INVESTMENT OBJECTIVE AND STRATEGY

Investment Objective. The Sub-Fund seeks to provide an exposure to the performance of US Dollar-denominated fixed rate government bonds issued by the US Treasury with a maturity of less than one year.

Investment Policy. The Sub-Fund aims to track the performance of the Index (or such other index determined by the Directors from time to time as being able to track substantially the same market as the Index), as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index consists of US Dollar-denominated fixed rate government bonds that have been issued by the US Treasury with a maturity of less than one year. The Index is market capitalisation weighted and rebalances on a monthly basis, as referred to under "*Index Tracking Risk*" in the Prospectus. Further details on the Index, including its components and performance, are available at <https://indices.theice.com>.

The Sub-Fund is not a money market fund and is not subject to the special regulatory requirements (including maturity and credit quality constraints) designed to enable money market funds to maintain a stable share price.

The Sub-Fund uses the optimisation methodology to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index. Consequently, the Sub-Fund may only hold a certain sub-set of the Index Securities. Further information on the use of the optimisation methodology can be found under "*Index Tracking Sub-Funds*" in the "*Investment Objectives and Policies*" section of the Prospectus.

The Sub-Fund may hold securities that are not constituents of the Index where such securities provide similar exposure by issuer and liquidity characteristics to the relevant Index Securities.

Instruments / Asset Classes. The Sub-Fund will primarily invest in securities listed or traded on Recognised Markets in the United States.

The Sub-Fund may hold up to 10% of its Net Asset Value in ancillary liquid assets (deposits, certificates of deposit, commercial paper and money market funds) in accordance with the UCITS Regulations. Subject to the following paragraph, the Sub-Fund may hold a higher percentage of its Net Asset Value in such ancillary liquid assets following large cash flows into or out of the Sub-Fund, as it may be inefficient and contrary to Shareholders' best interests to seek to invest cash received as subscriptions, or realise assets to meet large redemptions, solely on the relevant Dealing Day. The Sub-Fund will seek to reduce the percentage of its Net Asset Value held as ancillary liquid assets to below 10% of Net Asset Value as quickly as practicable, acting in the best interests of Shareholders.

The Sub-Fund will not invest more than 10% of its Net Asset Value in other regulated, open-ended collective investment schemes, including ETFs and money market funds, as described under “*Investment in Other Collective Investment Schemes*” in the “*Investment Objectives and Policies*” section of the Prospectus.

Use of FDI and Risk Management. In addition, the Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments (“**FDI**”) primarily to manage the Sub-Fund’s cash balances or cash flows or to hedge specific risks. Any use of FDI by the Sub-Fund shall be limited to (i) forward foreign exchange contracts (including non-deliverable forwards), (ii) bond futures and (iii) interest rate futures. FDI are described under “*Use of Financial Derivative Instruments*” in the “*Investment Objectives and Policies*” section of the Prospectus.

The expected proportion of the assets under management of the Sub-Fund that could be subject to securities lending will fluctuate between 0% and 20%, subject to a maximum of 20%.

For information in relation to the difficulties associated with tracking indices, please refer to “*Index Tracking Risk*” in the “*Risk Information*” section of the Prospectus. It is currently anticipated that the tracking error of the Sub-Fund will be up to 100 bps under normal market conditions. The causes of tracking error can include but are not limited to the following: holdings/size of the Sub-Fund, cash flows, such as any delays in investing subscription proceeds into the Sub-Fund or realising investments to meet redemptions, fees and the frequency of rebalancing against the Index.

Portfolio Holding Disclosure Policy. The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund’s holdings and full disclosure policy may be found on the Website.

INVESTMENT RISKS

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded.

The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

The single market in which the Sub-Fund invests may be subject to particular political and economic risks, and as a result, the Sub-Fund may be more volatile than more broadly diversified funds.

Further information about risks can be found in the “Risk Information” section of the Prospectus.

INVESTOR PROFILE

The Sub-Fund is intended for long-term investment. Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in

terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan.

Typical investors in the Sub-Fund are expected to be investors who want to take exposure to the market covered by the Index and are prepared to accept the risks associated with an investment of this type, including the volatility of such market.
