

L&G MSCI Europe Select UCITS ETF FUND SUPPLEMENT No.33

A sub-fund of Legal & General UCITS ETF Plc, an umbrella investment company with variable capital and segregated liability between its Funds incorporated with limited liability in Ireland under registration number 459936.

The Company and the Directors, whose names appear on page 10 of the Prospectus, are the persons responsible for the information contained in this Fund Supplement and accept responsibility accordingly. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of the information.

This Fund Supplement contains information relating to the L&G MSCI Europe Select UCITS ETF (the “Fund”) which is a separate Fund of Legal & General UCITS ETF Plc (the “Company”), an umbrella fund with segregated liability between its Funds. This Fund Supplement forms part of and should be read in the context of, and together with, the Company’s Prospectus dated 23 February 2022 and any other applicable addenda. Investors should also refer to the Company’s latest published annual report and audited financial statements (if any) and, if published after such report, a copy of the latest semi-annual report and unaudited financial statements. Capitalised expressions used and not defined in this Fund Supplement shall bear the meanings as set out in the Prospectus. If you are in any doubt about the action to be taken or the contents of this Fund Supplement, please consult your stockbroker, bank manager, lawyer, accountant or other independent professional adviser who, if such advice is taken in the United Kingdom, is an organisation or firm authorised or exempted pursuant to the FSMA.

Potential investors should consider the risk factors set out in the Prospectus and in this Fund Supplement before investing in this Fund. An investment in the Fund involves certain risks and may only be suitable for persons who are able to assume the risk of losing their entire investment.

The Prospectus sets forth information on investment risk, management and administration of the Fund, valuation, subscription, redemption and transfer procedures and details of fees and expenses payable by the Fund and should be read subject to the information herein.

The date of this Fund Supplement is 29 May 2026.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide reduced greenhouse gas emissions exposure to equity markets in Europe.

INVESTMENT POLICY

In order to achieve this investment objective, the Fund will seek to track the performance of the MSCI Global Select 500 Index – Europe Subset (the “**Index**”) subject to the deduction of the TER and other expenses associated with operating the Fund as further described in the “Fees and Expenses” section of the Prospectus. It will do so by investing primarily in an optimised portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index. The Fund will utilise optimisation/representative sampling techniques in order to achieve the Fund’s investment objective, including by reducing overall transaction costs and taxes. In utilising such techniques, the Fund will aim to identify and invest in a representative sample or sub-set of the component securities of the Index, whose risk and return characteristics closely resemble the risk and return characteristics of the Index as a whole. This is generally achieved through the use of quantitative analysis (i.e. application of mathematical rules-based analysis based on the risk and return characteristics of the Index components) with the level of sampling techniques used by the Fund being determined by the nature of the Index components. It is therefore not expected that the Fund will hold each and every underlying constituent of the Index at all times or hold them in the same proportion as their weightings in the Index.

Where consistent with its investment objective, the Fund may also invest in the following additional assets subject to the conditions and within the limits laid down by the Central Bank:

- equity securities of companies that are not component securities of the Index, but the risk and return characteristics of which, individually or collectively, closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole;
- Depositary Receipts relating either to component securities of the Index or to equity securities of the type referred to in the bullet point immediately above; and
- FDIs – namely, total return “unfunded” OTC Swaps and exchange-traded equity futures – which may be used for investment purposes (such as gaining exposure to the Index and/or any particular constituents of the Index) in accordance with the terms set out in the sections entitled “*Fund Investments*”, “*Unfunded OTC Swap Model*” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in total return “unfunded” OTC Swaps, it is not expected that this flexibility will be used. The Fund will only invest in FDIs as provided for in the RMP prepared by the Investment Manager in respect of the Fund and filed with the Central Bank.

The Fund may, in addition, employ other techniques relating to transferable securities, including entering into securities lending transactions, investing in repurchase and reverse repurchase transactions and short term money market collective investment schemes, for the purpose of efficient portfolio management only, in accordance with the terms set out in the section entitled “*Efficient Portfolio Management Techniques*” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in repurchase and reverse repurchase transactions it is not expected that this flexibility will be used.

The maximum proportion of the Net Asset Value of the Fund that can be subject to securities lending is 45%. The proportion of the Net Asset Value of the Fund that will be subject to securities lending is expected to range from 0% to 20%.

SUSTAINABILITY

The Fund promotes environmental and social characteristics, and therefore it is a financial product referred to in Article 8 of the SFDR. Further information on the environmental and social characteristics of the Fund can be found in the Sustainability Disclosure annex of this Fund Supplement.

TRACKING ERROR

The estimated anticipated (ex-ante) tracking error for the Fund in normal market conditions is 1% (annualised), which is the anticipated volatility of the difference between the return of the Fund's portfolio and the return of the Index. Investors are specifically referred to the section headed "Tracking error" in the Prospectus.

The anticipated tracking error figure referenced above is in respect of an unhedged Share class as against the Index which is also unhedged.

INDEX DESCRIPTION

The Index is designed to be a benchmark for European equities and measures the performance of publicly traded companies from various European countries which satisfy minimum criteria relating to liquidity and size.

The Index is administered and calculated by MSCI Limited (the "**Index Provider**").

Determination of the Index universe

Companies whose securities are eligible for inclusion in the Index Universe are determined by the Index Provider in accordance with the process described in the Index methodology, which is available at the following web address: [MSCI Europe Index](#)

The Index provides exposure to companies that satisfy certain environmental, social and governance ("**ESG**") requirements, as defined by the Index Provider and disclosed in the Index methodology. The Index only includes constituents of the MSCI Europe Index (the "**Parent Index**"¹), which are part of MSCI ACWI Select 500 Index. The Index excludes companies based on the following criteria:

- The Index excludes companies that are classified by the Index Provider as being involved in ongoing, very severe ESG controversy, where a company is implicated directly through its actions, products, or operations, as outlined in the MSCI ESG Controversies methodology which can be found at: <https://www.msci.com/legal/disclosures/esg-disclosures>.
- The Index excludes companies identified by MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics that are involved in the following business activities:

Controversial Weapons:

- Companies flagged by the Controversial Weapons screen described below will be excluded if their country of classification is not a member of the North Atlantic Treaty Organisation (NATO) or Switzerland
 - All companies with any tie to Controversial Weapons according to MSCI Ex-Controversial Weapons Indexes, as may be amended from time to time

Nuclear Weapons:

- Companies flagged by the Nuclear Weapons screen described below will be excluded if their country of classification is not a member of the North Atlantic Treaty Organisation (NATO) or Switzerland
 - All companies involved in the manufacture of nuclear weapons or the provisions of related auxiliary services

Thermal Coal Mining: Companies that meet both of the following conditions will be excluded

- Condition 1: Science Based Targets initiative (SBTi): companies that do not have one active carbon emissions reduction target approved by the SBTi; and

¹ The "Parent Index" is defined based on the Index being the European Index sub-set of the MSCI ACWI Select 500 Index.

- Condition 2: companies that derive 5% or more of their revenue from the mining of thermal coal and its sale to external parties, excluding revenue generated from the use of metallurgical coal and coal mined for internal power generation.

Thermal Coal Power: Companies that meet both of the following conditions will be excluded

- Condition 1: Science Based Targets initiative (SBTi): companies that do not have one active carbon emissions reduction target approved by the SBTi; and
- Condition 2: companies that also meet one or more of the following criteria:
 - derive 5% or more of their revenue from thermal coal-based power generation; or
 - have 5% or more of their capacity attributed to thermal coal-based power generation; or
 - generate 5% or more of their power from thermal coal.

The Index Provider determines what constitutes "involvement" in each restricted activity. This may be based on a percentage of revenue, a defined total revenue threshold or any association to a restricted activity. For more details on MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics, please refer to http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf and <https://www.msci.com/climate-change-solutions>.

Weighting Allocation

The Index is constructed using an optimization process. The optimisation process aims to:

- Reduce the weighted average greenhouse gas emissions (Scope 1 and 2) intensity relative to a company's enterprise value including cash by 6% on an annualized basis;
- Increase the weight in companies with one or more greenhouse gas emissions reduction targets approved by Science Based Targets initiative (SBTi) by 20%.

Net Total Return

Total return indices measure the market performance, including price performance and income from regular cash distributions (cash dividends or capital repayments). This income is treated as being reinvested in the Index and thus makes up part of the total index performance. The Index is a *net* total return index which means that cash dividends declared by Index constituents are reinvested in the Index net of withholding tax at the rates (depending on the country of domicile of the Index constituent) set out in the "Withholding Tax Rates" table available at: [MSCI INDEX CALCULATION METHODOLOGY](#)

Rebalancing Frequency

The Index is reconstituted on a semi-annual basis on the last business day of May and November.

Further Information

The information set out above is a summary of the principal features of the Index and does not purport to be an exhaustive description. Further information with respect to the component selection criteria, calculation and rebalancing methodology and treatment of corporate events can be found in the documents which (as of the date of this Fund Supplement) are available, along with the constituents and weightings of the Index and various other informational materials, at [MSCI Global Select 500 Index and Sub-Indexes Methodology and Constituents - MSCI](#).

Portfolio Composition

66354422.12

The portfolio of Investments held by the Fund is available daily at www.lgim.com.

PROFILE OF A TYPICAL INVESTOR

Only Authorised Participants may purchase ETF Shares in the Fund directly from the Company. All other investors may acquire or purchase ETF Shares only through the secondary market.

It is expected that investors in the Fund will be informed investors who have taken professional advice and who understand (and are able to bear) the risk of losing their investment and who can accept the levels of risks associated with investing in global equity markets.

RISK MANAGEMENT

The Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, shall be calculated on at least a daily basis using the commitment approach and, in accordance with the requirements of the Central Bank, may at no time exceed 100% of the Fund's Net Asset Value. As noted in the "*Investment Policy*" section above, the Fund's use of FDI is an ancillary element of the investment policy in that it is an alternative means of gaining exposure to the Index, or one or more of the constituents of the Index, in circumstances where direct investment in the constituents of the Index is not possible, practicable or desirable. Regardless of whether exposure to the underlying constituents is obtained by direct investment in the constituents, or by gaining exposure to the constituents through the use of FDI, the same notional value shall be committed to the investment by the Fund. Accordingly, it is not expected that the Fund will be leveraged.

RISK FACTORS

Investors are specifically referred both to the section headed "*Risk Factors*" and to Schedule II in the Prospectus and should consider all relevant risk factors prior to investing in the Fund, including those relating to investment in equities.

An investment in the Fund exposes an investor to the market risks associated with fluctuations in the Index and the value of securities comprised in the Index. The value of the Index can increase as well as decrease and the value of an investment will fluctuate accordingly. Investors can lose all of the capital invested in the Fund.

Sustainability risks are relevant as both standalone risks as well as crosscutting risks, which manifest through many other risk types, which are relevant to the assets of the Fund. For example, the occurrence of a sustainability risk can give rise to financial and business risk in the case of a negative impact on the creditworthiness of the issuer. The increasing importance given to sustainability considerations by both issuers and consumers means that the occurrence of a sustainability risk may result in significant reputational damage to affected issuers. These events might cause a material negative impact on the value of a Fund's investments. Whilst the index applies ESG exclusions, as set out above, with the aim of mitigating the impact of sustainability risks, there can be no assurance that all sustainability risks can be mitigated in the Fund.

Hedged Share Classes

Currency-hedging transactions carried out in respect of any particular hedged Share class are designed to minimise the effect, on the returns of the relevant hedged Share class, of movements in the currencies of denomination of the Index constituents relative to the "hedged" currency of the relevant hedged Share class.

Investors should be aware that when investing in a hedged Share class they may forego potential gains from appreciations in the currency of denomination of the Index constituents against the "hedged" currency of the relevant hedged Share class.

Currency hedging employed with respect to a hedged Share class aims to reduce currency risk rather than to eliminate it completely. Investors should also refer to the risk factor entitled "Currency" in the section of the

Prospectus entitled “Risk Factors”.

THE SHARES

As at the date of this Fund Supplement, the Fund has multiple classes of ETF Shares, as detailed in the table below. Additional classes of Shares may be added in the future in accordance with the requirements of the Central Bank.

Shares are freely transferable subject to and in accordance with the provisions of the Articles and as set out in the Prospectus.

As with other Irish companies limited by shares, the Company is required to maintain a register of Shareholders. ETF Shares will be held by the Common Depository's Nominee (as registered holder) in registered form. Only persons appearing on the register of Shareholders (i.e. the Common Depository's Nominee) will be a Shareholder. Fractional Shares will not be issued. No temporary documents of title or Share certificates will be issued (save for the Global Share Certificate, as set out in the Prospectus). A trade confirmation will be sent by the Administrator to the Authorised Participants.

*Expressed as a % per annum of the Net Asset Value of the Share class.

**The Promoter shall maintain and publish on www.lgim.com a "Dividend Calendar" containing details of the proposed dates relating to the declaration and payment of dividends which may be amended from time to time.

DIVIDEND POLICY

Where the Company intends to declare dividends with respect to one or more classes of Shares of the Fund, the proposed frequency of such dividend declarations (for example, *quarterly* or *annually*) shall be as set out in the table included above in the section entitled "*The Shares*".

Where dividends are paid, they shall be paid out of the net income of the Fund which is attributable to the relevant class of Shares. Dividends payable in respect of any particular class of Shares shall be paid in the currency in which such Share class is denominated. Where the currency in which a Share class is denominated differs from the Base Currency of the Fund, dividends shall be converted into the relevant class currency and any costs associated with such conversion shall be charged to the relevant Share class.

Income Equalisation

The Manager may implement income equalisation arrangements with a view to ensuring that the level of distributions from distributing Share classes is not affected by the timing of the issue, switching or redemption of Shares during the relevant accounting period. As a result, the same fixed distribution amount per Share based on the distributable income of the Fund is paid on each Share of a distributing Share class at the end of the accounting period. Where income equalisation arrangements are applied, an equalization rate is calculated in respect of a Share at the date of the issue, switching or redemption of the Share to reflect the equalised part of income accrued, which is incorporated in the distributable income at the end of the accounting period.

Currency of Payment and Foreign Exchange Transactions

Where an investor requests that a dividend is paid in a major currency other than the currency in which the relevant Share class is denominated, any necessary foreign exchange transactions will be arranged by the International Central Securities Depository (subject to this option being made available by the relevant International Central Securities Depository) for the account of, and at the risk and expense of, the relevant investor.

STOCK EXCHANGE LISTINGS

It is intended that the ETF Shares will be listed and admitted for trading on a number of stock exchanges, including without limitation, the London Stock Exchange, Borsa Italiana, Deutsche Börse, SIX Swiss Exchange, Euronext and Bolsa Mexicana de Valores. Details of where ETF Shares are listed and admitted for trading are available at www.lgim.com.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It will make a minimum of **sustainable investments with an environmental objective**:

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**:
___%

☒ ☐ **No**

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes the following environmental characteristics related to climate change:

- Reduction of greenhouse gas emission intensity;
- Avoiding investments in certain fossil fuels; and
- Reducing exposure to non-renewable energy.

The Fund promotes the following social characteristics relating to social norms and standards:

- Human rights, labour rights and anti-corruption as set out in the principles of the UN Global Compact

The Fund promotes the above-mentioned characteristics by tracking MSCI Global Select 500 – Europe Subset Index (the “Index”), which is a designated reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund. Whilst environmental and social characteristics are promoted through the application of the ESG investment strategy set out below, investors are reminded that these environmental and social characteristics are not sustainable investment objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

1. Greenhouse gas emissions intensity reduction compared to the Parent Index.
2. Greenhouse gas emissions intensity of the Index compared to the relevant reference point.
3. The proportion of the relevant comparator index excluded through the application of the exclusionary criteria set out below under the heading "What investment strategy does this financial product follow?".

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Fund does not commit to making any sustainable investments.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable.

- → ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Not applicable.

- → ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the Fund considers principal adverse impacts on sustainability factors. The Investment Manager takes the adverse sustainability indicators listed in Table 1 of Annex I of the SFDR Level 2 Measures into account, except for a small subset of indicators which are not mapped to the below-listed exclusions following consideration of their appropriateness to the Fund's investment strategy. For example, the indicator for 'Board gender diversity' (indicator 13 of Table 1 of Annex I of SFDR) is not currently taken into account due to the differing integration of diversity considerations into board composition in certain developed markets. The Fund considers principal adverse impacts, that are identified using the above-mentioned indicators, by tracking the Index that employs the ESG investment strategy outlined below in line with its methodology.

For example, the Fund uses the 'Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises' indicator (indicator 10 of Table 1 of Annex I of SFDR) to identify principal adverse impacts relating to social matters set out in the UN Global Compact principles and then considers and takes actions in relation to principal adverse impacts identified through tracking the Index that excludes companies that violate such principles.

Further information on how the Manager and the Investment Manager consider principal adverse impacts on an entity level can be found in the Sustainability Policy which is available on LGIM's website: [LGIM's Sustainability Policy 2022](#). Reporting on principal adverse impacts on sustainability factors will be made available in the annual report of the Fund.

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund aims to track the Index in accordance with its investment policy. The Index incorporates ESG criteria which are summarised in the section immediately below.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product***

The Fund follows the ESG investment strategy as described below by tracking the Index that:

(i) Includes an optimisation process to:

- Reduce the weighted average greenhouse gas emissions (Scope 1 and 2) intensity relative to a company's enterprise value including cash by 6% on an annualized basis;
- Increase the weight in companies with one or more greenhouse gas emissions reduction targets approved by Science Based Targets initiative (SBTi) by 20%.

(ii) The Index excludes companies that are classified by the Index Provider as being involved in ongoing, very severe ESG controversy implicating a company directly through its actions, products, or operations, as outlined in the MSCI ESG Controversies methodology which can be found on the MSCI website.

The Index excludes companies identified by MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics that are involved in the following business activities:

Controversial Weapons:

- Companies flagged by the Controversial Weapons screen described below will be excluded if their country of classification is not a member of the North Atlantic Treaty Organisation (NATO) or Switzerland
 - o All companies with any tie to Controversial Weapons according to MSCI Ex-Controversial Weapons Indexes, as may be amended from time to time

Nuclear Weapons:

- Companies flagged by the Nuclear Weapons screen described below will be excluded if their country of classification is not a member of the North Atlantic Treaty Organisation (NATO) or Switzerland
 - o All companies involved in the manufacture of nuclear weapons or the provisions of related auxiliary services

Thermal Coal Mining: Companies that meet both of the following conditions will be excluded

- Condition 1: Science Based Targets initiative (SBTi): companies that do not have one

active carbon emissions reduction target approved by the SBTi; and

- Condition 2: companies that derive 5% or more of their revenue from the mining of thermal coal and its sale to external parties, excluding revenue generated from the use of metallurgical coal and coal mined for internal power generation.

Thermal Coal Power: Companies that meet both of the following conditions will be excluded

- Condition 1: Science Based Targets initiative (SBTi): companies that do not have one active carbon emissions reduction target approved by the SBTi; and
- Condition 2: companies that also meet one or more of the following criteria:
 - o derive 5% or more of their revenue from thermal coal-based power generation; or
 - o have 5% or more of their capacity attributed to thermal coal-based power generation; or
 - o generate 5% or more of their power from thermal coal.

Such exclusions and the definition of "involvement" are determined by the Index Provider and disclosed in further detail the MSCI website.

The Index is consistent with the environmental and social characteristics of the Fund by providing exposure to such securities of issuers in accordance with the Index methodology described above and disclosed in further detail on the MSCI website.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The Fund excludes investments in issuers as set out immediately above; however, the Fund does not target a specific minimum rate of reduction from its investment universe.

● ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager ensures that the issuers of investments in which the Fund is invested follow good governance practices by tracking an index that excludes issuers that (i) fail to meet globally accepted norms and standards relating to governance matters (such as the UN Global Compact principles), or (ii) are involved in incidents with negative governance implications. As part of its due diligence the Investment Manager assessed the Index to ensure compliance with these requirements.

In addition, the Investment Manager also integrates the principles of good governance practices into its stewardship and engagement approach by setting expectations with issuers' management regarding good governance practices; actively engaging with the issuers; and supporting policymakers and legislators to ensure there is strong regulation and standards.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

 What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Fund invests at least 90% of its portfolio in investments to meet the environmental and social characteristics that it promotes (#1), all of which provide direct exposure to issuers. The remaining portion of investments are not used to attain the environmental and social characteristics and will fall under #2 Other. The Fund does not commit to making any sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Investments

#1 Aligned with E/S characteristics: 90%

#2 Other: 10%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund does not make use of derivatives to attain the environmental and social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in any “sustainable investments” within the meaning of the SFDR. Accordingly, it should be noted that the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?¹**

☐ Yes

☐ In fossil gas

☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds*

2. Taxonomy alignment of investments excluding sovereign bonds*

This graph represents 100 % of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

The Fund does not commit to making any investment in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund does not commit to a minimum share of sustainable investments.

What is the minimum share of socially sustainable investments?

The Fund does not commit to a minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Other holdings may include cash, depositary receipts, money market funds and derivatives. Such investments may be used for investment purposes and efficient portfolio management. Derivatives may also be used for currency hedging for any currency hedged share classes. Environmental or social safeguards applied by the Index are only applied to instruments that are used to attain exposure to an Index constituent.

The Investment Manager considers ESG factors, including analysis from the relevant responsible investing methodologies as part of assessing the credit risk profile of its most significant counterparties. The Investment Manager has an internal control

framework in place to consider and take appropriate action in the event that a significant counterparty fails to meet any minimum standards in respect of such ESG factors as defined by the Investment Manager.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes, the Index is designated as a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

The Index is aligned with each of the environmental and social characteristics of the Fund by providing exposure to issuers in accordance with the ESG investment strategy described above. At each index rebalance, the selection criteria of the Index are applied to its constituents.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The Fund invests, in a portfolio of securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index.

- ***How does the designated index differ from a relevant broad market index?***

The Index differs from the relevant broad market index as a result of the application of the ESG investment strategy described above as it results in a smaller investment universe than the broad market index due to the exclusions employed. The ESG investment strategy will also impact the weightings of the Index constituents compared to the broad market index.

- ***Where can the methodology used for the calculation of the designated index be found?***
