Dear Investors,

BlackRock Asset Management Deutschland AG looks back on positive market development in the Q1-Q4 2023 reporting period and expects the market for exchange-traded products (ETPs) to continue to develop dynamically. ETPs are selected financial instruments, such as ETFs, that are traded throughout the day in national stock exchanges, which have become an important part of the German investment fund industry. iShares in particular benefited from this development. In 2023, iShares achieved net inflows of USD 70.8 billion or EUR 64.1 billion across the EMEA region (Europe, Middle East & Africa), up from USD 48.3 billion or EUR 45.3 billion in 2022. This represented the highest proportion of inflows into ETFs in the EMEA region at 43.9%.

The range of iShares ETFs currently comprises 687 share classes admitted for sale in Germany. This gives investors in this country easy and diversified access to a variety of global markets and asset classes. Around one tenth (65) of these exchange-traded share classes are set up in Germany and can be recognized by the "(DE)" in the fund name.

As of 31 October 2024, the volume of German funds under management was USD 54.4 billion or EUR 50.1 billion. The volume of the 22 sub-funds, of which 21 sub-funds are admitted for public distribution, was USD 11.5 billion or EUR 10.6 billion on the same date. This Annual Report provides you with detailed information about the performance of our index funds.

The German economy remains in a difficult phase, particularly in the industrial and construction sectors. The German economy remains in a marked phase of weakness, with GDP declining slightly again in the third quarter of 2024. Industrial and construction output fell significantly, primarily due to persistently high financing costs and uncertainties surrounding economic conditions, which weigh on investment and dampen demand for capital goods. Demand for German exports has shown only a modest recovery, indicating ongoing competitiveness issues. Both domestic and foreign demand for German industrial goods remain subdued, and low capacity utilization in manufacturing further depresses investment.

Private consumption also provided limited support to economic growth in the third quarter. Although real incomes have risen as wages increase more than prices, consumers remain cautious and are slow to spend their additional disposable income. Consumer sentiment has shown a slight improvement but remains low, while savings rates continue to be high.

In August, industrial production saw a minor increase, almost entirely attributable to the automotive sector, where specific factors played a role. Production in energy-intensive industries remains weak overall, and new orders fell sharply in August after a previous rise driven by large orders. Domestic demand weakened, and the slight recovery in foreign demand for German industrial goods lost momentum. Business expectations in the industrial sector declined markedly in the third quarter, with no short-term improvement expected for the industrial economy.

The labor market has so far responded mildly to the economic downturn, with a slight increase in unemployment. Sectors such as manufacturing and retail are seeing job cuts, while hiring continues in health, education, and logistics. Short-time work remains largely limited to manufacturing, as no special access facilitations are currently in place.

Energy commodity prices rose slightly due to geopolitical tensions but eventually stabilized. Inflation fell to 1.8% in September, driven by a sharp decline in energy prices, though food prices, especially for fruits and vegetables, increased. These developments suggest that the German economy may remain in a prolonged phase of weakness in the medium term.

From the Company's perspective, the main uncertainties relate to the further development of inflation and the corresponding reaction of the central banks. Furthermore, in addition to geopolitical conflicts such as in Ukraine, Taiwan or Middle East, various parliamentary and presidential elections outside Europe are also pending. With its broad product range geared to investor and market interests, the Company continues to believe that it is well equipped to compete, even though increasing competitive pressure is being felt, partly as a result of the market entry of further and in some cases large competitors, which is increasing the pressure on margins in the asset management industry. In order to maintain the Company's position in the future despite increasing competition in the ETF market, a large number of customer group-specific and individual sales activities are planned.

Since the start of the Russian Federation's war of aggression against the sovereign neighboring state of Ukraine on February 24, 2022, economic sanctions against Russia, which had already been in place since 2014, have been significantly expanded. In addition to the European Union, these were also issued by other international organizations as well as nation states, such as the United Kingdom, Norway or Switzerland against companies, individuals or officials. The sanctions are supplemented by further decrees and regulatory measures which, among other things, have significantly restricted trading in Russian securities. The long-term consequences of the conflict are difficult to assess at this point in time. The iShares funds of BlackRock Asset Management Deutschland AG (including TGVs) had no direct exposure to Russian or Ukrainian securities as of the reporting date.

Institutional and private investors do not just value iShares ETFs as components of their portfolios for implementing their own investment ideas. As the funds become more widespread, the demand for ETF-based insurance solutions, ETF savings schemes and asset management products based on ETFs also grows. In this context, we have worked with partners to design models that offer suggestions for suitable asset allocations for investor types with different risk/reward profiles. In the reporting period, this included developing model portfolios for banks, various online brokers, and providers of digital asset management services, commonly known as robo-advisors. In the European ETF market, iShares is still excellently positioned as a provider from the onset. We continue to invest in excellent service and products that meet our customers' needs. We intend to further extend our market leadership by means of continuous and innovative expansion of our offering. The strategic competitive advantages of iShares ETFs include high market liquidity, tight bid/ask spreads, and highly accurate index replication.

# SEMI-ANNUAL REPORT FOR ISHARES NASDAQ-100® UCITS ETF (DE) FOR THE REPORTING PERIOD FROM 01/05/2024 UNTIL 31/10/2024

## Security prices and market prices

The fund assets are valued on the basis of the following market prices:

|                 |  |
|-----------------|--|
| Derivatives:    | Closing prices on the respective valuation dates |
| All securities: | Closing prices on the respective valuation dates |

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

| Units in circulation | Units | 23,450,000 |

**Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV**

**Security prices and market prices**

The fund assets are valued on the basis of the following market prices:

|                 |  |
|-----------------|--|
| Derivatives:    | Closing prices on the respective valuation dates |
| All securities: | Closing prices on the respective valuation dates |

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

**Exchange Rate(s) or Conversion Factor(s) (bulk quoting) as at 31/10/2024**

**Further information necessary for understanding the report pursuant to Section 7 No. 9 d) KARBV**

**Explanation of the calculation of net change in unrealised gains and losses**

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

**Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions**

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.
