INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide exposure to the large cap equity market in the United States.

INVESTMENT POLICY

In order to achieve this investment objective, the Fund will seek to track the performance of the Index, before the deduction of the TER and other Fund expenses, as further described under "*Fees and Expenses*" in the Prospectus. It will do so by investing, as far as possible and practicable, in the Index Securities, in the same proportions as their weightings in the Index.

Accordingly, the Fund may have exposure to or invest directly up to 20% of its Net Asset Value in shares issued by the same body, which limit may be raised to 35% for a single issuer in exceptional market conditions, including (but not limited to) circumstances in which such issuer occupies a dominant market position.

The Index is designed to measure the performance of large cap companies in the US market. The Index is a subset of the S&P 500 and comprises 100 major blue-chip companies across multiple industry groups, providing a broad representation of the largest and most established companies in the US.

PROFILE OF A TYPICAL INVESTOR

It is expected that investors in the Fund will be informed investors who: (i) have taken professional advice and who understand (and are able to bear) the risk of losing their investment; and (ii) can accept the levels of risks associated with the relevant equity markets (or sectors thereof) to which the Fund has exposure.

RISK FACTORS

Investors are referred to "*Risk Factors*" and Schedule II of the Prospectus and should consider all relevant risk factors prior to investing in the Fund. Investors should consider, in particular those relating to Shares, Index Tracking-Related Risks and Equity Risk.
