green Corp 1-5 Year UCITS ETF and Franklin Sustainable Euro Green Sovereign UCITS ETF.

The Management Company of the ICAV has appointed Franklin Advisers Inc and Franklin Templeton Investment Management Limited as Investment Manager in relation to Franklin Euro Short Maturity UCITS ETF.

The Management Company of the ICAV has delegated investment management to Franklin Advisers Inc which in turn has delegated to Franklin Templeton Institutional LLC to act as Sub-Investment Manager in relation to Franklin USD Investment Grade Corporate Bond UCITS ETF.

The Management Company has also appointed State Street Fund Services (Ireland) Limited as Administrator to the Fund.

The portfolio of assets maintained for each series of shares and comprising a Sub-Fund will be invested in accordance with the investment objectives and policies applicable to such Sub-Fund as specified in their relevant Supplement. Shares may be divided into different classes to accommodate, amongst other things, different dividend policies, charges, fee arrangements (including different total expense ratios), currencies, or to provide for foreign exchange hedging in accordance with the policies and requirements of the Central Bank from time to time.

Generally, only an Authorised Participant may engage in creation or redemption transactions directly with the Sub-Fund in the primary market (to be distinguished from the secondary market that shares may trade in). The ETF shares are listed for secondary trading on each Listing Stock Exchange (as defined in the Prospectus as such selected exchanges as the Directors may determine from time to time in respect of each Fund and which are specified on the Website) and individual ETF shares may be purchased and sold by investors on Listing Stock Exchanges through a broker-dealer. The Sub-Fund issues or redeems Creation Units (as defined in the Prospectus as a block of 50,000 shares (or multiples thereof) which constitutes the unit by which the Fund creates or redeems units through transactions with Authorised Participants) to Authorised Participants (as defined in the Prospectus as with respect to ETF shares, a market maker or a broker-dealer entity, which has entered into a participating dealer agreement for the purposes of directly subscribing and/or redeeming ETF shares with the Fund (i.e. primary market)). Shares in the Sub-Funds may be created or redeemed on any Dealing Day at the Net Asset Value per share as of the relevant Dealing Day, subject to an appropriate provision for duties and charges. The Sub-Fund will generally issue or redeem Creation Units in return for a basket of securities (and/or an amount of cash) that the Sub-Fund specifies each day. All other investors may purchase ETF shares through the secondary market which includes the Authorised Participants, through a stock exchange listing or over the counter. An investor buying or selling ETF shares in the secondary market will pay the secondary market price for ETF shares (broker costs and spreads may also apply) which may deviate, to varying degrees, from the Net Asset Value per share. Further information on purchases and sales in the primary and secondary market is included in the Prospectus.

Franklin Templeton ICAV Annual Report

5

#### **Sub-Funds and Share Classes**

There are thirty four Sub-Funds in operation as at 30 June 2025. Twenty eight of these Sub-Funds seek to track an index (the "Index Tracking Sub-Funds") and six of the Sub-Funds are actively managed by the Investment Manager to seek to achieve a specific investment objective (the "Actively Managed Sub-Funds"). Franklin European Equity UCITS ETF terminated on 16 November 2023. Franklin Global Equity SRI UCITS ETF terminated on 15 April 2025.

The following table details the Sub-Funds of the ICAV that are Index Tracking Sub-Funds.

#### Stock Exchange Listings (continued)

Where full replication of the Index is not reasonably possible, the Sub-Fund will use an optimisation methodology to build a representative portfolio that provides a return that is comparable to that of the Index.

The specific investment objectives, strategies and policies for each Sub-Fund are set out in each Investment Manager's report.

The investment policy of the **Index Tracking Sub-Funds** is to track the performance of the relevant Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index. In order to seek to achieve this investment objective, the Investment Manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index.

The **Actively Managed Sub-Funds' investments** will be managed actively by the Investment Manager or its delegates to seek to achieve its investment objective, for example, to seek to outperform an Index, rather than just to track it. Where a Sub-Fund is actively managed, the Investment Manager will have greater discretion in relation to the composition of the Sub-Fund's portfolio, subject to the investment objectives and policies stated in their relevant supplemental prospectus. An Actively Managed Sub-Fund will not seek to track the performance of any Index.

### **DIRECTORS' REPORT FOR THE YEAR ENDED 30 JUNE 2025**

The Directors of the ICAV present herewith their report together with the audited financial statements for the year ended 30 June 2025. The financial statements of the ICAV have been prepared in accordance with Financial Reporting Standard 102 ("FRS 102"), Irish statute comprising the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") and the UCITS Regulations.

#### **Review of Business**

The ICAV was established on 11 July 2017. The launch dates of the individual Sub-Funds in the ICAV are disclosed on page 6.

The results for the year are set out on pages 69 to 78. A detailed review of the performance of the ICAV is included in the Investment Manager's Report on pages 15 to 52. The ICAV will continue to act as an investment vehicle as set out in the Prospectus.

The financial statements have been prepared on a going concern basis as nothing has come to the attention of the Directors that indicate that the Sub-Funds cannot continue in operational existence for a period of at least 12 months from the date of approval of these financial statements ("the period of assessment"). The financial statements for Franklin European Equity UCITS ETF have been prepared on a basis other than going concern as this Sub-Fund ceased trading on 16 November 2023. The financial statements for Franklin Global Equity SRI UCITS ETF have been prepared on a basis other than going concern as this Sub-Fund ceased trading on 15 April 2025.

#### **Corporate Governance**

#### **Statement of Compliance on Corporate Governance**

The ICAV has adopted and applied the provisions of the Irish Funds Industry Association Corporate Governance Code for Collective Investment Management Schemes and Management Companies ("the Code"), the text of which is available from the Irish Funds website: <a href="https://www.irishfunds.ie">www.irishfunds.ie</a>. The ICAV has been fully compliant with the Code for the year ended 30 June 2025, as well as for the year ended 30 June 2024.

#### Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the financial statements of the Sub-Funds of the ICAV, in accordance with applicable law and regulations.

The ICAV Act requires the Directors to prepare financial statements for each financial period. Under that law they have elected to prepare the financial statements in accordance with FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland.

The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the Sub-Funds of the ICAV at the end of the year and of the profit or loss of the Sub-Funds of the ICAV for the year. Under Irish law, the Directors shall not approve the Financial Statements unless they are satisfied that they give a true and fair view of the ICAV's assets, liabilities and financial position as at the end of the year and profit or loss of the ICAV for the year. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Sub-Funds will
  continue in business.

# DIRECTORS' REPORT FOR THE YEAR ENDED 30 JUNE 2025 (continued)

#### Statement of Directors' Responsibilities (continued)

The Directors are responsible for keeping adequate accounting records which are sufficient to:

- correctly record and explain the transactions of the ICAV;
- disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Sub-Funds
  of the ICAV; and
- enable them to ensure that the financial statements comply with the ICAV Act and the UCITS Regulation and enable those Financial Statements to be audited.

To achieve this, the Directors have appointed Franklin Templeton International Services S.à r.l., (the "Management Company") who have delegated responsibility to the Administrator, State Street Fund Services (Ireland) Limited (the "Administrator"), to maintain the accounting records of the Sub-Funds and perform additional administrative duties. The accounting records are kept by State Street Fund Services (Ireland) Limited, at 78 Sir John Rogerson's Quay, Dublin, Ireland. The Directors have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Sub-Funds of the ICAV. In this regard they have entrusted the assets of the Sub-Funds to the Depositary for safe-keeping. The Directors have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

The financial statements are published on the www.franklintempleton.com website. The Directors, together with the Manager are responsible for the maintenance and integrity of the financial information included in this website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other countries.

#### **Distributions**

Distributions declared for the year ended 30 June 2025 and 30 June 2024 are disclosed under Note 12 to the financial statements.

#### **Financial instruments**

Details of the ICAV's use of financial instruments including transferable securities and financial derivative instruments are disclosed in Notes 1, 6 and 11 to the financial statements. A full list of transferable securities and derivative financial instruments held by the Sub-Fund's at the year end date can be found in the respective Sub-Fund's Schedule of Investments.

#### **Risk Management Objectives and Policies**

Details of the ICAV's risk management objectives, policies and the Sub-Funds' exposure to market risk, credit and counterparty risk and liquidity risk at the year end are included in Note 6 to the financial statements.

Further details of the ICAV's risks, including non-financial risks, are detailed in the Prospectus.

#### **Key Performance Indicators**

The Directors consider that the change in net asset value ("NAV") per share is a key indicator of the performance of the ICAV. Key performance indicators monitored by the Directors for each Sub-Fund include the monthly movement in the NAV per share, the tracking of each Sub-Fund's performance to the performance of the relevant Index and the share capital movements.

#### **Transactions with Connected Persons**

Regulation 41(1) of the Central Bank UCITS Regulations states that "a responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the shareholders of the UCITS".

As required under Regulation 81 (4) of the Central Bank UCITS Regulations, the Directors are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 41(1) are applied to all transactions with connected persons; and all transactions with connected persons that were entered into during the year to which the report relates complied with the obligations that are prescribed by Regulation 41(1).

# DIRECTORS' REPORT FOR THE YEAR ENDED 30 JUNE 2025 (continued)

#### Transactions with Connected Persons (continued)

The Directors are satisfied that (i) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected party (as defined in Regulation 42 of the Central Bank UCITS Regulations) and (ii) all transactions with connected parties entered into during the period to which the report relates compiled with the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulation.

#### **Related Party Transactions**

All transactions involving related parties during the year are disclosed in Note 10 to the financial statements.

#### **Segregated Liability**

The ICAV is an umbrella fund with segregated liability between the Sub-Funds and as such, as a matter of Irish law, the assets of a Sub-Fund will not be exposed to the liabilities of the ICAV's other Sub-Funds.

Segregated liability ensures that the liabilities incurred on behalf of a Sub-Fund will be discharged solely out of the assets of that Sub-Fund and there can generally be no recourse to the other Sub-Funds to satisfy those liabilities.

Each Sub-Fund will be responsible for paying its fees and expenses regardless of the level of profitability. Notwithstanding the foregoing there can be no guarantee or assurance that, should an action be brought against the ICAV in a court of another jurisdiction, that the segregated nature of the Sub-Funds would necessarily be upheld.

#### **Employees**

The ICAV had no employees during the year ended 30 June 2025 and the year ended 30 June 2024.

#### Significant Events During the Year

See Note 15 to the financial statements for details of significant events affecting the ICAV during the year.

#### Significant Events Since the Year End

See Note 16 to the financial statements for details of significant events affecting the ICAV since the year end.

#### **Directors**

The name and nationality of persons who were Directors at any time during the year ended 30 June 2025 are set out below:

Joseph Carrier (American)
Fionnuala Doris (Irish)\*
Joseph Keane (Irish)\*
Joseph Larocque (American) (Chairman)
Elinor Murray (British)
Jaspal Sagger (British)
Craig Tyle (American)

#### Secretary

OSG Corporate Governance Limited held the office of Secretary throughout the financial year.

#### Directors and ICAV's Secretary's Interest in Shares and Contracts

During the years ended or as at the years ended 30 June 2025 and 30 June 2024, neither the Directors nor Company Secretary had any material interest, beneficial or non-beneficial, in the share capital of the ICAV.

#### **Directors' Fees**

Directors' fees earned during the year and payable at the year end are disclosed in Note 5 to the financial statements.

<sup>\*</sup> Independent Directors.

# DIRECTORS' REPORT FOR THE YEAR ENDED 30 JUNE 2025 (continued)

#### **Political Donations**

The ICAV did not make any political donations during the current year or during the prior year.

#### Relevant audit information

The Directors believe that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the ICAV's statutory auditors are aware of that information. In so far as they are aware, there is no relevant audit information of which the ICAV's statutory auditors are unaware.

#### **Independent Auditors**

PricewaterhouseCoopers, Chartered Accountants, were appointed as independent auditors of the ICAV on 13 June 2017 and have indicated their willingness to continue in office in accordance with Section 125 of the ICAV Act 2015.

On behalf of the Board of Directors

Joseph Keane Director Fionnuala Doris Director

Joseph Leane

Lionnuala Dovis

Date: 22 October 2025

### **INVESTMENT MANAGER'S REPORT**

### **Economic and Market Overview for Investment Manager's Report**

#### Twelve-Month Reporting Period ended 30 June 2025

Global equities advanced during the 12 months ended 30 June 2025, despite episodes of significant volatility. Investors were generally optimistic about a soft landing for the global economy, supported by resilient growth in certain regions and monetary easing by major central banks, including the US Federal Reserve (Fed), the European Central Bank (ECB), the Bank of England (BoE) and the People's Bank of China (PBoC). The Bank of Japan (BoJ) was an outlier, raising its benchmark rate several times during the 12-month period. Donald Trump's US presidential victory in November 2024 and potential expansionary fiscal policies boosted US equities during the fourth quarter, though concerns about his tariff plans affected global trade sentiment. During the first few months of 2025, global equities were pressured by concerns about US economic growth and trade policies. In early April, Trump's announcement of severe "reciprocal" US tariffs rattled equity markets around the world, though delayed tariff hikes later eased recession fears and led to a global equity market rally. The Israel-Iran conflict in June had minimal impact on global markets. On the economic front, global manufacturing activity showed mixed results, growing in some months and contracting in others, but ultimately ending the 12-month period in expansion territory. Global services activity consistently expanded during the period. In this environment, the MSCI All Country World Index of stocks posted a positive return in US-dollar (USD) terms for the 12 months under review. As measured by MSCI indexes in USD terms, developed market equities slightly outpaced the global index and frontier market stocks significantly outperformed it, while emerging market equities modestly trailed it. In terms of investment style, growth stocks modestly outpaced their value counterparts during the 12-month period.

In credit markets, sovereign bond yields were mixed over the period. The 10-year US Treasury note's yield fell 17 basis points (bps) over the 12-month period to 4.23%. This was despite yields having increased between June and December 2024; some pullback in growth expectations for the United States may have supported the more recent move, which took place despite the Fed keeping rates on hold. However, eurozone government bond yields rose, including the yield on 10-year German Bunds, which ended the period 11 bps higher at 2.61%. This also contrasts to the second half of 2024, when eurozone yields fell. Much of the increase in European yields occurred after the announcement of expanded defence spending under the "ReArm Europe" Plan in March 2025, which raised some concern about fiscal expansion. The 10-year Japanese government bond yield ended June 2025 at 1.43%, 38 bps above its year-ago level, due to tighter monetary policy and a reduction of government support for bonds. Other developed market yields were mixed, as were emerging market yields, though most Asian yields fell within the latter group.

US stocks collectively rose during the 12-month period, with major indexes reaching new record highs multiple times despite bouts of heightened volatility. Trump's presidential victory and the Republican Party's success in gaining a congressional majority led to optimism about a market-friendly administration. Consequently, US stocks rose significantly post-election in early November and through mid-December 2024, but gains were pared amid concerns about tariffs, trade relationships and inflation. During the first quarter of 2025, US stocks experienced substantial volatility amid worries about Trump's tariff policies and their impact on economic growth, inflation and the Fed's interest-rate path, along with concerns about a Chinese company's new artificial intelligence (AI) model. Trump's early-April "Liberation Day" announcement of significantly higherthan-expected tariffs on goods imported from nearly all countries led to fears of a recession and caused stocks to plunge. However, delays in tariff hikes, reduced recession fears, expectations of interest-rate cuts, easing geopolitical tensions and stronger-than-expected corporate earnings drove stocks higher, with the S&P 500 Index and the Nasdaq Composite Index ending the period at new record highs and the Dow Jones Industrial Average hovering near its all-time high. The Fed began lowering the federal funds target rate in September 2024 by 50 bps and followed up with two 25-bp cuts in November and December, down to a range of 4.25%-4.50%, but paused during the first half of 2025 as policymakers continued to monitor and evaluate the potential impact of tariff, immigration and tax policies. Annual inflation, as measured by the core personal consumption expenditures price index—which excludes food and energy prices and is the Fed's preferred gauge—cooled in April to the lowest level in more than four years but accelerated in May, remaining above the Fed's 2% long-run target. The country's gross domestic product (GDP) contracted in the first quarter of 2025 for the first time in three years, due largely to a significant rise in imports (which are a subtraction in the GDP calculation). Manufacturing activity contracted during most of the 12-month period, expanding only in January and February 2025 before contracting for four consecutive months. Meanwhile, except for a contraction in May, services activity expanded during most of the period.

In Europe, stocks collectively advanced for the 12-month period, overcoming the decline seen during the second half of 2024 due to concerns about the economic outlook, earnings warnings, political turmoil in Germany and France, and Trump's tariff threats. European stocks gained strongly during the first quarter of 2025 amid signs of economic improvement, interest-rate cuts by the ECB and BoE, and optimism about a potential Russia-Ukraine ceasefire. Better-than-expected corporate earnings and increased fiscal budgets, notably in Germany, further supported sentiment. In early April, Trump's tariff announcements drove stocks lower, but they rallied as trade tensions eased. Progress in the trade negotiations between the United States and

## **INVESTMENT MANAGER'S REPORT (continued)**

the European Union, along with a US-China tariff truce, boosted investor confidence. The eurozone's GDP grew in the first quarter of 2025 at the fastest sequential rate since the third quarter of 2022. Manufacturing activity in the currency bloc contracted during the 12-month period despite improving in the first half of 2025, while services activity expanded during most of the period. The ECB eased its monetary policy throughout the period, reducing the refinancing rate by 210 bps to 2.15%. In the United Kingdom, GDP stalled in the third quarter of 2024 but grew sequentially in the following two quarters. The country's manufacturing activity contracted in June for nine consecutive months, while its services activity expanded during most of the 12-month period. The BoE lowered its key rate by 100 bps over four cuts to 4.25%.

Japanese equities generally rose during the 12 months under review. In early August 2024, Japanese stocks fell due to the BoJ's interest-rate hike and US recession concerns, leading to the unwinding of the yen carry trade, which had depended on borrowing the yen at a low cost to purchase potentially higher-return assets. An easing in these factors and less hawkish comments from BoJ officials subsequently supported Japanese stocks during the rest of 2024. However, the announcement of US tariffs on imported vehicles and certain automobile parts, along with Trump's reciprocal tariffs, led to significant volatility during the first few months of 2025. The delay in the implementation of reciprocal tariffs led to a recovery in Japanese stocks. However, trade friction between Japan and the United States remained unresolved, as the US tariff on Japanese car imports continued to be a negotiation sticking point. Japan's GDP grew sequentially in the third and fourth quarters of 2024 but stagnated in the first quarter of 2025. The country's manufacturing activity contracted during the first 11 months of the period but expanded slightly in June, while its services activity expanded during most of the period. The BoJ raised its benchmark interest rate twice during the period to 0.50%, its highest level in 17 years.

Emerging market equities collectively gained during the 12-month period but modestly trailed developed market stocks. The Chinese government's announcement of significant stimulus in September drove Chinese and other emerging market stocks higher. However, stocks pared gains later in 2024 amid investor concerns about political instability in South Korea, Trump's tariff threats and uncertainty about whether China's stimulus measures are enough to end the country's real estate crisis. In the first quarter of 2025, Chinese and other emerging market stocks benefitted from investor enthusiasm about a Chinese company's new Al model and signs of a more supportive stance from the Chinese government. After declining significantly in early April due to Trump's announcement of more-severe-than-expected reciprocal tariffs, stocks rallied as the implementation of such tariffs was delayed. The rebound was further supported by favourable economic factors in certain regions and stimulus measures in China, along with a 90-day truce on US-China tariffs announced in May. This truce saw US tariffs on Chinese goods reduced from 145% to 30% and Chinese tariffs on US products lowered from 125% to 10%. On the economic front, China's GDP grew sequentially in 2024's fourth quarter at the fastest rate in seven quarters but moderated in 2025's first quarter. The country's manufacturing activity was mixed as it contracted during some months and expanded in others, ultimately contracting for three consecutive months to end the period, while non-manufacturing activity expanded during most of the 12-month period. The PBoC lowered its key lending rates several times during the period to record lows. The one-year loan prime rate (LPR), which is the benchmark for most corporate and household loans, was cut to 3.0%, while the fiveyear LPR, which guides mortgage rates, was lowered to 3.5%. Elsewhere in emerging markets, many central banks reduced their benchmark interest rates, though the pace often slowed from previous actions as the period progressed. However, some central banks, notably Brazil's, began new hiking cycles in their efforts to control inflation.

### **Performance Review**

The below table details the performance details of the Index Tracking Sub-Funds.

		Sub-Fund return based on Net Asset Value for the year ended	Benchmark return for the year

<sup>\*</sup> Sub-Fund performance is calculated net of fees and expenses comprising the Total Expense Ratio (TER) and does not take account of commissions and costs incurred on the issue and redemption of shares. Performance is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Where applicable the NAV includes a provision for Capital Gains Tax on portfolio holdings, the benchmark does not include any such provision. Past performance is no indication of current or future performance.

#### **Tracking Error**

The Sub-Funds of the Franklin Liberty Shares ICAV that are passively managed intend to track as closely as possible the performance of their respective systematic rules-based proprietary index as described in the prospectus. The tool commonly used to measure achievement of this objective is the realised tracking error.

Realised tracking error is the standard deviation of the delivered excess returns over an annual period. It is a measurement of the consistency of the returns relative to the benchmark index over a defined period.

Realised tracking error can be affected by several factors, including but not limited to, the Total Expense Ratio (TER) of the Sub-Fund, the timing of trades when index is rebalanced, efficient portfolio management techniques employed in attempting to replicate benchmark returns, and the tax rate applied to dividends or interests received by the Sub-Fund as opposed to the tax rate assumed in the total return calculation of the benchmark.

<sup>\*\*</sup> The Sub-Fund launched post 30 June 2024. Refer to Sub-Funds and Share Classes in General Information for details.

## **INVESTMENT MANAGER'S REPORT (continued)**

The table below compares the anticipated tracking error of the Funds (as disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as of 30 June 2025:

Sub-Fund	Anticipated tracking error	Annualised realised tracking error
Franklin AI, Metaverse and Blockchain UCITS ETF*	1.00%	0.10%
Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF	1.00%	0.81%
Franklin Emerging Markets UCITS ETF	0.80%	0.43%

Franklin U.S. Equity UCITS ETF	0.50%	0.06%
Franklin US Dividend Tilt UCITS ETF*/**	0.20%	0.02%
Franklin US Mega Cap 100 UCITS ETF*/**	0.20%	0.00%

<sup>\*</sup> Realised tracking error is normally computed from 36 months of returns. The Fund's return history is too short to give a statistically significant tracking error.

Over the period under review the Sub-Funds and their respective benchmarks achieved the performances disclosed in the Investment Manager's report. The over / (under) performance of a Sub-Fund to its respective benchmark is principally attributable to the differences in timing of trades when index is rebalanced; to the Total Expense Ratio (TER) borne by the Sub-Fund, and the tax rate applied to dividends or interests received by the Sub-Fund as opposed to the tax rate assumed in the total return calculation of the benchmark. The wider tracking error and under performance to the index of the Franklin FTSE India UCITS ETF are explained by the impact of taxation of capital gains in this market.

# INVESTMENT MANAGER'S REPORT - INDEX TRACKING SUB-FUNDS

### Franklin AI, Metaverse and Blockchain UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were information technology, financials and communication services. Individual holdings that lifted the Sub-Fund's absolute return included MicroStrategy, Roblox and IBM.

For the same period, the only sector that detracted from the Sub-Fund's absolute performance was consumer discretionary. Individual holdings that hindered the Sub-Fund's absolute return included Super Micro Computer, Intel and Adobe.

#### **Summary of Investment Objective/Policy**

The Sub-Fund seeks to provide equity exposure to listed companies around the world that are involved in the metaverse. The Sub-Fund seeks to track the performance of the Solactive Global Metaverse Innovation Index ("the Underlying Index") as closely as possible, regardless of whether the Index level rises or falls. The Sub-Fund aims to replicate the Underlying Index by holding all of its securities in a similar proportion to their weighting in the Index. The holdings of the Underlying index comprise of global equity securities issued by companies that are deemed to have or are expected to have significant exposure to the provision of products and/or services that contribute to the metaverse.

# Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's duration and yield-curve positioning in US bonds dragged on relative results. Sector allocation and security selection hindered relative returns, notably positioning in euro-denominated Romanian bonds, as well as US-dollar-denominated Israeli and Senegalese debt. However, a lack of exposure to US-dollar-denominated Romanian bonds and positioning in US-dollar-denominated Polish debt added relative value. The Sub-Fund's local market allocation contributed to relative performance, owing primarily to an overweight exposure to the outperforming eurozone market. Its currency positioning had a positive impact on relative results, particularly a long exposure to the euro.

#### Summary of Investment Objective/Policy

The Sub-Fund aims to provide exposure to Euro- and US Dollar-denominated sovereign debt issued by emerging market countries. The Sub-Fund seeks to track the performance of the ICE Catholic Principles ESG Emerging Markets External Sovereign Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls. The Sub-Fund will select the securities that constitute the Underlying Index in order to build a representative portfolio that provides a return that is comparable to that of the Underlying Index but which may not track the Underlying Index with the same degree of accuracy as an investment vehicle replicating the entire Underlying Index. Each country's exposure is capped at 10% of the Underlying index which are selected from the ICE BofA Diversified Emerging Markets External Debt Sovereign Bond Index (Investment Universe) to ensure diversification and minimise security level concentrations.

### Franklin Emerging Markets UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were financials, communication services and consumer staples. Individual holdings that lifted the Sub-Fund's absolute return included Emaar Properties, Gold Fields and China Life Insurance.

For the same period, the only sectors that detracted from the Sub-Fund's absolute performance were energy and health care. Individual holdings that hindered the Sub-Fund's absolute return included Kia, Hanmi Semiconductor and BIM Birlesik Magazalar.

#### **Summary of Investment Objective/Policy**

The Sub-Fund invests in large and mid-capitalisation stocks in emerging market countries globally. The Sub-Fund seeks to track the performance of the Emerging Markets Equity Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index rises or falls. The Sub-Fund aims to replicate the Underlying Index by holding all of its securities in a similar proportion to their weighting in the Index. The holdings of the Underlying Index comprise the top quartile of stocks which are selected from the MSCI Emerging Markets Index (the Investment Universe), using a transparent multifactor selection process that applies four investment style factors (quality, value, momentum and low volatility).

# INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS

## Franklin Euro IG Corporate UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's duration and yield-curve positioning in eurozone bonds lifted relative performance. Its security selection also contributed to relative returns, while sector allocation had a broadly neutral impact. Positioning in corporate investment-grade industrial issues added relative value, as did selection in their utility counterparts and government-related bonds. However, its exposure to subordinated debt (ex banking, ex insurance) proved detrimental to relative results.

#### **Summary of Investment Objective/Policy**

The Sub-Fund seeks to provide income from the European corporate bond market while seeking to preserve capital. The Sub-Fund seeks to achieve its investment objective by investing primarily in Euro-denominated investment grade corporate debt securities.

# INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS (continued)

### Franklin Euro Short Maturity UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's security selection and sector allocation contributed to relative performance, notably positioning in eurozone corporate investment-grade financial issues and selection in their industrial counterparts. Its selection in Spanish and Romanian government bonds also added relative value. The Sub-Fund's overall currency positioning further enhanced relative results. Duration and yield-curve positioning in eurozone bonds lifted the Sub-Fund's relative returns slightly.

#### **Summary of Investment Objective/Policy**

The Sub-Fund aims to provide current income whilst maximising total returns in the Euro-denominated short term fixed income market.

The Sub-Fund invests mainly in:

 short-term fixed and floating rate investment grade debt securities denominated in Euro issued by sovereign and corporate issuers including non-European issuers

The Sub-Fund can invest to a lesser extent in:

- lower quality debt securities such as non-investment grade securities or securities in default (limited to 20% of the Sub-Fund's assets)
- derivatives for hedging, efficient portfolio management and/or investment purposes

The Sub-Fund pursues an actively managed investment strategy. Therefore, the Sub-Fund will hold a portfolio of actively selected and managed investments rather than seek to track the performance of a benchmark. Any benchmark referred to is as a point of reference against which the performance of the Sub-Fund may be measured. The securities in which the Sub-Fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

# INVESTMENT MANAGER'S REPORT - INDEX TRACKING SUB-FUNDS

### Franklin European Quality Dividend UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were financials, communication services and utilities. Individual holdings that lifted the Sub-Fund's absolute return included Imperial Brands, Bankinter and Swiss Prime Site.

For the same period, the only sectors that detracted from the Sub-Fund's absolute performance were materials and consumer discretionary. Individual holdings that hindered the Sub-Fund's absolute return included Equinor, TotalEnergies and Intermediate Capital Group.

#### **Summary of Investment Objective/Policy**

The Sub-Fund invests in high quality large and midcapitalisation stocks with high and persistent dividend income in developed countries in Europe. The Sub-Fund seeks to track the performance of the European Dividend Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls. The Sub-Fund aims to replicate the Underlying Index by holding all its securities in a similar proportion to their weighting in the Underlying Index. The holdings of the Underlying Index comprise 50 stocks which are selected from the MSCI Europe IMI ex REITS Index (the Investment Universe), using a transparent selection process which applies a dividend persistence and yield screen followed by a quality screen.

### Franklin FTSE Asia ex China ex Japan UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were financials, industrials and communication services. Individual holdings that lifted the Sub-Fund's absolute return included TSMC, Hong Kong Exchanges and Clearing and SK Hynix.

For the same period, the sectors that detracted most from the Sub-Fund's absolute performance were materials, consumer discretionary and energy. Individual holdings that hindered the Sub-Fund's absolute return included Samsung Electronics, HDFC Bank and Hon Hai Precision Industry.

#### **Summary of Investment Objective/Policy**

The Sub-Fund invests in large and mid-capitalisation stocks in Asia, excluding China and Japan. The Sub-Fund seeks to track the performance of the FTSE Asia ex Japan ex China Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls. The Sub-Fund will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably possible (for example as a result of the number of securities or the liquidity of certain securities within the Index), the Sub-Fund will use the optimisation methodology to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index but which may not track the Index with the same degree of accuracy as an investment vehicle replicating the entire Index may. Consequently, the Sub-Fund may, over certain periods, only hold a subset of the Index Securities.

### Franklin FTSE Korea UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were industrials, financials and communication services. Individual holdings that lifted the Sub-Fund's absolute return included SK Hynix, Hanwha Aerospace and Doosan Enerbility.

For the same period, the sectors that detracted most from the Sub-Fund's absolute performance were information technology, materials and consumer discretionary. Individual holdings that hindered the Sub-Fund's absolute return included Samsung Electronics, Hyundai Motor and Samsung SDI.

#### Summary of Investment Objective/Policy

The Sub-Fund invests in large and mid-capitalisation stocks in South Korea. The Sub-Fund seeks to track the performance of the FTSE Korea 30/18 Capped Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls. The Sub-Fund will select the securities that constitute the Underlying Index in order to build a representative portfolio that provides a return that is comparable to that of the Underlying Index but which may not track the Underlying Index with the same degree of accuracy as an investment vehicle replicating the entire Underlying Index. The holdings of the Underlying Index comprise of South Korean large and mid-cap equities derived from the FTSE All-World Index, on a free float market capitalisation basis.

### Franklin FTSE Saudi Arabia UCITS ETF

For the financial period since inception (28 October 2024 to 30 June 2025), the sectors that contributed most to the Sub-Fund's absolute performance were real estate, information technology and communication services. Individual holdings that lifted the Sub-Fund's absolute return included Dar Al Arkan Real Estate, Riyadh Cables Group Company and Saudi Arabian Mining Company.

For the same period, the sectors that detracted most from the Sub-Fund's absolute performance were utilities, health care and consumer staples. Individual holdings that hindered the Sub-Fund's absolute return included Savola Al-Azizia United Company, Arabian Contracting Services Company and Leejam Sports Company.

#### Summary of Investment Objective/Policy

The Sub-Fund seeks to provide exposure to large and mid-capitalisation stocks in Saudi Arabia. The Sub-Fund seeks to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index. The Index is a broad free float market-capitalisation weighted index which captures large and mid-sized companies incorporated and/or listed in Saudi Arabia. The Index is derived from the FTSE Global Equity Index Series, an index which covers 98% of the world's investable market capitalisation

### Franklin S&P 500 Screened UCITS ETF

For the financial period since inception (15 April 2025 to 30 June 2025), the sectors that contributed most to the Sub-Fund's absolute performance were information technology, financials and consumer discretionary. Individual holdings that lifted the Sub-Fund's absolute return included NVIDIA, Tesla and Microsoft.

For the same period, the sectors that detracted from the Sub-Fund's absolute performance were health care and energy. Individual holdings that hindered the Sub-Fund's absolute return included UnitedHealth Group, Merck and Apple.

#### **Summary of Investment Objective/Policy**

The Sub-Fund seeks to provide exposure to large capitalisation stocks in the US with a greater emphasis on those stocks deemed to be more environmentally and socially responsible. The Sub-Fund seeks to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index. The Index is based on the S&P 500 index, (the "Parent Index") which is comprised of large cap stocks in the US. The Index is designed to measure the performance of the constituents in the Parent Index that meet the sustainability criteria defined for the Index. The Index is constructed to achieve a higher sustainability profile through an overall reduction in carbon emissions and an improvement of the S&P Global ESG score relative to the Parent Index. The Index aims to improve the overall S&P Global ESG Score relative to the Parent Index by over- or under-weighting companies based on their S&P Global ESG Scores.

## Franklin STOXX Europe 600 Paris Aligned Climate UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were financials, communication services and industrials. Individual holdings that lifted the Sub-Fund's absolute return included SAP, Deutsche Boerse and Deutsche Telekom.

For the same period, health care was the only sector that detracted from the Sub-Fund's absolute performance. Individual holdings that hindered the Sub-Fund's absolute return included Novo Nordisk, LVMH Moet Hennessy Louis Vuitton and ASML.

#### **Summary of Investment Objective/Policy**

The Sub-Fund aims to provide exposure to European large and mid-capitalisation stocks which are aligned to the transition to a low carbon economy. The Sub-Fund seeks to track the performance of the STOXX Europe 600 Paris-Aligned Benchmark Index (the "Underlying Index") as closely as possible, regardless of whether the Underlying Index level rises or falls. The Sub-Fund will select the securities that constitute the Underlying Index in order to build a representative portfolio that provides a return that is comparable to that of the Underlying Index but which may not track the Underlying Index with the same degree of accuracy as an investment vehicle replicating the entire Underlying Index. No holdings shall comprise more than 4.5% of the Underlying Index which are selected from the STOXX 600 Europe Index (Investment Universe) to ensure diversification and minimise security level concentrations.

## INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS

### Franklin Sustainable Euro Green Bond UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's security selection detracted from relative performance, although sector allocation added relative value. Selection in government bonds hindered relative results, although this was partially offset by the positive influence of an overweight exposure to this area. Local market allocation held back relative returns, notably exposure to the UK market. The Sub-Fund's duration and yield-curve positioning in eurozone bonds subtracted relative value, as did its exposure to interest-rate derivatives. Currency positioning weighed slightly on relative performance, through a small exposure to the Swiss franc.

#### **Summary of Investment Objective/Policy**

The Sub-Fund aims to provide exposure to the European green bond market whilst maximising total returns.

The Sub-Fund invests mainly in:

 bonds that are labelled green and denominated in European currencies

The Sub-Fund can invest to a lesser extent in:

- bonds that are climate aligned
- derivatives for hedging, efficient portfolio management and/or investment purposes

The Sub-Fund pursues an actively managed investment strategy. Therefore, the Sub-Fund will hold a portfolio of actively selected and managed investments rather than seek to track the performance of a benchmark. Any benchmark referred to is as a point of reference against which the performance of the Sub-Fund may be measured. The securities in which the Sub-Fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

## INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS (continued)

### Franklin Sustainable Euro Green Corp 1-5 Year UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's sector allocation detracted from relative performance, while security selection contributed slightly. Positioning in corporate investment-grade financial bonds curbed relative returns. The Sub-Fund's exposure to government-related debt also subtracted relative value, although this was countered to some degree by the positive impact of selection in this area. Selection in corporate investment-grade utility issues also enhanced relative results. The Sub-Fund's duration and yield-curve positioning in eurozone bonds had a small positive impact on relative performance.

#### **Summary of Investment Objective/Policy**

The Sub-Fund's aim is to pursue a sustainable investment objective, by providing exposure primarily to the European corporate green bond market with a short to mid duration of less than 5 years, whilst maximising total returns. The Sub-Fund seeks to achieve its investment objective by investing at least 90% of its Net Asset Value in sustainable investments. Such investments will primarily consist of bonds which have been labelled as "green", as described below, and are denominated in European currencies and issued by corporate issuers.

# INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS (continued)

## Franklin Sustainable Euro Green Sovereign UCITS ETF

For the financial year ended 30 June 2025, the Sub-Fund's sector allocation and, to a lesser extent, security selection detracted from relative returns, principally owing to a lack of exposure to Italian sovereign debt and an overweight position in Austrian government bonds, although this was partially offset by the beneficial bearing of selection in the latter area. Positioning in Spanish sovereign debt added relative value. Its duration and yield-curve positioning in eurozone bonds weighed on relative performance, as did its exposure to interest-rate derivatives. Local market allocation hampered relative results, primarily through an overweight exposure to the underperforming UK market.

#### **Summary of Investment Objective/Policy**

The Sub-Fund's aim is to pursue a sustainable investment objective, by providing exposure primarily to the European sovereign green bond market, whilst maximising total returns. Investment Policy. The Sub-Fund seeks to achieve its investment objective by investing at least 90% of its Net Asset Value in sustainable investments. Such investments will primarily consist of bonds which have been issued by SSA (sovereigns, sub-sovereigns, supranationals and agencies) entities.

## INVESTMENT MANAGER'S REPORT - INDEX TRACKING SUB-FUNDS

### Franklin U.S. Equity UCITS ETF

For the financial year ended 30 June 2025, the sectors that contributed most to the Sub-Fund's absolute performance were information technology, financials and consumer staples. Individual holdings that lifted the Sub-Fund's absolute return included NVIDIA, Microsoft and Broadcom.

For the same period, the sectors that detracted from the Sub-Fund's absolute performance were health care, energy and materials. Individual holdings that hindered the Sub-Fund's absolute return included Apple, Eli Lilly and Applied Materials.

#### **Summary of Investment Objective/Policy**

The Sub-Fund seeks to provide exposure to large and midcapitalisation stocks in the US. The Sub-Fund seeks to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index The Index is a systematic, rules-based proprietary index that is owned and calculated by FTSE Russell and is comprised of approximately 200 stocks selected from the Russell 1000 Index which is designed to measure the performance of large and mid-capitalisation stocks in the U.S.

## INVESTMENT MANAGER'S REPORT - ACTIVELY MANAGED SUB-FUNDS

## Franklin USD Investment Grade Corporate Bond UCITS ETF

For the financial year ended 30 June 2025, security selection was accretive to relative returns for the period under review. Contributors to performance include media company Charter Communications, technology company Cisco Systems and retailer Dick's Sporting Goods. In contrast, detractors included bank Morgan Stanley, wireless provider T-Mobile and midstream energy company Williams. The Sub-Fund's yield curve and duration positioning negative impacted performance during the year. While overall duration ended near neutral to the benchmark, yield changes on specific parts of the curve were a negative.

#### **Summary of Investment Objective/Policy**

The Sub-Fund aims to provide current income from the USD fixed income market while seeking to preserve capital.

The Sub-Fund invests mainly in:

U.S. dollar denominated fixed and floating rate investment grade corporate debt securities and investments issued by U.S. companies

The Sub-Fund can invest to a lesser extent in:

- non-U.S. securities including those issued by issuers in emerging markets
- derivatives for hedging, efficient portfolio management and/or investment purposes

The Sub-Fund pursues an actively managed investment strategy. Therefore, the Sub-Fund will hold a portfolio of actively selected and managed investments rather than seek to track the performance of a benchmark. Any benchmark referred to is as a point of reference against which the performance of the Sub-Fund may be measured. The securities in which the Sub-Fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

### REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

We have enquired into the conduct of Franklin Templeton ICAV (the "ICAV") for the year ended 30 June 2025, in our capacity as Depositary to the ICAV. This report including the opinion has been prepared for and solely for the shareholders in the Sub-Funds of the ICAV. This report has been prepared in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as amended (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

#### Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the ICAV in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the ICAV has been managed in that period in accordance with the provisions of the ICAV's Instrument of Incorporation and the UCITS Regulations. It is the overall responsibility of the ICAV to comply with these provisions. If the ICAV has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

#### **Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the ICAV has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the constitutional documentation and the appropriate regulations; and
- (ii) otherwise in accordance with the ICAV's constitutional documentation (the "Instrument of Incorporation") and the appropriate regulations.

#### **Opinion**

In our opinion, the ICAV has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the Instrument of Incorporation, the UCITS Regulations and the Central Bank's UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the Instrument of Incorporation, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited

Toma Hely

78 Sir John Rogerson's Quay

Dublin 2 Ireland

Date: 22 October 2025

## Independent auditors' report to the shareholders of the Sub-Funds of Franklin Templeton ICAV

#### Report on the audit of the financial statements

#### **Opinion**

In our opinion, Franklin Templeton ICAV's financial statements:

- give a true and fair view of the Sub-Funds' assets, liabilities and financial position as at 30 June 2025 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles
  Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities)
  Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report, which comprise:

- the Statement of Financial Position as at 30 June 2025;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Schedule of Investments for each of the Sub-Funds as at 30 June 2025; and
- the notes to the financial statements for each of the Sub-Funds, which include a description of the accounting policies.

Our opinion is consistent with our reporting to the Board of Directors.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Independence*

We remained independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the ICAV.

We have provided no non-audit services to the ICAV in the period from 1 July 2024 to 30 June 2025.

#### Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1 to the financial statements which describes the reasons why the financial statements of Franklin Global Equity SRI UCITS ETF and Franklin European Equity UCITS ETF have been prepared on a basis other than going concern.

#### Our audit approach

#### Overview

#### Materiality

Overall materiality: 50 Basis points (2024: 50 Basis points) of Net Assets Value ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the ICAV's Sub-Funds, with the exception of Franklin Global Equity SRI UCITS ETF which used average NAV and Franklin European Equity UCITS ETF which used total assets as the basis for overall materiality.

Performance materiality: 75% of overall materiality.

#### Audit scope

The ICAV is an open-ended investment ICAV with variable capital and engages Franklin Templeton International Services S.á r.l (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the ICAV.

We tailored the scope of our audit taking into account the types of investments within the Sub-Funds, the involvement of the third party service providers, referred to overleaf, the accounting processes and controls, and the industry in which the ICAV operates. We look at each of the Sub-Funds at an individual level.

#### Key audit matters

Valuation and existence of financial assets at fair value through profit or loss.

#### The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

#### Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

#### Key audit matter

## Valuation and existence of financial assets at fair value through profit or loss.

The financial assets at fair value through profit or loss included in the Statement of Financial Position for each of the Sub-Funds as at 30 June 2025 are measured at fair value in accordance with Financial Reporting Standard 102.

The relevant accounting policies and disclosures have been included in Note 1c Significant Accounting Policies – Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss, Note 1n Significant Accounting Policies – Significant Accounting Estimates and Judgements and Note 6 Risk Management Policies and Disclosure within the notes to the financial statements.

This is considered a key audit matter as it represents the principal element of the financial statements.

#### How our audit addressed the key audit matter

We tested the valuation of investments for each Sub-Fund by independently agreeing to third party vendor sources, where possible.

For some equity positions where we could not price using independent third-party vendors, we considered the appropriateness of managements valuations.

We obtained independent confirmation from the Depositary of the investment portfolio of each Sub-Fund as at 30 June 2025 and reconciled the Depositary confirmation to the accounting records.

No material matters were noted as a result of performing these procedures.

#### How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the ICAV, the accounting processes and controls, and the industry in which it operates.

The directors control the affairs of the ICAV and are responsible for the overall investment policy which is determined by them. The ICAV engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the ICAV. The Manager has delegated certain responsibilities to Franklin Advisors, Inc, Franklin Templeton Institutional, LLC, Franklin Templeton Investment Management Limited and Franklin Advisory Services LLC (the 'Investment Managers') and to State Street Fund Services (Ireland) Limited (the 'Administrator'). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Administrator. The ICAV has appointed State Street Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the ICAV's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a sub-fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the ICAV's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

#### **Materiality**

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the ICAV's Sub-Funds as follows:

Overall materiality and how we determined it	50 Basis points (2024: 50 Basis points) of Net Assets Value ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the ICAV's Sub-Funds, with the exception of Franklin Global Equity SRI UCITS ETF which used average NAV and Franklin European Equity UCITS ETF which used total assets as the basis for overall materiality.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the ICAV is to provide investors with a total return at a Sub-Fund level, taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each Sub-Fund's NAV, for NAV per share impacting differences (2024: 5 basis points of each Sub-Fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

#### Conclusions relating to going concern

With the exception of Franklin Global Equity SRI UCITS ETF and Franklin European Equity UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the Sub-Funds' ability to continue to adopt the going concern basis of accounting included:

We obtained an understanding of the key indicators that are monitored with respect to going concern assumption and management's future plans for the ICAV and Sub-Funds' over the going concern period (being 12 months from the date of approval of the financial statements);

- We reviewed available board minutes during the period under audit and those available up to the date of this report;
- We considered post year end capital activity by reviewing the underlying accounting records;
- We made enquiries of management with respect to any planned significant redemptions of which they have been informed; and
- We considered the liquidity risk management techniques which are available to the ICAV and Sub-Funds.

With the exception of Franklin Global Equity SRI UCITS ETF and Franklin European Equity UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue

as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of Franklin Global Equity SRI UCITS ETF and Franklin European Equity UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Sub-Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on the responsibilities described above and our work undertaken in the course of the audit, the Irish Collective Assetmanagement Vehicles Act 2015 requires us to also report the opinion as described below:

#### Directors' Report

• In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 30 June 2025 is consistent with the financial statements.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Sub-Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the ICAV and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Irish Collective Asset-management Vehicles Act 2015, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended), and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Irish Collective Asset-management Vehicles Act 2015, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to management override of controls.

Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing journal entries, where any such journal entries, that met our specific risk based criteria, were identified;
- Testing accounting estimates and judgements and considered potential for management bias;
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing;
- · Reviewing minutes of the meetings of the board of directors; and
- Reviewing financial statement disclosures and agreeing to supporting documentation to assess compliance with applicable laws and regulations.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

#### Use of this report

This report, including the opinions, has been prepared for and only for the shareholders of each of the Sub-Funds as a body in accordance with section 120 of the Irish Collective Asset-management Vehicles Act 2015 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

#### Other required reporting

#### Irish Collective Asset-management Vehicles Act 2015 exception reporting

#### Directors' remuneration

Under the Irish Collective Asset-management Vehicles Act 2015 we are required to report to you if, in our opinion, the disclosures of directors' remuneration specified by section 117 of that Act have not been made. We have no exceptions to report arising from this responsibility.

#### **Appointment**

We were appointed by the Board of Directors on 22 June 2018 to audit the financial statements for the year ended 30 June 2018 and subsequent financial periods. The period of total uninterrupted engagement is 8 years, covering the years ended 30 June 2018 to 30 June 2025.

David Pickerill

<sup>\*</sup> The Sub-Fund launched post 30 June 2023. Refer to Sub-Funds and Share Classes in General Information for details.

The accompanying notes are an integral part of the annual financial statements.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2025

### 1. Significant Accounting Policies

The policies have been consistently applied to all years presented, unless otherwise stated. The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below. Please refer to the general information section of the financial statements for details of how the ICAV is structured.

These audited financial statements for the ICAV are prepared for the year ended 30 June 2025.

### a) Basis of Preparation

The ICAV's financial statements have been prepared in accordance with Financial Reporting Standard 102 ("FRS 102"), Irish statute comprising the Irish Collective Asset-management Vehicles Act 2015 (as amended) (the "ICAV Act") and the UCITS Regulations.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

In preparation of financial statements in conformity with FRS 102, the ICAV is required to make certain accounting estimates and assumptions. Actual results may differ from these estimates and assumptions. The Directors believe that any estimates used in preparing the financial statements are reasonable and prudent. Critical accounting estimates are those which involve the most complex or subjective judgments or assessments. The areas of the ICAV's business that typically require such estimates are the determination of the fair value of financial assets and liabilities.

Certain reclassifications have been made to previously reported amounts to conform to current period presentation, which had no impact on reported net assets.

The financial statements for all Sub-Funds have been prepared on a going concern basis with an exception of the Franklin European Equity UCITS ETF and the Franklin Global Equity SRI UCITS ETF as the Directors are of the view that the ICAV will continue in operational existence for twelve months from the date of approval of these financial statements ("the period of assessment"). The financial statements for Franklin European Equity UCITS ETF and Franklin Global Equity SRI UCITS ETF have been prepared on a basis other than going concern as these Sub-Funds ceased trading on 16 November 2023 and 15 April 2025, respectively.

The ICAV is availing of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

### Fair value of financial instruments

FRS 102, the accounting standard applicable in the United Kingdom and Ireland, requires that a reporting entity, in accounting for its financial instruments apply either a) the full provisions of Section 11 "Basic Financial Instruments" and Section 12 "Other Financial Instruments" of FRS 102, b) the recognition and measurement provisions of IAS 39 "Financial Instruments: Recognition and Measurement" and only the disclosure requirements of Sections 11 and 12 of FRS 102; or c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9, "Financial Instruments" and/or IAS 39 (as amended following the publication of IFRS 9) and only the disclosure requirements of Sections 11 and 12 of FRS 102. The ICAV has chosen to implement the recognition and measurement provisions of IAS 39 and only the disclosure requirements of Sections 11 and 12.

### b) Functional and Presentation Currency

Items included in each Sub-Fund's financial statements are measured using the currency of the primary economic environment in which the relevant Sub-Fund operates (the "functional currency"). The functional or base currency of each Sub-Fund is detailed in the General Information section. The ICAV also has adopted these functional currencies as the presentation currency of each of the Sub-Funds.

Transactions in foreign currencies are translated into the functional currency at the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated into the functional currency of the Sub-Fund at the exchange rate at that date.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currency of the Sub-Fund at the exchange rate at the date on which fair value was determined.

### 1. Significant Accounting Policies (continued)

### b) Functional and Presentation Currency (continued)

Any foreign currency differences arising from retranslation are recognised in the Statement of Comprehensive Income in net gain/(loss) on investment activities, including those arising on financial instruments at fair value through profit or loss ("FVTPL").

### c) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss

### Classification

Financial assets and liabilities at FVTPL have two sub-categories: financial assets and financial liabilities held for trading and those designated by management at FVTPL at inception.

All instruments on the Sub-Funds' Schedule of Investments are classified at FVTPL. Gains and losses from changes in the fair value of the financial assets and financial liabilities at FVTPL category are included in the Statement of Comprehensive Income in Net gain/(loss) on financial assets/liabilities at fair value through profit or loss.

### **Recognition and Derecognition**

#### Recognition and initial measurement

Purchases and sales of investments are recognised as of the day the transaction takes place (trade date), the date on which the Sub-Fund commits to purchase or sell the asset. Other financial assets and liabilities are recognised on the date in which they originated. Investments are initially recognised at fair value, and transaction costs for all financial assets and financial liabilities carried at FVTPL are expensed as incurred. Financial assets and financial liabilities not at FVTPL are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition or issue.

### **De-recognition**

Investments are de-recognised when the rights to receive cash flows from the investments have expired or the relevant Sub-Fund has transferred substantially all risks and rewards of ownership. On de-recognition of a financial asset, the difference between the carrying amount of the asset and consideration received is recognised in the Statement of Comprehensive Income using the average cost methodology. Financial liabilities are derecognised when the contractual obligations are discharged, cancelled or expired.

### **Expected Credit Losses**

As at 30 June 2025 and 30 June 2024 all other receivables/cash are held with well capitalised counterparties and are due to be settled within one year. Management considered the probability of default to be close to zero. As a result, no loss allowance has been recognised based on 12 month expected credit losses as any such impairment would be wholly insignificant to the ICAV.

#### **Fair Value Measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the relevant Sub-Fund has access at that date.

### i) Transferable Securities

When available, the Sub-Funds measure the fair value of an investment using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. Sub-Funds measure instruments quoted in an active market at last traded in the case of equity instruments and mid-market prices in the case of corporate and government bonds, because this price provides a reasonable approximation of exit price.

If there is no quoted price in an active market, then the Sub-Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction. The Sub-Fund recognises transfers between levels of the fair value hierarchy as at the end of the reporting year during which the change has occurred.

- 1. Significant Accounting Policies (continued)
- Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss (continued)

### Fair Value Measurement (continued)

### ii) Collective Investment Schemes

Investment in collective investment schemes includes investing in other Funds (i.e., other Sub-Funds of the Company). However, a Sub-Fund may not invest in another Sub-Fund which itself holds shares in other Sub-Funds. Collective investment schemes outstanding at the end of the year, if any, are listed in each applicable Fund's Statements of Investments.

Units or shares in collective investment schemes will be valued at the latest available unaudited NAV relevant to the collective investment scheme.

### iii) Forward Currency Contracts

A Sub-Fund may enter into forward currency contracts to hedge against exchange rate risk or, in the case of actively managed Sub-Funds, take currency positions reflecting portfolio managers views. A forward currency contract allows the Sub-Funds to purchase or sell a specific currency on a future date at a price set at the time of the contract. Performance may be significantly influenced by movements in foreign exchange rates because currency positions held by a Sub-Fund may not correspond with the currency of the securities invested in.

The unrealised gain or loss on forward currency contracts is calculated as the difference between the contract price and the spot price as at the reporting period end. All changes in fair value are recognised within net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Any realised gains and losses on maturity of forward currency contracts are calculated based on contract basis of the investment in local currency and are included in net gains/(losses) on investment activities at fair value through profit or loss in the Statement of Comprehensive Income.

### iv) Futures contracts

Futures contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily.

Daily fluctuations in the value of a futures contract are recorded as unrealised gains or losses and as realised gains or losses when the position is closed. Realised gains and losses are recognised using the First In First Out ("FIFO") costing methodology. All changes in fair value are recognised within net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

### d) Amortised Cost

Financial assets and financial liabilities other than those at FVTPL are held at amortised cost. The amortised cost of the financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the accumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

#### i) Cash and Cash Equivalents, Bank Overdraft and Margin Cash

Cash comprises current deposits with banks and bank overdrafts. Cash and cash equivalents are short-term highly liquid investments with a maturity date of 3 months or less that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Cash and cash equivalents are held with State Street Custodial Services (Ireland) Limited and are stated at fair value. As at 30 June 2025, margin cash balances are held with J.P. Morgan (30 June 2024: margin cash balances were held with J.P. Morgan) and are included in Note 7. Bank overdrafts are held with State Street Custodial Services (Ireland) Limited and valued at face value, together with accrued interest where applicable. Collateral, if held, is presented on the Statement of Financial Position of the relevant Sub-Fund.

### ii) Debtors and Creditors

Debtors are recognised at fair value plus transaction costs that are directly attributable to their acquisition origination. Creditors are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition origination. They are subsequently measured at amortised cost.

### 1. Significant Accounting Policies (continued)

### e) Right of Offset

Financial assets and financial liabilities are offset and the net amount presented in the Statement of Financial Position when, and only when, the ICAV or the Sub-Funds have a legal right to set off the amounts and intend either to settle on a net basis or to realise the asset and settle the liability simultaneously. Income and expenses are presented on a net basis for gains and losses from financial instruments at fair value through profit and loss and foreign exchange gains and losses. The ICAV's financial assets and financial liabilities are not subject to offsetting, enforceable master netting arrangements and similar agreements.

### f) Investment Income

The Sub-Funds receives investment income from the assets and investments held. The measurement and presentation of the income type is outlined below:

#### i) Dividend income

Dividend income arising on the underlying equity investments of the Sub-Funds is recognised as income of the relevant Sub-Fund on the ex-dividend date. Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

#### ii) Interest income/interest expense

Interest income/interest expense which includes any accretion of discount and amortisation of premiums is recognised as income/expense of the relevant Sub-Fund of the ICAV on an effective interest basis in line with the contractual terms, in the Statement of Comprehensive Income.

### g) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis. Note 5 provides additional details of the fees and expenses of the Sub-Funds.

Expenses arising on the disposal of investments are deducted from the disposal proceeds.

### h) Realised Gains and Losses

Realised gains and losses on sale of investments are calculated based on the average book cost of the investment in local currency and are included in Net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

### i) Unrealised Gains & Losses

Unrealised gains and losses on investments are the difference between the original cost of the investment and its value at the reporting period end and are included in Net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

### j) Taxation

Dividend and interest income received by the Sub-Funds may be subject to withholding tax imposed in the country of origin. Investment income is recorded gross of such taxes and the corresponding withholding tax is recognised as a tax expense. Withholding tax reclaims receivable are recorded as other receivables in the Statement of Financial Position.

Many of the foreign countries in which the Sub-Funds invest have tax laws that indicate that capital gains taxes may be applicable to non-residents, such as the ICAV. Each relevant Sub-Fund realises capital gains or losses whenever it sells securities. If there are capital gains, the Sub-Fund may be subject to a capital gains tax in that underlying market.

### 1. Significant Accounting Policies (continued)

### k) Redeemable Participating Shares

The Sub-Funds issue redeemable participating shares in each Sub-Fund, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back to the relevant Sub-Fund at any time for cash, securities or a combination of cash and securities equal to a proportionate share of the Sub-Fund's Net Asset Value in accordance with the Prospectus.

The Sub-Fund's Net Asset Value per share is calculated by dividing the net assets attributable to the redeemable participating shareholders by the total number of outstanding redeemable participating shares. Investment positions are valued in accordance with the valuation methodology laid out in the Prospectus for the purpose of determining the Net Asset Value per share for subscriptions and redemptions.

### I) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or a financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on purchases and sales of securities and other investments are included in net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income account as incurred. Separately identifiable Depositary transaction costs are borne by the Manager through the TER of the Sub-Funds of the ICAV as detailed in Note 5.

### m) Distribution Policy

Each Sub-Fund may issue either or both distributing share classes and accumulating share classes. The Directors may declare dividends in respect of shares in any distributing class out of net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Sub-Fund. In the case of Sub-Funds with accumulating share classes, the Directors have determined to accumulate all net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Sub-Fund attributable to such accumulating classes and therefore do not intend to declare dividends in respect of shares in such classes.

### n) Significant Accounting Estimates and Judgements

Critical accounting estimates are those which involve the most complex or subjective judgments or assessments. The areas of the ICAV's and Sub-Funds business that typically require such estimates are the determination of the fair value of financial assets and financial liabilities as outlined in Note 1(a). Judgements applied in the preparation of these financial statements relate to the determination of going-concern as the basis of preparation as outlined in Note 1(a), the functional and presentation currency as outlined in Note 1(b), accruals for capital gains tax as discussed in Note 1 (j) and Note 2 and expected credit losses as outlined in Note 1 (c).

Significant accounting estimates used in the preparation of these financial statements relate to the fair value of investments. Details of specific estimates used in these financial statements are included in Note 6 (f). Accounting estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

### Fair value measurement of derivatives and investments not quoted in active market

The Sub-Funds hold investments that are not quoted in active markets, including derivative financial instruments. Fair value of such instruments is determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the ICAV and Sub-Funds may value positions using its own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Investment Managers, independent of the party that created them.

- 1. Significant Accounting Policies (continued)
- n) Significant Accounting Estimates and Judgements (continued)

### Fair value measurement of derivatives and investments not quoted in active market (continued)

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Investment Managers to make estimates. Changes in assumptions about these factors could affect the reported fair values of investments. The Sub-Funds consider observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

### o) Income equalisation

Income equalisation arrangements apply to each Sub-Fund. The arrangements are intended to ensure that the income per share, which is distributed in respect of the distribution period, is not affected by changes in the number of shares in issue during the year. The arrangements have no effect on the NAV of any share class. The calculation of equalisation is based on total accumulated undistributed net income. Income equalisation is included in the proceeds from the issuance of redeemable participating shares and payments for the redemption of redeemable participating shares in the Statement of Changes in Net Assets Attributable to holders of redeemable participating shares.

#### 2. Taxation

The ICAV is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997, as amended (the "TCA"). On that basis, the ICAV is not liable to Irish tax in respect of its income and gains, provided the ICAV is resident for tax purposes in Ireland. The ICAV shall be regarded as resident for tax purposes in Ireland provided it is authorised by the Central Bank of Ireland and it is centrally managed and controlled in Ireland.

However, Irish tax can arise on the happening of a "chargeable event" in the ICAV. A chargeable event arises on any distributions, redemption, repurchase, cancellation, transfer of Shares or the ending of a "relevant period". A relevant period is an eight-year period beginning with the acquisition of the Shares by the shareholder and each subsequent period of eight years beginning immediately after the preceding relevant period. A chargeable event does not include:

- (i) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) An exchange of shares representing one Sub-Fund for another Sub-Fund of the ICAV; or
- (iii) An exchange of shares arising on a qualifying amalgamation or reconstruction of the ICAV with another fund; or
- (iv) Certain exchanges of shares between spouses and former spouses.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D TCA) or in respect of a Shareholder who is neither Irish resident nor ordinarily resident in Ireland at the time of the chargeable event provided that a relevant declaration is in place (in accordance with Schedule 2B of the TCA) and the ICAV is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct.

In the absence of an appropriate declaration, the ICAV will be liable for Irish tax on the occurrence of a chargeable event, and the ICAV reserves its right to withhold such taxes from the relevant shareholders. There were no chargeable events during the period under review.

The ICAV is required to recognise a tax liability when it is probable that the tax laws of foreign countries require a tax liability to be assessed on the Sub-Fund's capital gains sourced from such foreign country, assuming the relevant taxing authorities have full knowledge of all the facts and circumstances. The tax liability is then measured at the amount expected to be paid to the relevant taxation authorities, using the tax laws and rates that have been enacted or substantively enacted by the end of the reporting period. There is sometimes uncertainty about the way enacted tax law is applied to offshore investment funds. This creates uncertainty about whether or not a tax liability will ultimately be paid by the Fund. Therefore, when measuring any uncertain tax liabilities, management considers all of the relevant facts and circumstances available at the time that could influence the likelihood of payment, including any formal or informal practices of the relevant tax authorities.

### 2. Taxation (continued)

Dividends, interest and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by foreign countries from which the investment income/gains are received and such taxes may not be recoverable by the ICAV and its shareholders. Withholding tax and reclaims incurred on dividends are recorded on ex-date. Dividends receivable are shown net of withholding taxes payable, if any, in the Statement of Financial Position. The dividend withholding tax charge for the period ended 30 June 2025 and 30 June 2024 is presented in the Statement of Comprehensive Income.

The ICAV may be subject to taxes imposed on realised and unrealised gains on securities of certain foreign countries in which the ICAV invests. Income/gains are received and such taxes may not be recoverable by the ICAV and its shareholders. Many of these foreign countries have tax laws that indicate that capital gains taxes may be applicable to non-residents, such as the ICAV. Typically, these capital gains taxes are required to be determined on a self assessment basis; therefore, such taxes may not be deducted by the ICAV's broker on a 'withholding' basis. The foreign tax expense, if any, is recorded on an accrual basis and is included in "Capital gains tax" in the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in "Other payables" in the Statement of Financial Position. Capital gains tax for the year ended 30 June 2025 and 30 June 2024 was accrued on gains on Franklin Emerging Markets UCITS ETF, Franklin FTSE Asia ex China ex Japan UCITS ETF, Franklin FTSE India UCITS ETF, Franklin Global Quality Dividend UCITS ETF, Franklin Global Equity SRI UCITS ETF and Franklin MSCI Emerging Markets Climate Paris Aligned UCITS ETF.

The ICAV considers interest and penalties on related tax liabilities to be an inseparable element of the tax liability and accounts for interest and penalties. These amounts would be included within the tax line in the Statement of Comprehensive Income, and the liability, if any, would be included within the income tax liability on the Statement of Financial Position.

In respect of the year ended 30 June 2025 and 30 June 2024, the ICAV has measured uncertain tax liabilities and related interest and penalties with respect to foreign capital gains taxes at Nil. While this represents management's best estimate, the estimated value could differ significantly from the amount ultimately payable.

Pillar Two The Organisation for Economic Co-operation and Development ("OECD") released Pillar Two Model Rules, which target a global 15% minimum tax rate. The OECD continues to release additional guidance on interpretation and application of Pillar Two, and many countries are passing and updating legislation as well as local guidance to comply with Pillar Two. Based on the current available legislation and guidance, the Fund has concluded there will be no material impact on income taxes with respect to Pillar Two for the year ended 30 June 2025. This is because the Fund is widely held and is typically a portfolio investor holding minority stakes in portfolio companies and hence does not prepare consolidated accounts with those companies. The Fund will also qualify as an Investment Fund Excluded Entity for the purpose of the Pillar Two Model Rules. The Fund will continue to evaluate the potential future impacts of Pillar Two and will continue to review and monitor the issuance of additional guidance.

### **Reporting Fund Status**

The ICAV has received confirmation from HM Revenue & Customs (HMRC) in the UK that it has been granted UK Reporting Fund Status with effect from the launch dates of all Sub-Funds for UK tax purposes.

### 3. Share Capital & Net Asset Value per Share

#### Authorised

The authorised share capital of the ICAV is 500,000,000,002 shares of no par value divided into 2 subscriber shares of no par value and 500,000,000,000 redeemable participating shares of no par value. The Directors have the power to issue all of the shares of the ICAV on such terms as they think fit.

### **Subscriber Shares**

The ICAV issued the 2 subscriber shares of no par value at EUR 1 each for the purpose of the registration of the ICAV. The subscriber shares entitle the holders to attend and vote at general meetings of the ICAV but do not entitle the holders to participate in the profits or assets of the ICAV except for a return of capital on a winding-up. They do not form part of the Net Asset Value of the ICAV and are thus disclosed in the financial statements by way of this note only.

### 3. Share Capital & Net Asset Value per Share (continued)

### **Redeemable Participating Shares**

Each of the shares entitles the holder to attend and vote at any general meetings of the ICAV and to participate equally in the profits and assets of the Sub-Fund to which the shares relate, subject to any differences between fees, charges and expenses applicable to different classes. Each shareholder shall have one vote for each whole share held. The liability of the shareholders shall be limited to the amount, if any, unpaid on the shares respectively held by them, and the shareholders shall not be liable for the debts of the Sub-Fund. Minimum creation and redemption amounts are specified in the relevant Supplement for each Sub-Fund. For the years ended 30 June 2025 and 30 June 2024, none of the Sub-Funds had a minimum creation and/or redemption amount.

### 3. Share Capital & Net Asset Value per Share (continued)

The issued share capital, Net Asset Value and Net Asset Value per share as at 30 June 2025 is as follows:

	Franklin AI, Metaverse and Blockchain UCITS ETF USD Accumulating Shares	Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF USD Accumulating Shares	Franklin Emerging Markets UCITS ETF USD Accumulating Shares	Franklin Euro IG Corporate UCITS ETF EUR Distributing Shares	Franklin Euro Short Maturity UCITS ETF EUR Distributing Shares	Franklin Euro Short Maturity UCITS ETF EUR Accumulating Shares	Franklin European Equity UCITS ETF* EUR Accumulating Shares

#### 5. Operating Expenses

#### a) Total Expense Ratio ("TER")

All of the fees and expenses payable in respect of a Sub-Fund are paid as one single fee. This is referred to as the Total Expense Ratio ("TER"). The following fees and expenses will be discharged out of the TER:

- the fees and expenses of the Manager, Auditor, Investment Manager (including the costs and expenses of any
  investment adviser appointed by the Investment Manager), legal advisers, Secretary, Directors fees (see page 119 for
  details of fees paid), Administrator and Depositary;
- the cost of registering any Sub-Fund for sale in any jurisdiction listing and maintaining a listing of Shares on any Listing Stock Exchange;
- the cost of convening and holding Directors' and Shareholders' meetings;
- professional fees and expenses for legal and other consulting services;
- the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and semi-annual reports and other documents to current and prospective investors;
- the costs and expenses arising from any licensing or other fees payable to any Index Provider or other licensor of intellectual property, trademarks or service marks used by the ICAV;
- the fees of any local paying, centralisation, registration or other similar agent (which must be at normal commercial rates):
- all establishment costs of the Fund and the Sub-Funds; and
- such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the ICAV or of any Sub-Fund.

The TER does not include extraordinary costs and certain transaction costs (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Sub-Fund, including duties and charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Sub-Fund's investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Sub-Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to a Sub-Fund or the Fund) as may arise from time to time, which will be paid separately out of the assets of the relevant Sub-Fund. Subject to applicable law and regulation, the Manager or Investment Manager may pay part or all of its fees to any person that invests in or provides services to the ICAV or in respect of any Sub-Fund.

The TER is calculated and accrued daily from the Net Asset Value of each Sub-Fund and payable monthly in arrears. The TER of each Sub-Fund of the ICAV is as listed in the relevant Supplement. If a Sub-Fund's expenses exceed the TER in relation to operating the relevant Sub-Fund, the Manager will cover any shortfall from its own assets.

### 5. Operating Expenses (continued)

- \*\*\*\*\*\*\* The TER decreased from 0.25% to 0.20% effective 28 February 2025.

#### **Directors Fees**

During the year ended 30 June 2025, the Directors earned fees amounting to EUR 53,951 (30 June 2024: EUR 54,104), none of which is outstanding as at period end and the previous year end. The Franklin Templeton Group provides employees to act as Directors of the ICAV (these Directors do not receive a fee).

#### **Independent Auditor's Remuneration**

The remuneration for all work carried out by the statutory audit firm for the year ended 30 June 2025 and 30 June 2024 are as follows:

	30 June	30 June
	2025	2024
	EUR	EUR
Statutory audit	298,588	245,535
Total	298,588	245,535

The fees for the statutory audit of the financial statements disclosed in the table above are exclusive of VAT and inclusive of out of pocket expenses. There were no fees charged for other assurance services or other non-audit services in respect of the current financial year or prior financial year.

#### **Transaction Costs**

Transaction costs are any fees and expenses incurred in buying and selling investments held by the Sub-Funds, e.g., brokerage costs and commissions and correspondence fees for transferring securities or investments or other interests, unless otherwise specified in the relevant Supplements to the Prospectus.

Transaction costs on purchases and sales of equity investments and futures contracts during the year are included in net gain/(loss) on financial assets/liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Transaction costs on the purchase and sale of Corporate Bonds and Government Bonds, are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Separately identifiable Depositary transaction costs are borne by the Manager through the TER of the Sub-Funds of the ICAV.

The Sub-Funds incurred total transaction costs during the years ended 30 June 2025 and 30 June 2024 as follows:

		30 June 2025	30 June 2024
Sub-Fund	Currency	Cost	Cost

<sup>\*</sup> The Sub-Fund terminated post 30 June 2023. Refer to Sub-Funds and Share Classes in General Information for details.

#### 6. Risk Management Policies and Disclosure

#### Introduction and overview

Each of the Sub-Funds of Franklin Templeton ICAV is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: credit and counterparty risk, liquidity risk and market risk (which in turn includes currency risk, interest rate risk and price risk). The ICAV takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in the ICAV's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on the Sub-Funds' performance where it can do so while still managing the investments of the Sub-Funds in a way that is consistent with the Sub-Funds' investment objective and policy.

<sup>\*\*</sup> The Sub-Fund launched post 30 June 2024, therefore there are no comparatives presented. Refer to Sub-Funds and Share Classes in General Information for details.

<sup>\*\*\*</sup> The Sub-Fund terminated post 30 June 2024. Refer to Sub-Funds and Share Classes in General Information for details.

#### 6. Risk Management Policies and Disclosure (continued)

#### Introduction and overview (continued)

The ability of an Index Tracking Sub-Fund (Franklin and Franklin FTSE ranges of Sub-Funds) to achieve significant correlation between the performance of the Sub-Fund and the Index it tracks may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Sub-Fund and the fees and expenses of the Sub-Fund. The Sub-Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Sub-Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Sub-Fund.

For Sub-Funds where investments are actively managed (as listed in the "General Information", page 6), the Investment Manager will use an investment approach that typically involves research such as fundamental analysis, micro and macroeconomic analysis and/or technical analysis rather than seeking to deliver the performance of an Index, because it believes actively selecting investments can deliver a better outcome than owning the market in its entirety. Such Sub-Funds could experience losses if the Investment Manager's judgment about markets, future volatility, interest rates, industries, sectors and regions or the attractiveness, relative values, liquidity, effectiveness or potential appreciation of particular investments made for a Sub-Fund prove to be incorrect.

Risk mitigation techniques applied to Index Tracking Sub-Funds will be different than those traditionally applied to actively managed Sub-Funds. These Sub-Funds seek to achieve a return that corresponds to or tracks the return of an Index or customised benchmark. Index Tracking Sub-Funds are not actively managed and do not attempt to take defensive positions under any market conditions. Therefore, an Index Tracking Sub-Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. Currency and interest rate exposures will also be determined by the Index. Such Sub-Funds' performance could therefore be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

#### a) Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. Each Sub-Fund holding equity investments is directly affected by movements in market prices.

The management of market risk is affected through asset allocation and diversification based on the Sub-Fund's investment objective as well as the Investment Manager's developed investment process. For the actively managed Sub-Funds, this includes in-depth research as well as monthly analysis of invested companies and the macroeconomics of the invested areas. For passively managed Sub-Funds this may include factor based or weight diversification rules built in the customised index that is tracked.

The maximum risk arising from an investment in a financial instrument is determined by the fair value of the financial instruments, except for short positions in derivatives and securities where the loss may potentially be unlimited. The value of market price risk that the Sub-Funds are exposed to at 30 June 2025 and 2024 is the fair value of investments as disclosed in the relevant Sub-Fund's Schedule of Investments.

#### **Price Sensitivity Analysis**

If the price of each equity security held by the Sub-Funds had increased by 10% at 30 June 2025 (30 June 2024: 10%), with all other variables remaining constant, this would have increased the net assets of the Sub-Funds as disclosed in the table below. A 10% decrease at 30 June 2025 (30 June 2024: 10%) would have an equal and opposite effect on the value of the Sub-Funds.

		30 June	30 June
Sub-Fund	Currency	2025	2024
Franklin AI, Metaverse and Blockchain UCITS ETF	USD	1,359,407	375,765

<sup>\*</sup> The Sub-Fund terminated post 30 June 2023. Refer to Sub-Funds and Share Classes in General Information for details.

#### b) Foreign Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds may be denominated in a currency other than the functional currency of the Sub-Funds.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

For the actively managed Sub-Funds, the Investment Manager monitors each Sub Fund's currency exposure on a regular basis and the Investment Manager may attempt to mitigate this risk by using financial derivative instruments ("FDI").

<sup>\*\*</sup> The Sub-Fund launched post 30 June 2024, therefore there are no comparatives presented. Refer to Sub-Funds and Share Classes in General Information for details.

<sup>\*\*\*</sup> The Sub-Fund terminated post 30 June 2024. Refer to Sub-Funds and Share Classes in General Information for details.

#### 6. Risk Management Policies and Disclosure (continued)

### b) Foreign Currency risk (continued)

For passive strategies the foreign currency exposures and corresponding risk are observed through attribution reports. As the strategies are passive there can be no risk mitigation. The foreign currency risk is accepted by managers and shareholders.

A Sub-Fund may use FDIs on behalf of a specific class in order to hedge some or all of the foreign exchange risk for such class. A Sub-Fund that hedges foreign exchange risk for any class may enter into forward currency contracts in order to hedge some or all of the foreign exchange risk for the relevant class. To the extent that hedging is successful, the performance of the relevant class is likely to move in line with the performance of the underlying assets. The use of hedged currency classes may substantially limit holders of the relevant classes from benefiting if the currency of each of these classes falls against the base currency and/or the currency in which the assets of the Sub-Fund are denominated.

The foreign currency risk exposure and currency sensitivity analysis, which detail the approximate increase or decrease in net assets attributable to redeemable participating shareholders of each relevant Sub-Fund if the exchange rate of the base currency increased or decreased by 5% relative to the non-base exposure for each Sub-Fund, as at 30 June 2025 and 2024 are detailed in the tables below, for those Sub-Funds with material exposure.

#### c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

#### 6. Risk Management Policies and Disclosure (continued)

#### c) Interest rate risk (continued)

The ICAV is subject to interest rate risk on any debt securities and cash and may have an indirect exposure to interest rate risk through investments in financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security. On the actively managed fixed income Sub-Funds, the interest rate risk is managed through scenario stress testing. Among the measures considered are the results of a +200 basis points parallel shift in IR curves and the results of a proportional shift of +100% on credit spreads. The outcome of those stress tests and their evolution are observed monthly.

As the passively managed Sub-Funds are tracking equity indices or custom benchmarks, it is considered that the sensitivity of those Sub-Funds to interest rate risk is of a limited relevance. Furthermore, market risk (including interest risk) is generally not mitigated on index tracking Sub-Funds as it is accepted through the intention to track a market index. Market risk is however periodically monitored through observation of stress testing performed on the portfolios of assets.

The interest rate exposure for each Sub-Fund as at 30 June 2025 is as follows:

#### d) Credit risk and Counterparty risk

Credit risk is the probable risk of loss resulting from a borrower's failure to repay a loan or meet its contractual obligations. Investments in equity securities are not exposed to credit risk. The Sub-Funds bear credit risk on any debt securities held. Credit risk generally encompasses default risk, spread risk, counterparty risk and settlement risk. The credit risk of the Sub-Funds' debt securities as at 30 June 2025 and 30 June 2024 is monitored by the Investment Manager.

The Investment Manager may use forward currency contracts to hedge against foreign currency exposure. These have a similar credit or default risk to a regular currency spot transaction. Forward currency contracts are 'Over the Counter' traded and therefore have counterparty risk which arises from the potential failure of counterparties to meet their obligations under the contract or arrangement.

#### 6. Risk Management Policies and Disclosure (continued)

#### d) Credit risk and Counterparty risk (continued)

Counterparty risk is a sub-set of credit risk and is the risk to each party of a contract that the counterparty will not live up to its contractual obligations. The Sub-Funds have exposure to counterparty risk on any bilateral agreement such as over the counter derivatives transactions where both sides face credit risk, (i.e. forward currency contracts).

Derivatives, cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the Sub-Funds with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. The Depositary is therefore not liable in any way for the default of any counterparty.

Franklin Templeton Investment Management Limited, as Investment Adviser, has a Counterparty Credit Committee which meets regularly to review and update a list of approved counterparties, change exposure limits and counterparty approval status. The committee has the authority to block trading with a particular counterparty should they believe that exposure to that particular counterparty is too high. Total firm wide exposures to each counterparty and each counterparties' credit rating, credit default swap spread and share price movements are also monitored and reported to the Trading and Portfolio Management teams on a weekly basis.

As at 30 June 2025, the credit rating for Citibank NA was A+ (30 June 2024: A+) and JPMorgan Securities Inc was AA- (30 June 2024: A+).

The ICAV's Depositary is State Street Custodial Services (Ireland) Limited. Substantially all of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. These are held in a combination of segregated and unsegregated accounts. Bankruptcy or insolvency of the Depositary or of it parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to their investments held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 30 June 2025 is A (30 June 2024: A).

The credit risk of the Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF's debt securities as at 30 June 2025 and 30 June 2024 is summarised as follows:

<sup>\*</sup> Rating source is Standard & Poor's, if unavailable Moody's ratings are used and if unavailable Fitch Ratings are used. In cases where an issuer rating was unavailable the country issue rating was used.

#### e) Liquidity risk

The Sub-Funds' assets generally comprise of highly liquid debt and equity securities. For actively managed Sub-Funds, liquidity is a factor that the Investment Manager considers when investing in any financial instrument. For Index Tracking Sub-Funds, the financial instruments invested in will be determined by the relevant Index tracked.

The main financial liability of the Sub-Funds is the redemption of redeemable participating shares. As the Sub-Funds are open ended, the relevant Sub-Fund is required to redeem shares on request by shareholders at a price equivalent to the Net Asset Value per share, subject to settlement and dealing restrictions laid down in the Prospectus.

The Investment Manager manages each Sub-Fund's liquidity position on a daily basis. Also the Investment Manager is able, through the provisions in the Prospectus, to defer the processing of redemptions of significant size to facilitate an orderly disposition of securities in order to protect the interest of the remaining shareholders. The maximum number of redeemable participating shares available for redemption on any given day can be restricted to 10% of the total number of shares in issue in the relevant Sub-Fund. If the Fund refuses to redeem Shares for this reason, the requests for redemption on such date can be reduced rateably and the redemption requests will be treated as if they were received on each subsequent Dealing Day until all the Shares to which the original request related have been redeemed, provided that the Fund is not be obliged to redeem more than 10% of the number of Shares of a particular Sub-Fund outstanding on any Dealing Day, until all the Shares of the Sub-Fund to which the original request related have been redeemed.

#### 6. Risk Management Policies and Disclosure (continued)

#### f) Fair Value Hierarchy

The ICAV is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

#### 6. Risk Management Policies and Disclosure (continued)

#### f) Fair Value Hierarchy (continued)

The standard requires an entity to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (Level 3), the amendment requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the year split between those recognised in the Statement of Comprehensive Income and recognised through the statement of total recognised gains and losses, purchases, sales issues and settlements. The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Sub-Funds. The Sub-Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Assets and liabilities not carried at fair value are carried at amortised cost, their carrying values are a reasonable approximation of fair value.

The following tables analyse within the fair value hierarchy the Sub-Funds' financial assets and financial liabilities measured at fair value at 30 June 2025.

<sup>\*</sup> Represents net unrealised gain/(loss).

Investments whose values are based on quoted market prices in active markets are classified within Level 1. For the ICAV, these include active listed equities and exchange traded derivatives.

Financial instruments that are not listed but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include bonds.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the year. There were no transfers out of Level 1 into Level 2 during the year ended 30 June 2025 (30 June 2024: None). There were transfers out of Level 1 into Level 3 during the years ended 30 June 2025 and 30 June 2024.

<sup>\*\*</sup> The Sub-Fund launched post 30 June 2024, therefore there are no comparatives presented. Refer to Sub-Funds and Share Classes in General Information for details.

#### 6. Risk Management Policies and Disclosure (continued)

#### f) Fair Value Hierarchy (continued)

#### **Fair Value Estimation**

There were 17 securities with a fair value of USD Nil in Franklin Emerging Markets UCITS ETF that were classified as Level 3 at 30 June 2025 (30 June 2024: 17 securities with a fair value of USD Nil). Alrosa PJSC, Gazprom PJSC, GMK Norilskiy Nickel PAO, Inter RAO UES PJSC, LUKOIL PJSC, Moscow Exchange MICEX-RTS PJSC, Novolipetsk Steel PJSC, PhosAgro PJSC Depositary Receipts, Polyus PJSC, Rosneft Oil Co. PJSC, Severstal PAO, Surgutneftegas PJSC, Surgutneftegas PJSC (preferred stock), Tatneft PJSC and United Co. RUSAL International PJSC. RUSAL International PJSC suspended trading from the Moscow Exchange (MOEX) on 1 March 2022 and resumed trading on 24 March 2022 to local investors but continued to remain inaccessible to all "unfriendly" foreign investors. Given the current market conditions and the inability of the Sub-Fund to access the local Moscow equity market, the Russian investments are valued at zero on 30 June 2025. PhosAgro PJSC GDR and PhosAgro PJSC GDR Reg S continue to be halted by the international exchanges on which these depositary receipts trade and hence were valued at zero on 30 June 2025.

There was 1 security with a fair value of USD 418,650 in Franklin FTSE Asia ex China ex Japan UCITS ETF that was classified as Level 3 at 30 June 2025 (30 June 2024: None). ESR Group Ltd. has a fair value of USD 418,650, that was classified as Level 3.

There were 2 security with a fair value of USD 93,639 Franklin FTSE China UCITS ETF that were classified as Level 3 at 30 June 2025 (30 June 2024: 2 securities with a fair value of USD Nil). Yango Group Co. Ltd suspended trading on the Shenzhen Stock Exchange on 9 June 2023 and delisted on the 16 August 2023 as the company is currently liquidated and hence was valued at USD Nil on 30 June 2025. Hubei Biocause Pharmaceutical Co. Ltd. has a fair value of USD 93,639, that was classified as Level 3.

There were 4 securities with a fair value of USD Nil in Franklin Global Equity SRI UCITS ETF that were classified as Level 3 at 30 June 2025 (30 June 2024: 4 securities with a fair value of USD Nil). PhosAgro PJSC and Polyus PJSC suspended trading from the Moscow Exchange (MOEX) on 1 March 2022 and resumed trading on 24 March 2022 to local investors but continued to remain inaccessible to all "unfriendly" foreign investors. Given the current market conditions and the inability of the Sub-Fund to access the local Moscow equity market, the Russian investments are valued at zero on 30 June 2025. PhosAgro PJSC GDR and PhosAgro PJSC GDR Reg S continue to be halted by the international exchanges on which these depositary receipts trade and hence were valued at zero on 30 June 2025.

There was 1 security with a fair value of USD Nil in Franklin Global Quality Dividend UCITS ETF that was classified as Level 3 at 30 June 2025 (30 June 2024: 1 security with a fair value of USD. Tatneft PJSC suspended trading from the Moscow Exchange (MOEX) on 1 March 2022 and resumed trading on 24 March 2022 to local investors but continued to remain inaccessible to all "unfriendly" foreign investors. Given the current market conditions and the inability of the Sub-Fund to access the local Moscow equity market, the Russian investments are valued at zero on 30 June 2025.

The following table shows the movement in Level 3 of the fair value hierarchy for the year ended 30 June 2025:

	30 June 2025
Franklin FTSE Asia ex China ex Japan UCITS ETF	USD
Opening balance	-
Transfers into level 3	418,650
Closing balance	418,650
	30 June 2025
Franklin FTSE China UCITS ETF	USD
Opening balance	176,112
Realised loss in profit or loss	(781,363)
Unrealised gain in profit or loss	821,392
Sales	(216,141)
Transfers into level 3	93,639

#### g) Global Exposure and Leverage

The Sub-Funds' global exposure and leverage are calculated using the commitment approach and do not exceed 100% of Net Asset Value. The commitment approach converts each Sub-Fund's Financial Derivative Instruments ("FDI") positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future commitments to which it is, or may be obligated.

Any leverage resulting from the use of FDIs and efficient portfolio management techniques are in accordance with the requirements of the Central Bank and will not exceed 100% of the Net Asset Value of the relevant Sub-Fund.

#### 7. Cash and Cash Equivalents

As at 30 June 2025, all cash and cash equivalents and bank overdrafts are held with State Street Custodial Services (Ireland) Limited, with the exception of the margin cash below. The long-term credit rating of State Street Corporation, the ultimate parent of the Depositary, as at 30 June 2025 was A (30 June 2024: A). All margin cash balances were held with J.P. Morgan, whose credit rating as at 30 June 2025 was AA- (30 June 2024: A+).

The following margin cash balances held with broker as at 30 June 2025 and 30 June 2024 are included within cash and cash equivalents in the Statement of Financial Position:

#### 10. Related Party Disclosures

The Directors who are listed on page 3, the Investment Managers, Franklin Advisers, Inc., Franklin Templeton Investment Management Limited, Franklin Templeton Institutional, LLC and Franklin Advisory Services LLC, the Manager, Franklin Templeton International Services S.à r.l., the Swiss Representative, Franklin Templeton Switzerland Limited and the German Information Agent, Franklin Templeton Investment Services GmbH are considered related parties for the purposes of the accounting standards to which the ICAV is subject. Amounts earned by the Investment Manager during the period are recognised as operating expenses within the Statement of Comprehensive Income.

In relation to Franklin European Equity UCITS ETF as at 30 June 2025, EUR 15,063 was payable to Franklin Templeton International Services S.à r.l. for the reimbursement of pre-funded dividend and withholding tax amounts (30 June 2024: EUR Nil).

#### **Transactions with Key Management Personnel**

The interests of the Directors in related parties are as follows:

Joseph Carrier joined Legg Mason, Inc. in 2008 until he resigned in 2023 from Franklin Templeton Investments. Mr. Carrier held various senior appointments including Senior Vice President, Enterprise Risk Management for Franklin Templeton Investments and Chief Risk Officer and Chief Audit Executive for Legg Mason, Inc. He is a U.S. national. Appointed to the Board 23 February 2023.

Joseph Larocque joined Legg Mason, Inc. in 2001 until he resigned in 2019 and was the former Managing Director in charge of Affiliate Strategic Initiatives at Legg Mason. Mr. Larocque is a Director of a Franklin Templeton Luxembourg fund entity. He is a U.S. national. Appointed to the Board 23 February 2023.

Elinor Murray is a Vice President within Global Compliance for Franklin Templeton. Ms. Murray was previously the Managing Director, Head of European Compliance at Legg Mason Global Investors until it was acquired by Franklin Templeton in August 2020. She is a U.K. national. Appointed to the Board 1 November 2023.

Jaspal Sagger is the Head of Global Product Strategy and Development for Franklin Templeton having held a similar role at Legg Mason until it was acquired in August 2020. Mr. Sagger joined Legg Mason in February 2014, as Head of International Product Strategy, and assumed the role of Global Head of Product Strategy and Development in January 2019. Mr. Sagger was appointed Director to the Board of Directors of FTIS on 30 August 2024. He is a U.K. national. Appointed to the Board 23 February 2023.

Craig Tyle is a Senior Advisor for Franklin Templeton. Prior to his current role, Mr. Tyle was Executive Vice President and General Counsel for Franklin Resources, Inc. Mr. Tyle is also a Director of a Franklin Templeton Luxembourg fund entity. He is a U.S. national. Appointed to the Board 27 July 2023.

During the years ended 30 June 2025 and 30 June 2024, other than as disclosed above, no Director or connected person of any Director has any interest, beneficial or non-beneficial, in the share capital of the ICAV, or any material interest in the ICAV or in any agreement or arrangement with the ICAV.

Directors fees charged and payable are disclosed in Note 5.

#### Significant Shareholders

The following tables details the number of shareholders with significant holdings (at least 20%) of the relevant Sub-Fund and the percentage of that holding as at 30 June 2025 and 30 June 2024. The significant shareholders are the Authorised Participants who hold 100% of the Sub-Funds on the primary share register at the reporting date, the majority of which are re-sold on the secondary market. The beneficial ownership of these shares is then passed from the Authorised Participants through the trading of shares on the secondary market.

#### 11. Efficient Portfolio Management

The ICAV may, on behalf of each Sub-Fund, engage in techniques and instruments such as in FDIs, repurchase/reverse repurchase and stock lending agreements for the purposes of efficient portfolio management ("EPM") meaning the reduction of risk, including the risk of tracking error between the performance of a Sub-Fund and the performance of the Index tracked by the relevant passive Sub-Fund, the reduction of costs to the Sub-Funds, the generation of additional capital or income for the Sub-Fund and hedging against market movements, currency exchange or interest rate risks, taking into account the risk profile of each Sub-Fund and the general provisions of the UCITS Regulations. Such transactions may include foreign exchange transactions which alter the currency characteristics of transferable securities held by each Sub-Fund. Where permitted, Sub-Fund may use financial derivative instruments ("FDI") for efficient portfolio management purposes as well as for investment purposes, it is not possible to differentiate between the purposes of the FDI, as such any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income, and details of FDIs have been included in the risks note, please refer to Note 6 for details. No securities lending took place during the year ended 30 June 2025 or 30 June 2024.

#### REMUNERATION DISCLOSURE (UNAUDITED)

#### **Remuneration Policy**

FTIS is a management company licensed to manage UCITS funds and following the implementation of EU Directive 2014/91/EU amending the Undertaking for Collective Investment in Transferable Securities Directive (EU Directive 2009/65/EC) ("UCITS V") on 18 March 2016, it has been subject to the UCITS Remuneration Code.

#### Purpose and scope of the Remuneration Policy Statement

The Remuneration Policy of FTIS has been designed to align the personal objectives of staff with the long term interests of FTIS and the UCITS and AIFs managed by FTIS. It aims at mitigating incentives practices which may encourage employees to take unnecessary risk.

The Policy applies to a certain category of staff called the identified staff which includes members of the Board of Directors, Conducting Officers, members of control functions, risk takers, and any employee with remuneration which takes them into the same bracket as Conducting Officers or risk takers whose activities have a material impact on the risk profiles of the management company or the UCITS it manages.

#### Description of the structure of remuneration

The remuneration includes a fixed and variable component.

**Fixed remuneration:** Fixed remuneration is defined as base salary plus material company provided benefits which may include company cars, company pension contributions, private medical insurance premiums and life assurance premiums.

Base salary levels (including benefits) are set with reference to market benchmarking data (third party industry surveys), which are reviewed regularly.

Fixed salaries are set as a sufficiently high proportion of the total remuneration so that FTIS is able to operate a full flexible bonus policy, including the possibility to pay no bonus.

**Variable remuneration:** Variable remuneration is defined as annual bonuses paid under the Annual Incentive Plan (AIP), Long Term Awards in the form of performance share grants and Sales Bonus payments. Bonus levels are set with reference to overall corporate and business unit performance as well as individual performance achieved in FTIS.

#### Remuneration

Franklin Templeton International Services S.à r.l. ("FTIS"), as UCITS licensed management company (the "Management Company") has a remuneration policy (the "Policy") in place which applies to all UCITS funds (each a "UCITS" and together the "UCITS") under its management. The Policy has been designed to discourage excessive risk taking, integrating in its

#### Remuneration

performance management systems risk criteria specific to the business units it covers. The policy has a governance structure aimed at preventing internal conflicts of interest.

There are defined procedures in place for the creation, update, review and approval of the Policy as well as for communication and implementation of the Policy. Senior Management, Human Resources, Compliance and other functions are all involved in this process and the Policy is approved by Senior Management and the Board of Directors of the Management Company.

Fixed remuneration is defined as base salary plus other benefits which may include pension contributions, life assurance premiums or private medical insurance premiums. Levels of fixed remuneration are set with reference to job complexity, level of responsibility, performance and market benchmarking data. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses, long term awards in the form of performance share grants or sales bonus payments. Levels of variable remuneration are set with reference to overall corporate and business unit performance as well as individual performance.

The full Policy is available at the registered office of the Management Company. Quantitative information relevant to the Franklin Templeton Investment Services is outlined below:

Total amount of fixed remuneration paid by FTIS and its delegates during the year ended 30 September 2024*,**,****.	EUR 2,321,126
Total amount of variable remuneration paid by FTIS and its delegates during the year ended 30 September 2024*,**,****.	EUR 1,974,370
Number of staff of FTIS and in its delegates as at 30 September 2024.	601
Total amount of compensation paid by FTIS and its delegates to Senior managers during the year ended 30 September	
2024*,**,***.	EUR 1,137,148

# SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR") AND TAXONOMY REGULATION DISCLOSURES (UNAUDITED)

### Transparency of the promotion of environmental or social characteristics and of sustainable investment objectives in periodic reports

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088, the "SFDR") requires the ICAV to include a description in its periodic reports of the extent to which any fund classified pursuant to Article 8 of the SFDR (an "Article 8 Fund") has met its environmental or social characteristics or classified pursuant to Article 9 of the SFDR (an "Article 9 Fund") has met its sustainable investment objective. The SFDR also empowers the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively "ESAs") to develop draft regulatory technical standards ("RTS") to specify the information and presentation format in the periodic reports. The following SFDR Article 8 Funds' and Article 9 Funds' periodic disclosures have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023. The asset classifications in the following disclosures are based upon MSCI and may differ to the classification of the securities in the Schedule of Investments.

The disclosures for each classification are outlined as follows:

Sub-Fund name	SFDR classification
Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF	Article 8
Franklin Euro IG Corporate UCITS ETF	Article 8
Franklin Euro Short Maturity UCITS ETF	Article 8
Franklin Future of Food UCITS ETF	Article 8

Franklin LibertyShares ICAV Annual Report 563

### Franklin Catholic Principles Emerging Markets Sovereign Debt UCITS ETF (the "Fund")

Legal Entity Identifier: 254900HUXLPRCSWYJV17

#### Environmental and/or social characteristics

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES ⋈ NO ☐ It promoted Environmental/Social (E/S) ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 0.00% of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective ☐ It made sustainable investments with a ☑ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

The reduction of greenhouse (GHG) emissions in national economies:

The investment policy of the Fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Fund's performance and that of the Index. The Index is based on the ICE BofA Diversified Emerging Markets External Debt Sovereign Bond Index (the "Parent Index") and is comprised of US Dollar- and Euro-denominated sovereign bonds issued by emerging market countries. Index Securities are issued by governmental issuers, including government agencies and quasi sovereigns. The Index excludes securities from the Parent Index issued by countries that do not meet certain Roman Catholic principles, as identified by the Index Provider and adjusts security weightings relative to the Parent Index so as to reduce the overall carbon footprint of the Index relative to the Parent Index.

The Index starts with the investment universe of the Parent Index and excludes the bonds issued by countries which score poorly on the following criteria which have been identified by the Index Provider as being Roman Catholic principles including: care for the planet (i.e. reduction of greenhouse gas emissions) based on environmental, social, governance ("ESG") ratings data provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm and the Emissions Database for Global Atmospheric Research ("EDGAR"), a multipurpose, independent, global database of anthropogenic emissions of greenhouse gases and air pollution.

The Investment Manager engaged with the issuers on topics related to obligatory Principal Adverse Impact (PAI) indicator #15 (GHG Intensity).

• Good governance practices for countries (including but not limited to rule of law and prevention of corruption) and social justice (including but not limited to political stability, political rights and freedoms and the abolition of the death penalty):

The Investment Manager monitored the issuers in regard to various exclusionary criteria threshold including Control of Corruption, Rule of Law, Government Effectiveness, Political Stability, Regulatory Qualify, Political Rights, Civil Liberty, Political Freedom and Death Penalty. The commitment to not invest into issuers that do not pass the listed exclusions was met. The Investment Manager conducted a series of meetings with the issuers on topics related to obligatory PAIs #16 (Investee countries subject to social violations), and optional social PAIs #18 (Income inequality) to #24 (Rule of Law) within the Fund.

#### Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

Exposure to the principal adverse impacts (the "PAIs") indicators compared to the ICE BofA Diversified Emerging
Markets External Debt Sovereign Bond Index. Please refer to the values displayed in the section "How did this
financial product consider principal adverse impacts on sustainability factors?" which represent the performance of
the indicators as of the reference period.

#### … And compared to previous periods?

Please note that due to a change in methodology in 2024, PAIs indicators only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the four quarters in the reference period.

Exposure to the PAI indicators is representing the similar result in comparison to the previous year. The mandatory PAI #15 representing GHG intensity for 2024 disclosure was 650.97 tCO2e per million Euro revenue, while 2025 disclosure was 586.31 tCO2e per million Euro revenue.

Another mandatory PAI #16 representing investee countries subject to social violations for 2024 disclosure indicated no violating countries, the same as for 2025 disclosure which indicated no violators.

The Fund also monitors the additional PAIs. Additional PAI #18 representing the average income inequality score for 2024 disclosure average score was 42.11, while for 2025 disclosure average score is 41.80.

PAI #19 representing average freedom of expression score for 2024 disclosure was 61.29, while for 2025 disclosure average score is 62.29.

Another additional PAI #20 representing average human rights performance for 2024 disclosure performance was 0.59, while for 2025 disclosure performance is 0.60.

PAI #21 representing average corruption score for 2024 disclosure average score was 45.79, while for 2025 disclosure average is 45.58.

PAI #22 representing non-cooperative tax jurisdictions for 2024 disclosure was 4.94%, while for 2025 disclosure is 4.71%.

Additional PAI #23 representing average political stability score for 2024 disclosure was 6.38, while for 2025 disclosure average score is 6.84.

PAI #24 representing average rule of law score for 2024 disclosure was 0.10, while for 2025 disclosure average score is 0.09.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. Consistent with its intentions, as set out in the Supplement, the Fund did not commit to make sustainable investments.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. Consistent with its intentions, as set out in the Supplement, the Fund did not commit to make sustainable investments.

### -How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. Consistent with its intentions, as set out in the Supplement, the Fund did not commit to make sustainable investments.

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. Consistent with its intentions, as set out in the Supplement, the Fund did not commit to make sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

PAI Indicators were considered on two levels:

a) Restricting investable universe

PAIs were applied to remove from the investable universe investees violating social norms (PAI #16), human rights (social PAI #20), corruption norms (social PAI #21) and rule of law (social PAI #24).

b) Guiding thematic engagement

The Investment Manager, due to the obligatory engagement, is conducting a series of meetings with 5% of worst-scoring issuers, based on their exposure to obligatory PAIs #15 (GHG Intensity), PAIs #16 (Investee countries subject to social violations), and optional social PAIs #18 (Income inequality) to #24 (Rule of Law) within the Fund.

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
Colombia Government International Bond 7.375% 09/18/2037	Government Bonds	4.62%	Colombia
Romanian Government International Bond 5.25% 05/30/2032 REG S	Government Bonds	4.48%	Romania
Chile Government International Bond .555% 01/21/2029	Government Bonds	4.14%	Chile

Chile Government International Bond 1.44% 02/01/2029	Government Bonds	2.14%	Chile

#### What was the proportion of sustainability-related investments?

Not applicable. Consistent with its intentions, as set out in the Supplement the Fund did not commit to make sustainable investments.

#### Asset allocation describes the share of investments in specific

assets

#### What was the asset allocation?

94.52% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (5.48%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds).

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison			
	2025	2024	2023	
Investment Category	Proportion of Investments	Proportion of Investments	Proportion of Investments	
#1 Aligned with E/S characteristics	94.52%	95.00%	92.51%	
#2 Other	5.48%	5.00%	7.49%	
#1A Sustainable	N/A	N/A	N/A	
#1B Other E/S characteristics	94.52%	95.00%	92.51%	
Taxonomy-aligned	N/A	N/A	N/A	
Other environmental	N/A	N/A	N/A	
Social	N/A	N/A	N/A	

#### In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government Bonds	94.52%
Top sub-sector	% of Assets
Government Bonds	94.52%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

П	Yes	
	□ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable. Consistent with its intentions, as set out in the Supplement the Fund did not commit to make sustainable investments

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

Not applicable. Consistent with its intentions, as set out in the Supplement the Fund did not commit to make sustainable investments.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 5.48% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

- 1. To meet the environmental and social characteristics of the Fund, the Investment Manager did closely track the parent Index. The Index considered both environmental characteristics (GHG emissions) and social characteristics (corruption control, rule of law, government effectiveness, political stability, civil liberties, political freedom and no death penalty) in its composition.
- 2. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. The Fund is passive and tracks the Index with minimal tracking error.

Further information in respect of the Index, including its rules and performance, is available at following link <a href="https://indices.ice.com/">https://indices.ice.com/</a> by entering the Index identifier (EMCV) in the "Index" box in the "Index Snapshot" section. The components of the Index are available at: <a href="https://indices.ice.com/publications">https://indices.ice.com/publications</a> by entering the Index identifier on the "ETF Benchmarks" tab.

The ICE Catholic Principles ESG Emerging Markets External Sovereign Index (the "Index") is the reference (and only) benchmark for the Fund.

The broad market index, the ICE BofA Diversified Emerging Markets External Debt Sovereign Bond Index (Parent Index), excludes all constituent countries that meet any of the following screening criteria based on Sustainalytics ESG ratings data, or if they are not covered by Sustainalytics:

Sustainalytics field name-code Exclusionary criteria threshold

- Death Penalty (251116151799) "Retentionist"

The carbon metric for the Parent Index is calculated based on the average of the CO2 per capita for each country in tons of CO2. If the Index carbon metric is at least 30% below that of the Parent Index no further adjustment is necessary. If the Index carbon metric is less than 30% below that of the Parent Index, the country weights are adjusted, subject to the 10% country cap, to achieve a 30% reduction. The CO2 per capita data is based on the dataset published by Emissions Database for Global Atmospheric Research ("EDGAR Carbon Data Report"). The data is refreshed annually in December, with the new data used at the year-end rebalancing for the January constituents.

The Index removes sovereign countries violating Catholic governance and social norms and rebalances portfolio composition to achieve lower GHG emissions.

How did this financial product perform ...

# Franklin Euro IG Corporate UCITS ETF (the "Fund")

Legal Entity Identifier: 254900LQFNBJ2SFDFA22

#### Environmental and/or social characteristics

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 promoted Environmental/Social (E/S) ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 32.10% of sustainable investments with an environmental objective in economic in economic activities that qualify as environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 35.60%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Manager's acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2,3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 485.34, while for the benchmark it was 791.17. The average Scope 1 + 2 GHG intensity for the Fund was 46.03, compared to 110.79 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

To further promote these characteristics, the Investment Manager engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Manager has actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 40.53%, compared to 40.27% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 14.22% for the Fund and 13.80% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager considers stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics.

With respect to the PAI indicator 12, Investment Manager views the difference as tolerable, particularly given that this factor is subject to data quality.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the Bloomberg Euro Aggregate
  Corporate Index. Please refer to the values displayed in the section "How did this financial product consider principal
  adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference
  period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias
  in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset
  BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

#### … And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 29.18%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 24.52%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 34.76%, while the average allocation increased to 32.10% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 21% of the portfolio in sustainable investments as stipulated in precontractual disclosure.

During both reference periods, the Fund maintained its level of investment in Environmental Champions. As of 30 June 2024, the average allocation to Environmental Champions stood at 36.50%, while throughout the fiscal year ending on 30 June 2025, the average allocation was 35.60%. During both reference periods, the Investment Manager has been active in the field of sustainability engagement, with 109 issuers engaged in the previous reference period and 73 in the current reference period.

Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- · The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- · The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- · Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport including electric vehicles, affordable housing, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

An example is the green bond issued by SUEZ, a leading French company specializing in water and waste management. The company is one of the global leaders in environmental services, particularly in drinking water and wastewater treatment, solid waste management, recycling, and circular economy solutions.

This bond has contributed to achieving significant environmental results, including the avoidance of approximately 3,456,968 tonnes of  $CO_2$  equivalent emissions and the generation of 1,584,604 MWh of renewable energy annually. The initiatives supported by this financing have enabled the collection, treatment, and disposal of 6,257,093 tonnes of waste per year, benefiting more than 70 million people.

This green bond demonstrates how SUEZ leverages targeted sustainable financing to deliver measurable environmental benefits, enhance resource management, and improve quality of life, supporting the transition to a more sustainable and resilient future.

Another example of a bond supporting renewable energy development is the green bond issued in 2024 by Ørsted. Projects financed by the bond proceeds have contributed to achieving a total renewable energy capacity of 13 GW. Beyond advancing scalable renewable energy solutions that generate green energy and reduce emissions throughout the asset life cycle, Ørsted's bond proceeds also deliver a net-positive impact on biodiversity and provide tangible benefits to local communities.

One notable project funded is the launch of the Hornsea 3 Community Benefit Fund. Prior to its launch, Ørsted engaged with over 500 local stakeholders, whose feedback shaped the fund's criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund awarded GBP 249,000 to 21 local organizations aiming to enhance community well-being and resilience. Funded projects include educational programs, environmental conservation efforts, and initiatives to improve public health and social cohesion.

Investing in this green bond supports Ørsted's sustainable investment objectives by promoting renewable energy production, reducing greenhouse gas emissions, minimizing economic activities' impact on biodiversity, and fostering social integration and community development.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the 'DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and exclude such issuers from the investment universe.

A second proprietary tool, the ESG Credit App ranked corporate issuers by their greenhouse gasses emissions and greenhouse gas intensity using various points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

When deploying funds to sustainable investments, especially the 21% of portfolio of the Fund committed towards environmental and social objectives, the Investment Manager applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

### --How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Manager reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Manager ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and

Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Manager to be Environmental Champions. Environmental champions were identified using proprietary ESG rankings: the ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories.

Restricting Fund's investable universe

Issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
Ceska Sporitelna AS 5.737% 03/08/2028 *FIXED TO FLOAT* REG S	Financials	1.64%	Czech Republic

#### What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 32.10%.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

98.86% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.14%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day to day requirements of the Fund, as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 98.86% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 32.10% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

Entertainment	1.62%
Multi-Utilities	1.59%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.71%.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

The share of socially sustainable Investments was 7.39%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 1.14% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management purposes, or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 98.86% portion, where the Investment Manager have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
- 3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
- 4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Not applicable.

# Franklin Euro Short Maturity UCITS ETF (the "Fund")

Legal Entity Identifier: 549300WLCPUDYKVK0X09

#### **Environmental and/or social characteristics**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES ⋈ NO 00 □ It promoted Environmental/Social (E/S) ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 35.52% of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 49.87%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1,2,3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 456.19, while for the benchmark it was 835.72. The average Scope 1 + 2 GHG intensity for the Fund was 25.81, compared to 75.93 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regard stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries for the Fund was 170.26, while the benchmark was 184.55. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 194.13.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 42.07%, compared to 39.76% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 13.67% for the Fund and 13.96% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider stronger performance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 20.40%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the ICE BofA 0-1 Year Euro Broad
  Market Index. Please refer to the values displayed in the section "How did this financial product consider principal
  adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference
  period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias
  in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset
  BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

#### … And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments with a lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 30.17%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 28.19%.

Overall, the percentage of investment in green, social and sustainable bonds (Article 8) on 30 June 2024 was 37.14%, while the average allocation decreased to 35.52% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 11% of the portfolio in sustainable investments as stipulated in precontractual disclosure.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 41.89%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 49.87%.

At the end of the previous reference period, the Fund had a 0.27% exposure to excluded sectors or activities subject to additional exclusions. If, after purchase, a security's revenue from these sectors exceeded the limits defined in the prospectus, a divestment plan was initiated to sell the security in a timely manner, while acting in the best interest of shareholders. These securities were subsequently sold.

By the close of the current reference period, the Fund did not have any exposure to excluded sectors or activities subject to additional exclusions.

During both reference periods, the Investment Managers have been active in the field of sustainability engagement, with 99 issuers engaged in the previous reference period and 73 in the current reference period.

Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

The efficient use of energy, raw materials, water, and land;

- · The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- · Tackling inequalities and fostering social cohesion;
- Social integration:
- · Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport including electric vehicles, affordable housing, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

AlB's Green Bond financing has played a key role in Ireland's Deposit Return Scheme (DRS), launched in February 2024 to support circular economy goals. It also helps to meet environmental targets such as the EU's Single-Use-Plastic directive and the national goal of collecting 90% of plastic drinks containers by 2029. The scheme adds a refundable deposit to drink containers, encouraging returns via Reverse Vending Machines (RVMs) installed in 180 Lidl's stores across the country. By September 2024, Lidl's contribution involved handling 100 million recurrent bottles and cans, issuing over €17 million back to customers. Nationally, the scheme saw more than 500 million containers returned, significantly advancing environmental targets. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of waste and the development of a circular economy.

Another illustrative example is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the efficient use of energy and the reduction of greenhouse gas emissions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from MSCI to identify issuers involved in harmful economic activities and/or controversies. Issuers deemed to violate PAI #7 (activities negatively affecting biodiversity-sensitive areas), #10 (violation of the UN Global Compact principles and the principles of the OECD Guidelines for Multinational Enterprises), and #14 (exposure to controversial weapons) were excluded from the Fund's investment universe.

The Investment Managers also used the Energy and Environmental Transition Index ("EETI") which ranks the remaining issuers in the Fund's investment universe according to their GHG emissions and intensity. Issuers falling within the bottom 20% of their peer groups with respect to PAI #1 (GHG emissions) and #3 (carbon footprint) (for corporates) and PAI #15 (GHG intensity) (for sovereigns) were excluded from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties (PAI #16) and/or corruption.

When deploying funds to sustainable investments, especially the 11% of portfolio of the Fund committed towards environmental and social objectives, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

## -----How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators, including PAIs and other data points deemed by the Investment Managers as proxies for adverse impact, were used to:

- a) remove issuers that were considered to do significant harm from the portfolio; and
- b) inform the Investment Managers about the risk associated with adverse impact and take appropriate action that included due diligence, qualitative scrutiny and/or engagement (for details of an engagement see the "Principal Adverse Impact" and "Investment Strategy of the Fund" sections of this annex).

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects scored well on PAIs linked to GHG emissions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- · Identifying best-in-class issuers;
- · Restricting Fund's investable universe; and
- · Guiding thematic engagement

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various references that included energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO2e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi target.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

#### What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 35.52%.

#### Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

99.02% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.98%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds).

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 35.52% of its portfolio in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison			
	2025	2024	2023	
Investment Category	Proportion of Investments	Proportion of Investments	Proportion of Investments

#2 Other	0.98%	1.66%	5.14%	
#1A Sustainable	35.52%	37.14%	22.38%	
#1B Other E/S characteristics	63.50%	61.20%	72.48%	
Taxonomy-aligned	N/A	N/A	N/A	
Other environmental	28.19%	30.17%	20.84%	
Social	7.33%	6.97%	1.54%	

#### In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	65.33%
Financials	23.28%
Industrials	3.02%
Consumer Discretionary	2.30%
Health Care	1.70%
Utilities	1.47%
Real Estate	0.95%
Communication Services	0.69%
Consumer Staples	0.21%
Information Technology	0.05%
Top sub-sector	% of Assets
Government Bonds	65.33%
Banks	17.81%
Financial Services	2.33%
Insurance	1.78%
Automobiles	1.70%
Capital Markets	1.37%
Electric Utilities	0.85%
Real Estate Management & Development	0.83%
Health Care Equipment & Supplies	0.80%
Pharmaceuticals	0.78%
Electrical Equipment	0.74%
Machinery	0.61%
Diversified Telecommunication Services	0.61%
Automobile Components	0.60%
Air Freight & Logistics	0.55%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

П	Yes	
_	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28.19%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

The share of socially sustainable Investments was 7.33%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.98% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

No minimum environmental and/or social safeguards have been put in place.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
- 3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
- 4. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAI metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Not applicable.

# Franklin Future of Food UCITS ETF (the "Fund")

Legal Entity Identifier: 254900T2UOKB4G772S89

#### Environmental and/or social characteristics

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 promoted Environmental/Social (E/S) ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 37.63% of sustainable investments with an environmental objective in economic in economic activities that qualify as environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and/or social characteristics by replicating the Solactive Sustainable Food Index (the "Index"), which is designed to provide exposure to those companies related to the food industry that are implementing sustainable methods and processes. Companies within the index were required to make a positive contribution to a number of the most relevant UN Sustainable Development Goals including SDG 2 (Zero Hunger), SDG 9 (Industry, Innovation & Infrastructure), SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water) or SDG 15 (Life on Land). Additionally, any companies that were an obstacle to any of the 17 UN SDGs were excluded from the index and the Fund.

The index promoted environmental characteristics by excluding companies that had exposure or derived revenue from activities including fossil fuels, activities that negatively affected biodiversity or any activity that was causing harm to the environment. Companies with higher-than-average carbon emissions compared with their peer group were also excluded. 24.07% of the total Fund was made of sustainable investments with an environmental objective.

The index also promoted social characteristics by excluding companies that were involved in the production of weapons or activities such as alcohol, gambling, adult entertainment or tobacco. Any company that was in violation of international standards such as the UN Global Compact (UNGC) was also excluded from the index. Any company where there was no female representation on the Board was also excluded from the index. 13.56% of the total Fund was made of sustainable investments with a social objective.

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

- 1) At the end of the reporting period, the % of the portfolio contributing to the UN SDGs was 100%.
- 2) At the end of the reporting period, the % of the portfolio aligned with environmental or social characteristics was 99.80%.

	Sustainability KPI historical comparison			
	2025		2024	
Sustainability KPI Name	Value	Benchmark	Value	Benchmark
The percentage of the portfolio contributing to the UN SDGs named below in the response to "What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives".	100.00%	72.90%	100.00%	91.76%
The percentage of the portfolio aligned with E/S characteristics identified above in the response to "What environmental and/or social characteristics are promoted by this financial product?".	99.80%	75.26%	99.84%	71.97%

#### … And compared to previous periods?

The general sustainability indicators are in line with those in the previous period. Note that Benchmark values are based on the Parent Index

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to promote the provision of products or services related to the sustainable production of food. The companies were constituents of the index which is a diversified equity benchmark consisting of companies that through their innovative methods and processes are creating a sustainable food ecosystem. Companies were also required to be making a positive contribution a number of relevant UN SDGs. The benchmark also excludes companies incompatible with specific environmental and social value screens and contains companies with strong sustainability profiles. The sustainable investments were also able to generate revenue with an environmental or social objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 15% of the Fund was invested in securities that can be defined as sustainable with an environmental objective. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 24.07% of the Fund's securities were invested in sustainable investments with an environmental objective.

Although the Fund did not have sustainable investment as its objective, a minimum of 5% of the Fund was invested in securities that can be defined as sustainable with a social objective. These were securities that through their products and services contributed to a social objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 13.56% of the Fund's securities were invested in sustainable investments with a social objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria including the following:

- No ties to controversial weapons
- Less than 1% of revenue from thermal coal
- Less than 5% of revenue from tobacco related activities
- Is not a tobacco producer
- Not involved in any serious ESG Controversies.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

At the end of the reporting period, the percentage of companies that were deemed to be a significant obstructor to any of the SDGs was 0%.

Additionally, there were no companies with a governance of score of D or below included within the Fund.

## ----How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (#4)
- Exposure to negatively affecting biodiversity-sensitive areas (#7)
- Violations of UN Global Compact Principles (#10)
- Lack of Board Gender Diversity (#13)
- Exposure to controversial weapons (#14)

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Please see the response to "How were the indicators for adverse impacts on sustainability factors taken into account?"

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

#### What were the top investments of this financial product?

#### What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 37.63%.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

99.80% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.20%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 37.63% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison	
	2025	2024
Investment Category	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	99.80%	99.84%
#2 Other	0.20%	0.16%
#1A Sustainable	37.63%	35.89%
#1B Other E/S characteristics	62.17%	63.95%
Taxonomy-aligned	N/A	N/A
Other environmental	24.07%	27.70%
Social	13.56%	8.19%

#### In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Staples	28.52%
Materials	27.22%
Industrials	23.83%
Utilities	9.16%
Health Care	8.54%
Information Technology	1.59%
Energy	0.94%
Top sub-sector	% of Assets
Chemicals	22.97%
Machinery	18.87%
Food Products	13.15%
Consumer Staples Distribution & Retail	8.77%
Water Utilities	8.58%
Pharmaceuticals	8.30%
Containers & Packaging	4.25%
Household Products	3.33%
Personal Care Products	3.27%
Industrial Conglomerates	1.86%
Building Products	1.66%
Electronic Equipment, Instruments & Components	1.59%
Construction & Engineering	1.38%
Oil, Gas & Consumable Fuels	0.94%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

П	Yes	
_	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

#### What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 24.07% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 13.56%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.20% and consisted primarily of liquid assets or issuers for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental and social characteristics of the Fund. Additionally, the ESG data provider reviewed all stocks within the parent index to ensure that securities that were included in the Fund benchmark made a positive contribution to the specified UN SDGs. Any security that was deemed to be a major obstructor to any UN SDG was not included in the Fund benchmark.

The index is reviewed and rebalanced semi-annually and all securities were assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensured that the Fund continued to comply with the index methodology and analysed the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensured that the investments of the Fund continued to closely track the Index, thereby ensuring alignment with ESG characteristics of the Index.

Securities that failed the eligibility criteria of the index were deleted at the rebalance and divested from the Fund.

Proxy voting is carried out across our entire ETF range. Proxy voting on Franklin Future of Food UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. For further information on the Index, please refer to the Index methodology at

https://www.solactive.com/documents/equity-index-methodology

#### How does the reference benchmark differ from a broad market index?

Broad market indices are market capitalisation weighted with no exclusion criteria beyond size and investability. The index is focused on companies that are employing sustainable practices and utilising technology and demonstrating innovation within the food industry as well as mitigating the damage caused to the environment by traditional methods of food production. Index weights are also adjusted by a company's contribution to the UN Sustainable Development Goals. The index methodology also includes a range of value-based social and environmental exclusions as well as exclusions of companies which have a poor level of governance and those companies which are in violation of international standards including the UN Global Compact.

#### **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 promoted Environmental/Social ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 18.99% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy П with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy with a social objective ☐ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and/or social characteristics by replicating the Solactive Sustainable Health and Wellness Index-NR (the "Index"). which is designed to provide exposure to those companies that are delivering sustainable products and services related to health and wellness globally. Companies within the index were required to make a positive contribution to UN Sustainable Development Goal 3 (Good Health and Wellbeing). Additionally, any companies that were a major obstacle to any of the 17 UN SDGs were excluded from the index and the Fund.

The index promoted environmental and social characteristics by excluding companies that had exposure or derived revenue from activities including fossil fuels, the production of weapons or activities such as alcohol, gambling, adult entertainment or tobacco. Additionally, any company that was in violation of international standards such as UNGC or was involved in serious ESG controversies were also excluded from the Fund.

18.99% of the total Fund was made up of sustainable investments with a social objective.

#### Sustainability indicators measure how

the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

- 1) At the end of the reporting period, the % of the portfolio contributing to the UN SDG 3 (Good Health and Wellbeing) was
- 2) At the end of the reporting period, the % of the portfolio aligned with environmental or social characteristics was 99.88%.

	Sustainability KPI historical comparison			
	2025		2024	
Sustainability KPI Name	Value	Benchmark	Value	Benchmark
The percentage of the portfolio contributing to the SDG 3 (Good Health and Wellbeing) named below in the response to "What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives".	100.00%	50.40%	100.00%	60.58%
The percentage of the portfolio aligned with E/S characteristics identified above in the response to "What environmental and/or social characteristics are promoted by this financial product?".	99.88%	75.26%	99.89%	81.00%

#### … And compared to previous periods?

The general sustainability indicators are in line with those in the previous period. Note that Benchmark values are based on the Parent Index.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to fund and promote the sustainable provisions of products and services related to good health and wellbeing. The companies were constituents of the Index which is a diversified equity benchmark consisting of companies that were utilising technology and demonstrating innovation within the healthcare industry or companies that were enabling access to care, health or wellness provision for a wide range of consumers including the elderly.

Companies were also required to be making a positive contribution to UN SDG 3 (Good Health and Wellbeing). The benchmark also excludes companies incompatible with specific environmental and social value screens and contains companies with strong sustainability profiles. The sustainable investments were also able to generate revenue with an environmental or social objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 15% of the Fund was invested in securities that can be defined as sustainable with a social objective. These were securities that through their products and services contributed to a social objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 18.99% of the Fund's securities were invested in sustainable investments with a social objective.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria based on business activities including the following:

- · Controversial Weapons
- Conventional Weapons
- Violations of international standards including UNGC and OECD
- Tobacco, Adult Entertainment, Alcohol or Gambling
- Fossil Fuels
- Activities causing environmental harm
- Activities having a negative effect on biodiversity.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

At the end of the reporting period, the percentage of companies that were deemed to be a significant obstructor to any of the SDGs was 0%.

Additionally, there were no companies with a governance of score of D or below included within the Fund.

## ----How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (#4)
- Exposure to negatively affecting biodiversity-sensitive areas (#7)
- Violations of UN Global Compact Principles (#10)
- Lack of Board Gender Diversity (#13)
- Exposure to controversial weapons (#14)

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Please see the response to "How were the indicators for adverse impacts on sustainability factors taken into account?"

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 18.99%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.12% and consisted primarily of liquid assets or issuers for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental and social characteristics of the Fund. Additionally, the ESG data provider reviewed all stocks within the parent index to ensure that securities that were included in the Fund benchmark made a positive contribution to UN SDG 3. Any security that was deemed to be a major obstructor to any UN SDG was not included in the Fund. Companies with the worst performance in terms of governance (score of D or below) were eliminated from the index. Additionally, only companies with female representation on their respective Boards were included.

The index is reviewed and rebalanced semi-annually and all securities were assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensured that the Fund continued to comply with the index methodology and analysed the investments exposure at a portfolio level for possible adverse impact through the Index tracking. The Investment Manager ensured that the investments of the Fund continued to closely track the Index, thereby ensuring alignment with ESG characteristics of the Index.

Securities that failed the eligibility criteria of the Index were deleted at the rebalance and divested from the Fund.

# How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. For further information on the Index, please refer to the Index methodology at

https://www.solactive.com/documents/equity-index-methodology

# How does the reference benchmark differ from a broad market index?

Broad market indices are market capitalisation weighted with no exclusion criteria beyond size and investability. The Index is focused on companies that are employing sustainable practices and utilising technology and demonstrating innovation within the food industry as well as mitigating the damage caused to the environment by traditional methods of food production. Index weights are also adjusted by a company's contribution to the UN Sustainable Development Goals. The Index methodology also includes a range of value-based social and environmental exclusions as well as exclusions of companies which have a poor level of governance and those companies which are in violation of international standards including the UN Global Compact.

# Franklin MSCI China Paris Aligned Climate UCITS ETF (the "Fund")

Legal Entity Identifier: 254900G70W062PBB4G48

# Environmental and/or social characteristics

### Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that

00

☐ YES

contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

# Did this financial product have a sustainable investment objective?

☐ It made sustainable investments with an

environmental objective: 0.00%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made sustainable investments with a social objective: 0.00%

- ⊠ NO
  - It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13.00% of sustainable investments
    - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
    - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
    - □ with a social objective
  - ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics by replicating the MSCI China Climate Paris Aligned Net Total Return Index (the reference index), designed to meet the minimum requirements for EU Paris Aligned Benchmarks (EU PABs). The Fund invested in a portfolio of large and mid-cap equity holdings in China that included all or a large proportion of the securities included in the underlying index. Securities were also held in the same proportion as the weight of those securities in the index. The index was designed to align to the Paris Climate Agreement and help investors to transition towards a low-carbon economy.

The index also promoted environmental characteristics by reducing the carbon emissions intensity compared to the MSCI China index (the parent index), reduced exposure to fossil fuel reserves and increased exposure to potential climate change opportunities.

Other exclusions included stocks involved in controversial weapons, ESG controversies, tobacco, thermal coal mining, oil and gas and thermal coal power generation.

The index also excluded companies that were non-compliant with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/\$ sales) was 65.41% lower than that of the parent index (306 vs. 884.5) based on data provided by MSCI.

	Sustainability KPI historical comparison					
		2025 2024 2023		2024		2023
Sustainability KPI Name	Value	Benchmark	Value	Benchmark	Value	Benchmark
The Greenhouse Gas (GHG) Intensity of securities in the reference benchmark compared to the parent benchmark as measured by combined weighted scope 1, 2 and 3 emissions. (tCO2e/M\$ sales)	306.00	884.50	350.90	1,267.40	422.50	954.10

# … And compared to previous periods?

In 2025 the combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/M\$ invested) was 12.8% lower than in 2024.

Benchmark values are based on the Parent Index. Note that prior years referred to tons CO2e/M\$ invested but should refer to sales).

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to either to invest in companies that are providing solutions to mitigate the consequences of climate change or that have established climate polices and set carbon reduction targets and are constituents of the MSCI China Climate Paris Aligned Index which is an EU Paris-Aligned Benchmark. The sustainable investments were also able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 10% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 13% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria including the following:

- No ties to controversial weapons
- Less than 1% of revenue from thermal coal
- Less than 5% of revenue from tobacco related activities
- Is not a tobacco producer
- Not involved in any serious ESG Controversies.

# --How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- GHG intensity of investee companies (#3)
- Exposure to companies active in the fossil fuel sector (#4)
- Violations of UN Global Compact Principles (#10)
- Exposure to controversial weapons (#14)
- Ensuring that the level of GHG carbon emissions (Scope 1, 2 & 3), using the GHG Intensity calculation as
  described in the PAB Regulations, of the Index is at least 50% less than the MSCI China Index, its parent index
  and the total GHG Intensity of the Index is reduced by 10% annually

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

-----

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Please see the response to "How were the indicators for adverse impacts on sustainability factors taken into account?"

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
Tencent Holdings Ltd ORD HKD 0.000020	Communication Services	20.45%	China
Alibaba Group Holding Ltd ORD HKD 0.000003125	Consumer Discretionary	7.47%	Hong Kong

# What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 13.0%.

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

99.42% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.58%) included cash or cash equivalents held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives used for efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental characteristics, the Fund invested 13.00% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset A	Allocation historical comp	parison
	2025	2024	2023

Independent Power & Renewable Electricity Producers	2.86%
Entertainment	2.56%
Ground Transportation	2.07%
Electrical Equipment	1.87%
Real Estate Management & Development	1.50%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

	Yes	
_	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

# What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 13.00% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.58% and included cash or cash equivalents held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives used for efficient portfolio management purposes.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the reference index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental characteristics of the Fund.

The index is reviewed semi-annually in May and November, and all securities are assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensures that the Fund continues to comply with the index methodology and analyses the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensures that the investments of the Fund continue to closely track the Index, thereby ensuring alignment with ESG characteristics of the Index

Securities that no longer pass the eligibility criteria of the index are deleted at the rebalance and divested from the Fund. The Investment Managers implement the index changes and sell out of those securities in a timely fashion.

Proxy voting is carried out across our entire ETF range. Proxy voting on Franklin MSCI China Paris Aligned Climate UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

The Fund ensured that the level of GHG carbon emissions (Scope 1, 2 & 3), using the GHG Intensity calculation as described in the PAB Regulations, of the Index was at least 50% less than the MSCI China Index, its parent index and the total GHG Intensity of the Index was reduced by 10% annually.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

Further information on the methodology can be found at the following link:

https://www.msci.com/eqb/methodology/meth\_docs/MSCI\_Climate\_Paris\_Aligned\_Indexes.pdf

### Mow does the reference benchmark differ from a broad market index?

The index is structured to deliver decarbonisation requirements which are absolute but also relative to the parent index, which is a relevant broad market index. The index methodology also provides for multiple activity-based exclusions, as described above, which are not features of the parent index.

# **Environmental and/or social characteristics**

# Sustainable investment means an investment in an economic activity that

an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES • $\boxtimes$ NO promoted Environmental/Social ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 12.23% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy with a social objective ☐ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics by replicating the MSCI Emerging Markets Climate Paris Aligned Net Total Return Index (the reference index), designed to meet the minimum requirements for EU Paris Aligned Benchmarks (EU PABs). The Fund invested in a portfolio of large and mid-cap equity holdings in emerging market countries that included all or a large proportion of the securities included in the underlying index. Securities were also held in the same proportion as the weight of those securities in the index. The index was designed to align to the Paris Climate Agreement and help investors to transition towards a low-carbon economy.

The index also promoted environmental characteristics by reducing the carbon emissions intensity compared to the MSCI Emerging Markets Index (the Parent Index), reduced exposure to fossil fuel reserves and increased exposure to potential climate change opportunities.

Other exclusions included stocks involved in controversial weapons, ESG controversies, tobacco, thermal coal mining, oil and gas and thermal coal power generation.

The index also excluded companies that were non-compliant with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights.

# Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/M\$ sales) was 62.33% lower than that of the parent index (439.90 vs. 1167.70) based on data provided by MSCI. Benchmark values are based on the Parent Index. Note that prior years referred to tons CO2e/M\$ invested but should refer to sales).

	Sustainability KPI historical comparison					
		2025 2024 202		2023		
Sustainability KPI Name	Value	Benchmark	Value	Benchmark	Value	Benchmark
The Greenhouse Gas (GHG) Intensity of securities in the reference benchmark as measured by combined weighted scope 1, 2 and 3 emissions. (tCO2e/M\$ sales)	439.90	1,167.70	490.40	1,480.60	533.60	1,203.70

# … And compared to previous periods?

In 2025 the combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/M\$ invested) was 10.3% lower than in 2024

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to either to invest in companies that are providing solutions to mitigate the consequences of climate change or that have established climate polices and set carbon reduction targets and are constituents of the MSCI Emerging Markets Climate Paris Aligned Index which is an EU Paris-Aligned Benchmark. The sustainable investments were also able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 10% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 12.23% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria including the following:

- · No ties to controversial weapons
- Less than 1% of revenue from thermal coal
- Less than 5% of revenue from tobacco related activities
- Is not a tobacco producer
- Not involved in any serious ESG Controversies.

# --How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- GHG intensity of investee companies (#3)
- Exposure to companies active in the fossil fuel sector (#4)
- Violations of UN Global Compact Principles (#10)
- Exposure to controversial weapons (#14)

The index also included criteria to ensure that the level of GHG carbon emissions (Scope 1, 2 & 3) of the Index was at least 50% less than the MSCI Emerging Markets Index, its parent index and the total GHG Intensity of the Index was reduced by 10% annually.

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 12.23% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 1.17% and included cash or cash equivalents held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives used for efficient portfolio management purposes. No minimum environmental or social safeguards have been put in place.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the reference index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental characteristics of the Fund.

The index is reviewed semi-annually in May and November and all securities are assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensures that the Fund continues to comply with the index methodology and analyses the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensured that the investments of the Fund continue to closely track the index, thereby ensuring alignment with ESG characteristics of the index.

Securities that no longer pass the eligibility criteria of the index are deleted at the rebalance and divested from the Fund. The Investment Managers implement the index changes and sell out of those securities in a timely fashion.

# Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO • 00 promoted Environmental/Social ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 38.94% of sustainable investments П in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy with a social objective ☐ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics by replicating the MSCI World Select Catholic Principles ESG Universal and Low Carbon NR Index (the reference index), which represents the performance of companies that have lower carbon exposure and higher ESG performance relative to the MSCI World Index (parent index).

The index promoted environmental and social characteristics by excluding companies that were involved in controversial business or that were considered to have negative environmental or social impacts. This included companies that were involved in activities such as adult entertainment, arctic oil and gas, civilian firearms, controversial and conventional weapons, gambling, nuclear weapons, tobacco, thermal coal power and unconventional oil and gas. Only companies an ESG rating of 'BB' or above measured by MSCI ESG Ratings were eligible for inclusion in the index.

Companies within the eligible universe were assessed for their carbon exposure and the index excluded the top 20% of companies from the parent index with the highest levels of carbon emissions intensity. Constituents were also ranked by their potential carbon emissions and stocks were excluded until the cumulative potential emissions of the excluded stocks reached 50% of the parent index.

The index also promoted social characteristics by excluding companies that did not comply with certain Roman Catholic principles or were contrary to Roman Catholic beliefs and values. This involved companies that were associated with activities such as abortion and contraception, animal testing and welfare and stem cell research or development.

Additionally, any company that was involved in very serious controversies involving the environmental, social or governance impact of their operations and/or products and services was excluded from the index.

38.94% of the total Fund was made of sustainable investments with an environmental objective.

# Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

- 1) At the end of the reporting period, the MSCI ESG rating score of the portfolio was 7.80 compared to a score of 6.64 for the MSCI World Index. This amounted to an improvement of 17.47%.
- 2) At the end of the reporting period, the portfolio had a weighted carbon intensity level that was 76.1% lower than the parent index

	Sustainability KPI historical comparison				
	2025			2024	
Sustainability KPI Name	Value	Benchmark	Value	Benchmark	
MSCI ESG Rating score of the index relative to the parent index	7.80	6.64	8.10	6.98	
Reduction of carbon emission intensity through the index, relative to the parent index	-76.10%		-76.30%		

# … And compared to previous periods?

The MSCI ESG Rating score of the portfolio outperformed the Parent Index by 17.47% during the period, versus 16.05% last year. The level of carbon emission intensity level of the portfolio was 76.1% lower than MSCI World. This is only a slight change from 2024 when the portfolio was 76.3% lower than MSCI World.

Benchmark values are based on the Parent Index.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to fund and promote environmentally responsible companies in developed market countries. The companies were constituents of the index which is a diversified equity benchmark consisting of companies that have lower carbon exposure and higher ESG performance relative to the parent index. Companies were also required not to be involved or associated with a range of controversial business activities or activities that conflicted with Roman Catholic values. The sustainable investments were also able to generate revenue with an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 10% of the Fund must be invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 38.94% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). As detailed above, this assessment required the individual company to meet strict criteria including avoidance of involvement in the following:

- Conventional and controversial weapons
- Civilian Firearms
- Stem Cell Research
- Gambling
- Adult Entertainment
- · Abortion and Contraception
- Animal Testing
- Tobacco (≥10% revenue or any producer)

Specific environmental exclusions were based on the following:

- Thermal Coal Mining
- Thermal Coal Power Generation
- Thermal Coal generated Electricity
- Gambling
- Unconventional Oil & Gas
- Arctic Oil & Gas

Additionally, the worst performing securities within the universe in terms of carbon emissions intensity and potential carbon emissions were excluded from the index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

----

### How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- GHG intensity of investee companies (#3)
- Exposure to companies active in the fossil fuel sector (#4) Violations of UN Global Compact Principles (#10) Exposure to controversial weapons (#14)

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Please see the response to "How were the indicators for adverse impacts on sustainability factors taken into account?"

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
NVIDIA Corp COM USD.001	Information Technology	12.96%	United States

# What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 38.94%.

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

99.85% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.15%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating.

Out of the Fund's portfolio segment which was aligned with the promoted environmental characteristics, the Fund invested % of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison		
	2025	2024

Health Care Equipment & Supplies	1.72%
Textiles, Apparel & Luxury Goods	1.40%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

П	Yes	
_	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

# What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 38.94% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.15% and included cash and derivatives for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the reference index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental characteristics of the Fund.

The index is rebalanced quarterly in February, May, August and November, and all securities are assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensures that the Fund continues to comply with the index methodology and analyses the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensures that the investments of the Fund continue to closely track the Index, thereby ensuring alignment with ESG characteristics of the index.

Securities that no longer pass the eligibility criteria of the index are removed from the Index at the rebalance and divested from the Fund. The Investment Managers implement the index changes and sell out of those securities in a timely fashion.

Proxy voting is carried out across our entire ETF range. Proxy voting on Franklin MSCI World Catholic Principles UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Further information can be found at the following link for the MSCI World Select Catholic Principles ESG Universal and Low Carbon Index: <a href="https://www.msci.com/documents/10199/4f7a4038-ffca-3a77-2e32-8315afadb39b">https://www.msci.com/documents/10199/4f7a4038-ffca-3a77-2e32-8315afadb39b</a>

### How does the reference benchmark differ from a broad market index?

Broad market indices are market capitalisation weighting with no exclusion criteria beyond size and investability. The index is designed to represent the performance of companies having lower carbon exposure and higher ESG performance than that of the broad market, while excluding companies that are involved in controversial businesses such as, but not limited to, weapons, gambling and adult entertainment. The index also upholds Roman Catholic governance and social norms by excluding companies that are involved in abortion, contraceptives, stem cell research and animal testing.

# Franklin S&P 500 Paris Aligned Climate UCITS ETF (the "Fund")

Legal Entity Identifier: 5493008P5LV6DXD8IP28

# Environmental and/or social characteristics

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 21.60% of sustainable investments with an environmental objective in economic in economic activities that qualify as environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics by replicating the S&P 500 Net Zero 2050 Paris-Aligned ESG Index (the reference index), designed to meet the minimum requirements for EU Paris Aligned Benchmarks (EU PABs). The Fund invested in a portfolio of US equity holdings that included all or a large proportion of the securities included in the underlying index. Securities were also held in the same proportion as the weight of those securities in the index. The index was designed to align to the Paris Climate Agreement and help investors to transition towards a low-carbon economy.

The index also promoted environmental characteristics by reducing the carbon emissions intensity compared to the S&P 500 Index (the parent index), reduced exposure to fossil fuel reserves and increased exposure to potential climate change opportunities.

Other exclusions included stocks involved in controversial weapons, tobacco, small arms, military contracting, thermal coal, oil sands, shale energy, gambling and alcohol.

The index also excluded companies that were non-compliant with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights.

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/\$ EVIC) was 77.78% lower than that of the parent index (102.07 vs. 459.44) based on data provided by S&P and Trucost.

		Sustainability KPI historical comparison					
		Sustainability KF1 historical con				iparisori	
		2025		2024		2023	
Sustainability KPI Name	Value	Benchmark	Value	Benchmark	Value	Benchmark	
The Greenhouse Gas (GHG) Intensity of securities of the reference index compared to the parent index as measured by combined weighted scope 1, 2 and 3 emissions. (tCO2e/M\$ EVIC) (S&P and Trucost)	102.07	459.44	115.53	274.07	120.90	311.83	

### … And compared to previous periods?

The carbon intensity of the Fund has decreased in the observed period. The scope 1, 2 and 3 average carbon intensity in 2025 was 11.65% lower than in 2024.

Benchmark values are based on the Parent Index.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to either to invest in companies that are providing solutions to mitigate the consequences of climate change or that have established climate polices and set carbon reduction targets and are constituents of the S&P 500 Net Zero 2050 Paris Aligned ESG Index which is an EU Paris-Aligned benchmark. The sustainable investments were also able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 10% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). 21.60% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria including the following:

- No ties to controversial weapons
- Less than 1% of revenue from thermal coal
- Less than 5% of revenue from tobacco related activities
- Is not a tobacco producer
- Not involved in any serious ESG Controversies.

### -How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- GHG intensity of investee companies (#3)
- Exposure to companies active in the fossil fuel sector (#4) Violations of UN Global Compact Principles (#10)
- Exposure to controversial weapons (#14)

Additional criteria also ensured that the level of GHG carbon emissions (Scope 1, 2 & 3), using the GHG Intensity calculation as described in the PAB Regulations, of the Index was at least 50% less than the S&P 500 Index, its parent index and the total GHG Intensity of the Index was reduced by 7% annually.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

П	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 21.60% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.09% and included cash and derivatives for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating., as well as derivatives used for efficient portfolio management purposes.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the reference index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental characteristics of the Fund.

The index is rebalanced quarterly in March, June, September and December, and all securities are assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensures that the Fund continues to comply with the index methodology and analyses the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensures that the investments of the Fund continue to closely track the index, thereby ensuring alignment with ESG characteristics of the index.

Securities that no longer pass the eligibility criteria of the index are deleted at the rebalance and divested from the Fund. The Investment Managers implement the index changes and sell out of those securities in a timely fashion.

Proxy voting is carried out across our entire ETF range. Engagements are recorded and shared between teams in a central engagement tool.

# How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

Further information on the methodology can be found at the following link:

 $\underline{\text{https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-paris-aligned-climate-transition-pact-indices.pdf}$ 

### How does the reference benchmark differ from a broad market index?

The index is structured to deliver decarbonisation requirements which are absolute but also relative to the parent index, which is a relevant broad market index. The index methodology also provides for multiple activity-based exclusions, as described above, which are not features of the parent index.

How did this financial product perform ...

...with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

# Franklin S&P 500 Screened UCITS ETF (the "Fund")

Legal Entity Identifier: 254900EZ5ZOSA17ODE66

# Environmental and/or social characteristics

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 21.19% of sustainable investments with an environmental objective in economic in economic activities that qualify as environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Through tracking the Index, the Fund promoted the following environmental/social characteristics:

- The reduction of carbon emissions relative the Parent Index.
- The improvement of the S&P Global ESG Score, relative to the Parent Index.

 $\ensuremath{\mathsf{S\&P}}\xspace$  500 Index, (the "Parent Index"),  $\ensuremath{\mathsf{S\&P}}\xspace$  500 Guarded Index – NR ("Reference Benchmark")

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Through tracking the Index, the Fund used the following sustainability indicators to measure the attainment of the environmental/social characteristics promoted by the Fund:

- Carbon emissions reduction at least 10 percent reduction in carbon emissions of the Index (measured as the
  weighted average carbon intensity of its constituents, assessed by scope 1, 2 and 3 green gas emissions per USD
  of enterprise value) relative to the Parent Index
- S&P Global ESG Scores at least 10 percent improvement of the S&P Global ESG score relative to the Parent Index

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/\$ revenues) was 13.55% lower than that of the parent index (110.78 vs. 128.15).

The S&P Global ESG Scores was 10.03% higher than that of the parent index (48.9 vs 44.44).

Benchmark values are based on the Parent Index.

Sustainability KPI Name	Value	Benchmark
Weighted Average Carbon Intensity (CO2Mto/Revenues)	110.78	128.15
S&P Global ESG Scores	48.90	44.44

# ... And compared to previous periods?

Not applicable.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the Fund's sustainable investments was to reduce carbon emissions and generate revenue via products and services either supporting the green transition (by moving away from fossil fuel use) or other environmentally beneficial activities such as clean energy (such as wind, hydro or solar power) and waste management (such as water treatment, waste to energy facilities, recycling or eco packaging). The sustainable investments which the Fund made contributed to these objectives by providing funding and liquidity to issuers whose products and services supported these objectives and which were compliant with the exclusion screens set out below.

Although the Fund did not have sustainable investment as its objective, a minimum of 5% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 21.19% of the Fund's securities were invested in sustainable investments with an environmental objective.

decisions on

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment

The Index Provider used proprietary data tools and qualitative research applied to all companies in the Index and evaluated all Index constituents to ensure alignment with the Do No Significant Harm principles. The Index Provider's methodology applied exclusions which were used to remove all issuers that were considered to cause significant harm from the Index.

### -How were the indicators for adverse impacts on sustainability factors taken into account?

The principal adverse impacts ("PAI") were incorporated within the index methodology to ensure issuers did not cause significant harm and the ones below were deemed to be material to the Fund:

Exposure to companies active in the fossil fuel sector (PAI#4)

All companies deriving significant revenue from thermal coal (extraction or power generation) or oil sands (extraction) were excluded from the Index (cf. Binding Elements section).

Violations of UN Global Compact Principles (PAI#10)

Norms based screening of investments based on compliance with relevant international norms and standards such as those issued by the Organisation for Economic Co-operation and Development (OECD) and the UN Global Compact. Companies that perform badly in relation to these standards were excluded from the Index.

Controversial Weapons (PAI#14)

All companies with any involvement in controversial weapons were excluded from the Index.

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All of the Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

This was achieved by the Index Provider by using Sustainalytics Global Standard Screening (GSS) to assess controversies concerning UN Global Compact, OECD Guidelines for Multinational Companies and UN Guiding Principles on Business and Human Rights.

Companies were classified as one of:

Non-Compliant: classification given to companies that did not act in accordance with the UNGC principles and their associated standards, conventions, and treaties

Watchlist: classification given to companies at risk of violating one or more principles, for which all dimensions for Non-Compliant status could not be established or confirmed

Compliant: Classification given to companies that act in accordance with the UNGC principles and their associated standards, conventions, and treaties. As of each Index rebalancing, companies classified as Non-Compliant were not eligible for inclusion in the Index.

details available link: are on below https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-guarded-indices.pdf

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts through its replication of the Index which reflected certain principal adverse impacts which are deemed to be material to the Fund within the Index methodology.

Exposure to companies active in the fossil fuel sector (PAI#4)

All companies deriving significant revenue from thermal coal (extraction or power generation) or oil sands (extraction) were excluded from the Index:

- Thermal coal extraction (>=5% revenues).
- Thermal coal power generation (>=5% revenues).
- Oil sands extraction (>=5% revenues).

Violations of UN Global Compact Principles (PAI#10)

Norms based screening of investments based on compliance with relevant international norms and standards such as those issued by the Organisation for Economic Co-operation and Development (OECD) and the UN Global Compact. Companies that perform badly in relation to these standards were excluded from the Index.

Controversial Weapons (PAI#14)

All companies with any involvement in controversial weapons were excluded from the Index.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2025-04-15 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
NVIDIA Corp COM USD.001	Information Technology	7.14%	United States
Microsoft Corp COM USD0.001	Information Technology	5.37%	United States
Apple Inc COM USD.00001	Information Technology	3.97%	United States

WALMART INC COM USD0.1	Consumer Staples	0.63%	United States

# What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 21.19%.

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

99.85% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.15%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating, including cash or cash equivalents as well as derivatives.

Out of the Fund's portfolio segment which was aligned with the promoted environmental characteristics, the Fund invested 21.19% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Information Technology	27.46%
Financials	17.15%
Industrials	10.89%
Consumer Discretionary	9.95%
Health Care	9.66%
Communication Services	8.34%
Consumer Staples	5.50%
Energy	3.69%
Materials	3.01%
Utilities	2.38%
Real Estate	1.83%
Top sub-sector	% of Assets
Semiconductors & Semiconductor Equipment	12.01%
Software	8.96%
Banks	7.30%
Interactive Media & Services	4.75%
Technology Hardware, Storage & Peripherals	4.28%
Pharmaceuticals	3.64%
Insurance	3.51%
Oil, Gas & Consumable Fuels	3.46%
Capital Markets	3.24%
Financial Services	2.78%
Broadline Retail	2.52%
Health Care Equipment & Supplies	2.20%
Automobiles	2.14%
Hotels, Restaurants & Leisure	1.89%
Machinery	1.84%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

# What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund commits to invest a minimum proportion of 5% of its Net Asset Value in environmentally sustainable investments that are not aligned with the EU Taxonomy.

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852. Regulation, 21.19% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.15% and included cash and derivatives used for efficient portfolio management purposes, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund replicated the Index, which is constructed using inclusion and exclusion criteria, which were binding. There is no scope for any of these criteria to be bypassed.

- 10% reduction in carbon emissions of the Index relative to the Parent Index;
- 10% improvement of the S&P Global ESG Score with respect to the Parent Index;
- Under the exclusions based on the UN Global Compact, companies were required to be classified "Compliant" or "on Watch List" by using Sustainalytics Global Standard Screening (GSS).
- Under the exclusions based on Controversies, companies were assessed on controversies related to economic crime and
  corruption, fraud, illegal commercial practices, human rights issues, labour disputes, workplace safety, catastrophic accidents
  and environmental disasters. Companies flagged by S&P Global's MSA (Media and Stakeholder Analysis) for removal were
  ineligible for re-entry into the Index for at least one full calendar year.
- ESG exclusions based on business activities were companies with any direct business involvement in the following activities:
  - o Controversial weapons, including nuclear weapons (0% revenues).
  - Tobacco production (0% revenues).
  - Tobacco (related products/services, retail distribution) (>=5% revenues).
  - Small arms (small arms weapons for civilian use, non-civilian use and key components) (0% revenues).
  - Small arms (retail/distribution of small arms weapons for civilian customers) (>=5% revenues).
  - Military contracting (weapons, weapon-related products, and services) (>=10%revenues).
  - o Environmentally responsible exclusions based on the following activities:
  - Thermal coal extraction (>=5% revenues).
  - Thermal coal power generation (>=5% revenues).
  - Oil sands extraction (>=5% revenues).
  - o The Index also excluded companies that have significant ownership (stake of 25% or more) of another company that:
    - Was involved in Controversial weapons, including nuclear weapons.
    - Was involved in the production of tobacco.
    - Was involved in the production of small arms (small arms weapon for civilian use, non-civilian use, and key components).

Proxy voting is carried out across our entire ETF range. Proxy voting on Franklin S&P 500 Screened UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Further information can be found at the following links:

https://www.spglobal.com/spdji/en/indices/sustainability/sp-500-guarded-index/#overview

and

https://www.spglobal.com/spdjii/en/documents/methodologies/methodology-sp-guarded-indices.pdf

### How does the reference benchmark differ from a broad market index?

Broad market indices are market capitalisation weighting with no exclusion criteria beyond size and investability. The Index is designed to represent the performance of a portfolio of companies that overweighs constituents with lower-than-average greenhouse gasses and higher Environmental, Social and Governance (ESG) performance to achieve an overall 10% reduction in carbon emissions and 10% improvement of the S&P Global ESG Score relative to the Parent Index to, while excluding companies that were involved in controversial businesses like weapons, tobacco, thermal coal, military weapons, and oil sands or failed to meet international standards such as the UN Global Compact, or the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The Fund had the same Weighted Average Carbon Intensity and S&P Global ESG score as the S&P 500 Guarded Index – NR ("Reference Benchmark")

Compared with the S&P 500 Index (the Parent Index or Broad market index), the Fund demonstrated a 13.55% lower Weighted Average Carbon Intensity and a 10.03% higher S&P Global ESG score.

Mow did this financial product perform ...

# Environmental and/or social characteristics

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO 00 promoted Environmental/Social (E/S) ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 10.01% of sustainable investments with an environmental objective in economic in economic activities that qualify as environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective □ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Through tracking the Index, the Fund promoted the following environmental/social characteristics:

- The reduction of carbon emissions relative to the Parent Index.
- The improvement of the S&P Global ESG Score, relative to the Parent Index.

 $S\&P\ World\ Index,\ (the\ "Parent\ Index"),\ S\&P\ World\ Guarded\ Index-NR\ ("Reference\ Benchmark")$ 

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

Through tracking the Index, the Fund used the following sustainability indicators to measure the attainment of the environmental/social characteristics promoted by the Fund:

- Carbon emissions reduction at least 10 percent reduction in carbon emissions of the Index (measured as the
  weighted average carbon intensity of its constituents, assessed by scope 1, 2 and 3 green gas emissions per USD
  of enterprise value) relative to the Parent Index
- S&P Global ESG Scores at least 10 percent improvement of the S&P Global ESG score relative to the Parent Index

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/\$ revenues) was 13.55% lower than that of the parent index (110.75 vs. 128.15).

As of the last rebalancing date of 30 April, the S&P Global ESG Scores was 9.51% higher than that of the parent index (52.18 vs 47.65)

Benchmark values are based on the Parent Index.

Sustainability KPI Name	Value	Benchmark
Weighted Average Carbon Intensity (CO2Mto/Revenues)	110.75	127.43
S&P Global ESG Scores	52.18	47.65

# … And compared to previous periods?

Not applicable.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the Fund's sustainable investments was to reduce carbon emissions and generate revenue via products and services either supporting the green transition (by moving away from fossil fuel use) or other environmentally beneficial activities such as clean energy (such as wind, hydro or solar power) and waste management (such as water treatment, waste to energy facilities, recycling or eco packaging). The sustainable investments which the Fund made contributed to these objectives by providing funding and liquidity to issuers whose products and services supported these objectives and which were compliant with the exclusion screens set out below.

Although the Fund did not have sustainable investment as its objective, a minimum of 5% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 10.01% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Index Provider used proprietary data tools and qualitative research applied to all companies in the Index and evaluated all Index constituents to ensure alignment with the Do No Significant Harm principles. The Index Provider's methodology applied exclusions which are used to remove all issuers that were considered to cause significant harm from the Index.

# --How were the indicators for adverse impacts on sustainability factors taken into account?

The principal adverse impacts ("PAI") were incorporated within the index methodology to ensure issuers did not cause significant harm and the ones below were deemed to be material to the Fund:

Exposure to companies active in the fossil fuel sector (PAI#4)

All companies deriving significant revenue from thermal coal (extraction or power generation) or oil sands (extraction) were excluded from the Index (cf. Binding Elements section).

Violations of UN Global Compact Principles (PAI#10)

Norms based screening of investments based on compliance with relevant international norms and standards such as those issued by the Organisation for Economic Co-operation and Development (OECD) and the UN Global Compact. Companies that perform badly in relation to these standards were excluded from the Index.

Controversial Weapons (PAI#14)

All companies with any involvement in controversial weapons were excluded from the Index.

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All of the Fund's investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

This was achieved by the Index Provider by using Sustainalytics Global Standard Screening (GSS) to assess controversies concerning UN Global Compact, OECD Guidelines for Multinational Companies and UN Guiding Principles on Business and Human Rights.

Companies were classified as one of:

Non-Compliant: classification given to companies that did not act in accordance with the UNGC principles and their associated standards, conventions, and treaties.

Watchlist: classification given to companies at risk of violating one or more principles, for which all dimensions for Non-Compliant status could not be established or confirmed.

Compliant: Classification given to companies that act in accordance with the UNGC principles and their associated standards, conventions, and treaties. As of each Index rebalancing, companies classified as Non-Compliant were not eligible for inclusion in the Index.

Further details are available on the below link: <a href="https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-quarded-indices.pdf">https://www.spglobal.com/spdji/en/documents/methodologies/methodology-sp-quarded-indices.pdf</a>

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts through its replication of the Index which reflected certain principal adverse impacts which were deemed to be material to the Fund within the Index methodology.

Exposure to companies active in the fossil fuel sector (PAI#4)

All companies deriving significant revenue from thermal coal (extraction or power generation) or oil sands (extraction) were excluded from the Index:

- Thermal coal extraction (>=5% revenues).
- Thermal coal power generation (>=5% revenues).
- Oil sands extraction (>=5% revenues).

Violations of UN Global Compact Principles (PAI#10)

Norms based screening of investments based on compliance with relevant international norms and standards such as those issued by the Organisation for Economic Co-operation and Development (OECD) and the UN Global Compact. Companies that perform badly in relation to these standards were excluded from the Index.

Controversial Weapons (PAI#14)

All companies with any involvement in controversial weapons were excluded from the Index.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2025-04-15 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
NVIDIA Corp COM USD.001	Information Technology	10.24%	United States
Microsoft Corp COM USD0.001	Information Technology	7.84%	United States

# What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 10.01%.

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

99.97% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.03%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating, including cash or cash equivalents as well as derivatives.

Out of the Fund's portfolio segment which was aligned with the promoted environmental characteristics, the Fund invested 10.01% of its portfolio in sustainable investments.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Information Technology	33.90%
Financials	14.16%
Consumer Discretionary	10.26%
Health Care	9.54%
Communication Services	9.50%

Broadline Retail	2.80%
Health Care Equipment & Supplies	2.66%
Hotels, Restaurants & Leisure	2.46%
Biotechnology	2.42%
Specialty Retail	2.07%
Automobiles	2.06%
Consumer Staples Distribution & Retail	2.04%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

П	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

# What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund commits to invest a minimum proportion of 5% of its Net Asset Value in environmentally sustainable investments that are not aligned with the EU Taxonomy.

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852. Regulation, 10.01% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.03% and included cash and derivatives used for efficient portfolio management purpose, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund replicated the Index, which is constructed using inclusion and exclusion criteria, which were binding. There is no scope for any of these criteria to be bypassed.

- 10% reduction in carbon emissions of the Index relative to the Parent Index;
- 10% improvement of the S&P Global ESG Score with respect to the Parent Index;
- Under the exclusions based on the UN Global Compact, companies were required to be classified "Compliant" or "on Watch List" by using Sustainalytics Global Standard Screening (GSS).
- Under the exclusions based on Controversies, companies were assessed on controversies related to economic crime and
  corruption, fraud, illegal commercial practices, human rights issues, labour disputes, workplace safety, catastrophic accidents
  and environmental disasters. Companies flagged by S&P Global's MSA (Media and Stakeholder Analysis) for removal were
  ineligible for re-entry into the Index for at least one full calendar year.
- ESG exclusions based on business activities were companies with any direct business involvement in the following activities:
  - o Controversial weapons, including nuclear weapons (0% revenues).
  - Tobacco production (0% revenues).
  - Tobacco (related products/services, retail distribution) (>=5% revenues).
  - Small arms (small arms weapons for civilian use, non-civilian use and key components) (0% revenues).
  - Small arms (retail/distribution of small arms weapons for civilian customers) (>=5% revenues).
  - Military contracting (weapons, weapon-related products, and services) (>=10%revenues).
  - o Environmentally responsible exclusions based on the following activities:
  - Thermal coal extraction (>=5% revenues).
  - Thermal coal power generation (>=5% revenues).
  - Oil sands extraction (>=5% revenues).
  - o The Index also excluded companies that have significant ownership (stake of 25% or more) of another company that:
    - Was involved in Controversial weapons, including nuclear weapons.
    - Was involved in the production of tobacco.
    - Was involved in the production of small arms (small arms weapon for civilian use, non-civilian use, and key components).

Proxy voting is carried out across our entire ETF range. Proxy voting on Franklin S&P World Screened UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Further information can be found at the following links:

https://www.spglobal.com/spdji/en/indices/sustainability/sp-world-guarded-index/#overview

and

https://www.spglobal.com/spdjii/en/documents/methodologies/methodology-sp-guarded-indices.pdf

### How does the reference benchmark differ from a broad market index?

Broad market indices are market capitalisation weighting with no exclusion criteria beyond size and investability. The Index is designed to represent the performance of a portfolio of companies that overweighs constituents with lower-than-average greenhouse gasses and higher Environmental, Social and Governance (ESG) performance to achieve an overall 10% reduction in carbon emissions and 10% improvement of the S&P Global ESG Score relative to the Parent Index to, while excluding companies that were involved in controversial businesses like weapons, tobacco, thermal coal, military weapons, and oil sands or failed to meet international standards such as the UN Global Compact, or the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The Fund had the same Weighted Average Carbon Intensity and S&P Global ESG score as the S&P World Guarded Index – NR ("Reference Benchmark")

Compared with the S&P World Index (the Parent Index or Broad market index), the Fund demonstrated a 13.3% lower Weighted Average Carbon Intensity and a 9.52% higher S&P Global ESG score. Although improvement in the S&P Global ESG score fell just below the 10% threshold, this was due to the Fund being managed in accordance with the binding elements of the precontractual disclosure for only the final two months of the fiscal year.

How did this financial product perform ...

# Franklin STOXX Europe 600 **Paris Aligned Climate UCITS ETF** (the "Fund")

Legal Entity Identifier: 549300ZDC0V552DW8K29

# Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

### Did this financial product have a sustainable investment objective? ☐ YES $\boxtimes$ NO promoted Environmental/Social ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 14.40% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy with a social objective ☐ It made sustainable investments with a ☐ It promoted E/S characteristics, but did not social objective: 0.00% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics by replicating the STOXX Europe 600 Paris-Aligned Index (the reference index), designed to meet the minimum requirements for EU Paris Aligned Benchmarks (EU PABs). The Fund invested in a portfolio of European equity holdings that included all or a large proportion of the securities included in the underlying index. Securities were also held in the same proportion as the weight of those securities in the index. The index was designed to align to the Paris Climate Agreement and help investors to transition towards a low-carbon economy.

The index also promoted environmental characteristics by reducing the carbon emissions intensity compared to the STOXX 600 Index (the parent index), reduced exposure to fossil fuel reserves and increased exposure to potential climate change opportunities.

Other exclusions included stocks involved in controversial weapons, tobacco, coal and fossil fuels and power generation subject to specific revenue thresholds specified by the index provider, military contracting, thermal coal, oil sands, shale energy, gambling and alcohol.

Additionally, any company deemed by ISS (Institutional Shareholder Services) to be causing a significant obstruction to UN Sustainable Development Goal (SDG) 13 - Climate Action was also excluded from the index.

### Sustainability indicators measure how the environmental or

social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

The Fund uses the Greenhouse Gas (GHG) Intensity of securities in the index, as measured by scope 1, 2 and 3 emissions as its sustainability indicator.

The combined weighted Scope 1, 2 and 3 average carbon intensity (tons CO2e/M\$ Revenue) of the index was 44.90% lower than that of the parent index (47.18 vs. 85.62).

	Sustainability KPI historical comparison			
	2025		2024	
Sustainability KPI Name	Value	Benchmark	Value	Benchmark
The Greenhouse Gas (GHG) Intensity of securities in the reference benchmark compared to the parent index as measured by combined weighted scope 1, 2 and 3 emissions. (tCO2e/M\$ Revenue)	47.18	85.62	76.77	130.63

# … And compared to previous periods?

The carbon intensity of the Fund has decreased in the observed period. The scope 1, 2 and 3 average carbon intensity in 2025 was 38.54% lower than in 2024.

Due to a change in MSCI and ISS, we will only display ISS data going forward.

Benchmark values are based on the Parent Index. Note that prior years referred to tons CO2e/M\$ invested but should refer to sales. In 2024, CO2e/M\$ invested was 578.90 compared to 840.50 for the parent index, and in 2023 CO2e/M\$ invested was 531.50 compared to 864.30 for the parent index.

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Fund made were to either to invest in companies that are providing solutions to mitigate the consequences of climate change or that have established climate polices and set carbon reduction targets and are constituents of the STOXX Europe 600 Paris Aligned Index which is an EU Paris-Aligned benchmark. The sustainable investments were also able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17).

Although the Fund did not have sustainable investment as its objective, a minimum of 10% of the Fund was invested in securities that can be defined as sustainable. These were securities that through their products and services contributed to an environmental objective and were able to meet the criteria for "do no significant harm" in accordance with SFDR article 2 (17). At the end of the reference period, 14.40% of the Fund's securities were invested in sustainable investments with an environmental objective.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

By tracking the index, the Fund was also able to avoid investing in many companies that cause significant harm to any environmental objective. In addition, those securities defined as sustainable investments were assessed to ensure that they did not cause significant harm to any environmental or social objective and ensure alignment with SFDR Article 2(17). This assessment required the individual company to meet strict criteria including the following:

- No ties to controversial weapons
- Less than 1% of revenue from thermal coal
- Less than 5% of revenue from tobacco related activities
- Is not a tobacco producer
- Not involved in any serious ESG Controversies.
- Ensuring that the level of GHG carbon emissions (Scope 1, 2 & 3), using the GHG Intensity calculation as described
  in the PAB Regulations, of the Index is at least 50% less than the STOXX Europe 600 Index, its parent index and the
  total GHG Intensity of the Index is reduced by 7% annually.

# --How were the indicators for adverse impacts on sustainability factors taken into account?

The index that the Fund replicated includes criteria to reduce exposure to or to exclude securities which conflicted with the following principal adverse indicators:

- GHG intensity of investee companies (#3)
- Exposure to companies active in the fossil fuel sector (#4)
- Violations of UN Global Compact Principles (#10)
- Exposure to controversial weapons (#14)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

....

-----

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. Any securities that failed to comply with the UNGC principles, OECD Guidelines or UN Guiding Principles on Business and Human Rights were excluded from the index.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Please see the response to "How were the indicators for adverse impacts on sustainability factors taken into account?"

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

# What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
ASML Holding NV ORD EUR.09	Information Technology	4.26%	Netherlands
SAP SE ORD EUR NPV	Information Technology	3.87%	Germany
LVMH Moet Hennessy Louis Vuitton SE ORD EUR.3	Consumer Discretionary	3.83%	France

# What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 14.40%.

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

99.75% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.25%) was not aligned with the promoted characteristics and consisted primarily of liquid assets or issuers for which there was no ESG rating, as well as derivatives used for efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental characteristics, the Fund invested 14.40% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1** Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison		
	2025	2024	2023
Investment Category	Proportion of Investments	Proportion of Investments	Proportion of Investments

Communication Services	7.21%
Materials	6.94%
Utilities	2.80%
Real Estate	1.17%
Top sub-sector	% of Assets
Pharmaceuticals	15.62%
Textiles, Apparel & Luxury Goods	10.29%
Capital Markets	8.17%
Chemicals	6.23%
Insurance	5.32%
Semiconductors & Semiconductor Equipment	4.84%
Software	4.60%
Diversified Telecommunication Services	4.24%
Personal Care Products	3.64%
Food Products	3.42%
Beverages	2.45%
Banks	2.39%
Health Care Equipment & Supplies	2.38%
Electric Utilities	2.20%
Air Freight & Logistics	2.03%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Not applicable.

# What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 14.40% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

0.0%. The Fund does not set a minimum share of sustainable investments with a social objective.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 0.25% and included cash and derivatives for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating, as well as derivatives used for efficient portfolio management purposes.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As outlined above, the reference index excluded stocks of companies that had exposure to and / or derived revenue from certain activities in order to promote the environmental characteristics of the Fund.

The index is rebalanced quarterly and all securities are assessed for their continued eligibility within the index. The Investment Manager monitored the portfolio regularly and ensures that the Fund continues to comply with the index methodology and analyses the investments exposure at a portfolio level for possible adverse impact through the index tracking. The Investment Manager ensures that the investments of the Fund continue to closely track the index, thereby ensuring alignment with ESG characteristics of the index.

Securities that no longer pass the eligibility criteria of the index are deleted at the rebalance and divested from the Fund. The Investment Managers implement the index changes and sell out of those securities in a timely fashion.

Proxy voting is carried out across our entire ETF range. The Proxy voting for the Franklin Stoxx Europe 600 Paris Aligned Climate UCITS ETF aligns with the Sustainability Voting Guidelines provided by our proxy voting advisor ISS (Institutional Shareholder Services). Our portfolio managers have the ultimate decision rights and are able to vote meetings in line with their judgement and are supported by voting guidance from the Franklin Templeton stewardship team. Where engagements are undertaken this will typically be led by our fundamental research analysts from actively managed strategies, who maintain a direct relationship with the issuers concerned. Engagements are recorded and shared between teams in a central engagement tool.

The Fund ensured that the level of GHG carbon emissions (Scope 1, 2 & 3), using the GHG Intensity calculation as described in the PAB Regulations, of the Index was at least 50% less than the STOXX Europe 600 Index, its parent index and the total GHG Intensity of the Index was reduced by 7% annually.

# How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Further information on the methodology can be found at the following link:

https://www.stoxx.com/document/Indices/Common/Indexguide/stoxx\_index\_guide.pdf

page 357

### How does the reference benchmark differ from a broad market index?

The index is structured to deliver decarbonisation requirements which are absolute but also relative to the parent index, which is a relevant broad market index. The index methodology also provides for multiple activity-based exclusions, as described above, which are not features of the parent index.

Mow did this financial product perform ...

# Franklin Sustainable Euro Green Bond UCITS ETF (the "Fund")

Legal Entity Identifier: 549300DYLFY0UQSSHE55

Sustainable investment means an investment in an economic activity that contributes to an environmental or

social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

# Sustainable investment objective

### Did this financial product have a sustainable investment objective? ☐ It promoted Environmental/Social (E/S) It made sustainable investments with an characteristics and while it did not have as its objective environmental objective: 99.25% a sustainable investment, it had a proportion of 0.00% of sustainable investment with an environmental objective in economic in economic activities that qualify as activities that qualify as en sustainable under the EU Taxonomy environmentally sustainable under the as environmentally **EU Taxonomy** П in economic activities that do not with an environmental objective in economic qualify as environmentally sustainable activities that do not qualify as environmentally under the EU Taxonomy sustainable under the EU Taxonomy with a social objective ☐ It made sustainable investments with a social ☐ It promoted E/S characteristics, but did not make any objective: 0.00% sustainable investments

# To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised green bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with an environmental objective which are deemed to be supportive of a low-carbon future, or supportive of the Paris Climate Agreement. This objective was predominantly met by investing in green bonds, which constituted 98.14% of portfolio. The proceeds from these investments were utilised to finance initiatives such as renewable energy deployment, energy efficiency, carbon-efficient transportation modes, and green buildings. Additionally, proceeds from these investments also financed projects in relation to waste and wastewater treatments, as well as environmentally sustainable management of living natural resources and land use. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 874 tons of CO2e avoided or reduced, c. 654 MWh of renewable energy produced, c. 855 m2 of green buildings constructed or renovated, c. 58 electric vehicles deployed, c. 5,781 m3 water saved or treated, and c. 24 tons of waste prevented, collected and treated, reused, recycled or disposed per every million of Euro invested (data as of 31 Dec 2024).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG7 Affordable and Clean Energy (79%), SDG 13 Climate Action (73%), SDG 11 Sustainable Cities and Communities (63%), SDG 9 Industry, Innovation and Infrastructure (60%), and SDG 12 Responsible Consumption and Production (39%) (as of 31 December 2024).

An example of the bond supporting the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually and 1,281,883 tonnes of CO2 per year have been avoided.

Furthermore, in support of the Fund's sustainable investment objective to support a low carbon future, the Investment Manager engaged with portfolio investees regarding greenhouse gas emission reductions

The Fund also contributed to other positive environmental outcomes by investing in use of proceeds instruments, which financed projects such as protection of biological diversity, promotion of circular economy, sustainable waste management,

An example of the bond supporting the sustainable waste management and the development of a circular economy, is the green bond issued by the Allied Irish Banks. AIB's Green Bond financing has played a key role in Ireland's Deposit Return Scheme (DRS), launched in February 2024 to support circular economy goals. It also helps to meet environmental targets under the Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment ("EU Single-Use-Plastic Directive") and the national goal of collecting 90% of plastic drink containers by 2029. The DRS adds a refundable deposit to drink containers, encouraging returns via Reverse Vending Machines (RVMs) installed in 180 Lidl's stores across the country. By September 2024, Lidl's contribution involved handling 100 million recurrent bottles and cans, issuing over €17 million back to customers. Nationally, the DRS saw more than 500 million containers returned, significantly advancing environmental targets. Thanks to the proceeds that have supported DRS project to date, 1,248 tonnes of waste per year have been treated/prevented.

Additionally, the Investment Manager engaged with investees of this Fund on topics including biodiversity conservation, climate change adaptation and mitigation, waste and wastewater management.

# How did the sustainability indicators perform?

Amount (in Euro) provided to eligible projects on a quarterly basis – based on allocation to green bonds:

Q3 2024 - 290,680,592 Q4 2024 - 301 482 453

Q1 2025 - 255,621,488

Q2 2025 - 283.335.774

	Sustainability KPI historical comparison		
	2025	2024	2023
Sustainability KPI Name	Value	Value	Value
Percentage of investments in green bonds	98.14%	97.62%	95.57%
Percentage of investments in other eligible bonds supportive of a low-carbon future or supportive of the Paris Climate Agreement	1.11%	1.42%	1.59%
Percentage of investments in issuers having exposure to or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%

## … And Compared to Previous Periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (percentage of investment in green and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments with a slightly higher average allocation at the end of the current reference period.

Overall, the percentage of investment in green and other eligible bonds on 30 June 2024 was 99.04%, while the average allocation increased to 99.25% in the fiscal year ending 30 June 2025.

At the end of the current and previous reference periods, the Fund had no exposure to, or ties with excluded sectors and additional exclusions.

# How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio. All issuers were monitored using the Investment Manager's principal adverse impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

Principal adverse impacts are the most significant investment decisions environmental, social matters, respect for human rights, anti-

negative impacts of on sustainability factors relating to and employee

corruption and antibribery matters.

# How were the indicators for adverse impacts on sustainability factors taken into account?

Adverse impact indicators, including PAIs and other data points deemed by the Investment Manager as proxies for adverse impact, were used to:

a) remove issuers that were considered to do significant harm from the portfolio; and

b) inform the Investment Manager about the risk associated with adverse impact and take appropriate action – that included due diligence, qualitative scrutiny and/or engagement (for details of an engagement see the "Principal Adverse Impact" and "Investment Strategy of the Fund" sections of this annex).

While assessing eligible bonds, The Investment Manager reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g. solar/PV panels), the Investment Manager ascertained that financed projects scored well on PAIs linked to GHG emissions

# Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

# How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- · Performing the DNSH test; and
- Guiding thematic engagement.

Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the DNSH principles across the portfolio using the PAIs indicators. All issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests and evaluation based on their greenhouse gas emissions, political liberties and/or corruption.

Guiding thematic engagement

The Investment Manager is on target with its commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 2024-07-01 – 2025-06-30

Asset allocation describes the share of investments in specific assets.

# What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 99.25%.

### What was the asset allocation?

99.25% of the Fund's portfolio contributed to the sustainable investment objective. The remaining portion (0.75%) did not contribute to such objective and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as derivatives used for hedging purposes.

	Asset Allocation historical comparison		
	2025	2024	2023

Water Utilities	0.93%
Automobile Components	0.92%
Paper & Forest Products	0.89%
Construction & Engineering	0.68%
Ground Transportation	0.67%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 99.25%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Not sustainable" was 0.75% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes.

No minimum environmental and/or social safeguards have been put in place for the liquid assets.

For derivatives, the Investment Manager determined what was the underlying asset and if applicable, subjected this asset to all relevant ESG screening depending on the underlying asset's nature.

If the Investment Manager was not in position to determine the ESG quality of the underlying asset because of its nature (e.g., currency forwards for hedging purposes), the Investment Manager assessed the ESG credentials of a derivative contract counterparty. If a counterparty was a subsidiary without separate ESG reporting scheme, the ESG characteristics of a parent company apply. The Fund did not engage in derivatives with financial institutions which were not meeting Investment Manager's ESG criteria. To qualify as eligible counterparty, a financial institution had to meet at least two of the following criteria:

- MSCI ESG rating of BBB or above or in absence of MSCI rating, being above industry average rating as judged by alternative third party ESG data provider;
- signatory to the Equator Principles:
- signatory to Task Force on Climate-Related Financial Disclosures; and
- was committed to set a Science Based Targets initiative (the "SBTi") target.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to environmental objectives, ensuring that investments avoided significant harm while their issuers adhered to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods.

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental impacts. Additionally, the Fund invested in other eligible bonds deemed to be supportive of reducing and eliminating carbon emissions and other environmental objectives. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund
- 3. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental objective into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

## How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. Not applicable.

## Franklin Sustainable Euro Green Corp 1-5 Year UCITS ETF (the "Fund")

Legal Entity Identifier: 25490008AGZTC1BZY545

#### Sustainable investment m

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

#### The **EU Taxonomy**

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Sustainable investment objective

#### Did this financial product have a sustainable investment objective? ☐ It promoted Environmental/Social (E/S) It made sustainable investments with an characteristics and while it did not have as its objective environmental objective: 97.82% a sustainable investment, it had a proportion of 0.00% of sustainable investment with an environmental objective in economic in economic activities that qualify as activities that qualify as en sustainable under the EU Taxonomy environmentally sustainable under the as environmentally **EU Taxonomy** П in economic activities that do not with an environmental objective in economic qualify as environmentally sustainable activities that do not qualify as environmentally under the EU Taxonomy sustainable under the EU Taxonomy with a social objective ☑ It made sustainable investments with a social ☐ It promoted E/S characteristics, but did not make any objective: 0.00% sustainable investments

## To what extent was the sustainable investment objective of this financial product met?

# Sustainability indicators measure how the sustainable objectives of this financial product are

attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised green bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with an environmental objective of reducing and eliminating carbon emissions. This objective was predominantly met by investing in green bonds, which constituted 97.82% of portfolio. The proceeds from these investments were utilised to finance initiatives such as renewable energy deployment, energy efficiency, clean transportation, circular economy and green buildings. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 508 tons of CO2e avoided or reduced, c. 1,440 MWh of renewable energy produced, c. 7,775 m3 of water saved or treated, c. 116 m2 of green buildings constructed or renovated, c. 114 electric vehicles deployed, c.154 tons of waste prevented and treated, reused, recycled or disposed per every million of Euro invested (data as of 31 Dec 2024).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 7 Affordable and Clean Energy (86%), SDG 13 Climate Action (70%), SDG 11 Sustainable Cities and Communities (66%), SDG 9 Industry, Innovation and Infrastructure (48%), and SDG 12 Responsible Consumption and Production (33%) (as of 31 December 2024).

An example of bond supporting energy efficiency is a green bond issued by one of the top banking groups in Europe – Intesa Sanpaolo. Escomax Kft. is a Special Purpose Vehicle (SPV) within the PLH Group, established for the development of public lighting projects aimed at achieving up to 60% savings in electricity consumption. The initiative involves public lighting upgrades across 90-100 municipalities in Hungary, with a total investment cost of HUF 2.96 billion. CIB Bank finances 70% of this total investment, which primarily covers the purchase and installation of lamps. Escomax Kft. enters into agreements with the municipalities to replace old lamps with modern LED technology. The company retains ownership of the lamps, while the municipalities pay a service fee for their usage. Operation and maintenance services are outsourced, and the municipalities directly pay electricity to the electricity trading companies. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of energy efficiency.

Another example is a green bond supporting circular economy issued by AlB. AlB's Green Bond financing has played a key role in Ireland's Deposit Return Scheme (DRS), launched in February 2024 to support circular economy goals. It also helps to meet environmental targets such as the EU's Single-Use-Plastic directive and the national goal of collecting 90% of plastic drinks containers by 2029. The scheme adds a refundable deposit to drink containers, encouraging returns via Reverse Vending Machines (RVMs) installed in 180 Lidl's stores across the country. By September 2024, Lidl's contribution involved

handling 100 million recurrent bottles and cans, issuing over €17 million back to customers. Nationally, the scheme saw more than 500 million containers returned, significantly advancing environmental targets. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of waste and the development of a circular economy.

Additionally, the Investment Manager engaged with investees of this Fund on topics including biodiversity conservation, energy, waste and wastewater management.

#### How did the sustainability indicators perform?

Amount (in Euro) provided to eligible projects on a quarterly basis – based on allocation to green bonds:

Q3 2024 - 33,098,545

Q4 2024 - 33,191,774

Q1 2025 - 33,169,443

Q2 2025 - 38,730,310

	Sustainability KPI historical comparison		
	2025	2024

Percentage of investments in green bonds	97.82%	97.99%	
Percentage of investments in social bonds	0.00%	0.00%	
Percentage of investments in sustainable bonds	0.00%	0.00%	
Percentage of investments in other eligible bonds supportive of reducing and eliminating carbon emissions and other environmental objectives	0.00%	2.01%	
Percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	
Number of issuers, with which the Investment Manager engages	72.00	60.00	

#### ... And Compared to Previous Periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (percentage of investment in green, social, sustainable and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments with a slightly lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 97.99%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 97.82%.

Overall, the percentage of investment in other eligible bonds (Article 9) on 30 June 2024 was 2.01%, while the average allocation decreased to 0.00% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 90% in sustainable investments as stipulated in precontractual disclosure

At the end of the current and previous reference periods, the fund had no exposure to, or tying with excluded sectors and additional exclusions.

During both reference periods, the Investment Manager was very active in the field of sustainability engagement. This is highlighted by the fact that 60 issuers were engaged in the previous reference period, and the Investment Manager has continued to expand its engagement efforts, resulting in more than 70 issuers being engaged in the current reference period.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Corporate issuers were monitored using the Investment Manager's principal adverse impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

#### -How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Manager reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Manager ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of the sustainable investments with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights was assessed using data from MSCI and internal research by the Investment Manager.

Alignment was ensured by MSCI identifying any potential non-compliance with these standards by issuers to the Investment Manager for investigation. Where this investigation subsequently demonstrates that an issuer was not aligned with these standards, the issuer's securities was not invested in and/or was divested from.

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- · Performing the DNSH test;
- · Guiding thematic engagement; and
- Applying exclusions.

#### Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their greenhouse gas emissions, political liberties and/or corruption.

#### Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

#### Applying exclusions

The Fund also considered UNGC violations, activities negatively affecting biodiversity (#PAI 7) and exposure to controversial weapons (PAI #14) for the purpose of applying specific ESG exclusions as described in the investment strategy.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.82%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Not sustainable" was 2.18% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund, as well as derivatives held solely for hedging purposes.

For the avoidance of doubt, this will not include certain money market instruments, such as government T-Bills, where the Investment Manager has confirmed they were aligned with environmental and/or social characteristics promoted by the Fund.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits met the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties that did not meet such criteria were not used by the Fund.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to environmental objectives, ensuring that investments avoided significant harm while their issuers adhered to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods. By employing these methods, the Fund had effectively fulfilled its pledged environmental objectives

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental impacts. Additionally, the fund invested in other eligible bonds deemed to be supportive of reducing and eliminating carbon emissions and other environmental objectives. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the
- 3. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

## How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. Not applicable.

## Franklin Sustainable Euro Green Sovereign UCITS ETF (the "Fund")

Legal Entity Identifier: 254900UNO4UQ4IFVZ469

#### Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

#### The **EU Taxonomy**

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

## To what extent was the sustainable investment objective of this financial product met?

#### **Sustainability indicators** measure how the sustainable

Taxonomy or not.

how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised green bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with an environmental objective of reducing and eliminating carbon emissions. This objective was predominantly met by investing in green bonds, which constituted 97.71% of portfolio. The proceeds from these investments were utilised to finance initiatives such as renewable energy deployment, energy efficiency, and carbon-efficient transportation modes. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 751 tons of CO2e avoided or reduced, c. 476 MWh of renewable energy produced, c. 1,185 m2 of green buildings constructed or renovated and c. 7,022 m3 of water saved or treated, and c.4 km2 of climate change adapted area per every million of Euro invested (data

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 13 Climate Action (85%), SDG 11 Sustainable Cities and Communities (79%), SDG 9 Industry, Innovation and Infrastructure (76%), SDG 7 Affordable and Clean Energy (76%), and SDG 12 Responsible Consumption and Production (55%) (as of 31 December 2024).

An example of the green bond investment supporting renewable energy deployment is a green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the efficient use of energy and the reduction of greenhouse gas emissions.

An example of a bond supporting clean transportation is a green bond issued by the Comunidad de Madrid, the region that has a clear environmental mandate to meet the needs of its citizens. Comunidad de Madrid committed to integrating sustainable development in all its activities while playing a key role in promoting sustainable development initiatives on the territory. Comunidad de Madrid supports the decarbonization of the Region's public transport. In 2020, Empresa de Municipal

de Transported de Madrid (EMT Madrid) has approved a €39m investment for the purchase of 50 new electric buses and 15 electric micro-buses. This is in line with the company' strategy of gradually reducing the fleet's carbon emissions. Comunidad de Madrid supports the maintenance and development of the electric metro of Madrid. Thanks to the Energy Saving Plan 2012-2017 and the current Energy Efficiency Plan, Metro de Madrid – the public enterprise of the Madrid underground –has reduced electricity consumption in daily operations by 25%. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of carbon-efficient transportation.

Additionally, the Investment Manager engaged with investees of this Fund on topics including greenhouse gas (GHG) emissions, clean transportation, waste and wastewater management.

#### How did the sustainability indicators perform?

· Amount (in Euro) provided to eligible projects on a quarterly basis – based on allocation to green bonds:

Q3 2024 - 57,579,279

Q4 2024 - 63,202,423

Q1 2025 - 66.279.443

Q2 2025 - 67,491,330

	Sustainability KPI historical comparison		
	2025	2024

Number of issuers, with which the Investment Manager engages	17.00	14.00	

#### ... And Compared to Previous Periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (percentage of investment in green, social, sustainable and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a slightly lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 99.20%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 97.71%.

Overall, the percentage of investment in other eligible bonds (Article 9) as of 30 June 2024 was 0.80%, while the average allocation decreased to 0.00% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 90% in sustainable investments as stipulated in precontractual disclosure.

At the end of the current and previous reference periods, the fund had no exposure to, or tying with excluded sectors and additional exclusions.

During both reference periods, the Investment Manager has been active in the field of sustainability engagement, with 14 issuers engaged in the previous reference period and 17 in the current reference period.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

## -How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory Principal Adverse Impact (PAI) indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Manager reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Manager ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multination Enterprises and the United Nations Guiding Principles on Business and Human Rights were only applicable to corporate issuers and not to sovereign and quasi-sovereign issuers.

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Performing the DNSH test;
- · Guiding thematic engagement; and
- Applying exclusions.

Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the DNSH principles across the portfolio using the PAIs indicators. Additionally, sovereign issuers are subjected to tests and evaluation based on their greenhouse gas emissions, political liberties and/or corruption.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered social violations (#PAI 16) for the purpose of applying specific ESG exclusions as described in the investment strategy.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

Largest investments	Largest investments Sector % of Assets		Country

Other	97.71%	99.20%		

#### In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	92.66%
Financials	2.68%
Utilities	2.38%
Top sub-sector	% of Assets
Government Bonds	92.66%
Electric Utilities	2.38%
Financial Services	1.66%
Banks	1.02%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.71%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00%.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Not sustainable" was 2.29% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund, as well as derivatives held solely for hedging purposes.

For the avoidance of doubt, this will not include certain money market instruments, such as government T-Bills, where the Investment Manager has confirmed they were aligned with environmental and/or social characteristics promoted by the Fund.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits met the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties that did not meet such criteria were not used by the Fund.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to environmental, ensuring that investments avoided significant harm while their issuers adhered to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods. By employing these methods, the Fund had effectively fulfilled its pledged environmental objectives.

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or impacts. Additionally, the Fund invested in other eligible bonds deemed to be supportive of reducing and eliminating carbon emissions and other environmental objectives. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the
- 3. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

## How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. Not applicable.

#### **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

#### Did this financial product have a sustainable investment objective? ☐ YES ⋈ NO 00 ☐ It made sustainable investments with an characteristics and while it did not have as its environmental objective: 0.00% objective a sustainable investment, it had a proportion of 12.26% of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy with an environmental objective in economic in economic activities that do not qualify as activities that do not qualify environmentally sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective ☐ It made sustainable investments with a ☐ It promoted E/S characteristics, but **did not** social objective: 0.00% make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 35.08%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (scope 1,2,3) of the investee companies (Principal Adverse Impact ("PAI") Indicator 3) for the Fund was 561.81, while for the benchmark it was 1065.83. The average Scope 1 + 2 GHG intensity for the Fund was 82.24, compared to 300.37 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries (PAI indicator 15) for the Fund was 238.87. Furthermore, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 275.73.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. . Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 35.78%, compared to 35.34% for the benchmark. The average unadjusted gender pay gap (PAI indicator 12) of investee companies was 15.29% for the Fund and 16.14% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider the stronger performance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics.

Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 17.19%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the Bloomberg US Corporate Bond
  Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse
  impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

#### … And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 13.63%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 11.17%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 14.95%, while the average allocation increased to 12.26% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has declined, the Fund has maintained its commitment of investing at least 11% of the portfolio in sustainable investments as stipulated in pre-contractual disclosure.

During both reference periods, the Fund maintained its level of investment in Environmental Champions. As of 30 June 2024, the average allocation to Environmental Champions stood at 35.86%, while throughout the fiscal year ending on 30 June 2025, the average allocation was 35.08%.

At the end of the current and previous reference periods, the Fund had no exposure to, or tying with excluded sectors and additional exclusions.

During both reference periods, the Investment Managers has been active in the field of sustainability engagement, with 82 issuers engaged in the previous reference period and 37 in the current reference period.

Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- · The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- · The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations: or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport including electric vehicles, affordable housing, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

A notable example is the environmental impact bond associated with LyondellBasell, a leading global player in the chemical industry committed to advancing solutions for sustainable living. Through the deployment of cutting-edge technologies and strategic investments, the company actively supports the transition toward a circular and low-carbon economy—aiming to create long-term value for customers, investors, and society at large.

As one of the world's largest polymer producers and a pioneer in polyolefin technologies, LyondellBasell manufactures and distributes products that serve critical sectors such as transportation, food safety, clean water, and healthcare.

The bond helped support actions that led to tangible environmental benefits. These include the avoidance of approximately 796,000 tonnes of  $CO_2$  emissions, the treatment or prevention of over 288,000 tonnes of waste, and the production of more than 3.7 million megawatt-hours of renewable energy. Additionally, the initiatives contributed to building a renewable energy capacity of 1,385 megawatts, reinforcing the shift toward cleaner energy systems.

Through this financing framework, LyondellBasell demonstrates how industrial innovation can drive measurable environmental progress and accelerate the global transition to sustainability.

Another illustrative example is the green bond issued by Verizon Communications Inc., a leading global player in the communications industry committed to delivering innovative and inclusive digital services. Through its subsidiaries, the company delivers communications, information, and entertainment services to consumers, businesses, and public entities. Verizon's green financing supports projects such as reducing greenhouse gas emissions, enhancing energy efficiency, and expanding the use of renewable energy sources—reflecting its broader commitment to building a more sustainable and resilient digital infrastructure.

The bond supported initiatives that delivered measurable environmental benefits, including the avoidance of approximately 404,113 tonnes of  $CO_2$  emissions and the addition of 475 megawatts in renewable energy plant capacity through newly constructed or rehabilitated facilities.

By issuing this green bond, Verizon Communications Inc. showcases its commitment to strategic sustainable finance that delivers measurable environmental results and fosters a resilient digital ecosystem aligned with global sustainability goals.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and exclude such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe according to their environmental performance including greenhouse gas emissions and intensity. Issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Another tool, the ESG Credit App ranked corporate issuers by their greenhouse gasses emissions and greenhouse gas intensity using various point such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers were subjected to tests based on their political liberties (PAI #16) and/or corruption.

When deploying funds to sustainable investments, especially the 11% of portfolio of the Fund committed towards environmental and social objectives, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

## -----How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- · Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- · Guiding thematic engagement; and
- · Applying exclusions.

#### Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various references that included energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO2e/GDP): and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi target.

#### Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

#### Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

#### Applying exclusions

The Fund considered UNGC violations, negative impact on biodiversity-sensitive areas and exposure to controversial weapons for the purpose of applying specific ESG exclusions as described in the investment strategy section.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

#### What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country

#### What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 12.26%.

#### Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

98.90% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.10%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day to day requirements of the Fund, as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 98.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 12.26% of its portfolio in sustainable investments.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Asset Allocation historical comparison

#### In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	34.47%
Health Care	12.48%
Communication Services	11.50%
Industrials	6.95%
Information Technology	6.85%
Utilities	6.53%
Energy	5.46%
Consumer Staples	4.78%
Consumer Discretionary	3.56%
Materials	2.84%
Government Bonds	1.78%
Real Estate	1.71%
Top sub-sector	% of Assets
Banks	14.32%
Capital Markets	12.26%
Oil, Gas & Consumable Fuels	4.69%
Diversified Telecommunication Services	4.13%
Health Care Providers & Services	3.75%
Electric Utilities	3.55%
Media	3.25%
Financial Services	3.04%
Insurance	2.97%
Pharmaceuticals	2.80%
Software	2.69%
Biotechnology	2.56%
Wireless Telecommunication Services	2.43%
Machinery	1.96%
Specialty Retail	1.93%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

П	Yes	
	☐ In fossil gas	☐ In nuclear energy
$\boxtimes$	No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments made in transitional and enabling activities? Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.17%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.10%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 1.10% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management purposes, or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 98.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

- 1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
- 2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
- 3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
- 4. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAI metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Not applicable.
