FUND OVERVIEW
The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Russell 1000 Growth UCITS 30/18 Capped Net Tax 15% Index, the Fund's benchmark index (Index).

KEY BENEFITS
1. Seeks to track the performance of an index which aims to measure the performance of the constituent securities of the Russell 1000 Index which exhibit higher growth characteristics
2. Provides exposure the index that measures the performance of the large and mid capitalisation segment of the US equity market.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the Benchmark Index was created to select securities within the Parent Index for their higher growth potential, there is no guarantee this objective will be achieved. Securities that previously exhibited high growth may not experience continued positive growth or may experience more volatility than the market as a whole.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV performance. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.
