## THE FUND AND SHARE CLASSES

### The Fund

UBS MSCI ACWI Socially Responsible UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to best-in-class environmental, social and governance ("**ESG**") global companies (while avoiding those with low ESG characteristics) via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section. Therefore, this best in class approach excludes at least 20% of the least well-rated securities as against the standard index universe. The Fund does not benefit from an SRI label.

### Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;

- USD UKdis;
- hUSD dis;
- hUSD acc;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;
- hSGD dis;
- hSGD acc;
- hCAD dis;
- hCAD acc;
- hJPY dis; and
- hJPY acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled "*Primary Market*" and "*Secondary Market*" under the "*Purchase and Sale Information*" section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

## INVESTMENT OBJECTIVE AND POLICY

### Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

### Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI ACWI SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI ACWI SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. The Fund seeks to achieve the objective by tracking the Index and, with regard to ESG criteria, giving exposure to global companies with high ESG ratings and to exclude the ones with negative social or environmental impact.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in USD, EUR, GBP, CHF, SGD, CAD and JPY (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

hCAD dis hCAD acc	MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with Developed Markets 100% Hedged to CAD Index (Net Total Return)
hJPY dis hJPY acc	MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with Developed Markets 100% Hedged to JPY Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Fund may use participation notes ("**P-Notes**") or warrants to trade in otherwise restricted markets, such as India. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are generally in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank

## **GERMAN INVESTMENT TAX ACT DISCLOSURE**

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

## **AMF DISCLOSURE**

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("AMF Rules"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

## **USE OF FDI**

As detailed in the investment policy above the Fund may use the following FDI:

### *Futures, Index Futures & Futures on Stocks*

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

### *Currency swaps*

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

### *Currency forwards*

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

### *Warrants*

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

## **HEDGING**

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs gains/losses of such hedging transactions will accrue solely to the relevant Class.

## **SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS**

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

## DESCRIPTION OF THE INDEX

*This section is a summary of the principal features of the MSCI ACWI SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.*

### General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. The Index is market cap weighted and tracks the total return net dividend performance of large and mid-capitalisation companies worldwide containing 23 developed markets and 24 emerging markets countries.

The Index is a benchmark for investors seeking exposure to best-in-class Environmental, Social and Governance (ESG) global companies while avoiding products whose social or environmental impact is considered to be negative by investors.

The Index is part of the MSCI Global Socially Responsible (SRI) Index series. The constituent selection is made from the principal index, being the MSCI World Index (the "**Parent Index**").

The Index is constructed in two stages. First, securities of companies involved in nuclear power, tobacco, alcohol, gambling, military weapons, civilian firearms, genetically modified organisms and adult entertainment are excluded. Then, MSCI's best-in-class selection process is applied to the remaining universe of securities in the Parent Index to target the top 25% companies in each sector according to their ESG ratings (thus eliminating 75% of the least well-rated securities. These ESG ratings are provided by the MSCI (the "**MSCI ESG Ratings**"). The companies must have the following MSCI ESG Ratings: i) an MSCI ESG rating above 'BBB' and ii) the MSCI ESG controversies score greater than 3 to be considered as a high ESG ratings companies.

The MSCI ESG Rating calculates a weighted average key issue score for each company based on the risks, opportunities and controversies identified for the company. The weights of selected key issues are determined by the industry's impact on environmental and social factors and the expected timeframe for risks and opportunities to materialise. Each company's final industry-adjusted score corresponds to a rating between best (AAA) and worst (CCC). The factors used to rate a company are, amongst others, carbon emissions, water stress, biodiversity and land use, labour management, human capital development, board diversity, etc. (non-exhaustive list).

At least 90% of the securities have an ESG rating.

As the investment policy of the Fund is to track the Index, the portfolio management of the fund is passive. As a result, the approach taken in relation to the consideration of ESG criteria is the one taken by MSCI and therefore dependent on the approach and methodology defined by a third party.

The consideration of ESG criteria varies from one asset to the other because material key issues are industry-specific and do not affect all the assets equally. Consequently, MSCI sets the weights that determine each key issue's contribution to the overall ESG rating, based on the level of contribution of the industry to environmental or social impact and the expected time frame for risk/opportunity to materialise.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager

becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

### **Index Methodology**

The Index draws its constituents from the MSCI ACWI SRI Index (the "**Parent Index**"). The Parent Index is composed of an aggregation of the MSCI World SRI Index and the MSCI EM SRI Index, which aggregate list of constituents are amended as follows:

- 1) companies which are involved in any alcohol, gambling, tobacco, military weapons, civilian firearms, nuclear power, adult entertainment and genetically modified organisms are excluded;
- 2) companies are then assigned an MSCI ESG score and ranked on such score. The MSCI ESG score is calculated based of the Index Provider's assessment of whether the relevant company has faced controversies concerning negative environmental, social and or governance impact the relevant company's operations, products and services.

The maximum weight of any issuer of the Parent Index is then capped at 5% in order to construct the Index.

The methodology of the construction of the Index (ticker no. 734920) is available on the MSCI internet website:

<https://www.msci.com/index-methodology>

Additional information about the Index can be found under:

<https://www.msci.com/indexes>

### **Index Factsheet**

The Index Factsheet is available on the MSCI internet website:

### **Publication of the Index Composition**

The composition of the Index is available on the MSCI internet website by selecting "ACWI SRI LOW CARBON SELECT 5% ISSUER CAPPED" in the tab:

<https://www.msci.com/constituents>

### **RISK MANAGEMENT**

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

## **INVESTMENT RISKS**

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

### **Concentration Risk**

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

### **Currency Risk**

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

### **Index Risk**

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

### **Index Tracking Risk**

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in

the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

### **Investment Risk**

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

### **Collateral Management Risk**

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

### **INVESTOR PROFILE**

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to take an exposure to the equity market performance of best in class ESG companies of the United Kingdom and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

### **DIVIDEND POLICY**

It is not the current intention of the Directors to declare a dividend in relation to following Share Classes:

- USD acc;
- hUSD acc;
- hEUR acc;
- hGBP acc;
- hCHF acc;
- hSGD acc;

## DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

## SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis
- hUSD dis
- hUSD acc
- hEUR dis
- hEUR acc
- hGBP dis
- hGBP acc
- hCHF dis
- hCHF acc
- hSGD dis
- hSGD acc
- hCAD dis
- hCAD acc
- hJPY dis
- hJPY acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200

USD acc	Index value / 150
USD UKdis	Index value / 200
hUSD dis	Index value / 200
hUSD acc	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hGBP dis	Index value / 200
hGBP acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200
hSGD dis	Index value / 200
hSGD acc	Index value / 200
hCAD dis	Index value / 200
hCAD acc	Index value / 200
hJPY dis	Index value / 2
hJPY acc	Index value / 2

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1'851.9900 at 03 November 2017, Shares in hUSD acc would be issued at an Initial Offer Price per Share of USD 9.2600. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

- (a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
- (b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

- (a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
- (b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

## **REDEMPTIONS**

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within two Business Days of the Dealing Day.

## **CONVERSIONS**

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

## **VALUATION OF ASSETS**

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

## **RISK FACTORS**

### **Currency Hedged Classes**

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

### **Stock Connect Risks**

Through seeking to track the performance of the Index, and notwithstanding that the maximum weight of any issuer of the Parent Index is then capped at 5% in order to construct the Index, the Fund may invest in certain eligible securities listed and traded on the Shanghai Stock Exchange ("**Stock Connect**

**Securities**”), through the securities trading and clearing programme developed by The Stock Exchange of Hong Kong Limited (“**SEHK**”), the Shanghai Stock Exchange (“**SSE**”), Hong Kong Securities Clearing Company Limited (“**HKSCC**”) and China Securities Depository and Clearing Corporation Limited (“**ChinaClear**”) for the establishment of mutual market access between SEHK and SSE (together, the “**Stock Connect**”). The Fund may trade and settle select securities listed on the SSE through the SEHK and HKSCC trading link (such trading can be termed “**Northbound**”).

No individual investment quotas apply to investors in Stock Connect Securities through Stock Connect. In addition, there are no lock-up periods or restrictions on the repatriation of principal and profits.

Nonetheless, trading through Stock Connect is subject to a number of restrictions which may impact the Fund’s investments. In particular, it should be noted that Stock Connect is in its initial stages. Further developments are likely and there is no assurance as to whether or how such developments may restrict or affect the Fund’s investments.

In addition, the application and interpretation of the laws and regulations of Hong Kong and the People’s Republic of China (“**PRC**”) and the rules, policies or guidelines published or applied by any regulator which regulates Stock Connect and activities relating to Stock Connect (including without limitation, the China Securities Regulatory Commission (“**CSRC**”), the People’s Bank of China, the State Administration of Foreign Exchange, the Securities and Futures Commission, the Hong Kong Monetary Authority or any other regulator, agency or authority with jurisdiction, authority or responsibility in respect of Stock Connect), or any exchange, clearing system or other entity which provides services relating to Stock Connect (including without limitation, the SEHK and any relevant subsidiary, HKSCC, SSE or ChinaClear) (“**Stock Connect Rules**”) from time to time in respect of Stock Connect or any activities arising from Stock Connect is untested and there is uncertainty as to how they will be applied.

#### Home Market Rules

A fundamental principle of trading securities through Stock Connect is that the laws and rules of the home market of the applicable securities shall apply to investors in such securities. In respect of Stock Connect Securities, Mainland China is the home market and thus investors in Stock Connect Securities should observe Mainland China securities regulations, SSE listing rules and other rules and regulations. If SSE rules or other PRC law requirements are breached, SSE has the power to carry out an investigation, and may, through SEHK exchange participants, require such exchange participants to provide information about investors, which may include the Fund, and assist in investigations.

Nevertheless, certain Hong Kong legal and regulatory requirements will also continue to apply to the trading of Stock Connect Securities.

#### Suspension, Restriction and Cessation of Operation of Stock Connect

SEHK (or any relevant subsidiary) may, under certain circumstances as specified in the SEHK rules, temporarily suspend or restrict all or part of the order-routing and related supporting services with regard to all or any Northbound trading of Stock Connect Securities, and for such duration and frequency as SEHK may consider appropriate. SEHK has absolute discretion to change the operational hours and arrangements of Stock Connect at any time and without advance notice, whether on a temporary or permanent basis, due to operational needs, inclement weather, under emergency situations or otherwise. Moreover, SEHK (or any relevant subsidiary) may cease the provision of the Stock Connect Northbound trading service permanently.

#### Suspension of Trading on A-Shares and H-Shares

The SEHK rules state that where any H-Shares with corresponding A-Shares accepted as Stock Connect Securities are suspended from trading on SEHK but the Stock Connect Securities are not suspended from trading on the SSE, the service for routing the Stock Connect Securities sell orders and Stock Connect Securities buy orders for such Stock Connect Securities to the SSE for execution will normally remain available. However, SEHK may, in its discretion, restrict or suspend such service without prior notice.

## Ownership

Hong Kong law recognises the proprietary interest of investors in shares held for them by their broker or custodian in the Central Clearing and Settlement System. Such recognition should apply equally to Stock Connect Securities held for Hong Kong and overseas investors by the relevant Clearing Participant through HKSCC. In addition, in the PRC (where Stock Connect Securities are registered in a securities account opened with ChinaClear in the name of HKSCC), it is expressly stipulated in the “Several Provisions on the Pilot Program of Shanghai-Hong Kong Stock Market Connect” (as promulgated by CSRC to prescribe the launch and operation of the Stock Connect) that HKSCC acts as the nominee holder and the Hong Kong and overseas investors own the rights and interests with respect to the Stock Connect Securities. Accordingly, the regulatory intention appears to be that Hong Kong and overseas investors (including the Fund) should also have proprietary rights over Stock Connect Securities under PRC laws, although this cannot be guaranteed.

However, as Stock Connect is a recent initiative there may be some uncertainty surrounding such arrangements. In addition, while Hong Kong and overseas investors (including the relevant Funds) may have proprietary rights over Stock Connect Securities, they must act through HKSCC as nominee in order to enforce such rights in accordance with its rules.

In the event HKSCC is insolvent, the Stock Connect Securities should not form the bankruptcy estate of HKSCC. Insolvency proceedings will be governed by Hong Kong laws, and it is expected (but is not entirely certain) that ChinaClear and PRC courts will recognise the power of the liquidator duly appointed under Hong Kong law in relation to the Stock Connect Securities.

## Foreign Ownership Limits

Under PRC laws, there is a limit to how many shares a single foreign investor is permitted to hold in a single PRC-listed company, and also a limit to the maximum combined holdings of all foreign investors in a single PRC-listed company. Such foreign ownership limits may be applied on an aggregate basis (i.e. across both domestically and overseas issued shares of the same listed company, whether the relevant holdings are through Northbound trading or other investment channels). The single foreign investor limit is currently set at ten per cent of the shares of a PRC-listed company and the aggregate foreign investor limit is currently set at 30 per cent of the shares of a PRC-listed company. Such limits are subject to change from time to time.

If the foreign ownership limits are breached, SSE will notify SEHK and, on a last-in-first-out basis, SEHK will identify the relevant trades involved and require the relevant exchange participants to require the investors concerned (which could include a Fund) to sell the shares within the timeframe stipulated by SEHK. If the relevant investors fail to sell their shares, exchange participants are required to force-sell the shares for the relevant investors in accordance with the Stock Connect Rules.

## ANNEX II

**Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<p><b>Sustainability indicators</b> measure how the sustainable objectives of this financial product are attained.</p>		<p><b>What environmental and/or social characteristics are promoted by this financial product?</b></p>
		<p>This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:</p> <ul style="list-style-type: none"> <li>• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile</li> <li>• a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI)</li> </ul> <p>The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with DM 100% hedged to USD Net Total Return.</p>
		<ul style="list-style-type: none"> <li>• <b><i>What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?</i></b></li> </ul>
		<p>The characteristics are measured using the following indicators respectively:</p> <ul style="list-style-type: none"> <li>• The MSCI ESG Score</li> </ul> <p>MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.</p> <ul style="list-style-type: none"> <li>• Weighted average carbon intensity (Scope 1+2) MSCI</li> </ul> <p>The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).</p>

		<ul style="list-style-type: none"> <li><b><i>What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?</i></b></li> </ul>
		<p>The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI ACWI SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.</p> <p>MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.</p> <p>The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution &amp; waste, environmental opportunities, human capital, product liability, stakeholder opposition &amp; social opportunities.</p> <p>MSCI Climate Change Metrics provides climate data &amp; tools to support investors integrating climate risk &amp; opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.</p>

**Asset allocation** describes the share of investments in specific assets.

**Taxonomy-aligned** activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
