Investment Managers' Report

Passive Fixed Income and Passive Equity Funds

Fund Performance

Passive Fixed Income Funds

Overall the Fixed Income Europe I SPDR ETFs performed reasonably closely in line with their respective benchmark indices for the period 1 April 2025 – 30 September 2025 (the "Reporting Period"). The Funds where performance tracking was wider than we would usually anticipate are explained wherever applicable.

Developed Market Government

Developed Market Government Funds consist of both treasury and government-related exposures across Eurozone, U.S. and UK gilt markets. All Funds tracked benchmark performance closely and delivered results within +/- 3 bps, except the below.

These funds invested in U.S. treasuries outperformed their respective benchmarks, majorly driven by evolving U.S. economic conditions and market volatility across the yield curve segments induced by uncertainties during the Reporting Period.

SPDR Bloomberg U.S. Treasury Bond UCITS ETF had a tracking difference of +9.1 bps compared to its benchmark. Even though all exposures of the Fund were within the limit, value add through sampling and trading gains contributed to outperformance. The Fund had net inflow of USD 237 million and its assets under management ("AUM") increased by around 35% during the Reporting Period.

SPDR Bloomberg 1-3 Year U.S. Treasury Bond UCITS ETF had a tracking difference of +7.0 bps compared to its benchmark. The Fund is invested in short term U.S. treasuries which had experienced volatility over the period, influenced by shifting monetary policy expectations. Even though all exposures of the Fund were within the limit, value add through sampling and trading gains contributed to outperformance. The Fund's AUM was fairly stable during the Reporting Period.

SPDR Bloomberg 3-7 Year U.S. Treasury Bond UCITS ETF had a tracking difference of +7.3 bps compared to its benchmark, mainly due to effects from trading gains and sampling, driven by market volatility during the period. The Fund had net outflow of USD 28 million and its AUM decreased by around 14% during the Reporting Period.

SPDR Bloomberg 7-10 Year U.S. Treasury Bond UCITS ETF had a tracking difference of +6.5 bps compared to its benchmark, mainly due to effects from trading gains sampling. The Fund's AUM was fairly stable during the Reporting Period.

SPDR Bloomberg 7-10 Year U.S. Treasury Bond UCITS ETF had a tracking difference of +6.5 bps compared to its benchmark, mainly due to effects from trading gains. The Fund's AUM was fairly stable during the Reporting Period.

SPDR Bloomberg 10+ Year U.S. Treasury Bond UCITS ETF had a tracking difference of +8.1 bps compared to its benchmark, mainly due to effects from sampling and trading gains. The Fund had net inflow of USD 42 million and its AUM increased significantly by around 87% during the Reporting Period.

SPDR Bloomberg Euro Government Bond UCITS ETF had a tracking difference of +5.8 bps compared to its benchmark, mainly due to effects from security selection. The Fund had net outflow of EUR 391 million and its AUM decreased by around 24% during the Reporting Period.

Investment Grade Corporates

Investment grade ("IG") corporate bond Funds, covering exposures across U.S., euro and sterling markets, all tracked benchmark performance closely within +/-15 bps, well within their respective risk and performance tolerances.

Aggregates

Aggregate Funds consist of a broad range of bond exposures covering treasury, government-related, corporate and securitized. Both of the Funds delivered results within +/- 10 bps, well within their respective risk and performance tolerances.

High Yield

The sub-investment grade (or high yield) Funds invest in corporate bonds of a lower credit quality. Tracking tolerances are wider (+/- 15 bps) for these Funds given the inherent volatility and lower liquidity of the asset class. In the context of high yield strategy, we apply stratified sampling (not buying all the bonds) and trading cost are not as low as government bonds.

Over the Reporting Period, all Funds tracked benchmark performance closely and delivered results within +/- 15 bps with the exception of the following:

SPDR 0-5 Year U.S. High Yield Bond UCITS ETF had a tracking difference of +18.7 bps compared to its benchmark. The excess performance was majorly driven by effects from security selection (+15.3 bps), predominantly from industrial sector which contributed +21.3 bps.

SPDR Euro High Yield Bond UCITS ETF had a tracking difference of +18.0 bps compared to its benchmark. The excess performance was majorly driven by effects from security selection (+13.0 bps), predominantly from industrial sector which contributed +12.0 bps.

Emerging Markets

Emerging Market ("EM") Funds also have wider risk and tracking tolerances, due to the higher volatility and lower liquidity inherent to the sector. Local currency debt funds generally have a greater tracking difference (+/- 15 bps) due to tax charges inherent to some local markets. For the Reporting Period, the SPDR Bloomberg Emerging Markets Local Bond UCITS ETF underperformed its benchmark by -20.3 bps.

Investment Managers' Report (continued) Passive Fixed Income and Passive Equity Funds (continued)

Emerging Markets (continued)

This underperformance was driven by taxes (-16.0 bps), paid out of issues from Brazil (-6.5 bps), India (-4.0 bps), Indonesia (-3.9 bps) and Philippines (-2.5 bps).

Passive Equity Funds

There were two new ETFs launched over the Reporting Period: SPDR Bloomberg 1-5 Year U.S. Corporate Bond UCITS ETF and SPDR S&P 400 U.S. Mid Cap Leaders UCITS ETF.

Most of SPDR I Equity Funds are within the anticipated deviation bands of their respective indices, on an annual and since inception basis.

All the Funds were within the anticipated 1 year annual ex-post tracking error number. However, it should be noted that 1-year ex-post tracking error is a short period to understand whether a Fund is within acceptable tolerance, a 3-year figure is much more in line with industry standards.

Additional information is provided on Funds where the tracking difference was +/- 0.10% on a gross-of-fees basis or where the one-year tracking error may be perceived to be high.

Over the Reporting Period SPDR S&P Euro Dividend Aristocrats ESG UCITS ETF outperformance (0.57%) is mainly attributed to tax withholdings.

SPDR S&P Global Dividend Aristocrats ESG UCITS ETF outperformance (0.30%) is mainly attributed to tax withholdings.

SPDR MSCI ACWI UCITS ETF outperformance (0.26%) is mainly attributed to security mis-weights.

SPDR MSCI EM Asia UCITS ETF outperformance (0.11%) is mainly attributed to tax withholdings.

SPDR MSCI Emerging Markets Small Cap UCITS ETF underperformance (-0.20%) is mainly attributed to security mis-weights.

SPDR MSCI Emerging Markets UCITS ETF outperformance (0.26%) is mainly attributed to tax withholdings.
