Objective and Investment Policy

The objective of this Sub-Fund is to track the performance of STOXX Europe Total Market Defense Capped Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

« Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. These technical net asset values are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares. »

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility	29.95%	-	29.85%
Benchmark volatility	29.96%	-	29.84%
Ex-post Tracking Error	0.19%	-	0.20%
Sharpe ratio	0.08	-	0.34

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Index Data (Source : Amundi)

Description of the Index

The Index is an equity index designed to capture the performance of eligible equity securities from the STOXX Europe Total Market Index (the "Parent Index"). The Parent Index covers approximately 95 percent of the free float market capitalisation across 17 European countries, as per Index methodology. Eligible equity securities are companies classified in the Aerospace and Defense sector, according to the Industry Classification Benchmark ("ICB"), and that have a proven revenue exposure to defense activities. The defense revenue exposure is defined using Revere (RBICS) data and the Index aims to capture companies with proven exposure to the Defense theme.
