Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

 The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 1 Day. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

Returns (Source: Fund Admin) - Past performance does not predict future returns

Under the ESMA rules or the FCA rules, funds distributed in the EU or the UK are not allowed to report performance returns if the fund is less than 12 months old.

Index Data (Source : Amundi)

Description of the Index

The Strategy Index, net dividends reinvested (dividends net of tax paid by the shares in the index are included in the index calculation), denominated in US dollars (USD), is calculated and published by the index provider MSCI. The Strategy Index, the MSCI World Leveraged x2 Daily Net Index, measures the performance of a strategy which consists of doubling exposure to the MSCI World index. It therefore offers dual exposure – upward or downward – to changes in the MSCI World index.
