

JPMORGAN ETFS (IRELAND) ICAV

US Equity Premium Income Active UCITS ETF

16 February 2026

(A sub-fund of JPMorgan ETFS (Ireland) ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between sub-funds with registered number C171821 authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

This Supplement (the “Supplement”) forms part of the Prospectus dated 16 February 2026 (the “Prospectus”) in relation to JPMorgan ETFS (Ireland) ICAV (the “ICAV”) for the purposes of the UCITS Regulations. This Supplement should be read in the context of, and together with, the Prospectus and contains information relating to the JPMorgan ETFS (Ireland) ICAV – US Equity Premium Income Active UCITS ETF (the “Sub-Fund”) which is a separate sub-fund of the ICAV.

The Sub-Fund is an Actively Managed Sub-Fund.

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety and consider the risk factors set out in the Prospectus and in this Supplement before investing in this Sub-Fund. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

The Directors, as listed in the “*Management*” section of the Prospectus accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information.

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollar.
Benchmark	S&P 500 (Total Return Net).
Dealing Deadline	14:30 hrs (UK time) for Currency Hedged Share Classes on each Dealing Day. 16:30 hrs (UK time) for unhedged Share Classes on each Dealing Day.
Investment Manager	J.P. Morgan Investment Management Inc., 383 Madison Avenue, New York, NY 10179, United States of America, whose business includes the provision of investment management services.
Minimum Subscription Amount	50,000 Shares (for in specie subscriptions) or cash equivalent (for cash subscriptions).

Valuation Point	Close of business on each Business Day on the market that closes last on the relevant Business Day and on which the relevant security or investment is traded.
Website	www.jpmorganassetmanagement.ie

INVESTMENT OBJECTIVE AND STRATEGY

Investment Objective. The objective of the Sub-Fund is to provide income and long-term capital growth.

Investment Policy. The Sub-Fund aims to (i) invest in a portfolio of equity securities comprising primarily of companies that are domiciled in, or carrying out the main part of their economic activity in the USA, and (ii) sell equity call options and/or equity index call options, to generate an income through the associated dividends and options premiums.

(i) Equity Portfolio

The Sub-Fund aims to invest at least 67% of its assets (excluding assets held for ancillary liquidity purposes) in equity securities issued by companies that are domiciled in, or carrying out the main part of their economic activity in the USA.

The Sub-Fund may also invest in equity securities issued by companies from any other country.

For the avoidance of doubt, investors should note that the Sub-Fund will not seek to track the performance of or replicate the Benchmark, rather the Sub-Fund will hold a portfolio of equity securities (which may include but will not be limited to Benchmark Securities) which is actively selected and managed with the aim of contributing to the Sub-Fund's objective of providing an income. The Sub-Fund also seeks a lower volatility than the Benchmark.

The Investment Manager may invest in securities which it considers most undervalued and not invest in securities which the Investment Manager considers most overvalued. In seeking to identify under and overvalued securities, the Sub-Fund will leverage on the expertise of the Investment Manager's fundamental research analysis. This fundamental research is applied consistently across industrial sectors and involves making regular site visits to the companies, speaking with company management, gathering information on competitors and engaging in discussions with a wide range of participants and experts in the relevant industry in order to estimate the companies' future cash flow, earnings and dividends. These estimates are then analysed in conjunction with the market prices of the securities which is the basis on which the relative attractiveness of the securities for investment is determined by the Investment Manager. Investors should note that equity securities are not selected based on anticipated dividend payments.

(ii) Equity Call Options / Equity Index Call Options

The Investment Manager seeks additional income through employing a financial derivative instrument ("FDI") overlay strategy which will be implemented by systematically selling equity call options and/or equity index call options which will typically have exposure to indices comprised of Benchmark Securities. The income provided from the option premiums is an important source of the Sub-Fund's return and may also reduce the Sub-Fund's volatility, the income generated from the option premiums may help offset any losses from the equity portfolio. However, investors should also note that the losses from the sale of equity call options and/or equity index call options may also offset the Sub-Fund's profits from increases in the value of the equity portfolio.

In a call writing strategy, the Sub-Fund (as the seller of the option) receives premiums from the purchaser of the option in exchange for providing the purchaser with the right to buy a certain amount of exposure to the performance of the underlying equity index from the Sub-Fund at a specific price, known as the exercise or strike price, during a specified period of time. If the value of the index underlying the option is less than the strike price, the option will generally not be exercised by the purchaser and the Sub-Fund will earn the full premium on the expiration of the option, or a portion of the premium if the option is terminated early. By contrast if the value of the index underlying the option exceeds the strike price, the option will generally be exercised and the Sub-Fund will have to pay the purchaser the difference between the value of the index and the strike price.

The Investment Manager will select option investments based on its estimate of market volatility levels, index valuations and market risks. The Investment Manager will draw upon the resources of its internal team of analysts as well as external sources of market data to determine these estimates. Further, the Investment Manager will evaluate relative option premiums in determining preferred option contract terms, such as exercise prices and expiration dates.

The Benchmark consists of large capitalisation stocks issued by companies in the USA (“**Benchmark Securities**”). The Benchmark comprises 500 of the top companies in leading industries of the US economy. The constituents may be subject to change over time. Further details on the Benchmark, including its components and performance, are available at www.spindices.com.

The Benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured and as it reflects the main investment universe and strategy for the Sub-Fund. The degree to which the Sub-Fund may resemble the composition and risk characteristics of the Benchmark will vary over time and its performance may be meaningfully different. Additionally, the Sub-Fund’s overall market exposure may vary significantly from the Benchmark as a result of its options overlay strategy.

The Sub-Fund will typically invest in assets denominated in USD. For any non-USD denominated assets, the currency exposure may be hedged back to USD.

ESG Integration. The Investment Manager also integrates financially material environmental, social and governance (“ESG”) issues¹ as part of the Sub-Fund’s investment process (“ESG Integration”). ESG Integration is the systematic inclusion of ESG issues in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG Integration by itself focuses on financial materiality and is therefore only part of a broader investment process. It is only one of the factors alongside other factors that the Investment Manager considers in portfolio construction, including buying and selling securities.

ESG issues are non-financial considerations that may positively or negatively affect a company’s revenues, costs, cash flows, value of assets and/or liabilities. While the Investment Manager includes financially material ESG issues, alongside other relevant factors, in the portfolio construction process,

¹ Environmental issues relate to the quality and functioning of the natural environment and natural systems, such as carbon emissions, environmental regulations, water stress and waste. Social issues relate to the rights, wellbeing and interests of people and communities, such as labour management and health and safety. Governance issues relate to the management and oversight of companies and other investee entities, such as board, ownership and pay.

ESG determinations may not be conclusive and securities of individual companies / issuers may be purchased, retained and sold without limit, by the Investment Manager as investment decisions are discretionary regardless of ESG considerations and potential ESG impact.

The Investment Manager considers information to inform its view on sustainability risks (which may change over time) which incorporates multiple data inputs across environmental, social and governance matters such as such as greenhouse gas emissions / emissions impact, product safety and executive remuneration.

The Investment Manager considers the information in terms of how it may impact the commercial viability of a company. Sustainability risk may have a negative impact on a company's operational effectiveness or reputation, for example, which in turn may negatively impact its profitability or capital growth opportunities. The Investment Manager can also use active ownership as a means to address identified sustainability risks. Active ownership is the process of exercising voting rights attached to securities and / or communicating with issuers on ESG issues, with a view to monitor or influence ESG outcomes within the issuer.

Please note that sustainability risk would not by itself prohibit an investment. Instead, sustainability risk forms part of the overall risk management processes, and is one of many risks which may, depending on the specific investment opportunity, be relevant to a determination of overall risk.

The investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Instruments / Asset Classes. The Sub-Fund will primarily invest in equity securities issued by large capitalisation companies across any industrial sector, which may include common stocks, preferred stocks and depositary receipts. The Sub-Fund will invest primarily in securities listed or traded on Recognised Markets in the USA. The Sub-Fund may also invest in units of real estate investment trusts ("REITs").

In normal circumstances the Sub-Fund may hold up to 10% of its Net Asset Value in ancillary liquid assets (deposits, certificates of deposit, commercial paper, fixed rate bonds issued by governments which are rated investment grade and money market funds) in accordance with the UCITS Regulations. Subject to the following paragraph, the Sub-Fund may hold a higher percentage of its Net Asset Value in such ancillary liquid assets following large cash flows into or out of the Sub-Fund, as it may be inefficient and contrary to Shareholders' best interests to seek to invest cash received as subscriptions, or realise assets to meet large redemptions, solely on the relevant Dealing Day. The Sub-Fund will seek to reduce the percentage of its Net Asset Value held as ancillary liquid assets to below 10% of Net Asset Value as quickly as practicable, acting in the best interests of Shareholders.

The Sub-Fund will not invest more than 10% of its Net Asset Value in other regulated, open-ended collective investment schemes, including ETFs and money market funds, as described under "*Investment in other Collective Investment Schemes*" in the "*Investment Objectives and Policies*" section of the Prospectus.

Use of FDI and Risk Management. In addition, the Sub-Fund may, for efficient portfolio management and investment purposes, use FDI to gain exposure to UCITS eligible equity indices of the type described above, to hedge specific risks, and/or to manage the cash flows and trading across multiple

time-zones. Any use of FDI by the Sub-Fund shall be limited to (i) options in respect of UCITS-eligible equity indices, as described above; (ii) futures in respect of the other assets in which the Sub-Fund may invest, as described above; (iii) forward foreign exchange contracts (including non-deliverable forwards) and (iv) warrants (subject to a maximum of 5% of Net Asset Value). FDI are described under "*Use of Financial Derivative Instruments*" in the "*Investment Objectives and Policies*" section of the Prospectus. The details of the equity indices to which exposure is taken will be disclosed in the annual financial statements of the ICAV.

The global exposure of the Sub-Fund is measured by the Relative VaR methodology, the reference portfolio being the Benchmark, as described under "*Risk Management*" in the "*Investment Objectives and Policies*" section of the Prospectus.

The Sub-Fund's expected level of leverage is 200% of its Net Asset Value, although it is possible that leverage might exceed this level from time to time. In this context, leverage is calculated as the sum of notional exposure of the FDI used, as defined in the "*Risk Management*" section of the Prospectus.

Portfolio Holding Disclosure Policy. The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund's holdings and full disclosure policy may be found on the Website.

Fund Classification – German Investment Tax Act. The Sub-Fund intends to qualify as an "Equity Fund" in accordance with the partial exemption regime and will invest more than 50% of its Net Asset Value on a continuous basis directly in equities as defined in the German Investment Tax Act.

INVESTMENT RISKS

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

The value of FDIs can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the FDI and therefore, investment in such instruments may result in losses in excess of the amount invested by the Sub-Fund. For information in relation to risks associated with the use of FDI, please refer to "*Derivative Risks*" in the "*Risk Information*" section of the Prospectus.

While the Sub-Fund uses an FDI overlay strategy which is intended to provide income, there is no guarantee that the derivative strategy will achieve this. The Sub-Fund may forego some capital appreciation potential, while retaining the risk of loss should the price of the underlying decline.

Selling call options will create exposure for the Sub-Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss. The maximum loss for the writer of a call option is potentially unlimited if the writer does not hold the components of the index which underlies the option, although the underlying component securities of

the index are not delivered if the option is exercised, as the contract is cash settled. The Sub-Fund's financial liability is therefore linked to the value of the underlying index.

REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.

The Distributing Share Classes give priority to dividends, rather than to capital growth, and may at times distribute capital gains.

Since the instruments held by the Sub-Fund may be denominated in, or have exposure to, currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

Sustainability risk is defined in the SFDR as "an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment". The Management Company considers sustainability risk as risks that are reasonably likely to materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, sustainability risk may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund. Sustainability risk considerations are part of ESG Integration and the likely impacts of sustainability risks on the returns of the Sub-Fund are assessed in reference to the Investment Manager's approach to sustainability risk management in the Sub-Fund's investment process. For the Sub-Fund, sustainability risks are considered to have a moderate/higher impact on returns relative to other sub-funds under the ICAV that have sustainable investment as their objective or promote environmental and/or social characteristics within the meaning of article 9 or 8 of the SFDR. Investors should refer to the "*Sustainability Risks*" section of the Prospectus for further information.

Further information about risks can be found in the "*Risk Information*" section of the Prospectus.

INVESTOR PROFILE

The Sub-Fund is intended for long-term investment. Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan.

The Sub-Fund is aimed at investors seeking income and long-term capital growth by actively investing primarily in a portfolio of US companies and through the use of index options.

Typical investors in the Sub-Fund are expected to be investors seeking broad exposure to the US equity market, and who are prepared to accept the risks associated with an investment of this type, including the volatility of such an investment approach.

SUBSCRIPTIONS – PRIMARY MARKET

Accumulating Share Classes and Distributing Share Classes are available for subscription in the Sub-Fund in the Base Currency of the Sub-Fund. Additional Share Classes, both unhedged and Currency Hedged, denominated in any currency listed in the “*Classes of Shares*” section of the Prospectus are available to launch at the discretion of the Management Company. A complete list of Share Classes which have been launched in the Sub-Fund may be obtained from the Website, the registered office of the ICAV or the Management Company.

Shares that have not been launched as of the date of this Supplement will be available from 9 am (UK time) on 17 February 2026 to 2 pm (UK time) on 14 August 2026 or such earlier or later date as the Directors may determine (the “**Offer Period**”). During the Offer Period, the Initial Offer Price is expected to be approximately USD 25 per Share (together with any applicable Duties and Charges) or its equivalent in the class currency of the relevant Share Class (together with any applicable Duties and Charges). The actual Initial Offer Price per Share for all Classes may vary from its estimated price depending on movements in the value of the securities between the date of this Supplement and the date that the Offer Period closes. The actual Initial Offer Price per Share will be available from the Administrator and on the Website following the Closing Date.

After the Closing Date and, in respect of Share Classes that have been already launched, from the date of this Supplement, Shares will be issued on each Dealing Day at the appropriate Net Asset Value per Share with an appropriate provision for Duties and Charges in accordance with the provisions set out below and in the Prospectus. Investors may subscribe for Shares for cash or in kind in respect of each Dealing Day by making an application by the relevant Dealing Deadline in accordance with the requirements set out in this section and in the “*Purchase and Sale Information*” section of the Prospectus. Consideration in the form of cleared subscription monies/securities must be received by the applicable Settlement Deadline. Subscription applications may be made on any Business Day and will be processed in line with the next applicable Dealing Deadline following receipt.

Currency Hedged Share Classes will use the NAV Hedge Methodology. Please refer to the “*Currency Hedging at Share Class Level*” section in the “*Investment Objectives and Policies*” section of the Prospectus and “*Currency Hedged Share Classes*” section in the “*Risk Information*” section of the Prospectus for further information on Currency Hedged Share Classes.

REDEMPTIONS – PRIMARY MARKET

Shareholders may effect a redemption of Shares on any Dealing Day at the appropriate Net Asset Value per Share, subject to an appropriate provision for Duties and Charges, provided that a valid redemption request from the Shareholder is received by the Management Company by the Dealing Deadline on the relevant Dealing Day, in accordance with the provisions set out in this section and at the “*Purchase and Sale Information*” section of the Prospectus. Settlement will normally take place within two Business Days of the Dealing Day but may take longer depending on the settlement schedule of the underlying markets. In any event, settlement will not take place later than 10 Business Days from the Dealing Deadline.

FEES AND EXPENSES

The TER for all Share Classes will be up to 0.35% per annum of the Net Asset Value.

Further information in this respect is set out in the “*Fees and Expenses*” section of the Prospectus.

DISTRIBUTIONS

Accumulating Share Classes and Distributing Share Classes are available in the Sub-Fund.

Distributing Share Classes will pay monthly dividend distributions based on the income (income, typically, in the form of dividends from stocks) and realised capital gains from underwriting of equity call options, less expenses attributable to the Share Class. These Share Classes will prioritise dividend payments over capital growth.

LISTING

An application has been made for the Shares to be admitted to the Official List and to trading on Euronext Dublin. Shares may also be admitted to trading on other Listing Stock Exchanges as specified on the Website.
