FUND OVERVIEW

The Fund seeks to track the performance of an index composed of companies from the European Banks sector.

KEY BENEFITS

- 1. Exposure to companies from developed countries in Europe
- 2. Direct investment into companies from the Banks supersector as defined by the Industry Classification Benchmark (ICB)
- 3. Banking sector exposure

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

GEOGRAPHIC BREAKDOWN (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the location where the issuer of the securities carries out much of their business. Bonds are included in US bond indices when the securities are denominated in U.S. dollars regardless of the domicile of the issuer.
