Invesco Physical Platinum ETC

SPPT

Product objective

The Invesco Physical Platinum ETC aims to provide the performance of the spot platinum price through certificates collateralised with physical platinum. Each Platinum ETC is a certificate, which is secured by physical platinum held in J.P. Morgan Chase Bank's London vaults. The Issuer of the certificates, Invesco Physical Markets PLC (Invesco PMP), is an Irish-domiciled company administered by J.P. Morgan Administration Services (Ireland) Limited. The investment return is achieved by holding physical platinum, which is valued daily at the PM auction for the London Bullion Market Association ("LBMA") Platinum price. The ETC will use a "swing bar" approach, whereby platinum plates/ingots equal to at least the full value of the certificates will be held in an allocated account in the name of the issuer. Invesco ETCs are exchange traded certificates and not funds or exchange traded funds.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested. If the issuer cannot pay the specified return, the proceeds from the sale of the precious metal will be used to repay investors. Investors will have no claim on the other assets of the issuer. Instruments providing exposure to commodities are generally considered to be high risk which means there is a greater risk of large fluctuations in the value of the instrument.

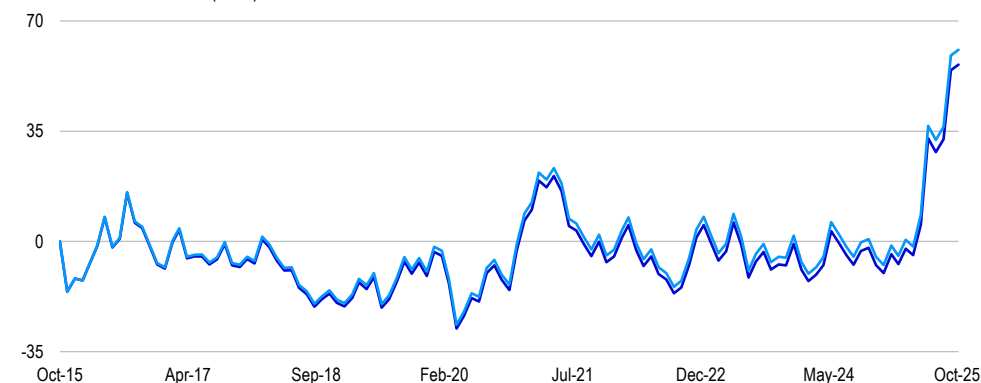

About the benchmark

The ETC aims to provide the performance of platinum, as measured by the LBMA Platinum Price. The price is in US dollars per troy ounce.

Source: Invesco, Bloomberg L.P., FactSet. Index/Benchmark performance is shown in the index/benchmark currency. ETC performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETC NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETC does not necessarily always hold all the securities in the index in their respective weighting. This ETC does not charge an entry fee.
