An umbrella fund with segregated liability between the sub-funds

Dated 11 July 2025

This Supplement replaces the Supplement dated 28 May 2024.

IMPORTANT INFORMATION

Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section headed "Risk Factors" of the Prospectus and the section headed "Other Information – Risk Factors" of this Supplement for a discussion of certain risks that should be considered by you.

In addition to investing in transferable securities, the Company may invest on behalf of the Fund in financial derivative instruments ("FDIs"), where applicable. Certain risks attached to investments in FDIs are set out in the Prospectus under "Risk Factors".

The Shares purchased on the secondary market cannot usually be sold directly back to the Fund. Investors must buy and sell Shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying Shares and may receive less than the current net asset value when selling them.

Prospective investors should refer to the annex to this Supplement regarding the Fund's sustainable investment objective.

An investment in the Shares is only suitable for you if you (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

Profile of a typical investor

A typical investor would be one who is a private or institutional investor and is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares.

Responsibility

The Directors accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement when read together with the Prospectus (as complemented, modified or supplemented by this Supplement) is in accordance with the facts as at the date of this Supplement and does not omit anything likely to affect the importance of such information.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the Company and provides general information about offers of shares in the Company. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent

of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

As at the date of this document, the Fund has no loan capital (including term loans) outstanding or created but unissued, nor any outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, or guarantees or other contingent liabilities.

Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and the latest annual report and audited accounts of the Company and the Fund (other than to prior recipients of the Prospectus) and if published after such report, a copy of the then latest semi-annual report and unaudited accounts. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the Company has already complied. If you wish to apply for the opportunity to purchase any Shares, it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

Definitions

Words and expressions defined in the Prospectus will, unless otherwise defined in this Supplement, have the same meaning when used in this Supplement.

For the purpose of this Supplement:

“Delegated Acts” means Commission Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement.

“EU Paris-Aligned Benchmark” means a benchmark that is labelled as an EU Paris-aligned benchmark where the underlying assets are selected in such a manner that the resulting benchmark portfolio’s greenhouse gas emissions are aligned with the long-term global warming target of the Paris Agreement and is constructed in accordance with the minimum standards laid down in the Delegated Acts.

“Paris Agreement” means a legally binding international treaty on climate change adopted in Paris on 12 December 2015 and which entered into force on 4 November 2016. The goal of the Paris Agreement is to limit global warming to below 2 degrees Celsius, preferably to 1.5 degrees Celsius, compared to pre-industrial levels. To achieve this long-term temperature goal, countries aim to reach global peaking of greenhouse gas emissions as soon as possible to achieve a climate neutral world by 2050.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective of the Fund

The objective of the Fund is to achieve the net total return performance of the MSCI Japan ESG Climate Paris Aligned Benchmark Select Index (the **“Reference Index”**) less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund’s exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

Further information on the components and selection criteria of the Reference Index is set out below under "**General Description of the Reference Index**".

Investment Policy of the Fund

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "**Investment Objective and Policies**" and section 5 "**Investment Restrictions and Permitted Investments**" of the Prospectus.

There are a number of circumstances where gaining access to the components of the Reference Index may be prohibited by regulation, may not otherwise be in the Shareholders' interests or may not otherwise be possible or practicable.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards and spot foreign exchange transactions. Further details on FDIs and how they may be used are contained in the main part of the Prospectus under "**Appendix III - Efficient Portfolio Management and use of Financial Derivative Instruments**".

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "**Investment Objectives & Policies**" and under "**Investment Restrictions and Permitted Investments**".

Transparency of sustainable investments

The Fund has a reduction in carbon emissions as its objective pursuant to Article 9(3) SFDR.

The Fund has a sustainable investment objective by pursuing a strategy that seeks to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieves this objective by tracking the Reference Index, which has a methodology that is aligned with attaining the objective of the Fund.

The Fund commits to investing a proportion of assets in sustainable investments (which may be in economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation under Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the "Taxonomy Regulation")).

The Fund does not currently intend to be aligned with the Taxonomy Regulation and, at the date of this Supplement, 0% of the Fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The Manager will keep the Fund's position vis-à-vis the Taxonomy Regulation under consideration and, to the extent required, the Supplement will be amended accordingly.

Further information on the Reference Index can be found in the section below titled "**General Description of the Reference Index**".

Index Tracking Strategy

It is anticipated that the "Tracking Error" of the Fund (being the standard deviation of the difference in returns between the Fund and the Reference Index) between 0% and 1% under normal market conditions. However, exceptional circumstances may arise which cause the Fund's Tracking Error to exceed 1%. Investors should note that the Tracking Error set out in this section is for the Unhedged Share Classes against the Reference Index (which is also unhedged).

Investment Restrictions of the Fund

Investors in particular must note that the general investment restrictions set out under "**Investment Restrictions and Permitted Investments**" in the Prospectus apply to the Fund.

Efficient Portfolio Management

Further information on efficient portfolio management techniques that may be used by the Fund is contained in the "**Securities Financing Transactions**" section below and in the main body of the Prospectus under the heading "**Efficient Portfolio Management and use of Financial Derivative Instruments**".

Securities Financing Transactions

The Fund may use certain 'securities financing transactions', as defined in Regulation 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 ("SFTR"), ("Securities Financing Transactions"), namely securities lending. The Fund's use of Securities Financing Transactions will be subject to the requirements of SFTR and in accordance with normal market practice, the Central Bank Regulations and any other statutory instrument, regulations, rules, conditions, notices, requirements or guidance of the Central Bank issued from time to time applicable to the Company pursuant to the Regulations ("Central Bank Rules"). Such Securities Financing Transactions may be entered into for any purpose that is consistent with the investment objective of the Fund, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risks. Securities lending will be for efficient portfolio management purposes only.

The type of assets that may be held by the Fund in accordance with its investment objective and policies and may be subject to such Securities Financing Transactions are equities. The maximum proportion of the Fund's assets that may be subject to securities lending is 100%, and the expected proportion of the Fund's assets that may be subject to securities lending is between 0% and 30%. Please refer to the Prospectus section "Securities Financing Transactions" for further details.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the foreign exchange exposure in any hedged Share Classes (identified by "Hdg" in their names). The purpose of the hedging in the hedged Share Classes is to limit, at a Share Class level, the profit or loss generated from foreign exchange exposure when holding an asset in a currency other than the Base Currency of the Fund. This is achieved by the hedged Share Classes employing 30 day rolling forward FX contracts, which are rolled monthly.

All costs and losses arising in relation to such currency hedging transactions will be borne by the hedged Share Class and all gains arising in connection with such hedging transactions will be attributable to the relevant Share Class. Although the Fund may utilise currency hedging transactions in respect of Share Classes, it shall not be obliged to do so and to the extent that it does employ

strategies aimed at hedging certain Share Classes, there can be no assurance that such strategies will be effective. The costs and related liabilities/benefits arising from instruments entered into for the purposes of hedging the currency exposure for the benefit of any particular Share Class of the Fund (where the currency of a particular Share Class is different to the Base Currency of the Fund) shall be attributable exclusively to the Share Class. Under exceptional circumstances, such as, but not limited to, where it is reasonably expected that the cost of performing the hedge will be in excess of the benefit derived and therefore detrimental to Shareholders, the Company may decide not to hedge the currency exposure of such Share Classes.

Where the Investment Manager seeks to hedge against currency fluctuations, while not intended, this could result in over-hedged or under-hedged positions due to external factors outside the control of the Company. However, over-hedged positions will not exceed 105% of the Net Asset Value of the relevant Share Class and hedged positions will be kept under review to ensure that over-hedged positions do not exceed the permitted level and that under-hedged positions do not fall short of 95% of the portion of the Net Asset Value of the relevant Share Class and any under-hedged position will be kept under review to ensure it is not carried forward from month-to-month. This review will also incorporate a procedure to ensure that positions in excess of 100% of Net Asset Value will not be carried forward from month to month.

Further information on currency hedging at Share Class level is contained in the main body of the Prospectus under the heading "**Hedged Classes**".

Collateral Policy

- (a) **Non-Cash Collateral:** In addition to the requirements for valuation of non-cash collateral in the Prospectus, subject to any agreement on valuation made with the counterparty, collateral posted to a recipient counterparty for the benefit of the Fund will be valued daily at mark-to-market value.
- (b) **Issuer Credit Quality:** In addition to the requirement for Issuer Credit Quality set out in the Prospectus, assets provided by the Fund on a title transfer basis shall no longer belong to the Fund and shall pass outside the custodial network. The counterparty may use those assets at its absolute discretion. Assets provided to a counterparty other than on a title transfer basis shall be held by the Depositary or a duly appointed sub-depositary.

Further information on the criteria which collateral received by the Fund must meet is contained in the main body of the Prospectus under the heading "**Non-Cash Collateral**".

- (c) **Collateral - Posted by the Fund:** In addition to the requirements in respect of collateral posted to a counterparty in the Prospectus, collateral posted to a counterparty by or on behalf of the Fund will consist of such collateral as is agreed with the counterparty from time to time and may include any types of assets held by the Fund.
- (d) **Valuation:** Information in respect of the collateral valuation methodology used by the Company can be found in the Prospectus under the heading "**Appendix III - Efficient Portfolio Management and use of Financial Derivative Instruments**". The rationale for the use of this collateral valuation methodology is primarily to guard against the price volatility of assets being received by the Fund as collateral.

The risk exposure of the Fund to counterparties will remain within the limits prescribed in the Prospectus under "**Appendix II - Investment Restrictions Applicable to the Funds under the Regulations**".

Further information on the collateral policy is contained in Appendix III to the Prospectus under the heading "**Collateral Policy**".

Borrowing and Leverage

The Company on behalf of the Fund may borrow up to 10% of the Net Asset Value of the Fund on a temporary basis. Such borrowings may only be used for short term liquidity purposes to cover the

redemption of Shares. Further information on Borrowing and Leverage is contained in the main body of the Prospectus under the heading "**Borrowing and Lending Powers**" and "**Leverage**" respectively.

The Company will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund's total exposure to the Reference Index will be limited to 100% of Net Asset Value.

While it is not the Investment Manager's intention to leverage the Fund, any leverage resulting from the use of FDIs will be done in accordance with the Regulations.

Dividend Policy

Dividends will be declared on a quarterly basis for the Dist Shares, the EUR Hdg Dist Shares, the GBP Hdg Dist Shares, the CHF Hdg Dist Shares, and the MXN Hdg Dist Shares, in accordance with the general provisions set out in the Prospectus under the heading "Dividend Policy" and Shareholders will be notified in advance of the date on which dividends will be paid. Distributions will not be made in respect of the Acc Shares, the EUR Hdg Acc Shares, the GBP Hdg Acc Shares, the CHF Hdg Acc Shares, and the MXN Hdg Acc Shares and income and other profits will be accumulated and reinvested in respect of those Shares.

Trading

Application will be made to Euronext Dublin or Deutsche Boerse and/or such other exchanges as the Directors may determine from time to time (the "**Relevant Stock Exchanges**") for listing and/or admission to trading of the Shares issued and available to be issued on the main market of each of the Relevant Stock Exchanges on or about the Launch Date. This Supplement and the Prospectus together comprise listing particulars for the purposes of trading on the main market of each of the Relevant Stock Exchanges.

Exchange Traded Fund

The Fund is an Exchange Traded Fund ("**ETF**"). The Shares of this Fund are fully transferable among investors and will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that Shares will be bought and sold by private and institutional investors in the secondary market in the same way as the ordinary shares of a listed trading company.

Management Fee	Up to 0.24% per annum or such lower amount as may be advised to Shareholders from time to time.

The Management Fee, a percentage of the Net Asset Value of the relevant Class of Shares (plus VAT, if any), is payable by the Company out of the Fund Assets to the Manager. The Management Fee will accrue on each day and will be calculated on each Dealing Day and paid monthly in arrears. The Manager will pay out of its fees (and not out of the assets of the Fund) the fees and expenses (where appropriate) of the Investment Manager, the Administrator, the Depositary, the Directors and the ordinary fees, expenses and costs incurred by the Fund that include Setting Up Costs and Other Administrative Expenses as described in the Prospectus.

Where a distribution fee, commission or other monetary benefit is received by the Fund, the Manager or any person acting on behalf of the Fund or the Manager of the Fund, the fee, commission or other monetary benefit shall be paid into the assets of the Fund.

Dilution Levy: The Fund will not apply a dilution levy.

This section headed "**Fees and Expenses**" should be read in conjunction with the section headed "**Fees and Expenses**" in the Prospectus.

German Investment Tax Act

In accordance with the German Investment Tax Act, as amended from time to time ("**GITA**"), the Fund intends to qualify as an equity fund as defined in section 2 para 6 GITA, and will continuously invest more than 50% of its Net Asset Value (as defined in section 2 para. 9a sent. 2 and 3 GITA) into equities (as defined in section 2 para 8 GITA).

Exchange of Shares

Shareholders may apply to exchange on any Dealing Day all or part of their holding of Shares of any Class of the Fund (the "**Original Class**") for Shares of another Class of the Fund which is being offered at that time (the "**New Class**") provided that all the criteria for applying for Shares in the New Class have been met.

The general provisions and procedures relating to redemptions will apply equally to exchanges. All exchanges will be treated as a redemption of the Shares of the Original Class and application to the purchase of Shares of the New Class, save that no Subscription Charge or Redemption Charge will be payable. Exchanges of Shares may be subject to an Exchange Charge of up to 3% of the Repurchase Price for the total number of Shares in the Original Class to be repurchased.

GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index tracks the performance of large and mid-capitalisation companies across Japan and aims to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. The Reference Index also provides exposure to companies with high ESG metrics and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

The Reference Index is further described below but only represents an extract of information available from public sources and neither the Directors, the Manager, MSCI Inc. or such other successor sponsor to the Reference Index (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

The Reference Index is initially constructed from the MSCI Japan Index (the "**Parent Index**") by using the Index Provider's exclusionary criteria to exclude from the Parent Index securities that: 1) are issued by an issuer that is not covered by MSCI ESG Research, specifically, MSCI ESG Controversies, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research, or MSCI Climate Change Metrics; 2) have faced severe or very severe controversies pertaining to ESG issues (including UN Global Compact violations) – defined as companies with an MSCI ESG Controversy Score of 0 or 1; 3) are involved (as defined by the Index Provider and detailed further in the methodology for the Reference Index) in any of the following business activities: controversial weapons, conventional weapons, civilian firearms, nuclear weapons, conventional and unconventional oil & gas, oil sands, shale oil, shale gas, uranium mining, thermal coal (including power generation, transport, distribution, and mining), oil & gas power, nuclear power, oil & gas refining, fossil fuel reserves ownership, tobacco, recreational cannabis, adult entertainment, alcohol, gambling, GMOs and power generation from liquid fuel and natural gas; 4) have an MSCI ESG rating of BB or below; and 5) are categorised as investment trust companies.

The remaining constituents are then subject to an optimisation which has the aim of aligning the Reference Index to the objectives of the Paris Agreement by reducing the weighting of companies exposed to climate transition risks, maximising the weighting of companies with the highest exposure to climate transition opportunities and minimising the ex-ante tracking error relative to the Parent Index.

The Reference Index seeks to achieve alignment with the objective of the Paris Agreement by adhering to the objectives set out below. Further details on the parameter levels to each objective (i.e. achieving a minimum reduction or increase) can be found in the methodology for the Reference Index.

A. Transition and Physical Risk Objectives

The Reference Index seeks to achieve the following:

1. a minimum reduction of overall Greenhouse Gas ("GHG") Intensity relative to the Parent Index;
2. a minimum average reduction in GHG Intensity per year;
3. a minimum active weight in sectors with a high impact on climate change relative to the Parent Index (as per the Delegated Acts - stocks in the NACE¹ Section codes A, B, C, D, E, F, G, H, L are classified as "High Climate Impact" sectors);
4. a minimum increase in the aggregate weight of companies setting targets relative to the aggregate weight of such companies in the Parent Index;
5. a minimum reduction in Weighted Average Potential Emissions Intensity relative to the Parent Index;
6. an Aggregate Climate Value-at-Risk under the 1.5 degree scenario;
7. a minimum increase in weighted average Low Carbon Transition (LCT) Score relative to the Parent Index; and
8. a minimum reduction in Weighted Average Extreme Weather Climate Value-at-Risk relative to the Parent Index.

¹ NACE is the European Union's classification of economic activities. Stocks in the NACE Section codes A, B, C, D, E, F, G, H, L are classified as "High Climate Impact" sector and other stocks are classified 'Low Climate Impact' sector. For further details regarding NACE, please refer to https://ec.europa.eu/eurostat/statistics-explained/index.php?title=NACE_background.

B. Transition Opportunity Objectives

The Reference Index also seeks to achieve the following against the Parent Index:

1. a minimum increase in weighted average LCT Score relative to the Parent Index;
2. a minimum ratio of Weighted Average Green Revenue/Weighted Average Brown Revenue relative to the Parent Index; and
3. a minimum increase in Weighted Average Green Revenue relative to the Parent Index.

The remaining constituents are also subject to a set of diversification and turnover constraints, details of which can be found in the methodology for the Reference Index.

Capitalised terms used above and not defined herein are defined by the Index Provider. Further information on these terms can be found in the methodology for the Reference Index or on the Index Provider's website.

MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

Index Rebalancing

The Reference Index rebalances on a semi-annual basis. At each rebalance, the weights of the securities are recomputed by applying the exclusionary criteria and optimisation approach described above.

The ongoing compliance of the index constituents with the Index Provider's ESG criteria is reviewed on a quarterly basis. At quarterly reviews, the Reference Index is not re-balanced, but an existing constituent may be deleted from the Reference Index if it is identified as being involved in a business activity excluded by the Reference Index or no longer complies with the desired ESG profile based on the Index Provider's ESG ratings and controversies research.

The Fund will bear the costs of any rebalancing trades (i.e. the costs of buying and selling securities of the Reference Index and associated taxes and transaction costs).

Index Provider and Website

The Reference Index is sponsored by MSCI and more details on the Reference Index can be found at <https://www.msci.com/esg-indexes>. The methodology for the Reference Index can be found at: https://www.msci.com/eqb/methodology/meth_docs/MSCI_ESG_Climate_Paris_Aligned_Benchmark_Select_Indexes_Methodology.pdf.

OTHER INFORMATION

Taxation

The tax treatment of the Company is set out in the Prospectus of the Company and the tax information provided therein is based on tax law and practice as at the date of the Prospectus.

Shareholders and potential investors are advised to consult their professional advisers concerning possible taxation or other consequences of purchasing, holding, selling or otherwise disposing of the Shares under the laws of their country of incorporation, establishment, citizenship, residence or domicile.

Consequences of Disruption Events

Upon the occurrence of a Disruption Event (and without limitation to the Directors personal powers as further described in the Prospectus) an Approved Counterparty may make adjustments to determine the valuation of FDIs. Further information on the consequences of Disruption Events is contained in the main body of the Prospectus under the heading "**Disruption Events**".

Limited Recourse

A Shareholder will solely be entitled to look to the assets of the Fund in respect of all payments in respect of its Shares. If the realised net assets of the Fund are insufficient to pay any amounts payable in respect of the Shares, the Shareholder will have no further right of payment in respect of such Shares nor any claim against or recourse to any of the assets of any other Fund or any other asset of the Company.

Risk Factors

Certain risks relating to the Shares are set out under the heading "**Risk Factors**" in the Prospectus. In addition, Shareholders must also note that:

- a) **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer, general and regional economies, market conditions and broader economic and political developments. This may result in fluctuations in the value of the Fund.
- b) **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- c) **Country Concentration Risk:** A Fund may be invested in a single country or small number of countries. A geographically concentrated investment strategy may be subject to a greater degree of volatility and of risk than one that is geographically diversified. The Fund's Investments will become more susceptible to fluctuations in value resulting from economic or business conditions in the country where the Fund is invested. As a consequence, the aggregate return of the Fund may be adversely affected by the unfavourable developments in such country

Investors should also refer to the Prospectus for additional disclosure of risks and conflicts of interest.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ Yes

☐ No

☒ It will make a minimum of **sustainable investments with an environmental objective:** 80 %

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:** _____ %

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of _____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

What is the sustainable investment objective of this financial product?

The Fund has a sustainable investment objective to invest in companies that seek to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieves the sustainable investment objective by tracking the MSCI Japan ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund.

The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

The Fund uses a variety of indicators to measure the attainment of the sustainable investment objective. This includes:

- MSCI ESG Score (as defined in the methodology of the Reference Index) improvement relative to the Parent Index;
- CO2 emissions reduction relative to the Parent Index;
- CO2 emissions intensity (scope 1,2 and 3) reduction at each Rebalance Date relative to the decarbonisation trajectory base date; and
- Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index).

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that don't meet certain PAI thresholds are excluded from the Reference Index, as defined in the methodology.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption

The Fund also relies on the qualitative research and monitoring of Invesco's ESG team to take into account the RTS PAI indicators ("**Invesco's PAI framework**") and to assess whether the sustainable investments of the Fund cause significant harm to the relevant environmental or social investment objective. Where a company does not meet certain thresholds according to Invesco's PAI framework, it can still be held within the Fund's portfolio but will not be considered a "sustainable investment" within the Fund, as measured according to Invesco's PAI framework.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index reduces exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excludes a number of companies involved in certain business activities, and through removal of companies involved in thermal coal and the oil and gas industry the index further reduces its exposure to greenhouse gas emissions. The methodology also excludes companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the index also addresses a number of other adverse indicators. The index also excludes any companies where data isn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity and land use, toxic emissions and waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership and control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity and land use, energy and climate change, toxic emissions and waste, operational waste, discrimination and workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Given the climate focus of the Fund, a number of social indicators may not be relevant to the investment strategy of the Fund and as a result the methodology of the Reference Index may not specifically consider these indicators.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights is captured in the index methodology of the Fund, with the result that securities will be excluded from the investible universe if they are deemed not to be in alignment.

The index methodology excludes companies that aren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the Human Rights space.

The index methodology excludes companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the United Nations Global Compact, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes ☐ No

Yes, as noted above, the index methodology considers principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Information on principal adverse impacts on sustainability factors is available in the annual report of the Fund.

The next annual report of the Fund will describe the extent to which the sustainable investment objective of the Fund is met. The annual report of the fund will be available on the Fund's website at etf.invesco.com.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What investment strategy does this financial product follow?

The investment objective of the Fund is to achieve the net total return performance of the Reference Index, less fees, expenses and transaction costs. In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index.

Please note that this Annex forms part of, and should be read in conjunction with the Supplement. Please refer to the Supplement for further information.

● *What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?*

The Fund achieves the sustainable investment objective by tracking the Reference Index within an acceptable tracking error and in accordance with the investment policy as outlined in the Supplement.

The methodology of the Reference Index applies exclusionary criteria to exclude from the MSCI Japan Index (the "**Parent Index**") securities that: 1) have not been assessed or rated by the Index Provider on the basis of MSCI ESG metrics (see further details below); 2) have faced severe or very severe controversies pertaining to ESG issues (including UN Global Compact violations) - defined as companies with an MSCI ESG Controversy Score of 0 or 1; 3) are involved (as defined by the Index Provider and detailed further in the methodology for the Reference Index) in any of the following business activities: controversial weapons, conventional weapons, civilian firearms, nuclear weapons, conventional and unconventional oil & gas, oil sands, shale oil, shale gas, uranium mining, thermal coal (including power generation and mining), thermal coal power, oil & gas power, nuclear power, oil & gas refining, fossil fuel reserves ownership, tobacco, recreational cannabis, adult entertainment, alcohol, gambling, GMOs and power generation from thermal coal, liquid fuel and natural gas ; 4) have an MSCI ESG rating of B or below; and 5) are categorised as investment trust companies.

The remaining constituents are then subject to an optimisation which has the aim of aligning the Reference Index to the objectives of the Paris Agreement by reducing the weighting of companies exposed to climate transition risks, maximising the weighting of companies with the highest exposure to climate transition opportunities and minimising the ex-ante tracking error relative to the Parent Index.

The Reference Index rebalances on a semi-annual basis (a "**Rebalance Date**"). At each rebalance, the weights of the securities are recomputed by applying the exclusionary criteria and optimisation approach described above, and changes to the components of the Reference Index are implemented at the next Rebalance Date.

Given the climate focus of the Fund, a number of social indicators may not be relevant to the investment strategy of the Fund and as a result the methodology of the Reference Index may not specifically consider these indicators.

Where a previously eligible security subsequently ceases to meet the criteria of the Reference Index, or where the Fund acquires a security as a result of a corporate action, the Fund may continue to hold such security until such time that the security is removed as a component of the Reference Index at the next Rebalance Date.

● *What is the policy to assess good governance practices of the investee companies?*

The index methodology of the Reference Index includes good governance criteria whereby companies are assessed against indicators such as sound management structures, employee relations, remuneration of staff and tax compliance. Companies that are deemed not to meet good governance practices according to the methodology of the Reference Index will be excluded.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

90% of the Fund's NAV will be selected according to the binding elements of the investment strategy. A minimum of 80% of the Fund's NAV will align with the sustainable investment objective of the Fund by contributing to the environmental objective of the Fund, meeting the do no significant harm criteria and good governance criteria. Up to 20% of the Fund's NAV may not fully meet all the requirements to be deemed sustainable investments, according to Invesco's PAI framework, as there may be certain social indicators not specifically considered by the Fund (those that are not relevant to the climate focus of the strategy). However the investments will still be selected according to the criteria of the methodology of the Reference Index. Up to 10% of the Fund's NAV will be invested in financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity purposes.

● *How does the use of derivatives attain the sustainable investment objective?*

The Fund does not use derivatives to attain sustainable investment objective of the Fund. The Fund will use derivatives for hedging and efficient portfolio management purpose only.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● *To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?*

0%

● *Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?*

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What is the minimum share of investments in transitional and enabling activities?

NA

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

80%

What is the minimum share of sustainable investments with a social objective?

NA

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Up to 20% of the Fund's NAV may not fully meet all the requirements to be deemed sustainable investments, when assessed against Invesco's PAI framework, however the investments will be selected according to the overarching sustainable investment objective of the Fund and the criteria of the Reference Index, which includes minimum exclusions and selection criteria applicable to the EU Climate Benchmarks.

Up to 10% of the Fund's NAV will be investments such as financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards are applied in relation to these instruments. The proportion and use of these investments does not affect the delivery of the sustainable investment objective as the Fund commits to investing a minimum proportion of its investments to attaining the sustainable investment objective of the Fund.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes

● How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

The Reference Index has been selected on the basis that it aligns with the sustainable investment objective of the Fund, which is to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

The Fund aims to track the performance of the Reference Index as closely as possible. As such, the Fund replicates the composition of the Reference index as closely as practical.

- *How does the designated index differ from a relevant broad market index?*

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

- *Where can the methodology used for the calculation of the designated index be found?*

Please refer to the index methodology which can be found on the 'Documents' tab of the Fund at etf.invesco.com.
