Performance, Portfolio Breakdowns and Net Assets information as at: 31-Jul-2025. All other data as at 05-Aug-2025.
This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the NYSE FactSet Global Blockchain Technologies Capped Index.

KEY BENEFITS

- 1. Global exposure to companies that are involved in the research, enablement, development and deployment of blockchain and cryptocurrency technologies and applications.
- 2. Secondary level of exposure to companies that design and manufacture the processing chips necessary for the validation ("mining") of blocks in the blockchain network.
- 3. Designed for investors wanting exposure to a wide variety of companies that are involved in the development, innovation, and utilization of blockchain and crypto technologies.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investments in the technology securities are subject to absence or loss of intellectual property protections, rapid changes in technology, government regulation and competition.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Blockchain companies may be subject to more volatility and less trading volume than securities of companies in more established industries, and blockchain companies involved in cryptocurrencies may be adversely affected by fluctuations in, and manipulation of, price of cryptocurrencies. Certain features of blockchain technology may increase the risk of fraud or cyberattack.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund’s investment objective, do not change a fund’s investment objective or constrain the fund’s investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund’s investment strategy, please see the fund’s prospectus.

MSCI ESG % Coverage	86,83%	MSCI ESG Fund Rating (AAA-CCC)	BB
MSCI ESG Quality Score - Peer Percentile	15,03%	MSCI ESG Quality Score (0-10)	3,95
Funds in Peer Group	1.178	Fund Lipper Global Classification	Equity Sector Information Tech
MSCI Weighted Average Carbon Intensity % Coverage	86,72%	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	589,02
MSCI Implied Temperature Rise (0-3.0+ °C)	> 2.5° - 3.0° C	MSCI Implied Temperature Rise % Coverage	86,72%

All data is from MSCI ESG Fund Ratings as of **18-Jul-2025**, based on holdings as of **30-Jun-2025**. As such, the fund’s sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund’s gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund’s gross weight; the absolute values of short positions are included but treated as uncovered), the fund’s holdings date must be less than one year old, and the fund must have at least ten securities.

GLOSSARY

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Implied Temperature Rise (0-3.0+ °C): Implied Temperature Rise (ITR) is used to provide an indication of alignment to the temperature goal of the Paris Agreement for a company or a portfolio. ITR employs open source 1.55°C decarbonization pathways derived from the Network of Central Banks and Supervisors for Greening the Financial System (NGFS). These pathways can be regional and sector specific and set a net zero target of 2050. We make use of this feature for all GHG scopes. A net zero emissions economy is one that balances emissions and removals. Because the ITR metric is calculated in part by considering the potential for a company within the fund's portfolio to reduce its emissions over time, it is forward looking and prone to limitations. As a result, BlackRock publishes MSCI's ITR metric for its funds in temperature range bands. The bands help to underscore the underlying uncertainty in the calculations and the variability of the metric.

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

MSCI Implied Temperature Rise % Coverage: Percentage of the fund's holdings for which MSCI Implied Temperature Rise data is available. The MSCI Implied Temperature Rise metric is displayed for funds with at least 65% coverage.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.
