Class: JPM US Research Enhanced Index Equity SRI Paris Aligned Active UCITS ETF - EUR Hedged (acc)

Fund overview

ISIN	Valor
IE0006HMLPV6	124744461
Investment objective: The objective of the Sub-Fund is to achieve a long-term return in excess of MSCI USA SRI EU PAB Overlay ESG Custom Index* ("the Benchmark") by actively investing primarily in a portfolio of US companies while aligning with the objectives of the Paris Agreement.	
Investment policy: The Sub-Fund pursues an actively-managed investment strategy.	
Investment approach <ul style="list-style-type: none">• Uses a fundamental, bottom-up selection process.• Enhanced index approach that builds a portfolio in reference to a Paris Aligned Benchmark by overweighting securities with the highest potential to outperform and underweighting securities considered most overvalued.• Diversified portfolio with disciplined, risk-controlled portfolio construction while retaining the decarbonization objectives of the Paris Agreement.• Applies values and norms-based screening to implement exclusions.	
Investor profile: Typical investors in the Sub-Fund are expected to be investors who want to take broad market exposure to the US stock market, who seek to benefit from potential excess returns with similar risks to investing in securities representing the Benchmark and who are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

Exclusion of companies that do not meet certain criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.

The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.

Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful.

Investors may have exposure to currencies other than the currency of their Share Class.

Further information about risks can be found in the "Risk Information" section of the Prospectus.

Risk Indicator - The risk indicator assumes you keep the product for

5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are the max as detailed in the fund's prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them. Investors should note that the benchmark data presented is expressed in the fund's base currency, which may be different from the currency in which the share class performance data is presented. Investors should exercise caution when comparing the benchmark data with share class performance data that are in different currencies, as currency fluctuations can contribute to differences in performance outcomes.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.
