REPORT OF THE MANAGEMENT BOARD FOR ISHARES STOXX EUROPE MID 200 UCITS ETF (DE)**Report of the Management Board**

Dear Investors,

In 2024, BlackRock Asset Management Deutschland AG ("BAMDE") was able to assert its position in the ETF market. In 2024, the market for ETPs and ETFs in Europe continued to develop dynamically. BlackRock's iShares division in particular benefited from this development and thus also the iShares branded ETFs managed by BAMDE in Germany. Considering the market relevant to BAMDE, iShares had the highest share of new business inflows into ETFs in the EMEA region in 2024. EMEA iShares achieved net inflows of USD 91.1 billion USD or EUR 87.7 billion EUR in the entire EMEA region (Europe, Middle East & Africa) in 2024 (previous year: USD 70.8 billion or EUR 64.1 billion), corresponding to a market share of 34% in inflows. In contrast, BAMDE recorded net outflows. This is explained by the different product offerings of the BAMDE ETF platform, which focuses primarily on European and German equities, compared to the Irish platform, which tracks global and tech indices.

The range of iShares ETFs currently comprises 775 share classes admitted for sale in Germany. This gives investors in this country easy and diversified access to a variety of global markets and asset classes. Around one tenth (67) of these exchange-traded share classes are set up in Germany and can be recognized by the "(DE)" in the fund name.

As of 31 October 2025, the volume of German funds under management was USD 73.0 billion or EUR 63.3 billion. The volume of the 23 sub-funds of iShares (DE) I Investment Stock Company with sub-funds, of which 22 sub-funds are admitted for public distribution, was USD 16.1 billion or EUR 13.9 billion on the same date. This Semi-Annual Report provides you with detailed information about the performance of our index funds.

The German industrial sector started the third quarter on a weak footing. While July still delivered an unexpectedly strong performance, industrial output fell sharply across almost all sectors in August. The decline was particularly pronounced among manufacturers of capital and consumer goods, as well as in the automotive and electrical industries. Although the shift of seasonal plant holidays in the automotive sector into August partly contributed to the downturn, overall production in the July-August period remained below the level of the previous quarter. Industrial turnover and exports also weakened, with exports to the United States falling markedly-reflecting, in part, the impact of higher U.S. tariffs on imports from the EU. Survey-based indicators, however, painted a somewhat more optimistic picture, as both the ifo Business Climate Index and the Purchasing Managers' Index (PMI) for manufacturing remained above their respective expansion thresholds.

Demand for German industrial goods has also lost considerable momentum recently. New orders fell noticeably in August and were clearly below the previous quarter's average for the July-August period. The previously resilient foreign demand softened markedly, with orders from non-EU countries - including the United States - dropping sharply. Domestic demand was unable to offset this decline. Capital goods orders in particular showed a significant loss of momentum. Nonetheless, improved production and export expectations reported by the ifo Institute for the third quarter indicate a potentially more resilient industrial cycle toward the end of the year.

Private consumption likely provided little stimulus to the economy in the third quarter as well. Although passenger car registrations rose significantly and consumers' income expectations improved over the summer months, purchase intentions declined, savings intentions increased, and economic sentiment weakened. This caution was reflected in real retail sales, which fell again slightly in August and remained subdued overall. The hospitality sector also posted declining real sales in the period for which data are available. Business sentiment among retailers and consumer-oriented service providers deteriorated accordingly.

In the labour market, employment declined slightly in August but remained broadly stable overall. Job losses in industry continued but were offset by employment gains in the services sector - most notably in health and social services, public administration, education, and energy supply. The use of short-time work (Kurzarbeit) continued to decrease. Forward-looking indicators presented a mixed picture: while the ifo Employment Barometer suggested further restraint in hiring plans across the economy, the IAB Employment Barometer remained in moderately expansionary territory. Unemployment increased slightly in September, driven primarily by cyclical factors within the unemployment insurance system (SGB III), whereas unemployment in the basic income support system (SGB II) declined further, reflecting ongoing labour-market integration of migrants, primarily into expanding service sectors. Overall underemployment has been falling for four consecutive months, and the recovery in the IAB Unemployment Barometer points to a potential decline in registered unemployment in the coming months.

Energy and commodity prices remained relatively stable. Crude oil prices moved sideways in September and came under pressure in October amid renewed trade tensions between the United States and China. Natural gas prices remained stable at a low level - around 19% below the previous year's level - supported by increased U.S. LNG exports and subdued Chinese demand. Upstream price indices also declined, with both import and producer prices falling due to lower energy prices and the appreciation of the euro. On a year-on-year basis, import and producer prices recorded clear declines.

Inflation picked up slightly in September, with the Harmonised Index of Consumer Prices (HICP) rising to 2.4%, partly due to base effects from last year's unusually low energy prices. Core inflation also edged up, driven mainly by volatile components such as travel services and clothing. On a month-on-month basis, the HICP increased by 0.2%, with services prices being the main contributor. Inflation is expected to fluctuate around its current level in the coming months. Energy prices are unlikely to exert the same dampening effect on headline inflation as in previous quarters. While reductions in electricity grid charges and the abolition of the gas storage levy will exert some downward pressure on inflation in early 2026, the increase in the national carbon price at the turn of the year will partly offset these effects.

Since the start of the Russian Federation's war of aggression against the sovereign neighbouring state of Ukraine on February 24, 2022, economic sanctions against Russia, which had already been in place since 2014, have been significantly expanded. In addition to the European Union, these were also issued by other international organizations as well as nation states, such as the United Kingdom, Norway or Switzerland against companies, individuals or officials. The sanctions are supplemented by further decrees and regulatory measures which, among other things, have significantly restricted trading in Russian securities. The long-term consequences of the conflict are difficult to assess at this point in time. The iShares funds of BlackRock Asset Management Deutschland AG (including TGVs) had no direct exposure to Russian or Ukrainian securities as of the reporting date.

REPORT OF THE MANAGEMENT BOARD FOR ISHARES STOXX EUROPE MID 200 UCITS ETF (DE)

With its broad product range geared to investor and market interests, the company sees itself well-positioned to compete, even though increasing competitive pressure is being felt, partly as a result of the market entry of further and in some cases large competitors, which is increasing the pressure on margins in the asset management industry. In order to maintain the Company's position in the future despite increasing competition in the ETF market, a large number of customer group-specific and individual sales activities are planned.

Institutional and private investors do not just value iShares ETFs as components of their portfolios for implementing their own investment ideas. As the funds become more widespread, the demand for ETF-based insurance solutions, ETF savings schemes and asset management products based on ETFs also grows. In this context, we have worked with partners to design models that offer suggestions for suitable asset allocations for investor types with different risk/reward profiles. In the reporting period, this included developing model portfolios for banks, various online brokers, and providers of digital asset management services, commonly known as robo-advisors. In the European ETF market, iShares is still excellently positioned as a provider from the onset. We continue to invest in excellent service and products that meet our customers' needs. We intend to further extend our market leadership by means of continuous and innovative expansion of our offering. The strategic competitive advantages of iShares ETFs include high market liquidity, tight bid/ask spreads, and highly accurate index replication.

Other information

Number of fund units in circulation and value of a fund unit on the reporting date pursuant to Section 16 Para. 1 No. 1 of the German Capital Investment Accounting and Valuation Ordinance (KARBV)

Unit value	EUR	59.20
Units in circulation	Units	8,358,959

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Index fund information pursuant to Section 16 Para. 2 KARBV

Tracking error level at the end of the reporting period pursuant to Section 16 Para. 2 No. 1 KARBV	0.17 percentage points
--	------------------------

Further information necessary for understanding the report pursuant to Section 7 No. 9 d) KARBV

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.
