JPMorgan ETFs (Ireland) ICAV -

EUR Aggregate Bond Active UCITS ETF

Class: JPM EUR Aggregate Bond Active UCITS ETF - EUR (acc)

Fund overview

ISIN IE00049TNTV6		
Investment objective: The objective of the Sub-Fund is to achieve a long-term return in excess of Bloomberg Euro Aggregate Index Total Return EUR Unhedged ("the Benchmark") by actively investing primarily in a portfolio of Euro-denominated investment grade debt securities, using financial derivative instruments to gain exposure to underlying assets, where appropriate.		
Investment policy: The Sub-Fund pursues an actively-managed investment strategy.		
Investment approach		
<ul style="list-style-type: none"> • Uses a globally integrated, research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers • Combines top-down asset allocation and bottom-up security selection targeting diversified sources of portfolio return – including sector rotation, security selection, currencies and yield curve positioning. • Invests across all sectors of EUR-denominated investment grade debt which includes government, government related, corporate, emerging markets and securitized debt. • May also invest in high yield and currency exposure is typically hedged back to the currency weights of the benchmark. 		
Investor profile: This product is intended for investors who plan to stay invested for at least 5 years.		
<ul style="list-style-type: none"> • The Sub-Fund is intended for long-term investment. Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan. • Typical investors in the Sub-Fund are expected to be those who seek exposure to the market covered by the Benchmark and a broadly diversified Euro-denominated investment grade bond investment. Investors may also be seeking investments with positive environmental and/or social characteristics that follow good governance practices and an overlay of ESG integration and values and norms-based screening of its investment universe.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market and below investment grade debt securities may also be subject to higher volatility and lower liquidity than non-emerging market and investment grade debt securities respectively.

Convertible bonds are subject to the credit, interest rate and market risks stated above associated with both debt and equity securities, and to risks specific to convertible securities. Convertible bonds may also be subject to lower liquidity than the underlying equity securities. Contingent convertible debt securities are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuing company). This may be as a result of the security converting to equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Mortgage-backed and asset-backed securities (MBS and ABS) depend on the cash flows from a specified pool of financial assets (i.e. mortgages in the case of MBS) and are subject to greater credit and interest rate risk and may be more volatile than other bonds. In addition, investments in MBS and ABS may be less liquid than investments in other bonds.

The value of financial derivative instruments can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the financial derivative instrument and therefore, investment in such instruments may result in losses in excess of the amount invested by the Sub-Fund.

Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, it may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.

The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.

Further information about risks can be found in the "Risk Information" section of the Prospectus.

General Disclosures

Before investing, obtain and review the current prospectus, Key Information Document (KID) and any applicable local offering document. These documents, as well as the sustainability-related disclosures, the annual and semi-annual reports and the articles of incorporation, are available in English free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmorganassetmanagement.ie.

A summary of investor rights is available in English at <https://am.jpmorgan.com/lu/investor-rights>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data

will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy

Risk Indicator - The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are the max as detailed in the fund's prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.
