Typical investors in the Sub-Fund are expected to be investors who want to take exposure to the markets covered by the investment policy of the Sub-Fund and are prepared to accept the risks associated with an investment of this type, including the volatility of such markets.

1.2 General

This Supplement sets out information in relation to the Shares and the Sub-Fund. You must also refer to the Prospectus which is separate to this document and describes the ICAV and provides general information about offers of shares in the ICAV. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

The Shares in the ETF Share Classes (as defined below) of the Sub-Fund are issued and admitted to listing on the Official List as maintained by Euronext Dublin and traded on the regulated market of Euronext Dublin.

2 INVESTMENT MANAGER

- 2.1 The Manager has appointed North Atlantic Investment Services Limited, trading as Goshawk Asset Management, with registered office at 6 Stratton Street, Mayfair, London, United Kingdom, W1J 8LD, as investment manager for the Sub-Fund (the Investment Manager) with a discretionary mandate pursuant to the investment management agreement dated 29 August 2024, between the Manager and the Investment Manager (the Investment Management Agreement) described under the heading Material Contracts below.
- 2.2 Under the terms of the Investment Management Agreement, the Investment Manager provides, subject to the overall supervision and control of the Manager, investment management services to the Manager in respect of the Sub-Fund's portfolio of assets. It may delegate all or part of the investment management responsibilities to one or more sub-investment managers, may obtain the services of investment advisers on a non-discretionary basis and may obtain third party research advice with the fees in respect of any such delegation being paid by the Investment Manager out of its own fee.

3 INVESTMENT OBJECTIVE AND POLICIES

3.1 Investment objective

The investment objective of the Sub-Fund is to achieve capital growth over the medium to long term.

3.2 Investment policy

The Sub-Fund is actively managed and in order to seek to achieve its investment objective, will typically invest in at least 80% of its portfolio in global equities and equity related securities both in developed and emerging markets. To a lesser extent, the Sub-Fund may also invest in sovereign bonds issued by governments of developed market countries. The portfolio will be based on long-term themes selected by the Investment Manager which will be balanced with the aim of delivering strong risk-adjusted returns.

The Sub-Fund may invest in ancillary liquid assets and money market instruments which may include bank deposits, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes.

Investors should also note that the Sub-Fund may invest in ETFs established as collective investment schemes and authorised as UCITS in pursuit of its investment objective, subject to the investment restrictions outlined in the Prospectus.

The transferable securities, ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) held by the Sub-Fund will be listed or traded on the Regulated Markets referred to in Appendix 1 of the Prospectus.

3.3 Investment Process

The investment process is designed to create a portfolio of companies with quality characteristics, being profitability and profitability growth, earnings stability; robust capital structure and capital discipline, which benefit from secular growth. To do so, the Investment Manager will identify global themes (as described further below) using quantitatively determined data points to select companies within those themes. The Investment Manager will then apply its valuation criteria to the identified universe (as described further below). As a final step, the Investment Manager will construct the portfolio to seek to deliver strong risk-adjusted returns.

Theme Identification

The Investment manager will seek to identify global themes within industries which have high and sustainable barriers to entry. These themes will tend to be diversified, with a focus on quality and cash flow generation, to ensure that the portfolio's exposure to exogenous events outside of the constituent companies' control is limited.

The Investment Manager's theme generation derives from a combination of portfolio management experience and available information and data in relation to the outlook for specific markets and sub-sectors. These themes will evolve and be curated according to ongoing market developments. The identification of themes will be supplemented by quantitative data analysis. Examples of key global themes include healthcare innovation, industrial automation and demographic led trends.

The Investment Manager will select an initial investment universe from within the identified global themes.

Valuation Criteria

The Investment Manager will then apply its valuation criteria to the initial investment universe. These criteria derive from the price a financial investor would pay to own the whole business in circumstances where it is not bringing any additional value or skills to the company. The Investment Manager will derive this value from analysis of companies' cash flow statement and the balance sheet. The analysis will inform the Investment Manager's judgement on "value for money" at any given time and therefore the allocation between companies within the initial investment universe.

The Investment Manager's valuation criteria will vary between sectors where standard techniques are less applicable such as, financials, petrochemicals and property. In all cases, the Investment Manager compares valuations in each sector globally, particularly paying attention to anomalies in margins between similar industries in different geographies. This can highlight risks that are not easily identified by local analysts and show arbitrage opportunities within the key themes identified. As the price paid for equities should have a margin of safety above this valuation criteria, the margin generally relates to the cyclical risk of the specific company's business.

The investable universe which results from the application of the valuation criteria will be dominated by well-financed businesses in stable or growing sectors with strong barriers to entry.

Portfolio Structure

The Investment Manager will seek to ensure that the portfolio is constructed in order to deliver strong risk-adjusted returns. As part of this, the Investment Manager will carry out a correlation matrix with the selected themes to ensure uncorrelated risk is built into the portfolio. While the Investment Manager will seek to ensure that the Sub-Fund benefits from strong market performance, it will also seek to ensure it is protected in the event of a market downturn.

3.4 Sustainability Risks

The Investment Manager does not integrate sustainability risks in the investment process.

3.5 **EU Taxonomy**

The investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

3.6 **Use of financial derivative instruments and efficient portfolio management**

Investors should note that the Sub-Fund may invest in FDIs for investment, efficient portfolio management and/or hedging purposes. The Sub-Fund may use futures, currency swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Sub-Fund. This may on occasions lead to an increase in the risk profile of the Sub-Fund or result in a fluctuation in the expected level of volatility. The Sub-Fund may also enter into securities lending transactions for efficient portfolio management purposes, and in particular, to reduce costs. Please see the section entitled Risk Factors in the Prospectus in relation to such risks.

The Sub-Fund will employ the commitment approach to assess the Sub-Fund's global exposure and to ensure that the Sub-Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Sub-Fund may be leveraged through the use of the FDIs, any such leverage would not be expected to be in excess of 100% of the Sub-Fund's Net Asset Value. Including FDI's, the total exposure associated with the investments of the Sub-Fund, may not exceed 200% of the Net Asset Value of the Sub-Fund.

Investment in FDIs is subject to the conditions and limits contained in the Central Bank UCITS Regulations issued by the Central Bank. Subject to these limits, the Sub-Fund may invest in FDIs dealt on any of the regulated markets set out in the list of Regulated Markets in Appendix 1 to the Prospectus (and/or over the counter FDIs (OTCs).

The ICAV employs a risk management process which enables it to accurately measure, monitor and manage at any time the various risks associated with FDIs and their contribution to the overall risk profile of the portfolio of assets of the Sub-Fund. The ICAV will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments. The Sub-Fund will only invest in FDIs in accordance with the risk management process filed with the Central Bank.

The Sub-Fund may invest in FDIs dealt over the counter provided that the counterparties to over-the-counter transactions are institutions subject to prudential supervision and belong to categories approved by the Central Bank.

Position exposure to the underlying assets of FDIs, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the Central Bank UCITS Regulations.

Please see the section entitled **Use of Financial Derivative Instruments and Efficient Portfolio Management** in the Prospectus in relation to FDI.

3.7 **Securities financing transactions**

The Sub-Fund may enter into repurchase/reverse repurchase agreements and securities lending arrangements solely for the purposes of efficient portfolio management and, in the case of securities lending in particular to reduce costs, subject to the conditions and within the limits set out in the Prospectus. Any type of assets that may be held by the Sub-Fund in accordance with its investment objective and policies may be

subject to such Securities Financing Transactions. The maximum and expected proportion of the Net Asset Value of the Sub-Fund that can be subject to Securities Financing Transactions is set out in the table below:

	Expected portion of Net Asset Value of the Sub-Fund	Maximum proportion of the Net Asset Value of the Sub-Fund
Securities Lending	20%	45%
Repurchase/reverse repurchase agreements	20%	45%

4 PORTFOLIO TRANSPARENCY

Information about the Investments of the Sub-Fund shall be made available on a daily basis. The Sub-Fund will disclose on www.HANetf.com at the start of each Business Day the identities and quantities of the securities and other assets held by it.

5 INVESTMENT RESTRICTIONS

The general investment restrictions as set out in the Prospectus shall apply.

The Sub-Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.

There may be instances where the weighting of any constituent security could cause the Sub-Fund to breach the investment restrictions set out in the Prospectus. If such an event occurs, it is intended that the Sub-Fund will purchase other assets, the effect of which will seek to maintain, so far as is possible, the same economic exposure to and the same weighting of the security of that issuer without breaching its investment restrictions.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders.

6 BORROWING

The Sub-Fund may borrow money in an amount up to 10% of the market value of its net assets at any time for the account of the Sub-Fund and the Depositary may charge the assets of the Sub-Fund as security for any such borrowing, provided that such borrowing is only for temporary purposes.

The Sub-Fund may acquire currency by means of a back-to-back loan agreement. Foreign currency obtained in this manner is not classified as borrowing for the purposes of the UCITS Regulations provided that the offsetting deposit is denominated in the Base Currency of the Sub-Fund and equals or exceeds the value of the foreign currency loan outstanding.

7 RISK FACTORS

- 7.1 While the general risk factors set out in the section entitled **Risk Factors** in the Prospectus apply to the Sub-Fund, the following risk factors described in the Prospectus under the headings **Absence of prior active market**, **Capital Controls and Sanctions Risk**, **Concentration Risk**, **Specialisation Risk**, **Sector Concentration Risk**, **Currency Risk**, **ETF Share Class and Non-ETF Share Class Risk**, **Environmental, Social and Governance (ESG) Standards**, **SFDR Sub-Fund Classification Risk**, **Screening Risk**, **Interest Rate Risk**, **Liquidity of Investments**, **Small- and Mid-Capitalisation Risk**, **Political and/or Legal/Regulatory Risk**, **Regulatory Restrictions** and **Issuer-specific Risk** are particularly relevant for the Sub-Fund.

7.2 The following risk relates specifically to the Sub-Fund:

The Sub-Fund's assets will be actively managed by the Investment Manager who will have discretion (subject to the Sub-Fund's investment restrictions) to invest the Sub-Fund's assets in investments that it considers will enable the Sub-Fund to achieve its investment objective. There is no guarantee that the Sub-Fund's investment objective will be achieved based on the investments selected.

8 DIVIDEND POLICY

The Sub-Fund may issue Distributing Shares and Accumulating Shares. Where any Distributing Shares are issued, the Directors may declare dividends annually on or about December in each year to the Shareholders of such Shares out of the net income and/or realised gains net of realised and unrealised losses and/or capital of the Sub-Fund attributable to the Distributing Shares, in accordance with the terms of the Prospectus. **Where distributions will be paid out of the capital of the Sub-Fund, investors may not receive back the full amount invested.** The profits attributable to the Accumulating Shares in the Sub-Fund shall be retained within the Sub-Fund and will be reflected in the Net Asset Value of the Accumulating Shares.
