## Notes to the Financial Statements

# Note 1 Summary of material accounting policies

The material accounting policies applied in the preparation of these financial statements are set out below. The policies have been consistently applied in the financial year and comparative financial year presented, unless otherwise stated.

#### (a) Basis of presentation

The financial statements are presented in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union, Irish Statute comprising the Companies Act 2014, and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations"); and under the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). References to statutes, regulations and laws shall include any amendments thereto. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The comparative figures are for the financial year ended 31 December 2023.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Fund's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to

the financial statements, are disclosed in Note 1(c).

New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2024

A number of new standards and amendments to standards are effective for the financial year beginning 1 January 2024 that are not expected to have a material impact on the Company's financial position, performance or disclosures in its financial statements.

Standard:	Narrative:	Effective Date:
	Classification of Liabilities as Current or	
Amendments to IAS 1	Non-Current	1 January 2024
Amendments to IFRS 16 Amendments to IAS	Lease Liability in a Sale and Leaseback Disclosure of Supplier	1 January 2024
7 and IFRS 7	Finance Arrangements	1 January 2024

New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2024 and not early adopted

A number of new standards, amendments to standards and interpretations are issued but not yet effective for financial year beginning 1 January 2024, and have not been early adopted in preparing these financial statements. The Company had assessed the impact of these standards to its financial position, performance or disclosures in its financial statements. As at 31 December 2024, the Company do not expect a material impact on the financial statements.

Standard:	Narrative:	Effective Date:
Amendments to IAS 21	Lack of Exchangeability Classification and	1 January 2025

IFRS 18	Statements Subsidiaries without	1 January 2027
	Public	
IFRS 19	Accountability: Disclosures	1 January 2027

#### (b) Foreign currency translation

Functional and presentation currency In accordance with IAS 21, items included in each Fund's financial statements are measured using the currency of the primary economic environment in which it operates and in which the majority of its capital activity is conducted (functional currency). The functional currencies of the individual Funds are set out in the General Information. Each individual Fund has adopted its functional currency as its presentation currency. The combined financial statements are presented in U.S. Dollar ("USD"), being the functional and presentational currency of the Company as the Board of Directors considers the U.S. Dollar to be the currency that most faithfully represents the currency in which the majority of the Funds of the Company measure their performance and report their results, as well as the currency in which they receive subscriptions from their investors.

#### Combined Financial Statements

- (i) For the purpose of producing the Combined Statement of Financial Position, assets and liabilities, including net assets attributable to holders of Redeemable Participating Shares of each Fund whose presentation currency is not USD are translated from its presentation currency to USD at the closing rate at the Statement of Financial Position date; and
- (ii) For the purpose of producing the Combined Statement of Comprehensive Income, the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and Combined Statement of

Cash Flows, the average exchange rates for the respective financial year are used to convert into USD, the respective statements of the Funds with a presentation currency other than USD. The currency gain or loss on difference on retranslation of opening net assets attributable to redeemable participating shareholders at closing rates and translation of the Combined Statement of Comprehensive Income and the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders at average rates is included in the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This translation adjustment does not impact the net asset value per share of any of the individual Funds.

#### Transactions and balances

Foreign currency transactions are translated into the functional currency of each Fund using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions together with gains and losses from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Proceeds from subscriptions and amounts paid on redemption of Redeemable Participating Shares are translated at average rates, which approximate the rates prevailing at the dates of the transactions. Translation differences on non-monetary items, such as equities, held at fair value through profit or loss are reported as part of the net gain/(loss) on financial instruments at fair value through profit or loss.

All other exchange gains and losses are presented in the Statement of Comprehensive Income. Monetary foreign currency denominated assets and liabilities are translated into the functional currency using the exchange rate prevailing at the Statement of Financial Position date.

## (c) Material accounting estimates and judgements

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the amounts recognised in the financial statements. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

#### Going concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future, being at least the next twelve months subsequent to the approval of the financial statements. Furthermore, the management is not aware of

any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

#### Fair value of financial instruments

When the fair value of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of liquidity and model inputs such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The models are calibrated regularly and tested for validity using prices from any observable current market transactions in the same instrument (without modification or repackaging) or based on any available observable market data. As at 31 December 2024 and 31 December 2023, no positions were fair valued using the mathematical model.

## (d) Financial instruments

#### (i) Classification

The Company classifies its investments, including derivatives, based on both the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets.

The portfolio of financial assets and financial liabilities is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. Consequently, all investments, including derivatives and short-term investments are measured at Fair value through profit or loss.

The Company's policy requires the Investment Managers and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

(ii) Recognition, derecognition and measurement Regular purchases and sales of investments are recognised on the trade date - the date on which the Fund contracts to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income. Financial assets and financial liabilities are derecognised when the rights to receive cash flows from the investments have expired or the Fund has transferred substantially all risks and rewards of ownership.

#### (iii) Subsequent measurement

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "financial assets or financial liabilities at fair value through profit or loss" category are presented in the Statement of Comprehensive Income within net gain on financial instruments at fair value through profit or loss in the year in which they arise.

#### (iv) Fair value

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the Statement of Financial Position date, as detailed in the Company's Prospectus and Fund Supplements. The quoted market price used for financial assets and liabilities held by the Fund is based on a price within the bid ask spread that is most representative of fair value.

See section c) of this note for valuation of financial assets and financial liabilities not traded on an active market.

#### (v) Investment Funds

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these units is recognised as net gain/(loss) on financial instruments at fair value through profit or loss. For each relevant Fund, the fair value of investment funds, if any, are included in the financial assets at fair value through profit or loss, on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Fund.

## (vi) Derivative instruments

Forward and Spot Foreign Currency Exchange Contracts The fair value of open forward foreign currency exchange contracts and open spot foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, unrealised gains or losses on open forward foreign currency exchange contracts, if any, are included in the financial assets or liabilities at fair value through profit or loss, as appropriate, on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Fund. For each relevant Fund, unrealised gains or losses on open spot foreign currency exchange contracts are included in cash and cash equivalents on the Statement of Financial Position. Changes in the value of open foreign currency exchange contracts are recognised as unrealised gains or losses on foreign currency exchange contracts within the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised within the Statement of Comprehensive Income.

#### Futures contracts

The Fund may purchase and sell futures contracts. A futures contract is a contract that obligates the holder to buy or sell an asset at a predetermined delivery price at a specified time in the future. Some futures contracts are net (cash) settled. Upon entering into a futures contract, the Fund is required to deposit cash or other liquid assets with the futures clearing broker in accordance with the initial margin requirements of the broker or exchange. Futures contracts are generally valued at the settlement price established at the close of business each day by the board of trade or exchange on which they are traded. For each relevant Fund, unrealised gains and losses on open futures contracts, if any, are included in the financial assets and liabilities at fair value through profit or loss, as appropriate, on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Fund. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts within the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised within the Statement of Comprehensive Income.

Cash may be deposited by or on behalf of a Fund for margin purposes with counterparties for open futures contracts. Such cash held with counterparties at the end of the financial year is recorded as Margin cash held with counterparties for open financial derivative instruments on the Statement of Financial Position.

#### (e) Cash and cash equivalents/Bank overdraft\*

All cash and cash equivalents are comprised of cash balances held within State Street Bank and Trust Company's ("State Street") custodian network and net unrealised gains and losses on open spot foreign currency exchange contracts. Certain cash balances may be held by sub-custodians, as approved and appointed by State Street, in markets where State Street does not operate as a depositary. Excess cash held with State Street is automatically swept overnight into shares of an underlying money market investment fund, namely, State Street USD Liquidity LVNAV Fund. Cash and cash equivalents are carried at amortised cost which approximates its fair value. Bank overdrafts are presented separately on the Statement of Financial Position and are payable to State Street. For the purpose of the Statement of Cash Flows, bank overdrafts are presented as part of cash and cash equivalents.

As at 31 December 2024 and 31 December 2023, none of the Funds are highly leveraged.

\* A separate cash account is opened at the umbrella level in different currencies (the "Umbrella Cash Account"). The Umbrella Cash Account is held with the Depositary and is solely used for fee and expense processing related to the Funds and the Company. The Umbrella Cash Account is excluded in the regular NAV calculation of the share-classes as it serves as a transit account for the fee and invoice payment process. The Umbrella Cash Account is subject neither to fees nor interest. As at 31 December 2024, the total balance of the

Umbrella Cash Account amounted to USD 2,469,306 (31 December 2023: USD 1,405,195). This Umbrella Cash Account is receivable by the Distributor. This amount is not recognised on the Funds' or Company's Statement of Financial Position as at 31 December 2024 and is noted here only.

#### (f) Redeemable participating shares

Redeemable participating shares are redeemable at the shareholder's option and are classified as financial liabilities, in accordance with IAS 32.

The Funds issue shares at the net asset value of the existing shares on the basis of dealing prices. In accordance with the Prospectus the holders of participating shares can redeem them for cash equal to a proportionate share of the relevant Fund's net asset value (calculated in accordance with redemption requirements) on the relevant dealing day.

The Fund's net asset value per share is calculated by dividing the net assets attributable to redeemable participating shareholders (calculated in accordance with redemption requirements) by the number of shares in issue.

## (g) Unrealised and realised gain/(loss) on investments

In respect of each instrument type classified as financial instruments at fair value through profit or loss, the changes in unrealised gains/(losses) and realised gains/(losses) are included in net gain/(loss) on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income for the Fund.

Realised gains and losses on disposals of financial instruments classified as "at fair value through profit or loss" are calculated using the average cost method. They represent the difference between an instrument's initial carrying amount and disposal amount, or cash payments or receipts made on settlement of derivative contracts (excluding payments or receipts on collateral margin accounts for such instruments).

## (h) Dividend income and interest expense

Dividend income is credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits. Interest expense are recognised in the Statement of Comprehensive Income on an accruals basis.

#### (i) Bond income

Bond income earned arising on fixed interest securities and liquidity instruments is recognised on an effective yield basis.

#### (i) Expenses

Expenses are accounted for on an accrual basis. Expenses are charged to the Statement of Comprehensive Income.

#### (k) Distributions

Distributions with an ex date during the financial year under review are included as a finance cost in the Statement of Comprehensive Income. The reinvestment of the deemed distribution if applicable, being the portion of the total distribution reinvested, are included as a share transaction in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

#### (I) Taxation

A Fund may be liable to taxes (including withholding taxes) in countries other than Ireland on dividend, interest income earned and capital gains arising on its investments. Income that is subject to such tax is recognised gross of the taxes and the corresponding tax is recognised as withholding tax expense in the Statement of Comprehensive Income. The capital gains taxes are recognised within the net gain on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income.

## (m) Share Class Allocations

Income, expenses (excluding class specific expenses) and realised/unrealised gains/losses pertaining to the Funds are allocated proportionately to each class of shares based upon the relative NAV of outstanding shares of each class at the beginning of the day (after adjusting for subscriptions, repurchases and distributions affecting the respective classes). Class-specific expenses are charged directly to the applicable class.

#### (n) Collateral

## Securities Lending Programme

A Fund may receive collateral in the form of stock from counterparties as part of the Company's securities lending programme. This collateral does not form part of the net assets of the relevant Fund. Collateral is recognised on the date the relevant Fund becomes a party to the contractual provisions of the securities lending arrangement. Collateral is derecognised when the securities on loan for which the collateral has been pledged have been returned to the relevant Fund. All collateral received under the securities lending programme is held with the securities lending agent, State Street Bank International GmbH, Frankfurt Branch.

In event of default by the counterparty, under the contractual provisions of the securities lending agreement, the relevant Fund seizes ownership of the collateral and no longer has repayment obligations of the collateral to the counterparty.

See Note 9 for further details regarding collateral received under the securities lending programme as of 31 December 2024 and 31 December 2023.

## (o) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Investment Managers.

#### (p) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Transaction costs on the purchase and sale of forwards are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities and bonds are included in net gains/(losses) on financial assets at fair value through profit or loss in the Statement of Comprehensive Income for each Fund. These costs are separately identifiable transaction costs and the total costs incurred by each Fund, inclusive of stamp duty, during the financial year are disclosed in Note 4. Custody transaction costs form part of the Total Expense Ratio ("TER") of the Fund but are not distinguishable from the other expenses captured within the TER.

## (q) Securities lending

The Company has appointed State Street Bank International GmbH, Frankfurt Branch as securities lending agent. Certain Funds may lend securities through the securities lending agent to broker, dealers and other financial organisations to earn additional income. Income earned from securities lending activities is accounted for on an accruals basis. See Note 9 for details.

## (r) Significant non-cash transactions

Many investing and financing activities do not have a direct impact on current cash flows although they do affect the capital and asset structure of an entity. The exclusion of non-cash transactions from the statement of cash flows is consistent with the objective of a statement of cash flows as these items do not involve cash flows in the current period. Examples of non-cash transactions are: (a) the acquisition of assets either by assuming directly related liabilities or by means of a finance lease; (b) the acquisition of an entity by

means of an equity issue; (c) the conversion of debt to equity; (d) in-specie subscription. In the case of the Company, the total value of the non-cash assets transferred in-specie to the Company via the Merger on 26 August 2024 was USD 8,089,569,509. The assets transferred were valued at fair value on the date of merger. During the financial year ended 31 December 2023, MSCI Europe ESG Universal Low Carbon Select UCITS ETF Fund merged into the MSCI EMU ESG Universal Low Carbon Select UCITS ETF by way of an in-specie transfer, amounting to EUR 6,450,056.

#### (s) Income equalisation

Income equalisation arrangements are applied in the case of subscriptions to and redemptions from certain Funds. The Net Asset Value per redeemable participating share as calculated on each Dealing Day has an income element and a capital element. In relation to any subscription or redemption, the monies received or paid are allocated proportionately to or from income and capital in a Fund. These arrangements are intended to ensure that the income per redeemable participating share, which is distributed in respect of any distribution period for which a distribution is made, is not affected by changes in the number of redeemable participating shares in issue during that period and to ensure dividend distributions are paid to shareholders at the same rate. The calculation of equalisation is based on net income. Income equalisation is included in the Share transaction section of the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, for all Funds.

#### (t) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

## (u) Multi-Currency Revolving Credit Facility Agreement

Each Fund may borrow money from State Street Bank International GmbH up to a limit of 10% of its Net Asset Value, but only for temporary or emergency purposes. A Fund may acquire foreign currency by means of a back-to-back loan agreement. Foreign currency obtained in this way is not classified as borrowing for the purposes of the UCITS Regulations provided that the offsetting deposit equals or exceeds value of the foreign currency loan outstanding. The relevant Fund shall repay each loan made on the earlier of (a) in the case of any loan other than a rollover loan, the date falling not more than sixty calendar days after its utilisation date; or any rollover loan, the term of that rollover loan when aggregated with the term of the original overnight loan to which that rollover loan relates and the terms of all other rollover loans relating to that original overnight loan, the date falling not more than sixty calendar days after the utilisation

date of that original overnight Loan; (b) and the final maturity date. Loans payable are carried at amortised cost which approximates its fair value. As at 31 December 2024, the carrying value of the amount drawn down under the credit facility agreement was USD 5,828,522 (31 December 2023: USD Nil).

Interest is calculated daily using the percentage rate per annum equal to the aggregate of the applicable margin and reference rate. Interest charged on the credit facility for the year ended 31 December 2024 is included within the expenses in the Statement of Comprehensive Income.

## Note 2 Taxation

Investors should be aware that tax regulations and their application or interpretation by the relevant taxation authorities can change periodically. The following should not be taken as constituting legal or tax advice. Investors should obtain information and, if necessary, should consult their professional advisers on the possible tax or other consequences of buying, holding, transferring or selling the Shares under the laws of their countries of origin citizenship, residence or domicile.

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a) A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations and;
- b) Certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations and;
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue

Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Company will be held in Crest or another recognised clearing system.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to taxes imposed by the country from which the investment income/gains are received and such withholding taxes may not be recoverable by the Company or its Shareholders.

The Common Reporting Standard ("CRS") has been developed by the OECD to address the issue of offshore tax evasion on a global basis. Prospective investors will be required to provide to the Fund information about themselves and their tax status prior to investment in order to enable the Fund to satisfy its obligations under CRS, and to update that information on a continuing basis. Prospective investors should note the Fund's obligation to disclose such information to the Irish tax authority. The Irish tax authorities will exchange the information with other tax authorities in participating CRS jurisdictions on an annual basis. Each investor acknowledges that the Fund may take such action as it considers necessary in relation to such investor's holding in the Fund to ensure that any withholding tax suffered by the Fund and any other related costs, interest, penalties and other losses and liabilities arising from such investor's failure to provide the requested information to the Fund is economically borne by such investor.

FATCA is the Foreign Account Tax Compliance Act which aims to gather information on overseas accounts held by US Persons and ultimately ensure that the correct amount of tax is paid by US taxpayers. FATCA enforces reporting obligations on foreign Financial Institutions ("FIs") where these accounts are held. The Directors intend that the Company will continue to be compliant with FATCA and the relevant Intergovernmental Agreement (IGA) regulations. The Company has been classified as a Reporting Model 1 Foreign Financial Institution with the GIIN: F8WC9R.99999.SL.372.

In general the Directors intend that each Fund available to the UK will be certified by HM Revenue & Customs in the UK as reporting funds. The reporting fund status will remain in place permanently provided that the annual reporting requirements are satisfied. In broad terms, a "reporting fund" is an offshore fund that meets certain annual reporting requirements to HM Revenue & Customs and its investors. The Directors intend to manage the affairs of the Company so that these annual duties are met and will continue to be met on an ongoing basis.

German equity ratios are calculated and distributed daily.

DAC6 – Disclosure requirements for reportable crossborder tax arrangements On 25 May 2018, the European and Financial Affairs Council ("ECOFIN") formally adopted Council Directive (EU) 2018/822 ("the DAC6") which provides for mandatory disclosure rules for certain crossborder arrangements. The Directive is the latest in a number of measures designed to strengthen tax transparency and to fight against what is regarded as aggressive cross-border tax planning.

DAC6 imposes mandatory reporting requirements on EU-based tax advisors, accountants, lawyers, banks, financial advisors and other intermediaries who design, market, organise, make available for implementation or manage the implementation of potentially aggressive cross-border tax planning schemes. It also covers persons who provide aid, assistance or advice in relation to potentially aggressive cross-border tax-planning schemes, where they can be reasonably expected to know that they have performed that function. If the intermediary is located outside the EU or is bound by legal professional privilege, the obligation to report can pass to the Fund in certain instances, as the taxpayer.

An arrangement is reportable if it falls within certain hallmarks. These hallmarks are very broadly defined and have the potential to capture a wide range of transactions.

DAC6 was transposed into Irish law by Chapter 3A, Part 33, Taxes Consolidation Act 1997, which was introduced by section 67 of Finance Act 2019.

Under DAC6, any reportable transactions that occur are required to be reported within 30 days.

## Note 3 Financial risks

## Global Exposure

Per the UCITS Regulations, and as part of the risk management and reporting requirements, the Funds must be monitored and measured in accordance with the regulatory requirements. In accordance with the regulatory requirements, global exposure can be calculated in two ways, either:

- (i) the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Funds; or
- (ii) Value at Risk ("VaR"), where complex investment strategies are used. The VaR measure estimates the potential loss of the portfolio over a pre-defined year of time given a specified confidence level. The VaR methodology is a statistical measurement that produces a single aggregate result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets.

The Funds use the commitment approach to measure global exposure.

The Funds' activities expose them to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The ability of a Fund to achieve significant correlation between the performance of the Fund and the Index it tracks may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

#### Market risks

#### Price risk

The Funds are exposed to equity price risk. This arises from investments held by the Funds for which prices in the future are uncertain. The investments of the Funds are subject to general economic conditions, normal market fluctuations and the risks inherent in investment in international securities markets. The Funds' exposure to market price risk is the total value of financial assets at fair value through profit or loss as set out in the Statement of Financial Position.

With all other factors unchanged the sensitivity of the Funds to a 10% fluctuation in market prices of Transferable securities which is management's best estimate of a reasonable possible shift in the market prices, is set out in the table below:

Estimated NAV increase/ (decrease) 2024	Estimated NAV increase/ (decrease) 2023

#### Currency risk

The Funds may invest in securities that are denominated in currencies that differ from the base currency. Changes in the values of those currencies relative to the base currency may have a positive or negative effect on the values of the Funds' investments denominated in those currencies.

The below tables include traded foreign forward currency contracts related to share class hedging. As at 31 December 2024 and 31 December 2023, the following Funds participated in share class hedging:

The table below summarises the sensitivity of the foreign currency exposed Funds' monetary and non-monetary assets and liabilities to changes in foreign exchange movement as at the respective financial year end dates. The analysis is based on the assumptions that the relevant foreign exchange rate increased or decreased against the Fund's functional currency by the percentages disclosed in the table below, with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the foreign exchange rates, having regard to historical volatility of those rates.

<sup>&</sup>lt;sup>1</sup> The Fund launched on 18 March 2024.

This sensitivity analysis is a relative estimate of risk and is not intended to be predictive of future results.

<sup>&</sup>lt;sup>2</sup> The Fund launched on 19 March 2024.

<sup>&</sup>lt;sup>3</sup> The Fund launched on 20 March 2024.

<sup>&</sup>lt;sup>4</sup> The Fund launched on 26 August 2024.

#### Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities (fair value interest rate risk) and future cash flows (cash flow interest rate risk). As interest rates rise, the values of debt securities or other income producing investments are likely to fall. This risk is generally greater for obligations with longer maturities.

The table below summarises the relevant Fund's exposure to interest rate risks. The Fund analysed below holds fixed interest and variable interest securities that expose the Fund to fair value interest rate risk. It includes the relevant Fund's assets and trading liabilities at fair values, categorised by earlier of contractual re-pricing or maturity dates.

#### As at 31 December 2024

Fund Name	Currency	Up to 1 year	1 to 5 years	Over 5 years	interest bearing	Net Assets
EUR Ultra-Short Bond ESG UCITS ETF	EUR	30,800,846	_	_	_	30,800,846

At 31 December 2024, had the base interest rates increased by 10% in relation to all holdings subject to interest with all other variables held constant, the finance expense on financial liabilities and assets would have increased by EUR 3,080,085. A 10% decrease would have an equivalent but opposite effect.

As at 31 December 2023, none of the Funds hold interest bearing securities. Cash holdings of the Funds are not subject to significant interest rate risk.

#### Concentration risk

Because the Company's assets may be invested in a limited number of investments which may be concentrated in a few countries the negative impact on the value of the Company's assets from adverse movements in a particular economy could be considerably greater than if the Company were not permitted to concentrate its investments to such an extent. Concentration risk is managed in line with the index that it is tracking.

Asset classifications are based on the domicile of the portfolio only.

The significant concentrations of each Fund's investments to particular countries by the Funds asset portfolio are disclosed in the following tables.

### As at 31 December 2024

### Credit risk

The Funds are exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Funds are exposed to counterparty credit risk on forward foreign exchange contracts, cash and cash equivalents and other receivable balances. The value of cash equivalents held by MSCI USA UCITS ETF, MSCI USA Value UCITS ETF, MSCI World UCITS ETF, S&P 500 UCITS ETF, Factor MSCI USA Low Volatility UCITS ETF, Factor MSCI USA Prime Value ESG UCITS ETF, Factor MSCI USA Quality ESG UCITS ETF and MSCI USA Select Factor Mix UCITS ETF in the underlying money market investment fund, State Street USD Liquidity LVNAV Fund (via the cash sweep from State Street custodian network) as at 31 December 2024 is USD 36,299,763 (31 December

2023: USD 12,638,673). EUR Ultra-Short Bond ESG UCITS ETF Fund is exposed to credit risk due to investment in debt securities, all of which were rated as Investment Grade as at 31 December 2024.

The maximum exposure of the Funds to credit risk at 31 December 2024 and at 31 December 2023 is the value of their assets as stated on the Statement of Financial Position.

The Funds minimise concentrations of credit risk by undertaking transactions with counterparties on recognised and reputable exchanges, where applicable. OTC derivative transactions are subject to the risk that a counterparty to the transaction will not fulfill its contractual obligations to the other party, as many of the protections afforded to exchange traded derivative transactions might not be available for OTC derivative transactions. For financial derivatives instruments traded on exchanges or clearinghouses, the primary credit risk is the creditworthiness of the Fund's clearing broker or the exchange or clearinghouse itself. Refer to Note 10 to the financial statements for details of the Funds' exposure to OTC derivatives as of 31 December 2024 and 31 December 2023.

The Funds transferable securities, with the exception of transferable securities on loan, and cash are held within the depositary's network as of 31 December 2024 and 31 December 2023. Details of the credit risk relating to assets held with the Depositary are disclosed on the following page. Refer to Note 9 to the financial statements for details of Funds participating in the securities lending program and the associated risks.

## Counterparty risk

The Funds may be subject to credit risk with respect to any counterparties with which the Company, on behalf of the Funds, enters into financial derivative instruments and other transactions such as repurchase agreements and securities lending transactions. If a counterparty becomes insolvent or otherwise fails to perform its obligations, a Fund may experience significant delays in obtaining any recovery in an insolvency, bankruptcy, or other reorganisation proceeding and may obtain only a limited recovery or may obtain no recovery.

At 31 December 2024 the following Funds had exposure to counterparty risk through the forward foreign currency contracts held with State Street Bank London (rated AA- by S&P), Barclays Bank (rated A+ by S&P), Citibank (rated A+ by S&P), HSBC Bank (rated A+ by S&P), UBS AG (rated A+ by S&P) and Westpac Banking Corporation (rated AA- by S&P):

Margin cash is also held with UBS AG in respect of the futures contracts traded on the Funds. Margin cash is recognised separately on the Funds' Statement of Financial Position.

### Depositary risk

The Funds' Depositary is State Street Custodial Services (Ireland) Limited (the "Depositary"). Substantially all of the Transferable Securities and cash of the Funds are held within the depositary network. Bankruptcy or insolvency of the Depositary or of its parent company State Street Corporation may cause the Funds' rights with respect to its investments in securities held by the Depositary to be delayed. The maximum exposure to this risk at 31 December 2024 and at 31 December 2023 is the Total Fair Value of Transferable Securities disclosed in the Schedule of Investments and Statement of Financial Positions, and the value of cash as detailed in the Statement of Financial Position.

State Street Custodial Services (Ireland) Limited is rated AA-(2023: AA-) by S&P.

Investments held by the Depositary are segregated from the assets of the Depositary, with ownership rights remaining with the Funds. The Depositary will ensure that any agents it appoints to assist in safekeeping the assets of the Funds will segregate the assets of the Funds. Thus in the event of insolvency or bankruptcy of the Depositary, the Fund's assets are segregated and protected and this further reduces counterparty risk. The Funds will, however, be exposed to the risk of the Depositary or certain depositories used by the Depositary, in relation to the Funds' cash held by the Depositary. In event of the insolvency or bankruptcy of the Depositary, the Fund will be treated as a general creditor of the Depositary in relation to cash holdings of the Funds.

### Liquidity risk

Liquidity risk is the risk that the Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds' listed securities are considered readily realisable, as the majority are listed on a known stock exchange.

Certain investments and types of investments are subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. It may be difficult for a Fund to value illiquid securities accurately. Also, the Funds may not be able to dispose of illiquid securities or execute or close out financial derivative instrument transactions readily at

a favourable time or price or at prices approximating those at which the Fund currently values them. Illiquid securities also may entail registration expenses and other transaction costs that are higher than those for liquid securities. Funds which held investments in the form of forward foreign currency exchange contracts as of 31 December 2024 and 31 December 2023 are listed under the Counterparty Risk section of this note.

The Company can manage liquidity risk through redemption limits and redemptions in-kind, if necessary. If redemption requests received in respect of Shares of a particular Fund on any Dealing Day (every business day and/or such other day as the Directors and/or Manager may determine) total, in aggregate, more than 10% of all of the issued Shares of that Fund on that Dealing Day, the Directors shall be entitled, at their absolute discretion, to refuse to redeem such number of Shares of that Fund on that Dealing Day, in excess of 10% of the issued Shares of the Fund, in respect of which redemption requests have been received, as the Directors and/or the Manager shall determine. If the Company refuses to redeem Shares for this reason, the requests for redemption on such date shall be reduced rateably and the Shares to which each request relates which are not redeemed shall be redeemed on each subsequent Dealing Day, provided that the Company shall not be obliged to redeem more than 10% of the number of Shares of a particular Fund outstanding on any Dealing Day, until all the Shares to which the original request related have been redeemed.

Each Fund may allow the Authorised Participant which has been appointed to offer prices for the Shares on any listing stock exchange to redeem Shares in-kind on each Dealing Day, unless otherwise specified in the relevant supplement. In this context, "in-kind" means that, with the consent of the Authorised Participant, rather than delivering cash proceeds in respect of a redemption, the Company will deliver securities or a combination of cash and securities, provided that the asset allocation is subject to the approval of the Depositary.

At 31 December 2024 and at 31 December 2023, all of the assets and liabilities of each Fund (as shown in the Statement of Financial Position) fell due within three months.

### Capital risk

The capital of the Funds is represented by the net assets attributable to holders of redeemable participating shares. The amount of net asset attributable to holders of redeemable participating shares can change significantly, as the Funds are subject to subscriptions and redemptions on a daily basis at the discretion of Authorised Participants and Shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the

development of the investment activities of the Funds. The Investment Managers monitor capital on the basis of the value of net assets attributable to holders of redeemable participating shares.

#### Fair value

IFRS 13 requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels as defined under IFRS 13.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices). Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (Level 3), IFRS 13 requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the financial year split between those recognised in the Statement of Comprehensive Income, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of Level 3 positions.

The Level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The majority of the Company's financial assets and liabilities measured at fair value at 31 December 2024 and 31 December 2023 were classified within Level 1 as they are actively traded listed equities and futures contracts, apart from fixed income securities and forward foreign currency exchange contracts which are classified within Level 2.

Level 1 is deemed to be the most appropriate categorisation for Net Assets Attributable to Redeemable Participating Shareholders.

## Level 2 Transferable Securities

As at 31 December 2024, the following securities were classified as Level 2:

Fund	Security Name
MSCI USA UCITS ETF	Contra Abiomed Inc

Investments, whose values are based on quoted market prices in active markets are classified within Level 1, including active listed equities. The Company does not adjust the quoted price for these instruments. The futures contracts held by the Funds as noted on the Funds Schedule of Investments as at 31 December 2024 and 31 December 2023, are classified within Level 1.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or nontransferrability, which are generally based on available market information. Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently.

The Funds recognise transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred. The transfer is primarily due to the availability of quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs. No

Level 3 reconciliation and no sensitivity analysis assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Company at the financial year ended 31 December 2024 and the financial year ended 31 December 2023.

During the financial year ended 31 December 2024, the following transfers of securities between levels took place:

- Level 1 to Level 2: one security, Shanghai RAAS Blood Products Co Ltd, held on MSCI Emerging Markets Climate Paris Aligned UCITS ETF due to trading halt prior to year end. The security resumed trading on January 2025.
- Level 3 to Level 2: one security, Contra Abiomed Inc, held on UBS Climate Aware Global Developed Equity CTB UCITS ETF, MSCI USA Socially Responsible UCITS ETF, MSCI USA UCITS ETF, MSCI World UCITS ETF, S&P 500 UCITS ETF, MSCI USA hedged to EUR UCITS ETF, MSCI USA hedged to CHF UCITS ETF, Factor MSCI USA Quality ESG UCITS ETF, MSCI USA Select Factor Mix UCITS ETF, MSCI ACWI Socially Responsible UCITS ETF, MSCI ACWI ESG Universal Low Carbon Select UCITS ETF, MSCI ACWI Climate Paris Aligned UCITS ETF, MSCI World Climate Paris Aligned UCITS ETF, MSCI World Socially Responsible UCITS ETF, MSCI USA ESG Universal Low Carbon Select UCITS ETF and MSCI USA Climate Paris Aligned UCITS ETF and One security, ESC GCI Liberty Inc, held on MSCI USA Select Factor Mix UCITS ETF which are priced with monthly broker quote.

During the financial year ended 31 December 2023, the following transfers of securities between levels took place:

- Level 2 to Level 3: one security, Radius Health Inc, held on MSCI USA Select Factor Mix UCITS ETF was written down to Nil due to trading halt.
- Level 3 to Level 2 : one security, Escrow New York REIT, held on MSCI USA Select Factor Mix UCITS ETF. The transfer in level is due to the price not being static for over 90 days.
- Level 1 to Level 3: one security, Leo Lithium Ltd, held on MSCI Pacific (ex Japan) IMI Socially Responsible UCITS ETF is valued based on the last traded market price prior to trading half.
- Level 1 to Level 2: one security, Koninklijke DSM BV, held on MSCI EMU Climate Paris Aligned UCITS ETF, MSCI Europe Climate Paris Aligned UCITS ETF, MSCI EMU ESG Universal Low Carbon Select UCITS ETF, Global Gender Equality UCITS ETF and MSCI ACWI Socially Responsible UCITS ETF was previously delisted from trading on the Euronext Amsterdam Stock Exchange due to reorganization.

There were no other transfers of securities between the levels in the fair value hierarchy.

## Note 4 Fees & Expenses

Closing Balance Fair Value

All of the fees and expenses payable in respect of a Fund are paid as one single fee. This is referred to as the Flat Fee. Out of the aforementioned Flat Fee, the Company will bear all costs incurred in connection with the Company's assets. This includes, but is not limited to, fees and expenses of the Investment Managers or Sub-Investment Manager, Depositary, Administrator, Directors, Distributor or Sub-Distributor and

Company Secretary. The Company may pay part or all of its fees to any person that invests in or provides services to the Company or in respect of any Fund.

The following fees and expenses will also be discharged out of the Flat Fee:

- (i) the cost of listing and maintaining a listing of Shares on any Listing Stock Exchange;
- (ii) the cost of convening and holding Directors' and Shareholders' meetings;

2,634

- (iii) professional fees and expenses for legal and other consulting services;
- (iv) the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and semi-annual reports and other documents to current and prospective Shareholders;
- (v) the costs and expenses arising from any licensing or other fees payable to any Index Provider or other licensor of intellectual property, trademarks or service marks used by the Company:
- (vi) the costs and expenses of any investment adviser appointed by the Investment Manager/s;
- (vii) such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Fund; and
- (viii) all establishment costs of the Company and the Funds not otherwise referred to above.

The Flat Fee does not include extraordinary costs and expenses (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Company including duty charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Company's investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company all of which will be paid separately out of the assets of the relevant Fund). The Flat Fee is calculated and accrued daily from the Net Asset Value of each Fund and payable monthly in arrears. The Flat Fee of each Fund is as listed below and in the relevant Supplement. If a Fund's expenses exceed the Flat Fee outlined below in relation to operating the Funds, the Distributor or its affiliate will cover any shortfall from its own assets.

The Flat Fee rates which were effective up to 31 December 2024 are outlined below:

# Note 5 Share capital

The authorised share capital of the Company is 500,000,300,002 (five hundred billion, three hundred thousand and two) Shares of no par value divided into 300,002 (three hundred thousand and two) Subscriber Shares of no par value and 500,000,000,000 (five hundred billion) Shares of no par value. The Directors are empowered to issue up to all of the Shares of the Company on such terms as they think fit. The Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different Classes) in the profits and assets of the Fund to which the Shares relate. The Company may from time to time by ordinary resolution increase its capital, consolidate the Shares or any of them into a smaller number of Shares, sub-divide the Shares or any of them into a larger number of Shares or cancel any Shares not taken or agreed to be taken by any person. The Company may by special resolution from time to time reduce its share capital in any way permitted by law. At a meeting of Shareholders, on a show of hands, each Shareholder shall have one vote and, on a poll, each Shareholder shall have one vote for each whole Share held by such Shareholder.

The Subscriber Shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company

except for a return of capital on a winding-up. The Subscriber Shares do not form part of the net assets of the Funds or the Company and are disclosed by way of this note only. As of 31 December 2024 and 31 December 2023, there are two Subscriber Shares in issue and are held by Alan White and Markus Goetschi, Directors of the Company.

The issued Redeemable Participating Share capital for each Fund is at all times equal to the Net Asset Value of that Fund. Redeemable Participating Shares are redeemable at the Shareholders option and are classified as financial liabilities. The Redeemable Participating Shares may also be bought and sold in a secondary market where such a market exists.

Share capital transactions (number of shares) for the financial year ended 31 December 2024 and 31 December 2023 are shown at the base of the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

Share capital transactions (monetary value of share transactions) for the financial year ended 31 December 2024 and financial year ended 31 December 2023 are shown below. All amounts are in the functional currency of the relevant Fund not the currency of the class.

<sup>&</sup>lt;sup>1</sup> Share class launched on 25 April 2023.

# Note 6 Related parties

Parties are considered to be related if one party has the ability to control the other party to exercise significant influence over the other party in making financial or operational decisions.

In the opinion of the Directors, the Investment Managers, the Directors, the Distributor, the Manager, the UK Facilities Agent, Paying and Information Agents and Representatives and the lending service provider are related parties under IAS 24 "Related Party Transactions". The respective UBS entities acting as the Manager, Distributor, Paying and Information Agents and Facilities Agent are listed on the Management and Administration pages in this annual report.

<sup>&</sup>lt;sup>2</sup> Share class terminated on 14 December 2023.

MSCI Europe ESG Universal Low Carbon Select UCITS ETF ceased trading on 14 December 2023 and its assets transferred into MSCI EMU ESG Universal Low Carbon Select UCITS ETF on the same date.

<sup>&</sup>lt;sup>4</sup> Fund and its share class launched on 20 April 2023.

Fund and its share class launched on 26 June 2023.

Markus Goetschi is an employee of the Distributor, UBS Asset Management Switzerland AG. Naomi Daly is an independent director of the Manager, a subsidiary of UBS Group AG. Alan White is an employee of the Manager. Marie Antoinette Petrini is an employee of UBS Europe SE, Sucursal en Espana Madrid branch.

None of the Directors of the Company had holdings in any of the Funds, with the exception of the two Subscriber Shares held by Alan White and Markus Goetschi as at 31 December 2024 and as at 31 December 2023.

The Directors' fees amounting to USD 70,164 were paid out of the Flat Fee during the financial year ended 31 December 2024 (financial year ended 31 December 2023: USD 70,362). Only Independent Directors are entitled to a Director's fee. Directors who are employees of UBS Group AG, or any of its subsidiaries do not earn any additional remuneration in respect of their roles as Directors of the Company.

The Company appointed UBS Fund Management (Luxembourg) S.A. to act as manager (the "Former Manager") of the Company and each Fund up to 27 April 2023. The Company appointed UBS Fund Management (Ireland) Limited as manager (the "Manager") on 28 April 2023 and replaced the Former Manager on this date. The Manager received fees for the financial year ended 31 December 2024 of USD 1,479,515 (financial year ended 31 December 2023: The Manager and Former Manager collectively, received fees of USD 937,141) which were paid out of the Flat Fee.

UBS Asset Management (UK) Ltd acts as Investment Manager for the Funds, with the exception of EUR Ultra-Short Bond ESG UCITS ETF which launched on 19 March 2024 and for which UBS Asset Management Switzerland AG acts as Investment Manager. UBS Asset Management (UK) Ltd acts also as UK Facilities Agent of the Company. The Investment Managers' fees were paid out of the Flat Fee for the financial year. Please refer to Note 4, Fees & Expenses, for an explanation of the fee structure of the Company. All transactions were entered into in the normal course of business. The total Investment Managers' fees charged for the financial year ended 31 December 2024 amounted to USD 25,763,178 (financial year ended 31 December 2023: USD 15,898,212) of which EUR 31,863 was paid to UBS Asset Management Switzerland AG. All amounts were paid out of the Flat Fee.

The total value of the assets transferred in-specie to the Company via the Merger on 26 August 2024 was USD 8,089,569,509.

UBS Asset Management Switzerland AG acts as the Distributor and lending service provider of the Company. The Distributor's fees were paid out of the Flat Fee for the financial

year. The Distributors' commission and fees amounted to USD 14,541,278 (financial year ended 31 December 2023: USD 21,197,385). Prior to 1 October 2024, the service provider received 20% of the lending income. The UBS Asset Management Switzerland AG received USD 75,665 (financial year ended 31 December 2023: USD 124,305) in securities lending transaction as lending service provider of the Company until 30 September 2024. Please see further details in Note 9.

Baader Bank AG, Banca Selia Holding S.P.A, Bank Julius Baer & CO AG, Citigroup London, DRW Global Markets Limited, Flow Traders B. # Note 7 Commission arrangements

During the financial year ended 31 December 2024, no commission sharing arrangements (CSAs) were entered into on behalf of the Company (financial year ended 31 December 2023: None).

## **Note 8 Distributions**

The Directors intend to declare distributions out of:

- (i) net income; and/or
- (ii) realised and unrealised gains net of realised and unrealised losses attributable to the Class (USD) A-dis Shares

In respect of each six month period ending on 30 June and 31 December within 30 calendar days of the end of the relevant financial period end. Any such dividends will be paid within two calendar months after declaration.

The distribution rates per share noted in the tables below are in the functional currency of the Fund, not the currency of the respective share class.

The following distributions were paid for the financial year ended 31 December 2024:

# Note 9 Securities lending

Securities lending is the temporary transfer of securities from the lender (the Company) to a third party borrower through an appointed lending agent. In exchange for the lent security the borrower provides collateral, prior to the delivery of securities, and pays a fee over the financial year of the loan. All loans within the lending program are open and rolled daily such that they can be terminated on demand.

The Company engages in securities lending for selected, physically replicated Funds with the aim of reducing the investor's net costs. Securities lending with the Company is always overcollateralised with at least 105% margin across all asset classes. An additional safeguard is that loan balances are capped at 50% of each Fund's Asset Under Management. Funds tracking a "socially responsible" index, an ESG, Gender Equality Index or Paris aligned Indices are not in the lending program.

The following Funds are in the securities lending program as at 31 December 2024:

MSCI USA UCITS ETF
MSCI USA Value UCITS ETF
MSCI World UCITS ETF
S&P 500 UCITS ETF
Solactive Global Pure Gold Miners UCITS ETF
MSCI Australia UCITS ETF
MSCI USA hedged to EUR UCITS ETF

In general, lending may only be effected via the Securities Lending Agent (State Street Bank) with the protection of an indemnity against borrower default provided for by State Street Bank and Trust Company (State Street). Collateral is held in a depositary account that is ring-fenced from the lending agent's Balance Sheet. Mark to markets take place on a daily basis to ensure that the required margin levels are

FTSE EPRA Nareit Developed Green UCITS ETF

Factor MSCI USA Quality ESG UCITS ETF

consistently maintained. Whilst State Street provides a borrower indemnity and carefully selects its underlying list of borrowers, an additional level of oversight is provided for by UBS Credit & Risk to structure a bespoke approved borrower list

Non-cash collateral received by way of the title transfer collateral arrangements in relation to securities lending transactions cannot be sold, re-invested or pledged.

It should be noted that securities lending is subject to a certain risk where the borrower does not return the borrowed securities according to their obligation, and where the value of the collateral provided does not cover the costs of repurchase of the securities. In such cases, State Street, under the terms of the borrower default indemnity, shall cover the cost of purchasing the replacement securities, subject to certain conditions.

Effective 1 October 2024, at least 80% of the gross revenue received in the context of securities lending transactions is credited to the relevant Fund while the Securities Lending Agent approximately receives 20% to cover operational costs resulting from the transactions carried out in relation to the securities lending.

Until 30 September 2024, at least 60% of the gross revenue received in the context of securities lending transactions is credited to the relevant Fund while UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover the due diligence and 20% of the gross revenues are paid to the Securities Lending Agent as normal compensation for its services in the context of such efficient portfolio management techniques.

UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover for services performed by UBS Asset Management Switzerland AG and the Securities Lending Agent approximately 20% to cover operational costs resulting from the transactions carried out in relation to the securities lending. The services include due diligence on the borrowers (careful borrower selection and monitoring), website disclosure of daily adjusted lending data like daily publication of collateral assets, disclosure in the financial statements. In terms of collateral liquidity checks are performed and collateralization level are monitored.

All amounts in this note are stated in USD, including amounts for those Funds with a functional currency other than USD.

Canadian Dollar	1.3720	_
Euro	0.9264	0.9238
Japanese Yen	151.7779	141.4096
Swiss Franc	0.8818	0.8962

## **Note 12 Operating segments**

The Investment Managers make the strategic resource allocations on behalf of the Funds. The Investment Managers are responsible for each Fund's entire portfolio and consider each Fund to be a single operating segment.

The Investment Managers' asset allocation decisions are based on a single, integrated investment strategy, to deliver the performance of the relevant Reference Index of each Fund, and each Fund's performance is evaluated by reference to the relevant Reference Index.

The Funds have no assets classified as non-current assets. Each Fund's investments expose it to the performance of the relevant Reference Index.

The Funds have highly diversified portfolios of investments, and no single investment accounts for a significant portion of the Company's income.

#### Products and services

All of the Company's revenues are derived from one product grouping, namely the portfolio securities invested in by the Funds in order to track the performance of their respective indices.

## Geographical areas

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each Fund's revenue may be considered as being attributed to the region stated in its investment objective.

#### Major customers

As the Company is an investment company, its distinct major customers are the Authorised Participants who make the primary market for the Funds' shares. The Company permits subscriptions and redemptions solely with Authorised Participants. Investors (whether or not the ultimate beneficial owner or end-investor) may purchase and sell shares in the ETFs on exchanges or from the Authorised Participants - however, the Company does not regard such investors or related end-investors as its direct customers.

## Note 13 Efficient Portfolio Management

The Company on behalf of a Fund may employ techniques and instruments relating to transferable securities, money market instruments and/or other financial instruments in which it invests for efficient portfolio management purposes.

Repurchase agreements and stock lending agreements may be used by the Funds for efficient portfolio management. State Street Bank International GmbH, Frankfurt Branch, which belongs to the same group as the Depositary bank, acts as securities lending agent for securities lending transactions entered into on behalf of the Funds. None of the Funds entered into Repurchase agreements during the financial year ended 31 December 2024 or financial year ended 31 December 2023.

During the financial year ended 31 December 2024, the Company entered into stock lending activities on behalf of the following Funds: MSCI USA UCITS ETF, MSCI USA Value UCITS ETF, MSCI World UCITS ETF, S&P 500 UCITS ETF, Solactive Global Pure Gold Miners UCITS ETF, MSCI Australia UCITS ETF, MSCI USA hedged to CHF UCITS ETF, Factor MSCI USA Low Volatility UCITS ETF and MSCI USA Select Factor Mix UCITS ETF. See Note 9 for details.

During the financial year ended 31 December 2023, the Company entered into stock lending activities on behalf of the following Funds: MSCI USA UCITS ETF, MSCI USA Value UCITS ETF, MSCI World UCITS ETF, S&P 500 UCITS ETF, Solactive Global Pure Gold Miners UCITS ETF, MSCI Australia UCITS ETF, MSCI USA hedged to EUR UCITS ETF, MSCI USA hedged to CHF UCITS ETF, Factor MSCI USA Low Volatility UCITS ETF, Factor MSCI USA Prime Value ESG UCITS ETF, Factor MSCI USA Quality ESG UCITS ETF and MSCI USA Select Factor Mix UCITS ETF. See Note 9 for details.

#### **Note 16 Portfolio Turnover Rates**

The Portfolio Turnover Ratio (PTR), expressed as a percentage, reflects the volume of dealing in the Fund. It is equal to the total of purchases and sales of securities netted against the value of the subscriptions and redemptions, over the average net assets of the Fund for the financial year, or from the Fund launch date to the respective financial year end date for Funds which launched during the relevant financial year. The PTR for the financial year ending 31 December 2024 and 31 December 2023 is the following:

Fund	31 December 2024	31 December 2023
MSCI USA UCITS ETF	(15.52%)	(7.89%)

## Note 17 Significant events during the financial year

The war in Ukraine and the ongoing conflict in the middle east have a material impact on financial markets, first and foremost on Russian, Ukrainian and Israeli securities but also on the wider markets globally. The situation remains very volatile and the UBS Fund Management Ireland Limited is closely monitoring in order to quickly take appropriate action to protect the interest of investors in our funds. It has put in place the necessary measures to at all times comply with applicable laws and regulations, in particular but not limited to the most recently enacted sanction regimes in the EU, Switzerland, UK and US. As we are experiencing serious trading limitations beyond sanctioned Russian securities, we

are applying fair value pricing for all relevant securities where price quotes (if available) are not considered reflective of their current market value. Depending on the future evolution of financial markets there may be a further impact on investment strategies. It is unclear right now whether this will require the application of liquidity measures in certain funds. These could include all such measures as indicated in the respective fund prospectuses.

On 26 February 2024, the Central Bank approved authorisation of following Funds: MSCI Canada ESG Universal Low Carbon Select UCITS ETF, S&P 500 Climate Transition ESG UCITS ETF and EUR Ultra- Short Bond ESG UCITS ETF.

<sup>&</sup>lt;sup>2</sup>Fund and its share class launched on 19 March 2024.

<sup>&</sup>lt;sup>3</sup>Fund and its share class launched on 20 March 2024.

<sup>&</sup>lt;sup>4</sup>Fund and its share class launched on 26 August 2024.

On 26 February 2024, UBS Asset Management Switzerland AG was appointed as Investment Manager for EUR Ultra-Short Bond ESG UCITS ETF.

In March 2023, UBS Group AG agreed to buy Credit Suisse, and on 7 December 2023 it was announced that the directors of UBS Group AG had approved the execution of a merger of UBS AG and Credit Suisse AG. As part of that broader merger project, it was proposed to consolidate the Irish platforms of the two entities, namely, Credit Suisse Index Fund (IE) ETF ICAV (the "ICAV") and the Company. such that the existing active seven sub-funds of the ICAV would merge onto the platform of the Company (the "Merger") via seven new Fund launches in the Company. The assets and liabilities of the relevant sub-funds of the ICAV were transferred in-specie to the Company and the shareholders of the respective sub-funds of the ICAV became shareholders of the Company. The effective date of Merger and new Fund launches in the Company was 26 August 2024.

A revised Prospectus for the Company was issued on 10 June 2024.

On 10 June 2024, the Central Bank approved authorisation of the following Funds: MSCI USA ESG Leaders UCITS ETF, MSCI USA Small Cap ESG Leaders UCITS ETF, MSCI World ESG Leaders UCITS ETF, Factor MSCI World Minimum Volatility ESG Leaders UCITS ETF, MSCI USA Tech 125 ESG Universal UCITS ETF, MSCI USA NSL UCITS ETF and FTSE EPRA Nareit Developed Green UCITS ETF.

All payments to investors, including redemption proceeds, potential distributions, and other payments, may, upon request, be paid through the Administrator, Registrar and Transfer Agent.

As facility for investors in Germany:

- provides investors with information on how to place orders and how repurchase/redemption proceeds are paid,
- facilitates the handling of information and access to procedures and regulations relating to investors' rights (investor complaints),
- provides investors with relevant information in relation to the functions performed by the facilities in a durable medium.

Applications for the redemptions and conversion of shares in the Funds (the "Shares") may be sent to the facility for investors in Germany and are being forwarded to the company.

The Prospectus together with the above listed Supplements, the Key Investor Information Document (KIID), Packaged Retail and Insurance-based Investment Products (PRIIPs), the Memorandum of Association of the Company and the Annual and Semi-annual Reports are published on the Company's website www.ubs.com/etf, and may be obtained free of charge in hardcopy at the office of the facility in Germany during normal opening hours.

Information to the procedures and regulations relating to investors' rights (investor complaints) are published on the Company's website https://www.ubs.com/global/en/asset-management/investment-capabilities/white-labelling-solutions/fund-management-company-services/fml-procedures.html

The issue, redemption and conversion prices of the Shares will be published on the Company's website <a href="https://www.ubs.com/de/de/assetmanagement/funds/etf.html">https://www.ubs.com/de/de/assetmanagement/funds/etf.html</a> in German.

Additionally, any notices to shareholders will also be available, free of charge from the German Paying and Information Agent, and will be published on the Company's website www.ubs.com/etf.

Moreover, communication to investors in the Federal Republic of Germany by means of a durable medium (§167 KAGB), will be published in the following cases:

- suspension of the redemption of the shares,
- termination of the management of the fund or its liquidation,
- any amendments to the articles of incorporation which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the fund with one or more other funds, and
- change of the fund into a feeder fund or the modification of a master fund.

### Appendix 1 (unaudited)

### **Securities Financing Transactions Regulations**

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTR") requires reporting and disclosures for securities financing transactions ("SFTs") and total return swaps. SFTs are specifically defined as per Article 3(11) of the SFTR as follows:

- a repurchase/reverse repurchase agreement
- securities or commodities lending/borrowing
- a buy-sellback or sale-buyback transaction
- a margin lending transaction

During the financial year under review, certain Funds were engaged in the Company's security lending programme, as noted in Note 9 to the financial statements. This Appendix contains the relevant SFTR reporting and disclosure requirements in respect of the securities on loan, as of 31 December 2024, on these Funds as detailed below and the relevant pages overleaf.

The following table details the value of securities on loan as a proportion of the Fund's Net Asset Value, as at 31 December 2024.

					Securities
					on loan %

For all Funds, the maturity tenor of securities on loan is open, as these are equity positions and are not subject to a contractual maturity date.

The following tables detail the value of securities on loan and associated non-cash collateral received, analysed by Lending Borrowers (the counterparties), as at 31 December 2024. Please refer to Note 9 for further information on reuse of non-cash collateral received.

No cash is received as collateral in relation to securities lending activities as at 31 December 2024.

The values are disclosed in USD which is the base currency of the Company, and the currency in which the non-cash collateral is received.

### Appendix 2 (unaudited)

#### **Remuneration Policy of the Manager**

### **Background**

UBS Fund Management (Ireland) Limited (the "Manager") has been authorised by the Central Bank of Ireland ("CBI") as UCITS Management Company under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "Regulations"). The Manager is subject to the relevant articles of the Regulations dealing with remuneration, including the Guidelines on Sound Remuneration Policies under the UCITS Directive (the "Guidelines") published by the European Securities and Markets Authority (ESMA/2016/575).

The Manager is a wholly owned subsidiary of UBS AG and is part of the UBS group. The Manager has a remuneration policy in place which is consistent with the UBS group remuneration policy. The Manager's policy was developed by senior management of the Manager, reviewed by the Human Resources function of UBS and approved by the Manager's board of directors. A summary of the key aspects of the UBS group remuneration practices is described in the following paragraphs.

# **UBS Compensation Governance and Philosophy**

As determined in the Articles of Association and UBS's Organization Regulations, the UBS Group Compensation Committee supports the board of directors of UBS (the "BoD") in its duties to set guidelines on compensation and benefits, to oversee implementation thereof, to approve certain compensation and to scrutinize executive performance. The Compensation Committee consists of independent BoD members, who are elected annually by UBS shareholders at the Annual General Meeting (the AGM), and is responsible for governance and oversight of the UBS compensation process and practices. This includes the alignment between pay and performance, and ensuring that the compensation framework supports appropriate risk awareness and management, as well as appropriate risk-taking. In 2024, to additionally support the connection between the Compensation Committee and the Risk Committee, the Compensation Committee Chairperson was also a member of the Risk Committee. The Risk Committee, a committee of the BoD, works closely with the Compensation Committee with the goal of ensuring that the compensation framework appropriately reflects risk awareness and management, and supports appropriate risk-taking. It supervises and sets appropriate risk management and risk control principles and is regularly briefed on how risk is factored into the compensation process. It also monitors the involvement of Group Risk Control and Compliance and Operational Risk in compensation and reviews risk-related aspects of the compensation process.

All elements of pay are considered when making UBS compensation decisions. UBS regularly review its principles and compensation framework in order to remain competitive and aligned with stakeholders' interests. In 2024, the UBS compensation framework remained broadly unchanged. UBS will continue to review our approach to salaries and performance awards, considering market developments, our performance and our commitment to deliver sustainable returns to shareholders.

UBS's compensation reinforces and aligns with the firm's culture and strategy, fosters engagement among employees and aligns their long-term interests with those of clients and stakeholders. The compensation structure encourages employees to have a focus on risk management and behave consistently with the firm's risk framework and appetite, thereby anticipating and managing risks effectively to protect UBS's capital and reputation. Compensation is appropriately balanced between fixed and variable elements and delivered over an appropriate period to support UBS's growth ambitions and sustainable performance. Compensation for each employee is based on individual, team, business division and Group performance, within the context of the markets in which UBS operates. At UBS, a holistic Total Reward approach is applied, generally consisting of fixed compensation (base salary and role-based allowances, if applicable), performance awards, pension contributions and benefits. UBS's Total Reward approach is structured to support sustainable results and growth ambitions. The Total Reward Principles apply to all employees globally, but may vary in certain locations due to local legal requirements, regulations and practices.

UBS's compensation philosophy focuses on balancing performance with appropriate risk-taking, retaining talented employees and shareholder returns. Its overall performance award pool funding percentage reduces as financial performance increases. In years of strong financial performance, this prevents excessive compensation and results in an increased proportion of profit before performance awards being available for distribution to shareholders or growing the Group's capital. In years where performance declines, the performance award pool will generally decrease; however, the funding percentage may increase. UBS's performance award pool funding framework is based on Group and business division performance, including achievements against defined performance measures. In assessing performance, UBS consider relative performance versus peers, market competitiveness of its pay position, as well as progress against strategic and integration objectives, including returns, risk-weighted assets and cost efficiency.

The Risk and Compliance functions support UBS's holistic reflection and consideration of the financial and non-financial impact (including reputation) of risk matters. UBS further considers the firm's risk profile and culture, the extent to which operational risks and audit issues have been identified and resolved, and the success of risk reduction initiatives including accountability for significant events. The funding for Group Functions is linked to overall Group performance and reflects

headcount, workforce location and demographics. For each functional area, quantitative and qualitative assessments evaluate service quality, risk management and financial achievements.

UBS's decisions regarding the performance award pool also balance consideration of financial performance with a range of factors, including the impact of litigation, regulatory costs, the effect of changes in financial accounting standards, capital returns and relative total shareholder return.

### **UBS Material Risk Takers and Key Risk Takers**

For relevant EU- or UK-regulated entities, UBS identifies individuals who are deemed to be Material Risk Takers (MRTs) based on sectorial and / or local regulatory requirements, including the respective EU Commission Delegated Regulation, the fifth iteration of the EU Capital Requirements Directive (CRD V) and equivalent UK requirements, as applicable. This group consists of senior management, risk takers, selected staff in control or support functions and certain highly compensated employees. For 2024, UBS identified 1,274 MRTs in relation to its relevant EU or UK entities. Subject to individual or legal-entity level proportionality considerations, variable compensation awarded to MRTs is subject to additional deferral and other requirements. For CRD-relevant entities, these include a minimum deferral rate of 40% or 60% (depending on role / variable compensation level) on performance awards and delivery of at least 50% of any upfront performance award in UBS shares that are vested but blocked for 12 months after grant. Deferred awards granted to MRTs under UBS's deferred compensation plans for their performance in 2024 are subject to 6- or 12-month blocking periods post vesting and do not pay out dividends or interest during the deferral period. Additionally, MRTs are subject to a maximum ratio between fixed and variable pay. Across EU locations, the maximum variable to fixed compensation ratio is set to 200%, based on approval through relevant shareholder votes. For UK-regulated MRTs, the maximum ratio was set by UBS taking into account the business activities and prudential and conduct risks of the relevant legal entities. In addition, the maximum ratios were set considering the scenario that the relevant legal entities might exceed their financial objectives, and to align with the ratios applicable for GEB members on a communicated value basis. The maximum ratio for all UK-regulated MRTs was approved by the compensation committees of the relevant entities. For up to seven years after grant, performance awards granted to MRTs are subject to clawback provisions, which allow UBS to claim repayment of both the upfront and the vested deferred element of any performance award if an individual is found to have contributed substantially to significant financial losses for the UBS Group or UBS corporate structure in scope, a material downward restatement of disclosed results, or engaged in misconduct and / or failed to take expected actions, thus contributing to significant reputational harm.

Key Risk Takers (KRTs) are defined as those employees that, by the nature of their roles, have been determined to materially set, commit or control significant amounts of the firm's resources and / or exert significant influence over its risk profile. This includes employees working in front-office roles, logistics and control functions. Identifying KRTs globally is part of our risk control framework and an important element in ensuring we incentivize only appropriate risk-taking. For 2024, in addition to GEB members, 835 employees were classified as KRTs throughout the UBS Group globally, including all employees with a total compensation exceeding USD / CHF 2.5m (Highly Paid Employees), who may not have been identified as KRTs during the performance year. In line with regulatory requirements, the performance of employees identified as KRTs during the performance year is evaluated by the control functions. In addition, KRTs' performance awards are subject to a mandatory deferral rate of at least 50%, regardless of whether the deferral threshold has been met (excluding KRTs with de minimis performance awards below a predetermined threshold where standard deferral rates apply). Consistent with all other employees, the deferred portion of a KRT's compensation is also subject to forfeiture or reduction if the KRT commits harmful acts.

### **UBS Fixed compensation**

Employees' fixed compensation (e.g., base salary) reflects their level of skill, role and experience, as well as local market practice. Base salaries are usually paid monthly or fortnightly, in line with local market practice. UBS offers competitive base salaries that reflect location, function and role. Salary increases generally consider promotions, skill set, performance and overall responsibility. In addition to base salary, and as part of fixed compensation, some employees may receive a role-based allowance. This allowance is a shift in the compensation mix between fixed and variable compensation, not an increase in total compensation. It reflects the market value of a specific role and is fixed, nonforfeitable compensation. Unlike salary, a role-based allowance is paid only if the employee is in a specific role. Similar to previous years, 2024 role-based allowances consisted of a cash portion and, where applicable, a blocked UBS share award

UBS provides a range of benefit plans, such as retirement benefits and health insurance, aiming to provide financial protection in case of significant life events, and support its employees' well-being and diverse needs. Retirement and other benefits are set in the context of local market practice and regularly reviewed for competitiveness. Pension plan rules in any one location are generally the same for all employees, including GEB members and other management. There are no enhanced or supplementary pension contributions for the GEB.

### **UBS Variable compensation**

Most of UBS's employees are eligible for an annual performance award. The level of this award, where applicable, generally depends on the firm's overall performance, the employee's business division, team and individual performance, and

behaviour, reflecting their overall contribution to the firm's results. These awards are in line with applicable local employment conditions and at the discretion of the firm.

In addition to the firm's Pillars (capital strength, simplification/ efficiency and risk management) and Principles (client centricity, connectivity, sustainable impact), Behaviours related to accountability with integrity, collaboration and innovation are part of the performance management approach. Therefore, when assessing performance, UBS considers not only what was achieved but also how it was achieved.

Underlining UBS's emphasis on sustainable performance and risk management, and its focus on achieving its growth ambitions, UBS delivers part of the employees' annual variable compensation through deferred compensation plans. UBS believes that its approach, with a single incentive decision and a mandatory deferral, is transparent and well suited to implementing its compensation philosophy and delivering sustainable performance. This aligns the interests of its employees and shareholders and appropriately links compensation to longer-term sustainable performance.

Deferred compensation is delivered through a combination of equity-based plans and a contingent capital plan. The equity-based plans are (i) the Long-Term Incentive Plan (LTIP) which is for UBS's GEB members, and (ii) the Equity Ownership Plan (EOP), which is for all other employees and which primarily aligns employee interest with those of UBS's shareholders. The Deferred Contingent Capital Plan (DCCP) aligns employees' interests with the interests of debt holders.

The mandatory deferral approach applies to all employees with regulatory-driven deferral requirements or total compensation greater than USD / CHF 300,000. Certain regulated employees, such as Senior Management Functions (SMFs) and Material Risk Takers (MRTs), are subject to additional requirements (e.g., more stringent deferral requirements, additional blocking periods). In addition, SMFs and MRTs receive 50% of their non-deferred portion in the form of immediately vested shares, which are blocked for 12 months after grant.

The deferred amount increases at higher marginal rates in line with the value of the performance award. The effective deferral rate therefore depends on the amount of the performance award and the amount of total compensation. UBS believes its deferral regime has one of the longest vesting periods in the industry. The weighted average deferral period for nonregulated employees is 4.4 years for GEB members, 3.8 years for MDs receiving Long Term Incentive Plan ("LTIP") and 3.5 years for other employees. Additionally, from time to time, UBS may utilize alternative deferred compensation arrangements to remain competitive in specific business areas. To further promote sustainable performance, all of UBS's deferred compensation plans include employment conditions and malus conditions. These enable the firm to reduce or fully forfeit unvested deferred awards under certain circumstances. pursuant to performance and harmful acts provisions. In addition, forfeiture is triggered in cases where employment has

been terminated for cause. UBS's share delivery obligations related to notional share awards are satisfied by delivering treasury shares, which are purchased in the market, to employees at vesting.

The Equity Ownership Plan (the "EOP") is the deferred compensation plan for employees that are subject to deferral requirements but do not receive LTIP awards. For the 2024 performance year, we granted EOP awards to 4,123 employees. Delivering sustainable results is a key objective for UBS. EOP creates a direct link with shareholder returns as a notional equity award and has no upward leverage. This approach promotes growth and sustainable performance. EOP awards generally vest over three years.

The Deferred Contingent Capital Plan ("DCCP") is a key component of UBS's compensation framework and supports alignment of the interests of senior employees with those of UBS's stakeholders. All employees subject to deferral requirements receive DCCP awards. For the 2024 performance year, UBS granted DCCP awards to 5,359 employees. DCCP is consistent with many of the features of the loss-absorbing bonds that UBS issues to investors and may be paid at vesting in cash or, at the discretion of the firm, a perpetual, marketable additional tier 1 (AT1) capital instrument. Employees can elect to have their DCCP awards denominated in Swiss francs or US dollars. DCCP awards vest in full after five years (longer deferral periods may apply for regulated employees). DCCP awards bear notional interest paid annually (except as limited by regulation for MRTs), subject to review and confirmation by the Compensation Committee. The notional interest rate for grants in 2025 was 2.70% for awards denominated in Swiss francs and 7.05% for awards denominated in US dollars. These interest rates are based on the current market rates for similar AT1 capital instruments issued by UBS Group. Awards are forfeited if a viability event occurs, i.e., if FINMA notifies the firm that the DCCP awards must be written down to mitigate the risk of an insolvency, bankruptcy or failure of UBS or if the firm receives a commitment of extraordinary support from the public sector that is necessary to prevent such an event. DCCP awards are also written down for GEB members if the Group's CET1 capital ratio falls below 10% and for all other employees if it falls below 7%.

#### **UBS Control Functions**

UBS control functions must be independent in order to monitor risk effectively. Therefore, their compensation is determined separately from the revenue areas that they oversee, supervise or monitor. Their performance award pool is based not on the performance of these businesses, but on the performance of the Group as a whole. UBS also considers other factors, such as how effectively the function has performed, and UBS's market position. Decisions on individual compensation for the senior managers of the control functions are made by the function heads and approved by the Group CEO. Decisions on individual compensation for the members of Group Internal Audit (GIA)

are made by the Head GIA and approved by the Chairman. Following a proposal by the Chairman, total compensation for the Head GIA is approved by the Compensation Committee.

### UBS's commitment to pay fairness, diversity, equity and inclusion

Pay equity and equal opportunity are fundamental to achieving UBS's strategy. The diversity of UBS's employees in terms of experiences, perspectives and backgrounds is critical to UBS's success. Factors such as gender, race, ethnicity or part-time status should not impact opportunities available to UBS employees. Fair and consistent pay practices are designed to ensure that employees are appropriately rewarded for their contribution. UBS pay for performance, and it takes pay equity seriously. UBS have embedded clear commitments in our global compensation policies and practices. UBS annually review our approach and policies, in line with established equal pay methodologies, to support our continuous improvement. As part of UBS's commitment to equal pay. UBS regularly conduct internal reviews on pay equity, and the UBS statistical analyses show a differential between male and female employees in similar roles across our core financial hubs of less than 1%. If UBS finds any gaps not explained by business or by appropriate employee factors, such as role, responsibility, experience, performance or location, UBS looks at the root causes and addresses them. UBS also aim to ensure that all employees are paid at least a living wage. UBS regularly assess employees' salaries against local living wages, using benchmarks defined by the Fair Wage Network. The UBS analysis in 2024 showed that employees' salaries were at or above the respective benchmarks.

#### **Further information**

Further details on the UBS policy and practices can be found in the 2024 Compensation Report and the 2024 Annual Report of UBS Group AG, both of which are available on www.ubs.com.

### **Proportionality**

Given the small size and non-complex nature of the Manager, it has applied the proportionality provisions of the Guidelines. The below information provides the total remuneration paid by the

Manager during the year to 31 December 2024. There is no allocation made by the Manager to each UCITS and as such the disclosure reflects the remuneration paid by the Manager in relation to work performed on all UCITS, as well as the remuneration paid by the Manager in relation to work performed on non-UCITS (e.g. AIF funds).

Of the total remuneration paid of EUR 2,904,548 for the year ended 31 December 2024 to 24 beneficiaries, EUR 2,441,505 (84%) has been paid as fixed remuneration. The remainder (16%) is variable remuneration. Remuneration code staff consists of those whom the Manager has determined undertake professional activities which have a material impact on the risk profiles of the Manager or of the AIFs, namely the board of directors of the Manager, senior management, material risk takers, control function staff, as well as highearning staff members (i.e. whose total remuneration falls into the remuneration bracket of senior managers and risk takers who are not already in the above categories and who have a material impact on the risk profile of the Company or of the funds it manages). There are 16 individuals who meet this definition and their total remuneration was EUR 2,218,719, split EUR 1,839,335 (83%) as fixed remuneration and the remainder (17%) as variable remuneration.

### Remuneration of delegates staff

As market or regulatory practice develops UBS AM may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other UBS fund disclosures in that same year.

For the year ending 31 December 2024 (last available information), the aggregate total remuneration paid by all delegated Investment Managers to their Identified Staffs in relation to the Fund amounted to EUR 162,585 of which EUR 109,720 represented the variable remuneration (4 beneficiaries).

### Appendix 3 (unaudited)

### **Schedule of Significant Portfolio Changes**

The following Schedule of Significant Portfolio Changes reflect the aggregate purchases of a security exceeding 1% of the total value of purchases and aggregate disposals greater than 1% of the total sales in the financial period. At a minimum the largest 20 purchases and sales are required to be disclosed, if applicable.

#### **Facilities for Retail investors**

The Prospectus, the Fund's constitutive documents, the Key Investor Information Documents (KIIDs), Packaged Retail and Insurance-based Investment Products (PRIIPs), where applicable, as well as financial statements are available for the purpose of inspection and obtaining copies thereof at www.ubs.com/etf.

In accordance with Directive (EU) 2019/1160, we hereby confirm that the following tasks are performed electronically and available to all retail investors located in all host member states where a fund managed by UBS Fund Management (Ireland) Limited, acting as management company or AIFM is marketed. In case you would need any assistance or information on the below tasks, you can contact us through the following email address: sh-ubsfacilities@ubs.com

- a) process subscription, repurchase and redemption orders and make other payments to investors relating to the shares/units of a fund managed by UBS Fund Management (Ireland) Limited in accordance with the fund's constitutive documents;
- b) information on how orders referred to in point a) can be made and how repurchase and redemption proceeds are paid;
- c) procedures and arrangements referred to in Article 15 of Directive 2009/65/EC relating to the investors' exercise of their rights arising from their investment in the UCITS in the Member State where the UCITS ismarketed, or handling of information relating to the exercise of their investors' rights arising from your investment in the AIF in the Member State where the AIF is marketed.

For further information on the above tasks, please access the following link: https://www.ubs.com/global/en/assetmanagement/fund-management-companies/fmie.html

# **Appendix 5 (unaudited)**

#### Sustainable Finance Disclosure Regulation ("SFDR")

**ESG** is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors is available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

**MSCI ESG scores** are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

Weighted Average Carbon Intensity (tons CO2e /USDm sales): The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes, including fixed income, as it is not based on equity ownership basis. It is the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research.

**Passive ESG**: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial and ESG objectives of the fund. For passively managed strategies, an ESG benchmark would be selected for the purpose of balancing between reasonable tracking error and high ESG alignment. In order to assess the magnitude of ESG improvements, the fund's ESG performance is also shown against a selected broad market index which closely represents the parent investment universe on which the ESG benchmark is based on.

**Principal adverse impacts (the "PAI")** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

The sustainability indicators in the annexes like the MSCI ESG Score or the Carbon Intensity (1, 2) emissions indicator for the portfolio, the reference index and the broad market index are calculated as an annual average.

As at 31 December 2024 the following Funds have been classified as Article 6:

MSCI USA UCITS ETF
MSCI USA Value UCITS ETF
MSCI World UCITS ETF
S&P 500 UCITS ETF

Factor MSCI USA Low Volatility UCITS ETF
MSCI USA Select Factor Mix UCITS ETF
MSCI USA NSL UCITS ETF

The investments underlying these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities.

These sub-funds do not consider principal adverse impacts on sustainability factors due to its investment strategy and the nature of the underlying investments.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS (Irl) ETF plc – S&P Dividend Aristocrats ESG Elite UCITS ETF

Legal entity identifier: 5493003RY65R3GU0MH74

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	••	<b>≭</b> No
investments with an environmental objective: _ in economic activities qualify as environmental sustainable under the Taxonomy in economic activities not qualify as environ sustainable under the Taxonomy	that itally EU that do mentally	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.25% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable inves with a social objective:		It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 10.86% higher than that of the parent benchmark (S&P Developed BMI Index Index) (7.45 vs 6.72).

A combined weighted Scope 1 and 2 average carbon intensity was 39.67% lower than that of the parent benchmark (S&P Developed BMI Index Index) (61.36 vs 101.70).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 3.62% percent higher as per 31 December 2024 vs 31 December 2023. (7.45 vs 7.19)

The combined Scope 1 and 2 average carbon intensity was 28.98% lower as per 31 December 2024 vs 31 December 2023. (61.36 vs 86.40)

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 2.27% percent higher as per 31 December 2023 vs 31 December 2022. (7.19 vs 7.03)

The combined Scope 1 and 2 average carbon intensity was 12.2% lower as per 31 December 2023 vs 31 December 2022. (86.40 vs 98.41)

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
HIGHWOODS PROPERTIES	Real estate	3.44	United States
VERIZON	<b>Communication Services</b>	2.61	<b>United States</b>
LG UPLUS CORP	Communication Services	2.10	N/A
TRINITY INDUSTRIES	Industrials	1.90	<b>United States</b>
BXP INC REIT USD.01	Real estate	1.87	<b>United States</b>

LIXIL CORP	Industrials	1.41	Japan
TAKEDA PHARMACEUTICAL	Health Care	1.38	Japan

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.92%. The proportion of sustainable investments of the financial product was 69.25%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

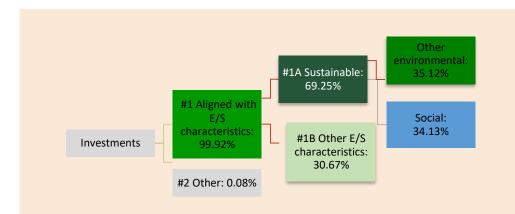

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial

make a substantial contribution to an environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

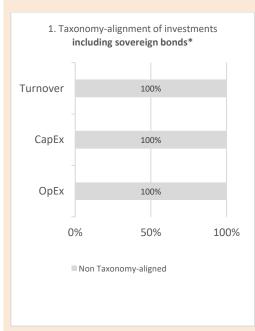

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

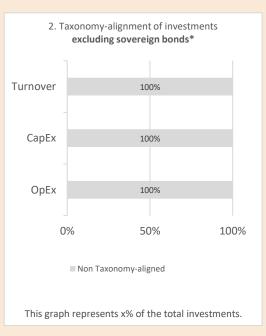

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

#### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 34.13%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The Index is an equity index calculated, maintained and published by international index supplier S&P Dow Jones Indices and is denominated in USD. It tracks the movements large and mid capitalisation companies across developed markets.

The index measures the performance of high dividend yielding / ESG-scoring companies that meet sustainability criteria as defined in this methodology, and meet the eligibility criteria defined in the S&P Developed Dividend Aristocrats® Index. Constituents are selected from eligible companies in the S&P Developed Broad Market Index (BMI) that have followed a managed-dividends policy of increasing or maintaining dividends for at least 10 consecutive years. Constituents are weighted by indicated dividend yield.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (S&P Developed ESG Dividend Aristocrats Total Return Net) (7.45 vs.7.45).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% higher than that of the reference benchmark (S&P Developed ESG Dividend Aristocrats Total Return Net) (61.36 vs 61.32).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (S&P Developed ESG Dividend Aristocrats Total Return Net) (7.45 vs 7.45).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% higher than that of the reference benchmark (S&P Developed ESG Dividend Aristocrats Total Return Net) (61.36 vs 61.32).

How did this financial product perform compared with the broad market index?` The ESG Score was 10.86% higher than that of the parent benchmark (S&P Developed BMI Index Index) (7.45 vs 6.72).

A combined weighted Scope 1 and 2 average carbon intensity was 39.67% lower than that of the parent benchmark (S&P Developed BMI Index Index) (61.36 vs 101.70).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier: 549300JOBFG0F06QXM93

UBS (Irl) ETF plc – MSCI United Kingdom IMI Socially Responsible UCITS ETF

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
• • Yes	• No	
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 86.87% of sustainable investments</li> <li>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul>	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 5.94% higher than that of the parent benchmark (MSCI UK IMI Index) (8.21 vs. 7.75).

A combined weighted Scope 1 and 2 average carbon intensity was 67.18% lower than that of the parent benchmark (MSCI UK IMI Extended Index) (28.58 vs. 87.08).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.97% percent lower as per 31 December 2024 vs 31 December 2023. (8.21 vs 8.17)

The combined Scope 1 and 2 average carbon intensity was 23.52% higher as per 31 December 2024 vs 31 December 2023. (28.58 vs 41.33)

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI United Kingdom IMI Extended SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd14

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

<sup>\*\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.99%. The proportion of sustainable investments of the financial product was 86.87%.

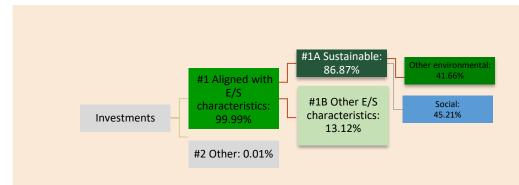

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- expenditure
  (OpEx) reflecting
  green operational
  activities of
  investee
  companies.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

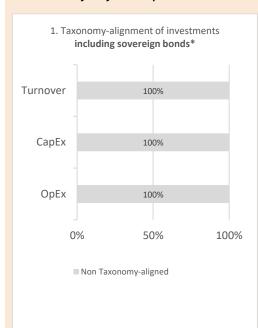

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

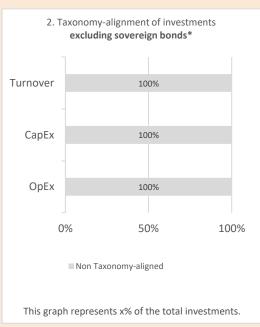

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 45.21%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

## How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in GBP. It tracks the total return net dividend performance of small, mid and large capitalisation companies of the United Kingdom market.

The Index is a benchmark for investors seeking exposure to best-in-class ESG United Kingdom companies while avoiding products whose social or environmental impact is considered to be negative by investors.

The Index is part of the MSCI Global Socially Responsible (SRI) Index series. The constituent selection is made from the principal index, being the MSCI UK IMI Index (the "Parent Index").

# How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI United Kingdom IMI Extended SRI Low Carbon Select 5% Issuer Capped Total Return Index) (8.21 vs 8.21).

A combined weighted Scope 1 and 2 average carbon intensity was 0.10% lower than that of the reference benchmark (MSCI United Kingdom IMI Extended SRI Low Carbon Select 5% Issuer Capped Total Return Index) (28.58 vs 28.61).

# How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI United Kingdom IMI Extended SRI Low Carbon Select 5% Issuer Capped Total Return Index) (8.21 vs 8.21).

A combined weighted Scope 1 and 2 average carbon intensity was 0.10% lower than that of the reference benchmark (MSCI United Kingdom IMI Extended SRI Low Carbon Select 5% Issuer Capped Total Return Index) (28.58 vs 28.61).

### How did this financial product perform compared with the broad market index?`

The ESG Score was 5.94% higher than that of the parent benchmark (MSCI UK IMI Index) (8.21 vs 7.75).

A combined weighted Scope 1 and 2 average carbon intensity was 67.18% lower than that of the parent benchmark (MSCI UK IMI Index) (28.58 vs 87.08).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.95% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 18.51% higher than that of the parent benchmark (MSCI USA Index) (7.81 vs 6.59).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 46.81% lower than that of the parent benchmark (MSCI USA Index) (50.16 vs 94.31).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

# ...and compared to previous periods?

### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.76% lower as per 31 December 2024 vs 31 December 2023. (7.81 vs. 7.87)

The combined Scope 1 and 2 average carbon intensity was 17.24% lower as per 31 December 2024 vs 31 December 2023. (50.16 vs 60.61)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.

The Index incorporates the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from sustainability indices. The

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

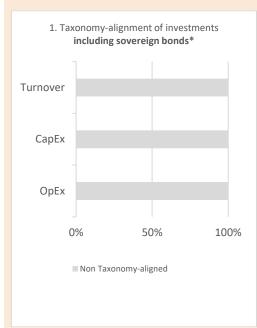

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

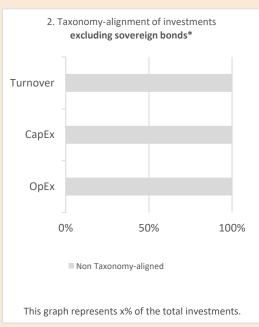

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 31.59%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

# How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI USA Prime Value ESG Low Carbon Select Index Net Return Index) (7.81 vs 7.81).

A combined weighted Scope 1 and 2 average carbon intensity was 0.02% higher than that of the reference benchmark (MSCI USA Prime Value ESG Low Carbon Select Index Net Return Index) (50.16 vs 50.15).

# How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI USA Prime Value ESG Low Carbon Select Index Net Return Index) (7.81 vs 7.81).

A combined weighted Scope 1 and 2 average carbon intensity was 0.02% higher than that of the reference benchmark (MSCI USA Prime Value ESG Low Carbon Select Index Net Return Index) (50.16 vs 50.15).

# How did this financial product perform compared with the broad market index?`

The ESG Score was 18.51% higher than that of the parent benchmark (MSCI USA Index) (7.81 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 46.81% lower than that of the parent benchmark (MSCI USA Index) (50.16 vs 94.31).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

UBS (Irl) ETF plc – Factor MSCI USA Quality ESG UCITS ETF

Legal entity identifier: 5493006WI0CPCH5X3423

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72.24% of sustainable investments</li> <li>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul>			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

**investment** means an investment in an economic activity

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 19.88% higher than that of the parent benchmark (MSCI USA Index) (7.90 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 77.30% lower than that of the parent benchmark (MSCI USA Index) (21.41 vs 94.30).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

# ...and compared to previous periods?

## 2024/2023:

The ESG Score (MSCI ESG Score) was 1.00% lower as per 31 December 2024 vs 31 December 2023. (7.90 vs 7.98)

The combined Scope 1 and 2 average carbon intensity was 22.68% lower as per 31 December 2024 vs 31 December 2023. (21.41 vs 27.69)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

# What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

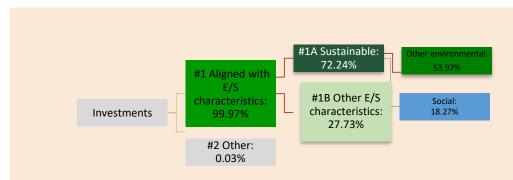

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.97%. The proportion of sustainable investments of the financial product was 72.24%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

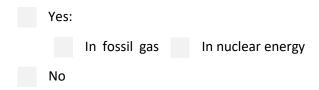

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

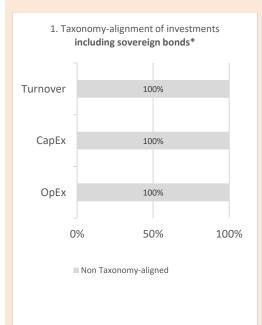

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

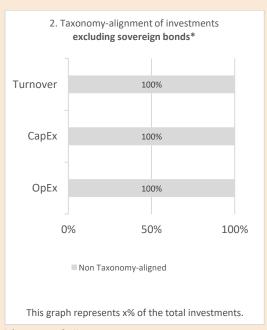

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 18.27%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

# How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI USA Quality ESG Low Carbon Select Index Net Return Index) (7.90 vs 7.90).

A combined weighted Scope 1 and 2 average carbon intensity was 0.33% higher than that of the reference benchmark (MSCI USA Quality ESG Low Carbon Select Index Net Return Index) (21.41 vs 21.34).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI USA Quality ESG Low Carbon Select Index Net Return Index) (7.90 vs 7.90).

A combined weighted Scope 1 and 2 average carbon intensity was 0.33% higher than that of the reference benchmark (MSCI USA Quality ESG Low Carbon Select Index Net Return Index) (21.41 vs 21.34).

How did this financial product perform compared with the broad market index?`

The ESG Score was 19.88% higher than that of the parent benchmark (MSCI USA Index) (7.90 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 77.30% lower than that of the parent benchmark (MSCI USA Index) (21.41 vs 94.30).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes		••	<b>*</b> N	No
qualify as en sustainable u Taxonomy in economic	activities that vironmentally activities that but activities that do activities that do activities that do activities that do	activities that qualify as environmenta sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify		did not have as its objective a sustainable and, it had a proportion of 69.46 % of able investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%				with a social objective noted E/S characteristics, but did not any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 6.34% higher than that of the parent benchmark (MSCI ACWI Index)) (7.21 vs 6.78).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 54.47% lower than that of the parent benchmark (MSCI ACWI Index) (54.75 vs 120.25).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

# ...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 0.70% higher as per 31 December 2024 vs 31 December 2023. (7.21 vs 7.16)

The combined Scope 1 and 2 average carbon intensity was 16.79% lower as per 31 December 2024 vs 31 December 2023. (54.75 vs 65.80)

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The MSCI ACWI ESG Universal Low Carbon Select Index aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	● ○ × No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 81.26% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 10.16% higher than that of the parent benchmark (MSCI World Index) (7.59 vs 6.89).

The Board Diversity - Percentage of Women, which was used as Gender Diversity Board Score, was 1.28% higher than that of the parent benchmark (MSCI World Index) (36.46% vs 36.00%).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods

### 2024/2023:

The ESG Score (MSCI ESG Score) was 1.56% percent lower as per 31 December 2024 vs 31 December 2023. (7.59 vs 7.71).

The Board Diversity - Percentage of Women was 12.25% percent lower as per 31 December 2024 vs 31 December 2023. (36.46% vs 41.55%).

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The Solactive Equileap Global Gender Equality 100 Leaders Index is designed to represent the performance of the top companies leading the field in terms of gender equality internationally.

For each security in the universe a score based on 19 gender criteria will be assigned. The 19 criteria are grouped in 4 categories listed below:

- gender balance in leadership & workforce
- equal compensation & work life balance
- policies promoting gender equality
- commitment to transparency and accountability

If several companies have the same Equileap Score, they are sorted according to their market capitalization.

For the Index, the top 100 companies are selected, ensuring an equal weight expo-sure to US listed companies and non-US listed companies. The Index is equally weighted, rebalanced annually and reviewed quarterly.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Index incorporates the norms-based screening by excluding companies with verified infringement of established international initiatives and guidelines (such as UN Principles and OECD Guidelines).

ISS ESG is designed to provide timely and consistent assessments of companies' adherence to international norms on human rights, labor standards, environmental protection and anti-corruption set out in the UN Global Compact and OECD Guidelines. The financial product exclude investments in companies involved directly or indirectly in Coal Mining and Power Generation, Hydraulic Fracturing, Oil & Sands as well as any involvement in Deep Water Drilling, Nuclear Energy, Adult Entertainment, Alcohol, Tobacco, Gambling, Military Equipment, Anti-personnel Mines, Biological and Chemical Weapons, Cluster Munitions, Depleted Uranium as well as Nuclear Weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

ISS ESG tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

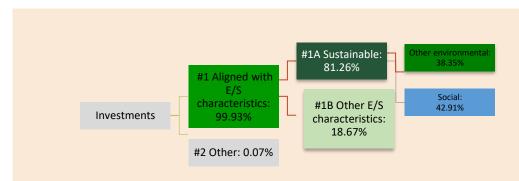

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

# What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.93%. The proportion of sustainable investments of the financial product was 81.26%.

### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

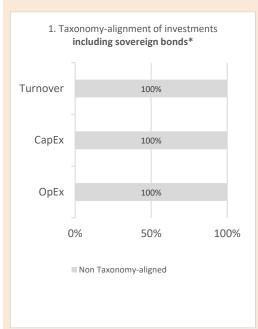

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

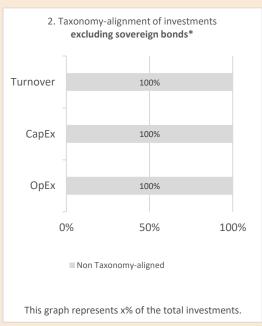

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 42.91%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

# How did this financial product perform compared to the reference benchmark?

# How does the reference benchmark differ from a broad market index?

The Solactive Equileap Global Gender Equality 100 Leaders Index is an equity index denominated in USD, maintained and published by international index supplier Solactive. Equileap, a leading expert in gender equality research, provides the gender-related data on companies on which Solactive then applies liquidity screenings to get to the final index composition while meeting the country, sector and issuer constraints. The Index tracks the movements of global companies which have the best Equileap gender diversity score. The Equileap gender diversity score is a ranking of companies based on their aggregated score in a number of gender equality criteria such as leadership, compensation, work-life balance, health and safety, paid family leave, marketing and transparency.

The stocks comprising the Index are screened by liquidity and gender diversity score.

100% of the securities have a leading Equileap gender diversity score.

# How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (Solactive Equileap Global Gender Equality 100 Leaders Net Total Return Index) (7.59 vs 7.59).

The Board Diversity - Percentage of Women, which was used as Gender Diversity Board Score, was equal that of the reference benchmark (Solactive Equileap Global Gender Equality 100 Leaders Net Total Return Index) (36.46 vs 36.46).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (Solactive Equileap Global Gender Equality 100 Leaders Net Total Return Index) (7.59 vs 7.59).

The Board Diversity - Percentage of Women, which was used as Gender Diversity Board Score, was equal that of the reference benchmark (Solactive Equileap Global Gender Equality 100 Leaders Net Total Return Index) (36.46 vs 36.46).

### How did this financial product perform compared with the broad market index?`

The ESG Score was 10.16% higher than that of the parent benchmark (MSCI World Index) (7.59 vs 6.89).

The Board Diversity - Percentage of Women, which was used as Gender Diversity Board Score, was 1.28% higher than that of the parent benchmark (MSCI World Index) (36.46 vs 36.00).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** UBS (Irl) ETF plc – MSCI ACWI Socially Responsible UCITS ETF

**Legal entity identifier:** 549300WIJFZSNB3QD276

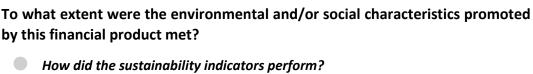

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.49% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not make any sustainable investments</b>		

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 22.12% higher than that of the parent benchmark (MSCI ACWI Index) (8.28 vs 6.78).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 70.56% lower than that of the parent benchmark (MSCI ACWI Index) (35.40 vs 120.25).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods

The ESG Score (MSCI ESG Score) was 1.10% percent higher as per 31 December 2024 vs 31 December 2023. (8.28 vs 8.19)

The combined Scope 1 and 2 average carbon intensity was 10.22% lower as per 31 December 2024 vs 31 December 2023. (35.40 vs 39.43)

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI ACWI SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd12

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

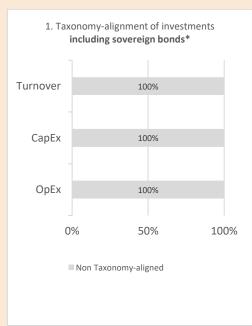

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

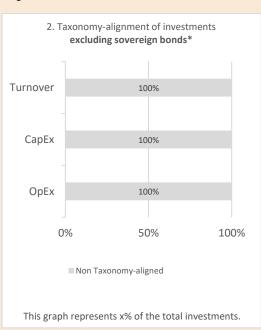

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 29.10%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. The Index is market cap weighted and tracks the total return net dividend performance of large and mid-capitalisation companies worldwide containing 23 developed markets and 24 emerging markets countries.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with DM 100% hedged to USD Total Return Net) (8.28 vs 8.28).

A combined weighted Scope 1 and 2 average carbon intensity was 0.14% higher than that of the reference benchmark (MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with DM 100% hedged to USD Total Return Net) (35.40 vs 35.35).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with DM 100% hedged to USD Total Return Net) (8.28 vs 8.28).

A combined weighted Scope 1 and 2 average carbon intensity was 0.14% higher than that of the reference benchmark (MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with DM 100% hedged to USD Total Return Net) (35.40 vs 35.35).

### How did this financial product perform compared with the broad market index?`

The ESG Score was 22.12% higher than that of the parent benchmark (MSCI ACWI Index) (8.28 vs 6.78).

A combined weighted Scope 1 and 2 average carbon intensity was 70.56% lower than that of the parent benchmark (MSCI ACWI Index) (35.40 vs 120.25).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ANNEX IV

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.65% of sustainable investments</li> <li>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul>			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

investment means

an investment in an economic activity

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 4.68% higher than that of the parent benchmark (S&P 500 Index) (6.94 vs 6.63).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 28.46% lower than that of the parent benchmark (S&P 500 Index) (69.27 vs 96.83).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.87% percent higher as per 31 December 2024 vs 31 December 2023. (6.94 vs 6.88)

The combined Scope 1 and 2 average carbon intensity was 19.83% lower as per 31 December 2024 vs 31 December 2023. (69.27 vs 86.40)

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 1.92% percent higher as per 31 December 2023 vs 31 December 2022. (6.88 vs 6.75)

The combined Scope 1 and 2 average carbon intensity was 20.9% lower as per 31 December 2023 vs 31 December 2022. (86.40 vs 109.02)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and

Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands and Small Arms.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands and Small Arms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

The list includes the

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.83%. The proportion of sustainable investments of the financial product was 71.65%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#### **Asset allocation** describes the environmental: #1A Sustainable: share of 71.65% investments in #1 Aligned with specific assets. F/S Social: characteristics: #1B Other E/S 19.93% Investments 99.83% characteristics: 28.18% To comply with the #2 Other: 0.17% EU Taxonomy, the

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

criteria for **fossil gas** include limitations

criteria include comprehensive safety and waste management rules.

### **Enabling activities** directly enable

other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

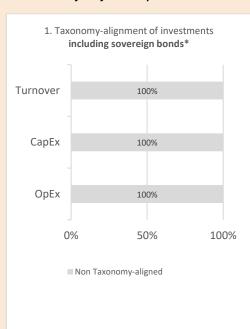

Taxonomy-aligned activities are expressed as a share of:

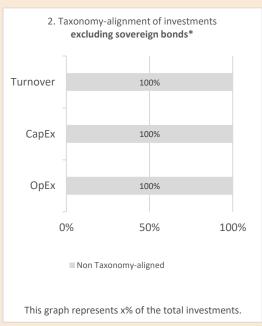

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 19.93%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the S&P 500 Index (the "Parent Index"). The Index is composed as follows:

- 1. starting with the Parent Index, the indices select from all constituents of the underlying index, with the exception of some companies which are deemed ineligible. These companies either:
- a. do not have an ESG score;
- b. are engaged in the production and/or sale of tobacco;
- c. are engaged in the business of controversial weapons;
- d. are within the bottom segment of a United Nations Global Compact score ranking; or
- e. are in the worst 25% of companies by ESG score, within each global industry group.
- 2. It is the target 25% of the market capitalisation of the original index using ESG score as the defining characteristic. The final index is market capitalisation weighted and sector neutral to its parent index (the S&P 500).
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (S&P 500 ESG Index (Net Return)) (6.94 vs 6.94).

A combined weighted Scope 1 and 2 average carbon intensity was 0.09% lower than that of the reference benchmark (S&P 500 ESG Index (Net Return)) (69.27 vs 69.33).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (S&P 500 ESG Index (Net Return)) (6.94 vs 6.94).

A combined weighted Scope 1 and 2 average carbon intensity was 0.09% lower than that of the reference benchmark (S&P 500 ESG Index (Net Return)) (69.27 vs 69.33).

How did this financial product perform compared with the broad market index?` The ESG Score was 4.68% higher than that of the parent benchmark (S&P 500 Index) (6.94 vs 6.63).

A combined weighted Scope 1 and 2 average carbon intensity was 28.48% lower than that of the parent benchmark (S&P 500 Index) (69.27 vs. 96.83).

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** UBS (IrI) ETF plc – MSCI World Socially Responsible UCITS ETF

**Legal entity identifier:** 549300NWCJVIIQ1DHR33

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● No			
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.83% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially.

list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 20.32% higher than that of the parent benchmark (MSCI World Index) (8.29 vs 6.89).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 73.17% lower than that of the parent benchmark (MSCI World Index) (26.00 vs 96.90).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.48% higher as per 31 December 2024 vs 31 December 2023 (8.29 vs 8.25).

The combined Scope 1 and 2 average carbon intensity was 17.36% lower as per 31 December 2024 vs 31 December 2023 (26.00 vs 31.46).

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 0.61% percent higher as per 31 December 2023 vs 31 December 2022. (8.25 vs 8.20)

The combined Scope 1 and 2 average carbon intensity was 11.22% lower as per 31 December 2023 vs 31 December 2022. (31.19 vs 35.13)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI World SRI Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversi es+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.45% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

Sustainable

**investment** means an investment in an

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 21.40% higher than that of the parent benchmark (MSCI USA Index) (8.00 vs 6.59).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 75.41% lower than that of the parent benchmark (MSCI USA Index) (23.79 vs 96.74).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.87% lower as per 31 December 2024 vs 31 December 2023 (8.00 vs 8.07).

A combined weighted Scope 1 and 2 average carbon intensity was 22.41% lower as per 31 December 2024 vs 31 December 2023 (23.79 vs 30.66).

### 2023/2022:

The ESG Score (MSCI ESG Score) was 2.06% percent higher as per 31 December 2023 vs 31 December 2022. (8.07 vs 7.91)

The combined Scope 1 and 2 average carbon intensity was 10.07% lower as per 31 December 2023 vs 31 December 2022. (30.66 vs 34.09)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI USA SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by reweighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

### Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

### Transitional activities are

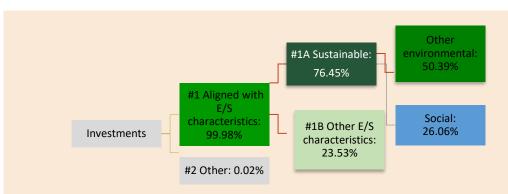

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.98%. The proportion of sustainable investments of the financial product was 76.45%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

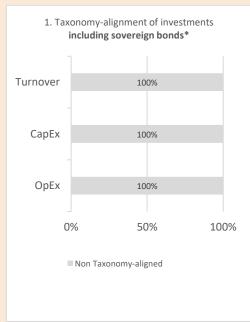

Taxonomy-aligned activities are expressed as a share of:

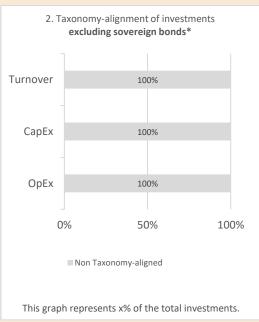

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1001

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 26.06%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index is a sub-set of the MSCI USA Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. It tracks the total return net dividend performance of large and mid capitalization companies of the United States of America.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Total Return Index) (8.00 vs 8.01).

A combined weighted Scope 1 and 2 average carbon intensity was 0.42% higher than that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Total Return Index) (23.79 vs 23.69).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Total Return Index) (8.00 vs 8.01).

A combined weighted Scope 1 and 2 average carbon intensity was 0.42% higher than that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Total Return Index) (23.79 vs 23.69).

#### How did this financial product perform compared with the broad market index?`

The ESG Score was 21.40% higher than that of the parent benchmark (MSCI USA Index) (8.00 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 75.41% lower than that of the parent benchmark (MSCI USA Index) (23.79 vs 96.74).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS (Irl) ETF plc – S&P 500 ESG ELITE UCITS ETF

Legal entity identifier: 549300R5VCVH48KS7Z06

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ ★ No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 82.05% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 11.16% higher than that of the parent benchmark (S&P 500 Index) (7.37 vs 6.63).

A combined weighted Scope 1 and 2 average carbon intensity was 32.43% lower than that of the parent benchmark (S&P 500 Index) (65.43 vs 96.83).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was equal as per 31 December 2024 vs 31 December 2023. (7.37 vs 7.37)

The combined Scope 1 and 2 average carbon intensity was 2.20% higher as per 31 December 2024 vs 31 December 2023. (65.43 vs 64.02)

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 5.40% percent higher as per 31 December 2023 vs 31 December 2022. (7.37 vs 6.99)

The combined Scope 1 and 2 average carbon intensity was 5.52% lower as per 31 December 2023 vs 31 December 2022. (64.02 vs 67.76)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

#### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 19.00%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the S&P 500 Index (the "Parent Index"). The Index is composed as follows:

1. starting with the Parent Index, the indices select from all constituents of the underlying index, with the exception of some companies which are deemed ineligible. These companies either:

- a. do not have an ESG score;
- b. are engaged in the production and/or sale of tobacco;
- c. are engaged in the business of controversial weapons;
- d. are within the bottom segment of a United Nations Global Compact score ranking; or
- e. are in the worst 25% of companies by ESG score, within each global industry group.
- 2. It is the target 25% of the market capitalisation of the original index using ESG score as the defining characteristic. The final index is market capitalisation weighted and sector neutral to its parent index (the S&P 500).
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (S&P 500 ESG ELITE Index (Net Return)) (7.37 vs 7.37).

A combined weighted Scope 1 and 2 average carbon intensity was 0.05% lower than that of the reference benchmark (S&P 500 ESG ELITE Index (Net Return)) (65.43 vs 65.46).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (S&P 500 ESG ELITE Index (Net Return)) (7.37 vs 7.37).

A combined weighted Scope 1 and 2 average carbon intensity was 0.05% lower than that of the reference benchmark (S&P 500 ESG ELITE Index (Net Return)) (65.43 vs 65.46).

How did this financial product perform compared with the broad market index?` The ESG Score was 11.16% higher than that of the parent benchmark (S&P 500 Index) (7.37 vs 6.63).

A combined weighted Scope 1 and 2 average carbon intensity was 32.43% lower than that of the parent benchmark (S&P 500 Index) (65.43 vs 96.83).

#### ANNEX V

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment means

an investment in an economic activity

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance UBS (Irl) ETF plc – UBS Climate Aware Global Developed Equity CTB UCITS ETF **Legal entity identifier:** 549300GG728TKSWH6C28

#### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
••	× Yes	• O No	
i	in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
~	made sustainable investments with a social objective: 23.92%	with a social objective  It promoted E/S characteristics, but did not make any sustainable investments	

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the EU Climate Transition Benchmarks Regulation. The financial product contributes to this by tracking, before expenses, the

price and income performance of the Solactive UBS Climate Aware Global Developed Equity CTB Index (USD) Net Total Return (the "Index").

#### How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

A combined weighted Scope 1 and 2 average carbon intensity was 48.75% lower than that of the parent benchmark (Solactive GBS Developed Markets Large & Mid Cap USD Index TR) (49.38 vs 96.36).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods

#### 2024/2023:

The combined Scope 1 and 2 average carbon intensity was 19.35% lower as per 31 December 2024 vs 31 December 2023. (49.38 vs 61.23)

#### 2023/2022:

The combined Scope 1 and 2 average carbon intensity was 26.38% lower as per 31 December 2023 vs 31 December 2022. (61.23 vs 83.17)

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The index incorporates the norms-based screening by exclude companies with verified infringement of established international initiatives and guidelines (such as UN Principles and OECD Guidelines).

ISS ESG is designed to provide timely and consistent assessments of companies' adherence to international norms on human rights, labor standards, environmental protection and anti-corruption set out in the UN Global Compact and OECD Guidelines. The financial product exclude investments in companies involved directly or indirectly in Coal Mining and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Power Generation, Hydraulic Fracturing, Oil & Sands as well as any involvement in Deep Water Drilling, Nuclear Energy, Adult Entertainment, Alcohol, Tobacco, Gambling, Military Equipment, Anti-personnel Mines, Biological and Chemical Weapons, Cluster Munitions, Depleted Uranium as well as Nuclear Weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The ISS ESG tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

# 7

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

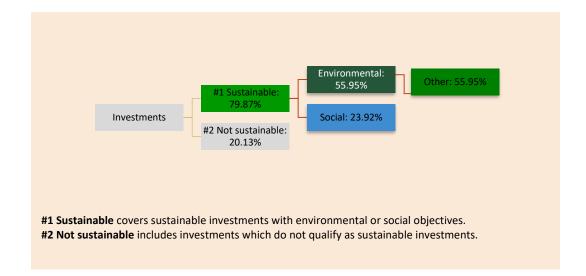

# Asset allocation describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

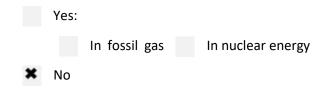

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

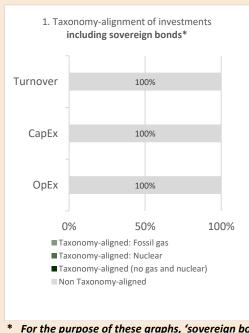

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

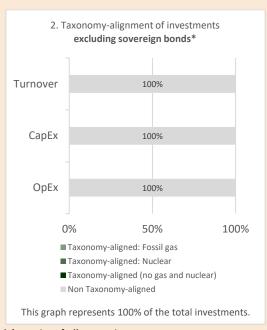

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 55.95%.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 23.92%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

# What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

# How did this financial product perform compared to the reference sustainable benchmark?

#### Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

#### How does the reference benchmark differ from a broad market index?

The Index is an equity index denominated in USD, maintained and published by international index supplier Solactive. It tracks the movement of large and mid-cap global listed companies from developed markets which are available to investors globally. The Index is constructed from the broad-based market-cap-weighted parent index, the Solactive GBS Developed Markets Large & Mid Cap USD Index (the "Parent Index") using an optimization process that is designed to measure the performance of securities meeting specific climate-related criteria, while maintaining a similar overall industry group weights as the parent index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (Solactive UBS Climate Aware Global Developed Equity CTB Index (USD) NTR) (49.38 vs 49.34).

How did this financial product perform compared with the reference benchmark?

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (Solactive UBS Climate Aware Global Developed Equity CTB Index (USD) NTR) (49.38 vs 49.34).

How did this financial product perform compared with the broad market index?

A combined weighted Scope 1 and 2 average carbon intensity was 48.75% lower than that of the broad market index (Solactive GBS Developed Markets Large & Mid Cap USD Index TR) (49.38 vs 96.36).

#### ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Legal entity identifier:

UBS (Irl) ETF plc - MSCI World Climate Paris Aligned UCITS ETF

549300X2HW7M617NKJ52

#### Sustainable investment objective

Did this financial product have a sustainable investment objective?			
• • X Yes	No		
investments with an environmental objective: 53.75%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective: 23.97%	It promoted E/S characteristics, but did not make any sustainable investments		

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Sustainable

**investment** means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance
practices.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

This financial product has a reduction in carbon emissions as its sustainable investment bjective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributed to this by before expenses, the price and income performance of the MSCI World Climate Paris Aligned Index (Net Return) (the "Index"). The attainment of the sustainable investment objective was measured by tracking a benchmark with a sustainability

profile (ESG Score) that is higher than the MSCI World Index (the "Parent Index") sustainability profile, and maintaining carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI). The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Climate Paris Aligned Index (Net Return).

#### How did the sustainability indicators perform?

The objective was measured using the following indicators respectively:

- 1. MSCI ESG Score was 3.63% higher than that of the parent benchmark (MSCI World Index) (7.14 vs 6.89)
- 2. A combined weighted Scope 1 and 2 average carbon intensity was 65.49% lower than that of the parent benchmark (MSCI World Index) (33.44 vs. 96.90).

#### ...and compared to previous periods?

The combined Scope 1 and 2 average carbon intensity was 6.16% higher as per 31 December 2024 vs 31 December 2023 (33.44 vs 31.50).

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

#### What were the top investments of this financial product?

  made by investee
  companies, e.g.
  for a transition to
  a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy-aligned Investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53.75%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 23.97%.

# What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

# What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the sustainable investment objective it seeks to achieve.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

# How did this financial product perform compared to the reference sustainable benchmark?

The Index (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the MSCI World Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation worldwide companies.

#### How did the reference benchmark differ from a broad market index?

The reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index is designed to align itself with the decarbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

MSCI ESG Score was equal that of the reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) (7.14 vs 7.14).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% higher than that of the reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) (33.44 vs 33.40)

#### How did this financial product perform compared with the reference benchmark?

MSCI ESG Score was equal that of the reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) (7.14 vs 7.14).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% higher than that of the reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) (33.44 vs 33.40).

How did this financial product perform compared with the broad market index?

MSCI ESG Score was 3.63% higher than that of the parent benchmark (MSCI World Index) (7.14 vs 6.89).

A combined weighted Scope 1 and 2 average carbon intensity was 65.49% lower than that of the parent benchmark (MSCI World Index) (33.44 vs 96.90).

#### ANNEX V

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
investments with an environmental objective: 62.84%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective: 17.70%	It promoted E/S characteristics, but did not make any sustainable investments		

aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI USA Climate Paris Aligned Index (Net Return) (the "Index").

#### How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 3.34% higher than that of the parent benchmark (MSCI USA Index) (6.81 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 63.84% lower than that of the parent benchmark (MSCI USA Index) (34.98 vs 96.74).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

#### 2024/2023:

The combined Scope 1 and 2 average carbon intensity was 8.26% higher as per 31 December 2024 vs 31 December 2023. (34.98 vs 32.31)

#### 2023/2022:

The combined Scope 1 and 2 average carbon intensity was 23.25% lower as per 31 December 2023 vs 31 December 2022. (32.31vs 42.10)

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

#### Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

#### How did this financial product perform compared to the reference benchmark?

The Index (MSCI USA Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

#### How does the reference benchmark differ from a broad market index?

The reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index is designed to align itself with the decarbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The ESG Score was 0.15% lower than that of the reference benchmark (MSCI USA Climate Paris Aligned Index (Net Return)) (6.81 vs 6.82).

A combined weighted Scope 1 and 2 average carbon intensity was equal that of the reference benchmark (MSCI USA Climate Paris Aligned Index (Net Return)) (34.98 vs. 34.98).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.15% lower than that of the reference benchmark (MSCI USA Climate Paris Aligned Index (Net Return)) (6.81 vs 6.82).

A combined weighted Scope 1 and 2 average carbon intensity was equal that of the reference benchmark (MSCI USA Climate Paris Aligned Index (Net Return)) (34.98 vs 34.98).

How did this financial product perform compared with the broad market index?

The ESG Score was 3.34% higher than that of the parent benchmark (MSCI USA Index) (6.81 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 63.84% lower than that of the parent benchmark (MSCI USA Index) (34.98 vs 96.74).

#### ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

**investment** means an investment in an economic activity

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance Legal entity identifier:

UBS (Irl) ETF plc – MSCI Europe Climate Paris Aligned UCITS ETF

549300BP9FW4JH4VJB23

#### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • X Yes	No		
investments with an environmental objective: 42.57%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective: 42.34%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI Europe Climate Paris Aligned Index (Net Return) (the "Index").

#### How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 11.84% higher than that of the parent benchmark (MSCI Europa Index) (8.31 vs 7.43).

A combined weighted Scope 1 and 2 average carbon intensity was 59.48% lower than that of the parent benchmark (MSCI Europa Index) (33.98 vs 83.85).

#### ...and compared to previous periods

#### 2024/2023:

The combined Scope 1 and 2 average carbon intensity was 14.32% lower as per 31 December 2024 vs 31 December 2023. (33.98 vs 39.66)

# How did the sustainable investments not cause significant harm to any sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.

The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
NOVO NORDISK	Health Care	2.96	Denmark

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

#### What was the proportion of sustainability-related investments?

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:		
	In fossil gas	In nuclear energy

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

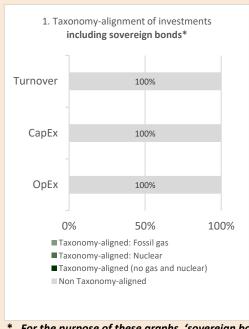

Taxonomy-aligned activities are expressed as a share of:

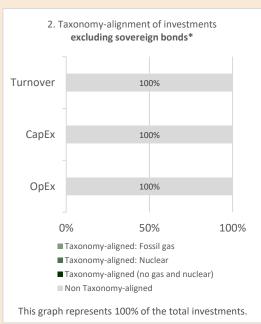

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- expenditure
  (CapEx) showing
  the green
  investments
  made by investee
  companies, e.g.
  for a transition to
  a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU
Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 42.57%.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 42.34%.

# What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

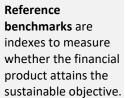

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no long-er in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

The Index (MSCI Europe Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation European companies.

#### How does the reference benchmark differ from a broad market index?

The reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index is designed to align itself with the decarbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions,

while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The ESG Score was equal that of the reference benchmark (MSCI Europe Climate Paris Aligned Index (Net Return)) (8.31 vs 8.31).

A combined weighted Scope 1 and 2 average carbon intensity was 0.50% higher than that of the reference benchmark (MSCI Europe Climate Paris Aligned Index (Net Return)) (33.98 vs 33.81).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI Europe Climate Paris Aligned Index (Net Return)) (8.31 vs 8.31).

A combined weighted Scope 1 and 2 average carbon intensity was 0.50% higher than that of the reference benchmark (MSCI Europe Climate Paris Aligned Index (Net Return)) (33.98 vs 33.81).

How did this financial product perform compared with the broad market index?`

The ESG Score was 11.84% higher than that of the parent benchmark (MSCI Europe Index) (8.31 vs 7.43).

A combined weighted Scope 1 and 2 average carbon intensity was 59.48% lower than that of the parent benchmark (MSCI Europe Index) (33.98 vs 83.85)

#### ANNEX V

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

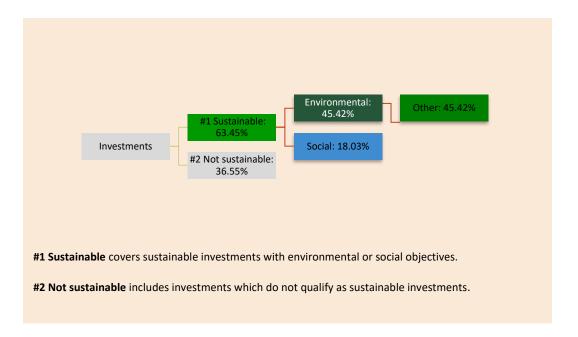

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### What was the proportion of sustainability-related investments?

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

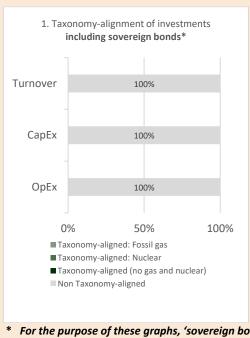

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1054

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU

Taxonomy.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 45.42%.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 18.03%.

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no long-er in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

#### How did this financial product perform compared to the reference benchmark?

The Index (MSCI Japan Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the MSCI Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation Japanese companies.

How did the reference benchmark differ from a broad market index?

The reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index is designed to align itself with the decarbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The ESG Score was equal that of the reference benchmark MSCI Japan Climate Paris Aligned Index (Net Return)) (7.39 vs 7.39).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% higher than that of the reference benchmark (MSCI Japan Climate Paris Aligned Index (Net Return)) (33.15 vs 32.99).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark MSCI Japan Climate Paris Aligned Index (Net Return)) (7.39 vs 7.39).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% higher than that of the reference benchmark (MSCI Japan Climate Paris Aligned Index (Net Return)) (33.15 vs 32.99).

How did this financial product perform compared with the broad market index?

The ESG Score was 0.54% higher than that of the parent benchmark (MSCI) (7.39 vs 7.35).

A combined weighted Scope 1 and 2 average carbon intensity was 50.76% lower than that of the parent benchmark (MSCI) (33.15 vs 67.33).

#### ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
•• × Yes	No			
It made sustainable investments with an environmental objective: 50.90%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.64% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective: 23.97%	It promoted E/S characteristics, but did not make any sustainable investments			

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

The **EU Taxonomy** is

practices.

Sustainable

**investment** means an investment in an economic activity

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI ACWI Climate Paris Aligned Index (Net Return) (the "Index").

### How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 2.80% higher than that of the parent benchmark (MSCI ACWI Index) (6.97 vs 6.78).

A combined weighted Scope 1 and 2 average carbon intensity was 68.46% lower than that of the parent benchmark (MSCI ACWI Index) (37.93 vs 120.25).

#### ...and compared to previous periods

#### 2024/2023:

The combined Scope 1 and 2 average carbon intensity was 6.21% lower as per 31 December 2024 vs 31 December 2023. (37.93 vs 40.44)

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

\*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

#### What was the proportion of sustainability-related investments?

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

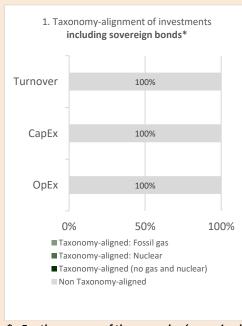

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. operational expenditure (OpEx) reflecting green operational activities of investee companies.

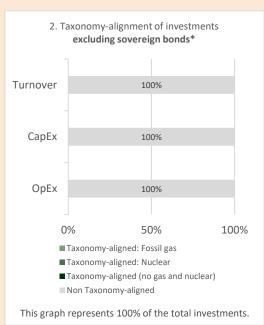

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.34%.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 19.47%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no long-er in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference sustainable benchmark?

Index (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the MSCI World Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation worldwide companies.

### How does the reference benchmark differ from a broad market index?

The reference benchmark (MSCI World Climate Paris Aligned Index (Net Return)) is part of the MSCI Climate Paris Aligned Index series. The Index is designed to align itself with the de-carbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The ESG Score was equal that of the reference benchmark (MSCI Emerging Markets Climate Paris Aligned Index (Net Return)) (5.91 vs 5.91).

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (MSCI Emerging Markets Climate Paris Aligned Index (Net Return)) (75.72 vs 75.78).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI Emerging Markets Climate Paris Aligned Index (Net Return)) (5.91 vs 5.91).

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (MSCI Emerging Markets Climate Paris Aligned Index (Net Return)) (75.72 vs 75.78).

How did this financial product perform compared with the broad market index?

The ESG Score was 2.60% higher than that of the parent benchmark (MSCI) (5.91 vs 5.76).

A combined weighted Scope 1 and 2 average carbon intensity was 76.86% lower than that of the parent benchmark (MSCI) (75.72 vs 327.26).

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Legal entity identifier: 549300K06DSGTS5FBI97

UBS (Irl) ETF plc - MSCI USA ESG Universal Low Carbon Select UCITS ETF

### Environmental and/or social characteristics

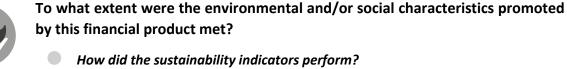

Did this financial product have a sustainable investment objective?				
• • Yes	● ○ <b>≭</b> No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.43% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

by this financial product met? How did the sustainability indicators perform?

> The ESG promotion characteristics are measured using the following indicators respectively:

> The ESG Score was 4.86% higher than that of the parent benchmark (MSCI USA Index) (6.91 vs 6.59).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 52.88% lower than that of the parent benchmark (MSCI USA Index) (45.58 vs 96.74).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.44% higher as per 31 December 2024 vs 31 December 2023 (6.91 vs 6.88).

The combined Scope 1 and 2 average carbon intensity was 8.05% lower as per 31 December 2024 vs 31 December 2023 (45.58 vs 49.57).

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 2.84% percent higher as per 31 December 2023 vs 31 December 2022. (6.88 vs 6.69).

The combined Scope 1 and 2 average carbon intensity was 14.74% lower as per 31 December 2023 vs 31 December 2022. (49.57 vs 58.14).

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI USA ESG Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
Apple	Information Technology	5.66	United States

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

### What was the proportion of sustainability-related investments?

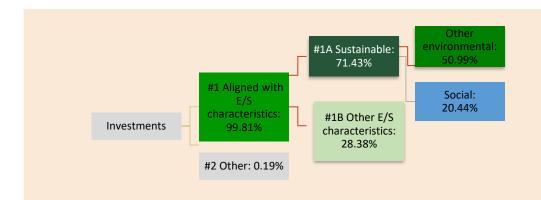

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.81%. The proportion of sustainable investments of the financial product was 71.43%.

### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

### \*\*\*\*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

directly enable other activities to make a substantial contribution to an

**Enabling activities** 

environmental objective.

**Transitional** 

activities are
activities for which
low-carbon
alternatives are not
yet available and
among others have
greenhouse gas
emission levels
corresponding to
the best
performance.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

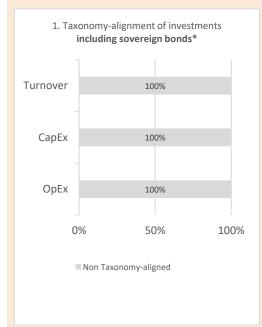

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

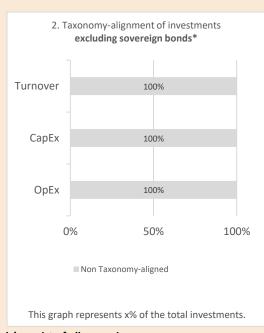

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 20.44%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether

the financial product attains the environmental or social characteristics

that they promote.

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? The ESG Score was 0.29% lower than that of the parent benchmark (MSCI USA ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index)) (6.91 vs 6.93).

A combined weighted Scope 1 and 2 average carbon intensity was 0.68% lower than that of the parent benchmark (MSCI USA ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index) (45.58 vs 45.89).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.29% lower than that of the parent benchmark (MSCI USA ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index)) (6.91 vs 6.93).

A combined weighted Scope 1 and 2 average carbon intensity was 0.68% lower than that of the parent benchmark (MSCI USA ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index) (45.58 vs 45.89).

### How did this financial product perform compared with the broad market index?

The ESG Score was 4.86% higher than that of the parent benchmark (MSCI USA Index) (6.91 vs 6.59).

A combined weighted Scope 1 and 2 average carbon intensity was 52.88% lower than that of the parent benchmark (MSCI USA Index) (45.58 vs 96.74).

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.96%. The proportion of sustainable investments of the financial product was 79.69%.

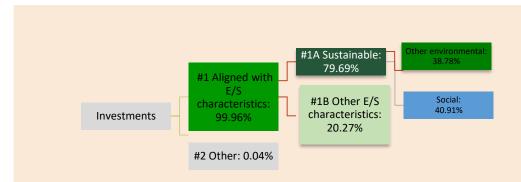

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

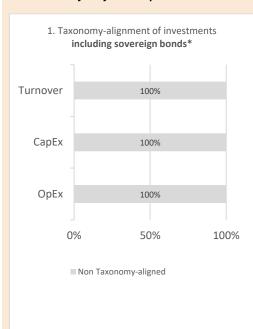

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

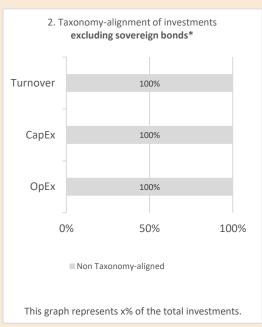

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 40.91%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the total return net dividend performance of large and mid-capitalisation companies across 10 Developed Markets (DM) in the EMU.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI EMU ESG Universal LCS 5% Issuer Capped Total Return Net) (8.15 vs 8.15).

A combined weighted Scope 1 and 2 average carbon intensity was 0.28% higher than that of the reference benchmark (MSCI EMU ESG Universal LCS 5% Issuer Capped Total Return Net) (32.58 vs 32.49).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI EMU ESG Universal LCS 5% Issuer Capped Total Return Net) (8.15 vs 8.15).

A combined weighted Scope 1 and 2 average carbon intensity was 0.28% higher than that of the reference benchmark (MSCI EMU ESG Universal LCS 5% Issuer Capped Total Return Net) (32.58 vs 32.49).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 4.09% higher than that of the parent benchmark (MSCI EMU Index) (8.15 vs 7.83).

A combined weighted Scope 1 and 2 average carbon intensity was 63.98% lower than that of the parent benchmark (MSCI EMU Index) (32.58 vs 90.44).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**UBS (Irl) ETF plc – MSCI Japan ESG Universal Low Carbon Select UCITS ETF

Legal entity identifier:

5493004NQHLNGZKSW481

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.15% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

The **EU Taxonomy** is

Sustainable

practices.

**investment** means an investment in an economic activity

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 4.20% higher than that of the parent benchmark (MSCI Japan Index)) (7.69 vs 7.38).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 42.63% lower than that of the parent benchmark (MSCI Japan Index) (38.63 vs 67.33).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 1.05% higher as per 31 December 2024 vs 31 December 2023. (7.69 vs 7.61)

The combined Scope 1 and 2 average carbon intensity was 14.67% lower as per 31 December 2024 vs 31 December 2023. (38.63 vs 45.27)

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 6.73% percent higher as per 31 December 2023 vs 31 December 2022. (7.61 vs. 7.13)

The combined Scope 1 and 2 average carbon intensity was 2.46% lower as per 31 December 2023 vs 31 December 2022. (45.27 vs 46.82)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The MSCI Japan ESG Universal Low Carbon Select Index aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
ΤΟΥΟΤΑ	Consumer Discretionary	4.37	Japan
SONY	Consumer Discretionary	4.26	Japan
HITACHI	Industrials	3.70	Japan
RECRUIT	Industrials	3.17	Japan
SUMITOMO MITSUI	Financial Services	2.85	Japan
MITSUBISHI UFJ	Financial Services	2.78	Japan
TOKYO ELECTRON	Information Technology	2.21	Japan
TOKIO MARINE	Financial Services	2.18	Japan
FAST RETAILING	Consumer Discretionary	2.07	Japan
KEYENCE	Information Technology	2.03	Japan
MIZUHO FINANCIAL	Financial Services	1.90	Japan
ІТОСНИ	Industrials	1.89	Japan
SOFTBANK	Communication Services	1.79	Japan
KDDI	Communication Services	1.56	Japan
DAIICHI SANKYO	Health Care	1.55	Japan

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.96%. The proportion of sustainable investments of the financial product was 58.15%.

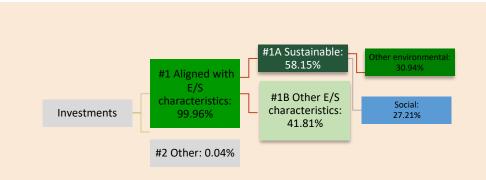

# Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure
   (OpEx) reflecting green operational activities of investee companies.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

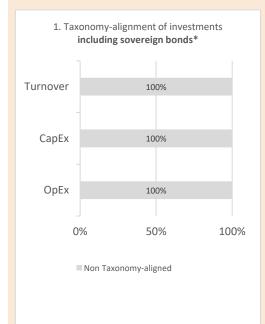

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

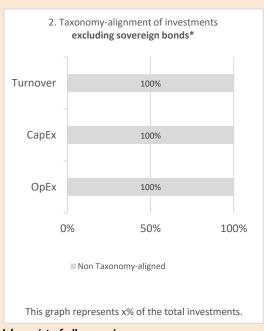

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

### What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 27.21%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in JPY. The Index tracks the total return net dividend performance of large and mid-capitalisation Japanese companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI Japan ESG Universal LCS 5% Issuer Capped Total Return Net) (7.69 vs 7.69).

A combined weighted Scope 1 and 2 average carbon intensity was 0.81% higher than that of the reference benchmark (MSCI Japan ESG Universal LCS 5% Issuer Capped Total Return Net) (38.63 vs 38.32).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI Japan ESG Universal LCS 5% Issuer Capped Total Return Net) (7.69 vs 7.69).

A combined weighted Scope 1 and 2 average carbon intensity was 0.81% higher than that of the reference benchmark (MSCI Japan ESG Universal LCS 5% Issuer Capped Total Return Net) (38.63 vs 38.32).

### How did this financial product perform compared with the broad market index?

The ESG Score was 4.20% higher than that of the parent benchmark (MSCI Japan Index) (7.69 vs 7.38).

A combined weighted Scope 1 and 2 average carbon intensity was 42.63% lower than that of the parent benchmark (MSCI Japan Index) (38.63 vs 67.33).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 22.95% higher than that of the parent benchmark (MSCI Emerging Markets ex China Index ) (7.50 vs 6.10).

A combined weighted Scope 1 and 2 average carbon intensity was 80.81% lower than that of the parent benchmark (MSCI Emerging Markets ex China Index ) (70.29 vs 366.23).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 10%. MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Indices aim to represent the performance of an investment strategy that by reweighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Further details can be found in the prospectus annex for each fund.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1 out of 9) is excluded from Sustainability indices.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

Product name:

Legal entity identifier: 5493000S1XKEF0WZNP58

UBS (Irl) ETF plc – MSCI World Small Cap Socially Responsible UCITS ETF

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?			
Yes	• No		
in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.63% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 31.46% higher than that of the parent benchmark (MSCI World Small Cap Index) (7.73 vs 5.88).

A combined weighted Scope 1 and 2 average carbon intensity was 65.37% lower than that of the parent benchmark (MSCI World Small Cap Index) (44.78 vs 129.31).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 1.84% higher as per 31 December 2024 vs 31 December 2023 (7.73 vs 7.59).

The combined Scope 1 and 2 average carbon intensity was 5.41% lower as per 31 December 2024 vs 31 December 2023 (44.78 vs 47.34).

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 3.73% percent higher as per 31 December 2023 vs 31 December 2022. (7.59 vs 7.32)

The combined Scope 1 and 2 average carbon intensity was 1.44% lower as per 31 December 2023 vs 31 December 2022. (47.34 vs 48.03)

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI World Small Cap SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

 $\frac{\text{https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Contr}}{\text{oversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4}}$ 

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

The list includes the

investments constituting the greatest proportion of investments of the financial product during the reference period which is:

2024

ystems.

#### **Asset allocation**

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

### Transitional activities are

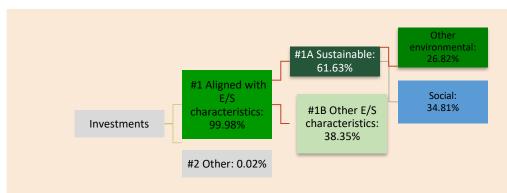

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.98%. The proportion of sustainable investments of the financial product was 61.63%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

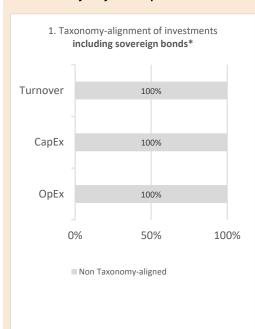

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

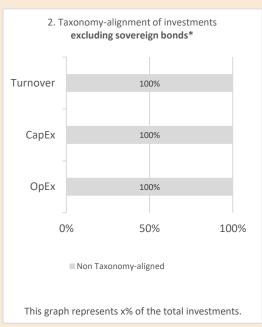

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex

### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 34.81%

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

### How did this financial product perform compared to the reference benchmark?

### How does the reference benchmark differ from a broad market index?

The Index is a sub-set of the MSCI World Small Cap Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. It tracks the total return net dividend performance of small-cap global stocks across developed markets countries.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index) (7.73 vs 7.73).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% lower than that of the reference benchmark (MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index) (44.78 vs 44.81).

### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index) (7.73 vs 7.73).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% lower than that of the reference benchmark (MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index) (44.78 vs 44.81).

#### How did this financial product perform compared with the broad market index?`

The ESG Score was 31.46% higher than that of the parent benchmark (MSCI World Small Cap Index) (7.73 vs 5.88).

A combined weighted Scope 1 and 2 average carbon intensity was 65.37% lower than that of the parent benchmark (MSCI World Small Cap Index) (44.78 vs 129.31).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	● ○ 🗶 No	
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.24% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 9.89% higher than that of the parent benchmark (MSCI Pacific (ex Japan) Index) (8.00 vs 7.28).

A combined weighted Scope 1 and 2 average carbon intensity was 67.47% lower than that of the parent benchmark (MSCI Pacific (ex Japan) Index) (53.99 vs 165.96).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 1.78% higher as per 31 December 2024 vs 31 December 2023 (8.00 vs 7.86).

The combined Scope 1 and 2 average carbon intensity was 16.36% lower as per 31 December 2024 vs 31 December 2023 (53.99 vs 64.55).

#### 2023/2022:

The ESG Score (MSCI ESG Score) was 2.37% percent higher as per 31 December 2023 vs 31 December 2022. (7.86 vs 7.68)

The combined Scope 1 and 2 average carbon intensity was 6.02% higher as per 31 December 2023 vs 31 December 2022. (64.55 vs 60.89)

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.01% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 11.20% higher than that of the parent benchmark (MSCI AC Asia (ex Japan) Index) (6.65 vs 5.98).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 61.91% lower than that of the parent benchmark (MSCI AC Asia (ex Japan) Index) (111.75 vs 293.39).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.15 % percent lower as per 31 December 2024 vs 31 December 2023. (6.65 vs 6.64)

The combined Scope 1 and 2 average carbon intensity was 7.02% lower as per 31 December 2024 vs 31 December 2023. (111.75 vs 120.19)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI AC Asia ex Japan ESG Leaders Low Carbon Select 5% Issuer Capped Index aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

Further details can be found in the prospectus annex for each fund.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

\*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### **Asset allocation**

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

## **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional activities are

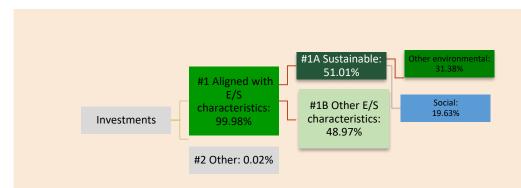

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.98%. The proportion of sustainable investments of the financial product was 51.01%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

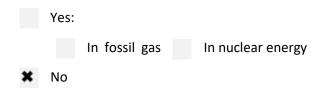

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

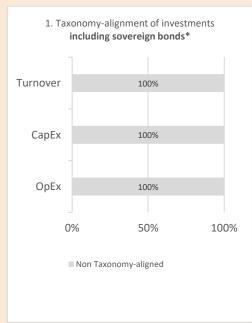

Taxonomy-aligned activities are expressed as a share of:

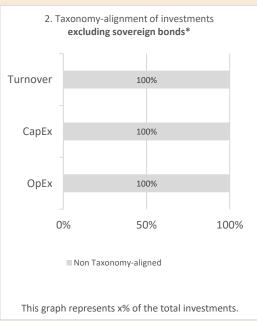

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1127

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 19.63%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI AC Asia (ex Japan) ESG Leaders Low Carbon Select 5% Issuer Capped Index (Net Return)). (6.65 vs 6.65).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% lower than that of the reference benchmark (MSCI AC Asia (ex Japan) ESG Leaders Low Carbon Select 5% Issuer Capped Index (Net Return)). (111.75 vs 112.29).

## How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI AC Asia (ex Japan) ESG Leaders Low Carbon Select 5% Issuer Capped Index (Net Return)). (6.65 vs 6.65).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% lower than that of the reference benchmark (MSCI AC Asia (ex Japan) ESG Leaders Low Carbon Select 5% Issuer Capped Index (Net Return)). (111.75 vs 112.29).

## How did this financial product perform compared with the broad market index?

The ESG Score was 11.20% higher than that of the parent benchmark (MSCI AC Asia (ex Japan) Index) (6.65 vs 5.98).

A combined weighted Scope 1 and 2 average carbon intensity was 61.91% lower than that of the parent benchmark (MSCI AC Asia (ex Japan) Index) (111.75 vs 293.39).

## ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.04% of sustainable investments</li> <li>with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul>			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

list of socially sustainable

Sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 3.81% higher than that of the parent benchmark (S&P Composite 1500's

Index) (6.82 vs 6.57).

A combined weighted Scope 1 and 2 average carbon intensity was 1.21% higher than that of the parent benchmark (S&P Composite 1500's Index) (100.41 vs. 99.15).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

## ...and compared to previous periods?

#### 2024/2023:

The ESG Score (MSCI ESG Score) was 0.59% higher as per 31 December 2024 vs 31 December 2023 (6.82 vs 6.78).

The combined Scope 1 and 2 average carbon intensity was 14.19% higher as per 31 December 2024 vs 31 December 2023 (100.41 vs 87.93).

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index. The Index provider implements the screens and exclusions set out above to ensure that the remaining portion of the Index which are sustainable investments do not cause significant harm. As outlined above, the GSS monitors companies to ensure that they are aligned with the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, the value-based exclusions mentioned in the previous response consider sustainability indicators listed in Table 1 of Annex 1 of Regulation (EU) 2022/1288, such as GHG emissions, Carbon footprint, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and exposure to controversial weapons.

Further details can be found in the prospectus annex for each fund.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
Best Buy	Consumer Discretionary	3.91	United States
Abbvie	Health Care	3.54	<b>United States</b>

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

## What was the proportion of sustainability-related investments?

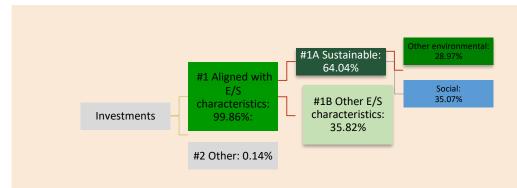

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.86%. The proportion of sustainable investments of the financial product was 64.04%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:		
	In fossil gas	In nuclear energ
No		

EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the

## Enabling activities directly enable

directly enable other activities to make a substantial contribution to an environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

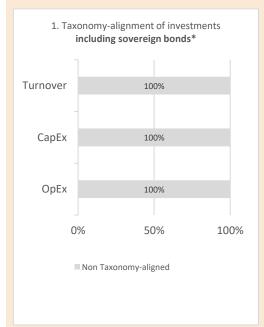

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

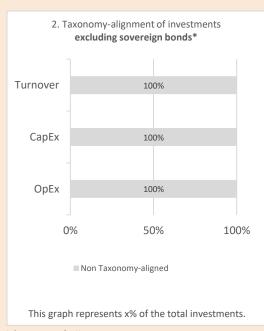

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g. for
  a transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

#### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 35.07%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

## How did this financial product perform compared to the reference benchmark?

# benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

Reference

promote.

#### How does the reference benchmark differ from a broad market index?

The Broad Market Index is the S&P Composite 1500. The Index is an equity index calculated, maintained and published by international index supplier S&P Dow Jones Indices and is denominated in USD. It measures the performance of large and midcapitalised U.S. companies.

The Index measures the performance of high dividend yielding / ESG-scoring companies that meet sustainability criteria as defined in this methodology, and meet the eligibility criteria defined in the S&P High Yield Dividend Aristocrats Index. Constituents are selected from

eligible companies in the S&P Composite 1500 that have followed a managed-dividends policy of increasing or maintaining dividends for at least 20 consecutive years. Constituents are weighted by indicated dividend yield.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (S&P ESG Elite High Yield Dividend Aristocrats) (6.82 vs 6.82).

A combined weighted Scope 1 and 2 average carbon intensity was 0.20% lower than that of the reference benchmark (S&P ESG Elite High Yield Dividend Aristocrats) (100.41 vs 100.61).

## How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (S&P ESG Elite High Yield Dividend Aristocrats) (6.82 vs 6.82).

A combined weighted Scope 1 and 2 average carbon intensity was 0.20% lower than that of the reference benchmark (S&P ESG Elite High Yield Dividend Aristocrats) (100.41 vs 100.61).

## How did this financial product perform compared with the broad market index?

The ESG Score was 3.81% higher than that of the parent benchmark (S&P Composite 1500's Index) (6.82 vs 6.57).

A combined weighted Scope 1 and 2 average carbon intensity was 1.27% higher than that of the parent benchmark (S&P Composite 1500's Index) (100.41 vs 99.15).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier: 391200106FYVTYZ8IK41

UBS (Irl) ETF plc — EUR Ultra-Short Bond ESG UCITS ETF

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 83.81% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

Sustainable

practices.

investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 10.95% higher than that of the parent benchmark (Solactive EMU Sovereign Bond TR Index) (7.09 vs 6.39).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

This financial product invests at least 80% of its total net assets in issuers that are constituents of the Index or securities which are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors and the Index provider applies ESG Ratings on all of the Index constituents with a commitment to a minimum proportion of sustainable investments of 10%.

The Index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When calculating the Sustainalytics ESG scores, indicators for adverse impacts on sustainability factors are taken into account by Sustainalytics.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Issuers identified as violating Freedom House principles will be removed from the Index. When calculating the Sustainalytics ESG scores, indicators Un Guiding Principles factors are taken into account by Sustainalytics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

## What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 98.09%. The proportion of sustainable investments of the financial product was 83.81%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

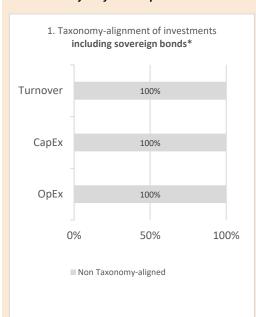

Taxonomy-aligned activities are expressed as a share of:

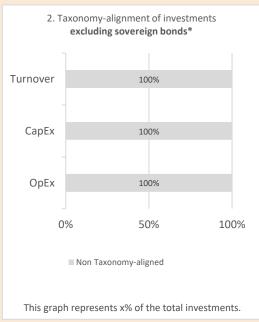

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

## What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 49.19%

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, for example where securities are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and

the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return) aims to track the performance of eligible fixed-rate, EUR-denominated government, quasi sovereign and supra-national bank bonds and commercial papers maturing within the next 6 months. The issuer of the securities must be domiciled in a member state of the European Monetary Union. The index exposure to government bonds is limited to 50% of the market cap of the index. The index is based on the composition Solactive EMU Aggregate Bond Index and a subset of it. The index is rebalanced on a monthly basis. The index further applies an environmental, social and governance (ESG) scoring and screening methodology of the issuer countries.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 3.81% higher than that of the reference benchmark (Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return)) (7.09 vs 6.83).

How did this financial product perform compared with the reference benchmark?

The ESG Score was 3.81% higher than that of the reference benchmark (Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return)) (7.09 vs 6.83).

How did this financial product perform compared with the broad market index?

The ESG Score was 10.95% higher than that of the parent benchmark (Solactive EMU Sovereign Bond TR Index) (7.09 vs 6.39).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX V

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph of Regulation (EU) 2020/852

Product name:

Sustainable

investment means

an investment in an

investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

economic activity that contributes to an environmental or social objective, provided that the Legal entity identifier:

UBS (Irl) ETF plc – S&P 500 Climate Transition ESG UCITS ETF

391200L92SK9497WSV13

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
• • X Yes	• No	
investments with an environmental objective: 57.29%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
★ It made sustainable investments with a social objective: 19.07%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments	

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 3.47% higher than that of the parent benchmark (S&P 500 Index) (6.86 vs 6.63).

A combined weighted Scope 1 and 2 average carbon intensity was 7.28% lower than that of the parent benchmark (S&P 500 Index) (89.78 vs 96.83).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

**Principal adverse** 

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.

The Sustainalytics' Global Standards Screening (GSS) provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in Sustainalytics' Global Standards Screening (GSS) is designed to monitor company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principels.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### **Asset allocation**

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective

# Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. operational expenditure (OpEx) reflecting green operational activities of

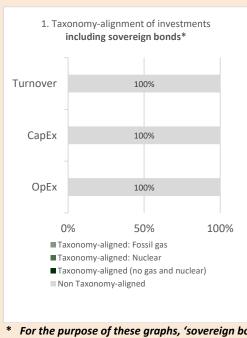

investee companies.

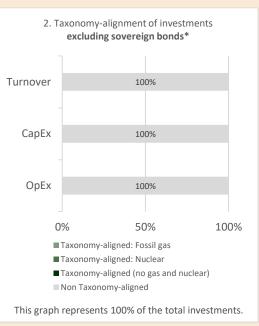

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of socially sustainable investments 57.29%.

#### What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 19.07%

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The S&P Climate Transition Base Index Series measures the performance of eligible equity securities from an underlying parent index selected and weighted to be collectively compatible with the transition to a low-carbon and climate resilient economy. The indices apply exclusions based on companies' involvement in specific business activities, violations of the principles of the United Nations' Global Compact (UNGC), and involvement in relevant ESG controversies, all outlined in Eligibility Criteria.

#### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The ESG Score was 0.15% lower than that of the reference benchmark (S&P 500 Climate Transition base ESG Index (Net Return) (6.68 vs 6.87).

A combined weighted Scope 1 and 2 average carbon intensity was 0.02% lower than that of the reference benchmark (S&P 500 Climate Transition base ESG Index (Net Return) (89.78 vs 89.80).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.15% lower than that of the reference benchmark (S&P 500 Climate Transition base ESG Index (Net Return) ) (6.68 vs 6.87).

A combined weighted Scope 1 and 2 average carbon intensity was 0.22% lower than that of the reference benchmark (S&P 500 Climate Transition base ESG Index (Net Return)) (89.78 vs 89.80).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 3.47% higher than that of the parent benchmark (S&P 500 Index) (6.86 vs 6.63).

A combined weighted Scope 1 and 2 average carbon intensity was 7.28% lower than that of the parent benchmark (S&P 500 Index) (89.78 vs 96.83).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable

investment means

an investment in an

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 2.95% higher than that of the parent benchmark (MSCI Canada Index) (7.68 vs 7.46).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

A combined weighted Scope 1 and 2 average carbon intensity was 55.69% lower than that of the parent benchmark (MSCI Canada Index) (105.78 vs 238.74).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ... and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI Canada ESG Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Further details can be found in the prospectus annex for each fund.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

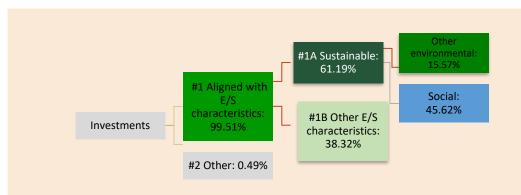

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.51%. The proportion of sustainable investments of the financial product was 61.19%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

To comply with the

#### directly enable other activities to make a substantial contribution to an

**Enabling activities** 

environmental objective.

## Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

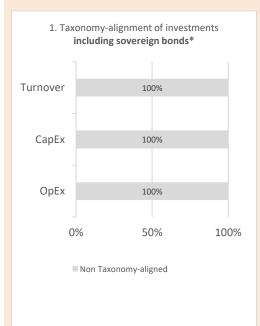

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

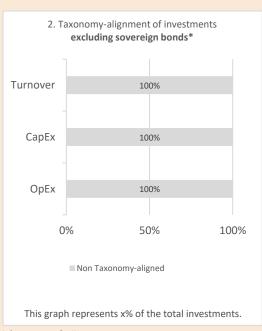

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

## What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 45.62%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI Canada Index Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and

denominated in CAD. The Index tracks the total return net dividend performance of large and mid-capitalisation Canadian companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.13% lower than that of the reference benchmark (MSCI Canada ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index ) (7.68 vs 7.69).

A combined weighted Scope 1 and 2 average carbon intensity was 0.22% lower than that of the reference benchmark (MSCI Canada ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index ) (105.78 vs 106.01).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.13% lower than that of the reference benchmark ((MSCI Canada ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index ) (7.68 vs 7.69).

A combined weighted Scope 1 and 2 average carbon intensity was 0.22% lower than that of the reference benchmark (MSCI Canada ESG Universal Low Carbon Select 5% Issuer Capped Total Return Index ) (105.78 vs 106.01).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 2.95% higher than that of the parent benchmark (MSCI Canada Index) (7.68 vs 7.46).

A combined weighted Scope 1 and 2 average carbon intensity was 55.69% lower than that of the parent benchmark (MSCI Canada Index) (105.78 vs 238.74).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Sustainable

investment means an investment in an economic activity that contributes to an environmental or

social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	● ● X No	
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.90% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 14.04% higher than that of the parent benchmark (MSCI World Index) (7.88 vs 6.91).

A combined weighted Scope 1 and 2 average carbon intensity was 38.14% lower than that of the parent benchmark (MSCI World Index) (60.49 vs 97.79).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI World ESG Leaders Index (Net Return) aims to represent the performance of an investment strategy that by reweighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

1171

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

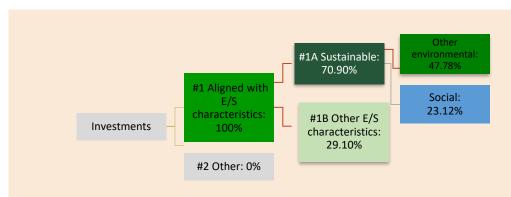

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 100%. The proportion of sustainable investments of the financial product was 70.90%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

# \*\*\*\*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

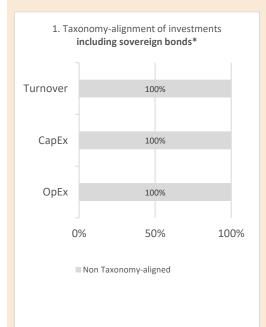

## Transitional activities are

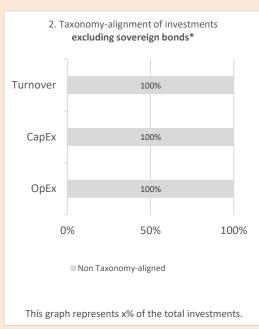

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 23.12%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

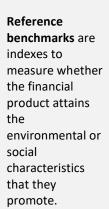

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The MSCI World Index draws its constituents from the MSCI World Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting

away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI World ESG Leaders Index (Net Return)). (7.88 vs 7.88).

A combined weighted Scope 1 and 2 average carbon intensity was 0.05% lower than that of the reference benchmark (MSCI World ESG Leaders Index (Net Return)). (60.49 vs 60.52).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI World ESG Leaders Index (Net Return)). (7.88 vs 7.88).

A combined weighted Scope 1 and 2 average carbon intensity was 0.05% lower than that of the reference benchmark (MSCI World ESG Leaders Index (Net Return)). (60.49 vs 60.52).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 14.04% higher than that of the parent benchmark (MSCI World Index) (7.88 vs 6.91).

A combined weighted Scope 1 and 2 average carbon intensity was 38.14% lower than that of the parent benchmark (MSCI World Index) (60.49 vs 97.79).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** 

Sustainable

investment means an investment in an economic activity that contributes to an environmental or

social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

Legal entity identifier:

UBS (Irl) ETF plc - MSCI USA ESG Leaders UCITS ETF

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	● ○ 🗶 No	
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.22% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 15.06% higher than that of the parent benchmark (MSCI USA Index) (7.64 vs 6.64).

A combined weighted Scope 1 and 2 average carbon intensity was 38.47% lower than that of the parent benchmark (MSCI USA Index) (59.52 vs 96.74).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI USA ESG Leaders Index (Net Return) aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. [Companies must have an MSCI ESG Controversies score of 3 or above to be eligible for the Index.]

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

#### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country
Nvidia	Information Technology	12.25	United States
Microsoft	Information Technology	11.07	<b>United States</b>

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

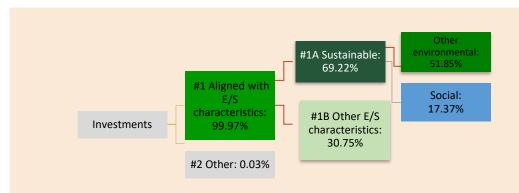

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.97%. The proportion of sustainable investments of the financial product was 69.22%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

# \*\*\*\*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

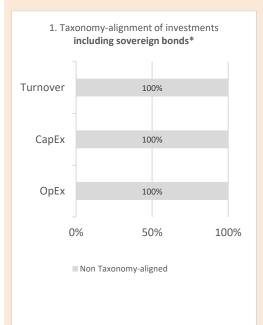

## Transitional activities are

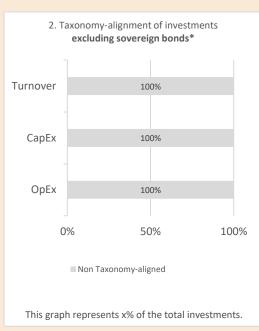

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.

   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

#### What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 17.37%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

#### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The MSCI USA ESG Leaders Index draws its constituents from the MSCI USA Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI USA ESG Leaders Index (Net Return) (7.64 vs 7.64).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% lower than that of the reference benchmark (MSCI USA ESG Leaders Index (Net Return) (59.52 vs 59.59).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI USA ESG Leaders Index (Net Return) (7.64 vs 7.64).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% lower than that of the reference benchmark (MSCI USA ESG Leaders Index (Net Return) (59.52 vs 59.59).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 15.06% higher than that of the parent benchmark (MSCI USA Index) (7.64 vs 6.64).

A combined weighted Scope 1 and 2 average carbon intensity was 38.47% lower than that of the parent benchmark (MSCI USA Index) (59.52 vs 96.74).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

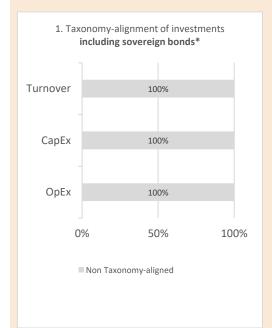

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

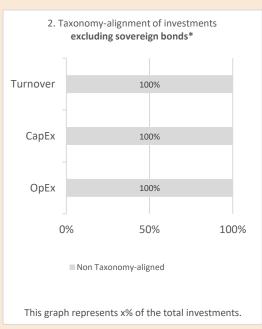

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 30.26%

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The MSCI USA Small Cap ESG Leaders Index draws its constituents from the MSCI USA Small Cap Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.14% lower than that of the reference benchmark (MSCI USA Small Cap ESG Leaders Index (Net Return) (6.90 vs 6.91).

#### Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

A combined weighted Scope 1 and 2 average carbon intensity was equal that of the reference benchmark benchmark (MSCI USA Small Cap ESG Leaders Index (Net Return). (63.57 vs 63.57).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.14% lower than that of the reference benchmark benchmark (MSCI USA Small Cap ESG Leaders Index (Net Return). (6.90 vs 6.91).

A combined weighted Scope 1 and 2 average carbon intensity was equal that of the reference benchmark benchmark (MSCI USA Small Cap ESG Leaders Index (Net Return). (63.57 vs 63.57).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 22.12% higher than that of the parent benchmark (MSCI USA Small Cap) (6.90 vs 5.65).

A combined weighted Scope 1 and 2 average carbon intensity was 42.18% lower than that of the parent benchmark (MSCI USA Small Cap) (63.57 vs 109.95).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** UBS (Irl) ETF plc – MSCI USA Tech 125 ESG Universal UCITS ETF

Legal entity identifier: 3912001G50M74O9YC160

# Environmental and/or social characteristics

Did th	Did this financial product have a sustainable investment objective?			
••	Yes		×	No
	It made sustainable investments with an vironmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	C w in	hara hile i	economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	t made sustainable investments vith a social objective:%			moted E/S characteristics, but did not any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 6.63% higher than that of the parent benchmark (MSCI USA Index) (7.08 vs 6.64).

A combined weighted Scope 1 and 2 average carbon intensity was 83.92% lower than that of the parent benchmark (MSCI USA Index). (15.57 vs 96.80).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ... and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI USA Tech 125 ESG Universal Index (Net Return) aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

# How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the supplement annex for each fund.

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

#### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.97%. The proportion of sustainable investments of the financial product was 81.34%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

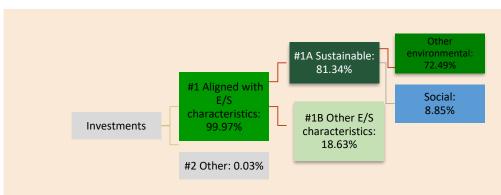

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

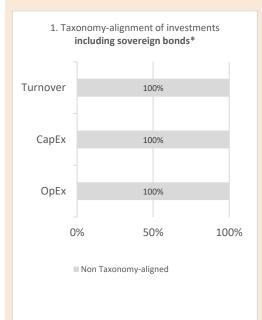

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

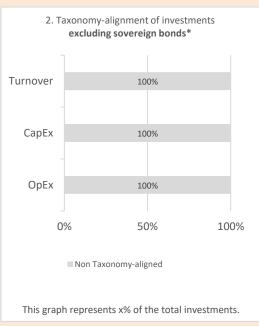

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

#### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 8.85%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and

the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

#### How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI USA Tech 125 ESG Universal Index (Net Return).) (7.08 vs 7.08).

A combined weighted Scope 1 and 2 average carbon intensity was 0.06% higher than that of the reference benchmark benchmark (MSCI USA Tech 125 ESG Universal Index (Net Return). (15.57 vs 15.56).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark benchmark (MSCI USA Tech 125 ESG Universal Index (Net Return). (7.08 vs 7.08).

A combined weighted Scope 1 and 2 average carbon intensity was 0.06% lower than that of the reference benchmark benchmark (MSCI USA Tech 125 ESG Universal Index (Net Return). (15.57 vs 15.56).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 6.63% higher than that of the parent benchmark (MSCI USA Index) (7.08 vs 6.64).

A combined weighted Scope 1 and 2 average carbon intensity was 83.92% lower than that of the parent benchmark (MSCI USA Index) (15.57 vs 96.80).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	● ○ 🗶 No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.35% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments		

Sustainability indicators measure how the environmental or social

characteristics promoted by the

financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 15.90% higher than that of the parent benchmark (MSCI World Index) (8.02 vs 6.92).

A combined weighted Scope 1 and 2 average carbon intensity was 22.43% lower than that of the parent benchmark (MSCI World Index) (75.86 vs 97.80).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI Canada ESG Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The MSCI World ESG Leaders Minimum Volatility Index draws its constituents from the MSCI World Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index. The index is calculated by optimizing the MSCI World ESG Leaders Index for the lowest absolute risk (within a given set of constraints).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

#### In which economic sectors were the investments made?

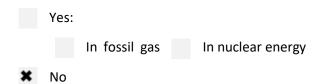

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

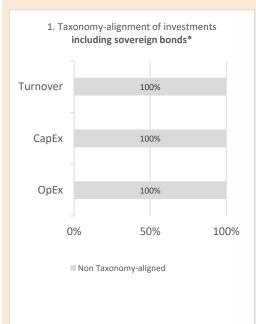

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

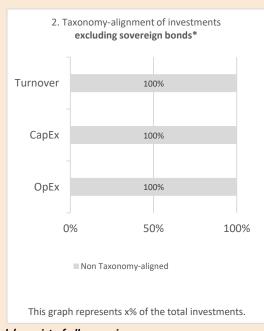

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.
  - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 32.17%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### How does the reference benchmark differ from a broad market index?

The MSCI World ESG Leaders Minimum Volatility Index draws its constituents from the MSCI World Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index. The index is calculated by optimizing the MSCI World ESG Leaders Index for the lowest absolute risk (within a given set of constraints).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI World ESG Leaders Minimum Volatility Index (Net Return)) (8.02 vs 8.03).

A combined weighted Scope 1 and 2 average carbon intensity was 0.22% lower than that of the reference benchmark (MSCI World ESG Leaders Minimum Volatility Index (Net Return)) (75.86 vs 76.03).

#### How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI World ESG Leaders Minimum Volatility Index (Net Return)) (8.02 vs 8.03).

A combined weighted Scope 1 and 2 average carbon intensity was 0.22% lower than that of the reference benchmark (MSCI World ESG Leaders Minimum Volatility Index (Net Return)) (75.86 vs 76.03).

#### How did this financial product perform compared with the broad market index?

The ESG Score was 15.90% higher than that of the parent benchmark (MSCI World Index) (8.02 vs 6.92).

A combined weighted Scope 1 and 2 average carbon intensity was 22.43% lower than that of the parent benchmark (MSCI World Index) (75.86 vs 97.80).

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier:

UBS (Irl) ETF plc – FTSE EPRA Nareit Developed Green UCITS ETF

# **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?			
Yes	• No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.27% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not make any sustainable investments</b>		

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities.

Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

Sustainable

practices.

investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG Score was 2.49% lower than that of the parent benchmark (FTSE EPRA Nareit Developed Index) (5.88 vs 6.03).

A combined weighted Scope 1 and 2 average carbon intensity was 1.95% higher than that of the parent benchmark (FTSE EPRA Nareit Developed Index) (88.57 vs 86.88).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

#### ...and compared to previous periods?

2024 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index with a minimum proportion of 20% of sustainable investments. The objective of the sustainable investments is to produce a portfolio with a higher MSCI ESG Score and a lower Carbon Intensity (1, 2) emissions indicator than the Broad Market Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Companies without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology and below.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.

Information regarding how the Fund's environmental or social characteristics are met, will be included with the Fund's annual report.

#### What were the top investments of this financial product?

<sup>\*</sup>Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

#### Enabling activities directly enable other activities to make a substantial contribution to an

contribution to a environmental objective.

## Transitional activities are

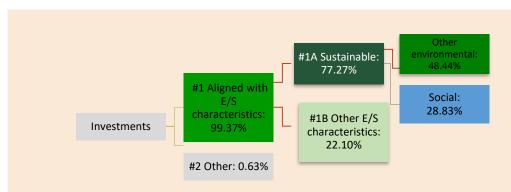

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.37%. The proportion of sustainable investments of the financial product was 77.27%.

#### What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

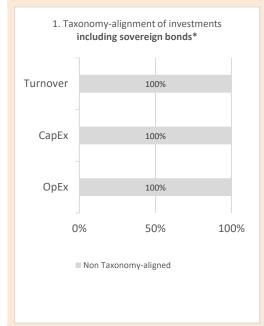

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies.
- capital
   expenditure
   (CapEx) showing
   the green
   investments made
   by investee
   companies, e.g. for
   a transition to a
   green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

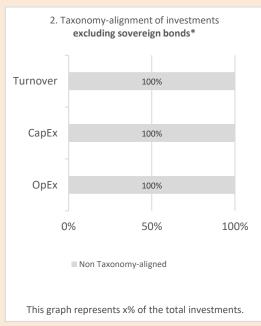

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

  There were no investments in transitional and enabling activities.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

# What was the share of socially sustainable investments? What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 28.83%.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the index and to minimize the tracking error. The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

#### How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the FTSE EPRA Nareit Developed Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier FTSE and denominated in USD.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.17% lower than that of the reference benchmark (FTSE EPRA Nareit Developed Green Index) (5.88 vs 5.89).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% lower than that of the reference benchmark (FTSE EPRA Nareit Developed Green Index) (88.57 vs 88.68).

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.17% lower than that of the reference benchmark (FTSE EPRA Nareit Developed Green Index) (5.88 vs 5.89).

A combined weighted Scope 1 and 2 average carbon intensity was 0.12% lower than that of the reference benchmark (FTSE EPRA Nareit Developed Green Index) (88.57 vs 88.68).

How did this financial product perform compared with the broad market index?

The ESG Score was 2.49% lower than that of the parent benchmark (FTSE EPRA Nareit Developed (5.88 vs 6.03).

A combined weighted Scope 1 and 2 average carbon intensity was 1.95% higher than that of the parent benchmark (FTSE FTSE EPRA Nareit Developed) (88.57 vs. 86.88).
