Invesco FTSE RAFI Emerging Markets UCITS ETF Dist

PEHH

Fund objective

The Invesco FTSE RAFI Emerging Markets UCITS ETF Dist aims to provide the net total return performance of the FTSE RAFI Emerging Index (the "Reference Index"), less the impact of fees. The fund distributes dividends on a quarterly basis.

An investment in this fund is an acquisition of units in a passively managed, index tracking fund rather than in the underlying assets owned by the fund.

Bloomberg ticker	PEHH SW
Fund size	USD 79.31m
NAV per share	USD 11.30
Shares in issue	7,020,749
Distribution yield	1.49%
SFDR classification	Article 6

Risk indicator

Lower risk Higher risk

The Risk Indicator is subject to change and is correct based on the data available at the time of publication.

¹ Ongoing charge includes management fee, custody and administration costs but excludes transaction costs. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments will fluctuate and you may not get back the full amount invested. As a large portion of this fund is invested in less developed countries, investors should be prepared to accept a higher degree of risk than for an ETF that invests only in developed markets. The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults. The value of equities can be affected by certain factors such as issuer's circumstances or economic and market conditions. This may result in value fluctuations. The Fund's performance may be adversely affected by variations in the exchange rates between the base currency of the Fund and the currencies to which the Fund is exposed.

About the index

The Reference Index is designed to break with the traditional price-based market cap weighted index design and instead derives its constituent weights from fundamental measures of company size. Its constituents are selected and weighted using four fundamental factors: Sales (averaged over the prior five years), Cash Flow (averaged over the prior five years), Book Value (at the review date), and Dividends (total dividend distributions averaged over the last five years).

Past performance does not predict future returns.

Source: Invesco, Bloomberg L.P., FactSet. Index/Benchmark performance is shown in the index/benchmark currency. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Factors: An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

Physical Replication: Physical funds invest directly in constituents of the benchmark index.

Replication Method: Strategy employed by the fund to achieve its objective.

UCITS: Undertakings for Collective Investment in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.
