This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The Fund seeks to track the performance of an index composed of Euro denominated German covered bonds.

KEY BENEFITS

- 1. Targeted exposure to the German Pfandbrief market
- 2. Direct investment in covered bonds
- 3. Investment grade bond exposure

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

CREDIT RATINGS (%)

Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

The German domiciled funds are "undertakings for collective investment in transferable securities" in conformity with the directives within the meaning of the German Law on the investments. These funds are managed by BlackRock Asset Management Deutschland AG which is authorised and regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht.

Further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the Net Asset Value per Share, investors may pay more than the then current Net Asset Value per Share when buying shares and may receive less than the current Net Asset Value per Share when selling them.
