SUPPLEMENT 3
18 SEPTEMBER 2026

L&G DAX® DAILY 2X LONG UCITS ETF

A sub-fund of Legal & General UCITS ETF Plc, an umbrella investment company with variable capital and segregated liability between its Funds.

This Supplement contains information relating to the L&G DAX® Daily 2x Long UCITS ETF (the "Fund") which is a separate Fund of Legal & General UCITS ETF Plc (the "Company"). This Supplement forms part of and should be read in the context of, and together with, the Prospectus dated 18 September 2026. If you are in any doubt about the action to be taken or the contents of this Supplement, please consult your stockbroker or other financial adviser. Investors should note that this Fund will pursue its investment policy principally through investment in FDIs. Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund. An investment in the Fund involves certain risks and may only be suitable for persons who are able to assume the risk of losing their entire investment.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to track the performance of the Index.

INVESTMENT POLICY

In order to achieve this investment objective, the Fund will seek to track the performance of the Index, before the deduction of the TER and other Fund expenses, as further described under "*Fees and Expenses*" in the Prospectus. It will do so by seeking to be fully exposed to the performance of the Index using "unfunded" total return OTC swaps with one or more counterparties, (each, a "Long Index Swap"), as described under "*Unfunded OTC Swap Model*" and in Schedule II of the Prospectus.

Accordingly, the Fund may have an indirect exposure to shares issued by the same body up to 20% of its Net Asset Value, which limit may be raised to 35% for a single issuer in exceptional market conditions, including (but not limited to) circumstances in which such issuer occupies a dominant market position.

The Index is a daily Leveraged Index which aims to deliver a return on each day which corresponds to twice (i.e. x2) the daily percentage change in the level of the DAX® Index (the "**Underlying Index**") less an implied amount reflecting the cost of borrowing additional capital to invest in the index portfolio to create the leveraged position which is comprised of an overnight interest rate (Euro OverNight Index Average ("**EONIA**")) and a liquidity spread cost reflecting the cost of sourcing long term liquidity to finance the leveraged position.

The Underlying Index reflects the segment of blue chips admitted to the Prime Standard Segment of the Deutsche Börse and comprises the 40 largest and most actively traded companies that are listed at the FWB® Frankfurter Wertpapierbörse (the Frankfurt Stock Exchange).

The Underlying Index is open to companies incorporated in Germany or to companies with operating headquarters in Germany with a major share of their stock exchange turnover at the Frankfurt Stock Exchange and juristic headquarters in the European Union or in an EFTA state. The DAX was conceived as the successor to the "Börsen-Zeitung Index", with a historical time series dating back until 1959.

The selection rules for companies comprised in the Underlying Index are exclusively based on exchange turnover and market capitalisation.

The Underlying Index is subject to adjustment on an annual basis (September) and is also reviewed quarterly (March, June, September, December).

RISK MANAGEMENT

The Investment Manager uses relative value-at-risk to assess the global exposure of the Fund on a daily basis.

The Fund may utilise the *"Reverse Repurchase Agreement"* model and the *"Short Basket Swap"* model, each as described in the "*Unfunded OTC Swap Model*" section in the Prospectus, or a combination of the two models.

The actual level of leverage at any given time will vary according to the degree to which the Fund is invested in each of the respective models at such time. Accordingly, the Fund is expected to be leveraged between 200% and a maximum of 310% of its Net Asset Value at any given time.

PROFILE OF A TYPICAL INVESTOR

It is expected that investors in the Fund will be sophisticated investors (and/or informed investors who have taken professional advice) who: (i) understand leverage and the risks associated with an investment in a Leveraged Long Fund, including the impact on returns of the daily rebalancing of a Leveraged Index and increased susceptibility to market movements; (ii) are able to bear the risk of losing their entire investment; (iii) view the investment as short term (i.e. day-to-day, in respect of each daily rebalancing period); and (iv) can accept the levels of volatility associated with the relevant equity markets (or sectors thereof) to which the Fund has exposure in addition to the double volatility imposed by the compounded daily return.

RISK FACTORS

Investors are referred to "*Risk Factors*" and Schedule II of the Prospectus and should consider all relevant risk factors prior to investing in the Fund. Investors should consider, in particular those relating to Shares, Index Tracking-Related Risks, Investing in FDI's, OTC Swap Risks and Risks of Leveraged Return and Inverse Return.
