Objective and Investment Policy

The objective of this Sub-Fund is to track the performance of MSCI Europe ESG Broad CTB Select Index, and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The Sub-Fund aims to achieve a level of tracking error of the Sub-Fund and its index that will not normally exceed 1%.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Index Data (Source : Amundi)

Description of the Index

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return. MSCI Europe ESG Broad Select Index is an equity index based on the MSCI Europe Index representative of the large and mid-cap securities across developed markets countries in Europe (the "Parent Index"). The index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score and reducing carbon footprint by at least 20% compared to its Parent Index whilst maintaining the risk and return characteristics similar to those of the Parent Index. More information about the composition of the index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com)
