¹As of 1 March 2024, UBS Asset Management (Americas) Inc. changed its form of corporation and was renamed UBS Asset Management (Americas) ITC

² As of 1 July 2024, Mrs Marie Antoinette Petrini has changed the company of employment from UBS Asset Management Spain, Madrid to UBS Asset Management (Europe) S.A., Spain (previously known as UBS Fund Management (Luxembourg) S.A.)

³ As of 1 October 2024, The Management Company changed its name from UBS Fund Management (Luxembourg) S.A. to UBS Asset Management (Europe) S.A.

Letter to Shareholders

We are pleased to present the 23rd annual report for UBS (Lux) Fund Solutions, formerly UBS ETF, covering the reporting period from 1 January 2024 to 31 December 2024.

The Fund range saw growing assets by EUR 7.1billion, increasing the total AuM in UBS (Lux) Fund Solutions to EUR 50.7 billion as of 31 December 2024.

In 2024, the European ETF market saw record inflow on the back of very strong US equity markets and strong demand for ETFs within the direct investing or retail client segment. Sustainable flows once again took a back seat to core equity and fixed income exposures, as investors navigated volatile interest rates and the strong demand for core equity exposure. UBS AM sales focused on core and ESG exposure promotion, always providing those solutions which were most commonly noted by our clients. The European market continued to move towards a top-heavy, winner takes all structure, as core equity flow and broad shelves proved to be vital for the continued success of Europe's largest providers.

To accommodate with our investor's needs, we have extended our currency-hedged offering and launched (hedged to AUD) Share Classes on UBS (Lux) Fund Solutions – Bloomberg TIPS 1-10 UCITS ETF and UBS (Lux) Fund Solutions – Sustainable Development Bank Bonds UCITS ETF.

Furthermore, on the UBS (Lux) Fund Solutions - EURO STOXX 50 ESG UCITS ETF we have launched a (EUR) A-acc Share Class. And for the UBS (Lux) Fund Solutions – Sustainable Development Bank Bonds 5-10 Index Fund, we have extended our offering with the launch of the first hybrid Share Classes, UCITS ETF (USD) A-acc and UCITS ETF (hedged to EUR) A-acc. The combination of Index Fund and UCITS ETF Share Classes allow investors that prefer ETF structures to access funds with well-established assets under management through a variety of unhedged and hedged exposures to accommodate requirements within their portfolio construction needs.

At the end of 2024, UBS AM was the 5th largest ETF house in Europe, as measured by Assets under Management. Inflows were consistent across a range of equity products as well as select fixed income funds, as the market gravitated towards core equity exposure as well as ESG and short-term Fixed Income exposures. The ETF business overall (across all platforms) finished the year with approx. USD 7.2 billion in Net New Money. The Swiss and Strategic Markets (Nordics in particular) regions stood out with strong Net New Money and very active client flow throughout the year. Germany and Austria, as well as Iberia also managed to attract positive flows throughout the year, contributing to the final Net New Money figure accordingly. The integration of Credit Suisse, both in terms of products and team colleagues, was successfully completed within the year, as the prior CS ETF business one of the first fund families to be migrated over to UBS systems completely. Overall, 2024 was a positive year for the business, despite the numerous internal and external distractions – and 2025 will again prove to be a key year in the development of the business, as UBS AM's strategic review of the overall business concludes and growth once again is fully in focus for the years ahead.

Global stocks had the best first quarter in five years, amid optimism over the outlook for the US economy and hopes that AI will boost corporate profits. The MSCI All Country World Index delivered a total return of 8.2% in the first quarter, the strongest performance in the first three months of the year since 2019.

The gains came despite greater caution in markets over the likely pace and extent of rate cuts from the Federal Reserve in 2024. Having priced as many as six quarter-point cuts for 2024 at the peak in January, markets ended March implying around three cuts. This reflected data suggesting that the improvement in inflation stalled in the first two months of the year, contributing to a mixed quarter for government bonds. Both the Bloomberg index for US Treasuries and the Pan-European Aggregate delivered negative returns for the quarter, though they regained some lost ground in March.

The Swiss National Bank kicked off the global rate-cutting cycle in March, taking investors by surprise to become the first developed-nation central bank to ease policy since the aftermath of the COVID-19 pandemic. Meanwhile, the Bank of Japan enacted its first rate hike in 17 years - ending an eight-year stretch of negative interest rates.

The second quarter ended on a high note, with global equities returning 2.6% in June. Gains were led by the S&P 500, which returned 3.6%. US returns were boosted by further evidence that US inflation is moderating, paving the way for rate cuts by the Federal Reserve. Optimism was kindled by the release of the consumer price index, which showed core inflation rising by a monthly 0.16% in May, the smallest increase since summer 2021. This was confirmed on the last trading day of the first half. The Fed's favourite measure of inflation— the core personal consumption expenditure index—rose just 0.08% in May, its smallest increase since 2020.

The Fed remained cautious on the outlook for easing, with the median forecast of top officials for just one rate cut in 2024 versus three in their prior projection from March. Meanwhile, the global cutting cycle continued, with the European Central Bank trimming rates for the first time since 2019. The Bank of Canada also eased policy, and the Swiss National Bank cut rates for a second time in three months.

Letter to Shareholders

Artificial intelligence remained a major theme for markets, fuelling the US stock rally. Chipmaker NVIDIA briefly became the world's largest company, overtaking Microsoft and Apple. Although NVIDIA quickly gave up the top spot and stood 9% below its all-time high on 18 June, it still ended the month 12.7% higher and up around 150% in the first half of the year.

Global equities bucked the seasonal trend for weakness in September, with the MSCI AC World Index delivering 2% returns over the month. Gains were led by MSCI China, as a combination of fiscal and monetary easing announcements propelled the index to a 23.3% rally and a ninth consecutive day of gains to close out September.

The most notable development for global markets in September was the beginning of the much-anticipated US rate-cutting cycle and the subsequent all-time highs for select US stock indexes. While US stocks began the month with declines on a soft August ISM manufacturing report, choppy trading for megacap tech stocks, and weaker-than-expected August payrolls data, they recovered their poise as the Federal Reserve began its easing cycle with a decisive 50-basis-point cut to support the US economy from a position of strength. Personal consumption expenditure (PCE) inflation data, the Fed's favourite measure, released at month-end struck an optimistic note, with August headline data of a 2.2% year-over-year increase undershooting market expectations and recording its lowest reading since February 2021.

A second major theme of September was the broadening and continuation of the global rate-cutting cycle, with major central banks lowering borrowing costs as growth concerns mount and inflation pressures ebb. The European Central Bank (ECB) cut rates in mid-September on tepid growth and further falls in inflation. Preliminary inflation data for September from several of the Eurozone's major economies was weaker than expected, with the annual rate in France falling to 1.2% (the lowest level since July 2021) and dropping to 1.5% from 2.3% in August for Spain.

Markets ended the year in a more cautious mood, as investors scaled back expectations for the Federal Reserve's pace of rate cuts after a hawkish December policy meeting. The MSCI All Country World and the S&P 500 lost 1.6% and 2.4%, respectively, in the final month of the year.

Despite the retreat in December, global stocks returned 20.7% for 2024 overall. The gains were led by the S&P 500, with a return of 25%. This was the second consecutive year in which the index advanced more than 20%, with US large cap stocks delivering their best two-year performance this century.

Markets have been supported by a combination of progress in bringing inflation back to central bank targets, monetary easing, the strength of the US economy, and optimism over the commercialization of artificial intelligence (AI). The importance in AI in driving equity gains was underlined by a 50.5% advance in the NYSE FANG+ index, which tracks the top 10 most-traded US technology companies.

Without taking any single-name views, shares in NVIDIA, the chipmaker that became the main focus of enthusiasm over AI, gained 171.2% after a 238.9% rise in 2023. An equal- weighted version of the S&P 500, which dilutes the impact of the megacap tech firms, gained 13%.

Treasury markets faced headwinds in December, after the Federal Reserve pointed to a slower pace of easing for 2025 at its final policy meeting of the year. That capped a volatile year of trading in US government bonds, amid shifting market expectations over the speed and extent of Fed rate cuts. The yield on the 10-year US Treasury, which started the year at 3.86%, ended at 4.57% - having risen as high as 4.7% in April and as low as 3.62% in September on a closing basis. The 10-year US Treasury yield has now moved up for four consecutive years for the first time since the 1980s.

For 2024 overall, the highest returns were in US and Euro high yield credit, with returns of 8.2% and 8.6% respectively. Investment grade bonds also produced positive returns. The Bloomberg US Credit index returned 2% in 2024 and its Euro counterpart delivered 4.7%.

Our Sub-Funds seek to closely track the performance of the underlying market indices. The investment returns of the Sub-Funds reflected the underlying market environment in 2024 and are shown in the table on the following page, expressed in the base currency of each Share Class as well as the tracking difference and the tracking error.

Letter to Shareholders

We thank you for the confidence you have shown in our family of UBS (Lux) Fund Solutions funds. We look forward to your continued support and to meeting your investment goals in the years ahead.

Sincerely,

13 March 2025

Chairman of the Board of Directors

^{*} The ETF Share Class launched during the reporting year. Please refer to Note 1 within the notes of the 2024 Financial Statements for further details.

** The ETF Share Class was launched less than 12 months before the end of the reporting period. Therefore, no tracking error (ex post) has been calculated for this ETF Share Class.

**** Management fee changes took place during the reporting year. Please refer to Note 3 within the notes of the 2024 Financial Statements for further details.

**** Share Class split during period. The performance calculation has been adjusted for the split. Please refer to Note 16 within the notes of the 2024 Financial Statements for further details.

***** Due to a bank holiday, the last official NAV per share was 30 December 2024.

****** The NAV per share was calculated 31 December 2024, whilst index figures relates to 30 December 2024.

¹⁾ The figures relating to the performances of the Sub-Funds reflect the percentage changes of official NAVs per share (cum dividends) over the reporting period. Last official NAV per share was 31 December 2024, or 30 December 2024 for Sub-Funds with a market holiday. The same period was used for the figures relating to the performance of the index against which an investment fund's performance is measured. The tracking difference is attributable to fund expenses (see "TER"), as well as non-reclaimable withholding taxes and to generation of securities lending income.

The Sub-Fund's Portfolio Manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's Index will not exceed 1% for ETF Sub-Funds and 1.5% for index Sub-Funds, under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking accuracy to exceed 1%, it is expected that the normal annual return difference will be no more than 5%.

3) Tracking error: annualised standard deviation.

The Sub-Fund's Portfolio Manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% for ETF Sub-Funds and 1.5% for index Sub-Fund and that Sub-Fund's under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund and that Sub-Fund's index, below or equal to 1% for ETF Sub-Funds and 1.5% for index Sub-Fund and that Sub-Fund's under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund and that Sub-Fund's under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund and that Sub-Fund's under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund and that Sub-Fund's under normal market conditions. However, exceptional ci

Performance from 1 January 2024 to 31 December 2024

4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (AMAS) *Guidelines on the calculation and disclosure of the TER* in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

Sub-Funds	Performance of the Sub-Fund (in %) (1) (unaudited)	Performance of the tracked index (in %) (unaudited)	Tracking difference (in %) (2) (unaudited)	Tracking error (ex post) (in %) (3) (unaudited)	Total Expense Ratio (TER) (in %) (4) (audited)

Additional details are available on the following website (News section): https://www.ubs.com/ch/en/assetmanagement/about/news/etfs-news/etf-news-display-ndp/en-20240126-ubs-issue-disclosure-msci.html?caasID=CAAS-ActivityStream

^{**} Management fee changes took place during the reporting year. Please refer to Note 3 within the notes of the 2023 Financial Statements for further details.

** Sub-Fund's name change took place during the reporting year. Please refer to Note 3 within the notes of the 2023 Financial Statements for further details.

*** The ETF Share Class was launched during the reporting year. Please refer to Note 1 within the notes of the 2023 Financial Statements for further details.

*** The ETF Share Class was launched less than 12 months before the end of the reporting year. Therefore, no tracking error (ex post) has been calculated for this ETF Share Class.

(a) Effective 31 July 2023 the index changed from MSCI EMU Prime Value Index (Net Return) (M7CXEMUP) to MSCI EMU Prime Value ESG Low Carbon Index (Net Return) (NU752968).

(b) Effective 31 July 2023 the index changed from MSCI EMU Quality Index (Net Return) (M7CXEMUP) to MSCI EMU Quality ESG Low Carbon Index (Net Return) (NU752970).

(c) Effective 31 July 2023 the index changed from MSCI EMU Quality Index (Net Return) (M3CXEMUP) to MSCI EMU Quality ESG Low Carbon Index (Net Return) (NU752970).

(d) MSCI notes that this Index related to this Sub-Fund and Class was affected by a technical implementation issue from launch until the November 2023 Index Review. This technical issue was resolved as of the 1 December 2023 rebalance and did not undermine the stated objective nor any of the defining characteristics of the index.

Additional details are available on the following website (News section):

¹⁾ The figures relating to the performances of the Sub-Funds reflect the percentage changes of official NAVs per share (cum dividends) over the reporting period. 29 December was the last official NAVs per share unless otherwise stated. The same period was used for the figures relating to the performance of the tracked index.

2) The figures relating to the performances of the index against which an investment fund's performance is measured. The tracking difference is attributable to fund expenses (see "TER"), as well as non-reclaimable withholding taxes and to generation of securities lending income.

Performance from 1 January 2023 to 31 December 2023

The Sub-Fund's Portfolio Manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's Index will not exceed 1% for IrET Sub-Funds and 1.5% for Index Sub-Funds, under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking accuracy to exceed 1%, it is expected that the normal annual return differences will be no more than 5%.

3) Tracking error: annualised standard deviation.

The Sub-Fund's Portfolio Manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% for ETF Sub-Funds and 1.5% for index Sub-Fund, under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund and that Sub-Fund's index, below or equal to 1% for ETF Sub-Funds and 1.5% for index Sub-Fund possible, it is expected that the annual tracking error to exceed 1%. In relation to those certain Sub-Funds where such accuracy is not practicably possible, it is expected that the annual tracking error will be no more than 3%.

Tracking error calculation:

The tracking error for the last 12 months is calculated as follows: =STANDARD DEVIATION (Monthly Excess calculated each month over a 12-month period)*SQUARE ROOT(12)

4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (ANAS) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Historical performance is no indicator of current or future performance

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

(a) Effective 1 April 2022 the index changed from Bloomberg Euro HQLA 1-5 Years Bond Index (Total Return) (133712EU) to Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index (Total Return) (136689EU).

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

¹⁾ The figures relating to the performances of the Sub-Funds reflect the percentage changes of official NAVs per share (cum dividends) over the reporting period. 30 December was the last official NAVs per share unless otherwise stated. The same period was used for the figures relating to the performance of the tracked index.

2) The tracking difference is attributable to fund expenses (see "TER"), as well as non-reclaimable withholding taxes and to generation of securities lending income.

The Sub-Fund's Portfolio Nanager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's index will not exceed 1% under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking accuracy to exceed 1%.

exceed 1% under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's fracking accuracy to exceed 1%.

3) Tracking error: annualised standard deviation.

The Sub-Fund's Portfolio Manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking error to exceed 1%.

Tracking error calculation:

The tracking error for the last 12 months is calculated as follows: =STANDARD DEVIATION (Monthly Excess calculated each month over a 12-month period)*SQUARE ROOT(12)

4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (AMAS) *Guidelines on the calculation and disclosure of the TER* in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Independent Auditor's Report

To the Shareholders of UBS (Lux) Fund Solutions 49, Avenue J.F. Kennedy L-1855 Luxembourg

Report on the audit of the financial statements

Opinion

We have audited the financial statements of UBS (Lux) Fund Solutions (the "Fund") and of each of its subfunds, which comprise the Statement of Net Assets and the Schedule of investments as at 31 December 2024 and the Statement of Operations and Statement of Changes in Net Assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-fund as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matters

Valuation of investment portfolio

Valuation of investment portfolio is considered to be a Key Audit Matter as potential misstatements could have a significant impact as investments comprise virtually all of the Fund's net assets and are the source of income, gains and losses.

Existence of Investment portfolio

Existence of investment portfolio is considered to be a Key Audit Matter as potential misstatements could have a significant impact as investments comprise virtually all of the Fund's net assets and are the source of income, gains and losses.

How our audit addressed the Key audit matter

- Obtaining an understanding and evaluating the key controls that have been implemented over the
 valuation process for of all investment securities. This includes obtaining the service auditor's report of
 the Administrator and identifying the key controls in place at the Administrator over the investment
 valuation process.
- Performing an independent valuation testing for all securities as at 31 December 2024.
- Obtaining an understanding and evaluating the key controls that have been implemented over the
 reconciliation process of all investment securities. This includes obtaining the service auditor's report of
 the Administrator and identifying the key controls in place at the Administrator over the investment
 reconciliation process.
- Obtaining independent confirmations of all investment securities held at year-end and investigating any
 material differences identified to confirm the existence of these securities.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund and of those charged with governance for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with the ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as "réviseur d'entreprises agréé" by the General Meeting of the Shareholders on 17 April 2024 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 4 years.

We confirm that the prohibited non-audit services referred to in EU Regulation No 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

Notes to Financial Statements

Note 1 Description of the Fund

UBS (Lux) Fund Solutions, formerly UBS ETF (the "Company") was incorporated in the Grand Duchy of Luxembourg as an open-ended investment company (a "Société d'Investissement à Capital Variable") on 7 September 2001 for an unlimited period under the original name of "Fresco". The Company is governed by the Luxembourg Law of 10 August 1915 on commercial companies, as amended, and by Part I of the Luxembourg Law of 17 December 2010 on undertakings for collective investments, as amended. Accordingly, each Sub-Fund has been established for an unlimited period. The registered office of the company is established at 49, Avenue J.F. Kennedy, L-1855 Luxembourg.

The Company has appointed UBS Asset Management (Europe) S.A. to act as its management company (the "Management Company") with effect as of 1 July 2012.

The Company's Articles of Incorporation (the "Articles") have been published in their original version in the Mémorial, Recueil des Sociétés et Associations (the "Mémorial") dated 11 October 2001. The notarial deed containing the minutes of the extraordinary general meeting held on 29 November 2004 deciding the change of the denomination of the company into UBS ETF has been published in the Mémorial dated 23 December 2004. Additionally, the notarial deed containing the minutes of the extraordinary general meeting held on 27 December 2005, amending the Articles related to the compliance by the Company with the rules of the amended directive 85/611/ EEC, has been published in the Mémorial dated 30 January 2006. Finally, the notarial deed containing the minutes of the extraordinary general meeting held on 18 January 2016, amending the Articles as to allow for the issuance of registered shares only has been published in the Mémorial dated 7 April 2016. All bearer shares were converted to registered shares as of 8 February 2016. Moreover, the consolidated version of the Articles has been deposited with the Luxembourg company register. On 7 April 2021 an extraordinary meeting of shareholders was held, amending the Articles, in order to, inter alia, update outdated references to laws and regulations contained and change the name of the Company from "UBS ETF" to "UBS (Lux) Fund Solutions. Articles has been published in the Mémorial dated 30 April 2021. On 22 December 2023 an extraordinary meeting of shareholders was held, amending the Articles, inter alia, update outdated references to laws and regulations. Articles have been published in the Mémorial dated 23 January 2024.

The Company has been established to provide investors with an opportunity to purchase Shares in its Sub-Funds, the investment objective of each of which is to aim to track a specific Index. Each Sub-Fund aims to replicate or track, before expenses, the price and income performance of its Index by holding a portfolio of transferable securities that comprises all or substantially all of the component securities of its Index.

Each Sub-Fund will have Shares listed on one or more Listing Stock Exchanges to be an Exchange Traded Fund ("ETF"). With the exceptions detailed in the prospectus, only institutions qualifying as Authorised Participants are able to subscribe or redeem Shares by delivery of in kind stocks, which mostly are stocks composing the relevant index or versus cash. Those subscriptions and redemptions minimise fund turnover and lower trading expenses. A secondary market is created through such Authorised Participants. Persons who are not Authorised Participants are able to buy or sell Shares in a Subfund on a Listing Stock Exchange at prices which should approximate to the Indicative Intra-Day NAV per Share from other investors in Shares who are acting as market makers or broker/dealers.

In order to allow participants in the secondary market to have access to a real-time estimate of the Daily NAV per Share, an Indicative Intra-Day NAV per Share is calculated by a calculation agent.

For Index Sub-Funds the Board of Directors is authorised without limitation to issue shares of any Sub-Fund and Share Class at any time; and shareholders have the right to request, at any time, to have their shares redeemed by the Management Company, under the conditions as described in the prospectus.

The Index Sub-Fund must invest its net assets predominantly in shares, transferable securities, money market instruments, units of UCIs, deposits with credit institutions, structured notes listed or dealt in on a Regulated Market, other assets and derivatives detailed in the prospectus.

As of 31 December 2024, the following ETF and Index Share Classes of the following Sub-Funds are available:

Listing

The shares of each Sub-Fund will be listed and admitted for trading on a number of stock exchanges. For details of where shares are listed or admitted for trading, please refer to the official UBS website www.ubs.com/etf.

Note 2 Summary of Significant Accounting Policies

A) Presentation of Financial Statements

The Financial Statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg.

This annual report is prepared on the basis of the last available net asset value of the Sub-Funds as at 31 December 2024. Which may be different from the last official published NAV for 2024.

B) Main Investment Valuation Principles

Securities listed on a recognised stock exchange or dealt in on any other Regulated Market are valued at their last available closing prices, or, in the event that there are several such markets, on the basis of their last available closing prices on the principal market for the relevant security provided that such closing prices used are normally the same as those used by the Index Provider in calculating the value of each Sub-Fund's Index, but in the event that the last available price does not truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors based on the reasonably foreseeable sales price determined prudently and in good faith.

Securities not listed or traded on a stock exchange or not dealt in on another Regulated Market are valued on the basis of the probable sales price determined prudently and in good faith by the Board of Directors.

The liquidating value of futures, forward or options contracts traded on exchanges or on other Regulated Markets are based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a future, forward or option contract cannot be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors may deem fair and reasonable.

C) Treatment of Currencies

The books and records of each Sub-Fund are denominated in the Base Currencies. All assets and liabilities of the Sub-Funds expressed in a currency other than the Base Currency are converted into the Base Currency at the exchange rate prevailing on the principal Regulated Market of such asset on the Dealing Day preceding the Valuation Time.

In order to prepare combined financial statements, financial statements of each Sub-Fund that is not EUR denominated have been converted into EUR at the following exchange rates:

D) Security Transactions and Investment Income

The net realised gain or loss on portfolio securities sold or paid out in kind as part of the redemption price for shares is determined on the average cost basis.

The assets of the Company include all stocks, stock dividends, cash dividends and cash distributions receivable by the Company to the extent that information therein is reasonably available to the Company and all interest accrued on any interest-bearing portfolio securities owned by the Company, except to the extent that it is included or reflected in the principal amount of such security. Dividends and interest income are accrued net of related withholding tax.

For bonds purchased at a discount interest income is accrued until it's redemption and disclosed in accretion of discount in the statement of operations. Whilst accrued interest expense for bonds purchased at a premium is shown in amortization on bonds line.

E) Options and Future Contracts

For the purpose of efficient portfolio management, the Company may enter into future contracts as set forth in the prospectus.

Initial margin deposits made upon entering into future contracts are included in deposits on financial future contracts in the Statement of Net Assets. The unrealised appreciation or depreciation on open future contracts is calculated as the difference between the contract price at trade date and the current day price on the last Business Day of the reporting year or period. Realised gains or losses represent the difference between the value of the contract at the time it was opened and the value at the time it was closed or expired.

For the purpose of efficient portfolio management, the Company may furthermore purchase and write (sell) options as set forth in the prospectus.

The risk associated with purchasing an option is that the Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the premium and any change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of portfolio securities acquired through the exercise of call options is increased by premium paid. The proceeds from portfolio securities sold through the exercise of put options are decreased by the premiums paid.

When the Company writes an option the premium received by the Company is recorded as a liability and is subsequently adjusted to the current market value of the option written. The Company records premiums received from written options that expire unexercised on the expiration date as realised gains from option transactions. The difference between the premium and the amount paid on the effective closing purchase transaction, including brokerage commissions, is also treated as a realised gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realised loss.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Company has realised a gain or a loss.

If a written put option is exercised, the premium reduces the cost basis of the security purchased by the Company.

In writing covered options, the Company bears the market risk of unfavourable change in the price of the security underlying the written option. Exercise of an option written by the Company could result in the Company selling or buying a security at a price different from the current market value. Losses from written market index options may be unlimited.

As of 31 December 2024, the Company had no outstanding options contracts and had outstanding future contracts as disclosed in the Schedule of Investments.

F) Forward Foreign Exchange Contracts

As described in the prospectus, each Sub-Fund is authorised to enter into forward foreign exchange contracts in order to protect a Sub-Fund against adverse movement in the value of a Sub-Fund's Base Currency. Each Sub-Fund may enter into contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date as a hedge or crosshedge against either specific transactions or portfolio positions.

The aggregate principal amounts are reflected net in the accompanying Statement of Net Assets if a Sub-Fund intends to settle the contract prior to delivery. All commitments are marked-to-market at the applicable translation rates and any resulting unrealised gains or losses are recorded in each Sub-Fund's financial statements.

Each Sub-Fund/Share Class records realised gains or losses at the time the forward foreign exchange contract is offset by entry into a closing transaction or extinguished by delivery of the currency. Risks may arise upon entering these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the Base Currency.

As of 31 December 2024, the Company had outstanding forward foreign exchange contracts as disclosed in the Schedules of Investments.

G) Swap Contracts

The Company may enter into swap contracts in which the Company and the counterparty agree to exchange the returns generated by a security, instrument, basket or index thereof for the return generated by another security, instrument, basket or index thereof. The payments made by the Company to the counterparty and vice versa are calculated by reference to a specific security, index, or instrument and an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, fixed interest rates, prices and total return on interest rate indices, fixed income indices and stock indices.

The commitment arising on a swap transaction is equal to the value of the net position under the contract marked to market daily.

As of 31 December 2024, the Company had no outstanding swap contracts.

H) Cross Sub-Fund investments

As of 31 December 2024, the Company had no cross investment.

Note 3 Agreements

In principle and unless specified in the prospectus, for all Share Classes, each Sub-Fund pays a Management Fee which may be different for the various Share Classes of the Sub-Fund. The Management Fee is allocated by the Company among the Sub-Funds and paid through the Depositary to the Management Company, after deducting any fees payable to the Distributor, if any. The Management Company will pay out of its fees the Company Administrator and the Portfolio Manager, each of which is a service provider. The fees for the Distributor, if any, are directly paid by the Company to the distributors.

The Management Fee is a flat fee calculated on the average daily NAV of the Sub-Fund attributable to the relevant class of shares and is payable monthly in arrears.

Directors Andreas Haberzeth and Clemens Reuter are employees of UBS Asset Management Switzerland AG which acts as the Distributor and as the Portfolio Manager.

Director Marie Antoinette Petrini is an employee of UBS Asset Management (Europe) S.A., Spain.

Director Josée Lynda Denis is an Independent Board Member.

Director Anke Jager is an Independent Board Member.

Non-Independent Directors of the Company do not receive any additional fees for their role as Directors. Only Independent Directors are entitled to a Director's fee.

UBS Information Agents and UBS as Lending Service Providers

Agents for Swiss residents only

The Company has appointed UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel as Representation Agent of the Company in Switzerland.

The Company has appointed UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and its branches in Switzerland as Paying Agent of the Company in Switzerland.

The prospectus, Packaged Retail and Insurance-based Investment Products (PRIIPs), management regulations, annual and semi-annual reports as well as the portfolio movements of the investment fund mentioned in this publication are available free of charge from UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and from UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel.

Agents for UK residents only

The Company has appointed UBS Asset Management (UK) Ltd, 5 Broadgate, EC2M 2QS London as Paying Agent in the United Kingdom.

Company Administrator, Domiciliary, Depositary, Corporate, Paying Agent and Securities Lending Agent

State Street Bank International GmbH, Luxembourg Branch, 49, Avenue J.F. Kennedy, L-1855 Luxembourg, acts as the Company's Administrator, Domiciliary, Depositary, Corporate and Paying agent in Luxembourg, Registrar and Transfer Agent and is responsible for the general administrative duties involved in administering the Company as prescribed by Luxembourg laws and acting as the Transfer Agent. These duties include domiciliation, calculation of the Daily NAV per Share and the keeping of the Company's accounts, as well as reporting. Moreover, the Administrative Agent will be responsible for the issue and redemption of shares in the Company, and all related operations, including processing all subscriptions, redemptions and conversions to or from Authorized Participants.

State Street Bank International GmbH Frankfurt Branch, Brüsseler Straße 1-3, D-60327 Frankfurt am Main, Germany acts as the Company's Securities Lending Agent.

Note 4 Taxation

Investors should be aware that tax regulations and their application or interpretation by the relevant taxation authorities can change periodically. The following should not be taken as constituting legal or tax advice. Investors should obtain information and, if necessary, should consult their professional advisers on the possible tax or other consequences of buying, holding, transferring or selling the Shares under the laws of their countries of origin citizenship, residence or domicile.

Under current laws and practice, the Company is not liable to any Luxembourg income tax, nor are dividends paid by the Company liable to any Luxembourg withholding tax.

No stamp duty or other tax is payable in Luxembourg on the issue of shares by the Company.

In general the Directors intend that each Fund available to UK investors will be certified by HM Revenue & Customs in the UK as reporting funds. The reporting fund status will remain in place permanently provided that the annual reporting requirements are satisfied. In broad terms, a "reporting fund" is an offshore fund that meets certain annual reporting requirements to HM Revenue & Customs and its investors. The Directors intend to manage the affairs of the Company so that these annual duties are met and will continue to be met on an ongoing basis.

Each Sub-Fund of the Company is subject to taxation on capital gains, interest and dividends in certain jurisdictions in which each Sub-Fund invests. It is the policy of each Sub-Fund to accrue for such taxes when the dividend is declared or interest is earned. At each valuation date, taxation on unrealised appreciation of securities is extracted from the redemption proceeds paid to investors.

The Common Reporting Standard ("CRS") has been developed by the OECD to address the issue of offshore tax evasion on a global basis. Prospective investors will be required to provide to the Fund information about themselves and their tax status prior to investment in order to enable the Fund to satisfy its obligations under CRS, and to update that information on a continuing basis. Prospective investors should note the Fund's obligation to disclose such information to the Luxembourg tax authority. The Luxembourg tax authorities will exchange the information with other tax authorities in participating CRS jurisdictions on an annual basis. Each investor acknowledges that the Fund may take such action as it considers necessary in relation to such investor's holding in the Fund to ensure that any withholding tax suffered by the Fund and any other related costs, interest, penalties and other losses and liabilities arising from such investor's failure to provide the requested information to the Fund is economically borne by such investor.

German equity ratios are calculated and distributed daily.

FATCA is the Foreign Account Tax Compliance Act which aims to gather information on overseas accounts held by US Persons and ultimately ensure that the correct amount of tax is paid by US taxpayers.

FATCA enforces reporting obligations on foreign Financial Institutions ("FIs") where these accounts are held.

UBS (Lux) Fund Solutions has been classified as a Sponsored Investment Entity. The sponsoring entity is UBS Asset Management (Europe) S.A. with the GIIN: 9D0VT6.00000.SP.442

Section 871(m) of the US Tax Code requires withholding (up to 30%, depending on whether a treaty applies) on certain financial instruments to the extent that the payments or deemed payments on the financial instruments are contingent upon or determined by reference to U.S.-source dividends. Under these regulations, withholding may be required even in the absence of any actual dividend-related payment or adjustment made pursuant to the terms of the instrument. If the Company becomes subject to a withholding tax as a result of 871(m), the value of the Shares held by the Shareholders may be materially affected. All prospective investors/Shareholders should consult with their own tax advisors regarding the possible implications of 871(m) on an investment in the Company.

DAC6 – Disclosure requirements for reportable crossborder tax arrangements

On 25 June 2018, Council Directive (EU) 2018/822 ("DAC6") entered into force introducing rules regarding the mandatory automatic exchange of information in the field of taxation in relation to reportable cross-border arrangements ("RCBAs"). DAC6 is intended to provide the tax authorities of EU member states with comprehensive and relevant information about potentially aggressive tax-planning arrangements with the aim that this information will enable the authorities to react promptly against harmful tax practices and close loopholes by enacting legislation or by undertaking adequate risk assessments and carrying out tax audits.

The DAC6 obligations apply from 1 July 2020, but may require reporting of arrangements implemented between 25 June 2018 and 30 June 2020. The Directive generally requires EU intermediaries to report to their local tax authorities information about RCBAs, including details of the arrangement as well as identification information about the involved intermediaries and relevant taxpayers, i.e. the persons to whom the RCBA is made available. Subsequently, the local tax authorities exchange the information with the tax authorities of other EU member states. As such, the Fund may be legally required to file information that is within its knowledge, possession or control on any RCBA to the respective tax authorities. This legislation is capable of applying to arrangements that do not necessarily constitute aggressive tax planning.

¹ Share Class launched during period. Please refer to Note 16 within the notes of the Financial Statements for further details.

Note 6 Distribution

Within the limits provided by Luxembourg law, the Board of Directors determines how the income of each Sub-Fund shall be dealt with, and may from time to time declare distributions. The Board of Directors may decide to pay interim dividends in compliance with the conditions set forth by Luxembourg law.

The Company intends for each Sub-Fund to distribute its net income in order to achieve the maximum tracking accuracy of the relevant Index. An income equalization amount will be calculated by reference to the amount of the Daily NAV Per Share representing the accrued net income (or deficit) at the time when a subscription or a redemption in kind is made so that the dividend representing the net investment income corresponds to the net income return of the Index.

For UK dis Share Classes, as defined in the prospectus, Net Investment Income used for determination of distributions may be different that Net Investment Income as per accounting records due to UK tax reporting requirements.

During the period from 1 January 2024 to 31 December 2024, the Company resolved to pay to all shareholders of the Sub-Funds mentioned below dividends which are intended to be paid out of the income net of all costs and expenses incurred by the relevant Sub-Funds during the relevant period as detailed in the following table.

² Share Class merged during period. Please refer to Note 16 within the notes of the Financial Statements for further details.

³ Share Class split during period. Please refer to Note 16 within the notes of the Financial Statements for further details.

² Share Class merged during period. Please refer to Note 16 within the notes of the Financial Statements for further details.

Note 7 Securities Lending

Securities lending is the temporary transfer of securities from the lender (UBS (Lux) Fund Solutions) to a third party borrower through an appointed lending agent. In exchange for the lent security the borrower provides collateral, prior to the delivery of securities, and pays a fee over the period of the loan. All loans within the lending program are open and rolled daily such that they can be terminated on demand

UBS (Lux) Fund Solutions engage in securities lending for selected, physically replicated Sub-Funds with the aim of reducing the investor's net costs. Securities lending with UBS (Lux) Fund Solutions is overcollateralised with at least 105% margin across all asset classes except for US Treasuries. For US Treasuries a margin surplus of at least 2% is maintained such that the value of collateral held is at least 102% of the value of the lent securities. An additional safeguard, introduced 1 April 2014, is that on loan balances are capped at 50% of each Sub-Fund's AUM except for EURO STOXX 50 UCITS ETF. For this Sub-Fund on-loan balance is capped at 25% of the Sub-Fund's AUM.

Effective 4 May 2017, Sub-Funds tracking fixed Income Indices and "ESG", "Paris Aligned" and "Socially Responsible" indexes were not in the security lending program anymore.

In general, lending may only be effected via the Securities Lending Agent (State Street Bank International GmbH, Frankfurt Branch) with the protection of an indemnity against borrower default provided for by State Street Bank and Trust Company. Collateral is held in a depositary account that is ring-fenced from the lending agents balance sheet. Mark to markets take place on a daily basis to ensure that the required margin levels are consistently maintained. Whilst State Street Bank and Trust Company provides a borrower indemnity and carefully selects its underlying list of borrowers an additional level of oversight is provided for by UBS Credit & Risk to structure a bespoke approved borrower list.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

It should be noted that securities lending is subject to a certain risk where the borrower does not return the borrowed securities according to their obligation, and where the value of the collateral provided does not cover the costs of repurchase of the securities. In such cases, State Street Bank and Trust Company, under the terms of the borrower default indemnity, shall cover the cost of purchasing the replacement securities, subject to certain conditions.

From 1 January 2024 to 30 September 2024, at least 60% of the gross revenue received in the context of securities lending transactions was credited to the relevant Sub-Fund while UBS Asset Management Switzerland AG received approximately 20% of the gross revenues to cover the due diligence and 20% of the gross revenues were paid to the Securities Lending Agent as normal compensation for its services in the context of such efficient portfolio management techniques.

The split was updated with the effective date of 1 October 2024, from this date at least 80% of the gross revenue received in the context of securities lending transactions is credited to the relevant Sub-Fund while the Securities Lending Agent approximately receives 20% to cover operational costs resulting from the transactions carried out in relation to the securities lending.

Note 9 Changes in Investment **Portfolio**

A copy of the list of changes in the portfolio during the reference period may be obtained free of charge at the Depositary, at the Paying Agents, at the Swiss representation office in Switzerland as well as at French Centralizing and Financial Agent.

Note 10 Commission arrangements

During the year ended 31 December 2024, no commission sharing arrangements (CSAs) were entered into on behalf of UBS (Lux) Fund Solutions.

Note 11 Transaction Costs

Transaction costs are recognised in the Statement of Operations as part of net change in unrealised gain/(loss) on investments and net realised gain/(loss) on investments.

Transaction costs have been defined as broker commission fees, commission on futures contracts and taxes relating to purchase or sale of equity and investments in other funds. Transaction costs for fixed income investments, forward currency contracts and other derivative contracts are not separately identifiable. For these investments transaction costs are included in the cost of transferable securities in the Statement of Net Asset. Therefore, transaction cost are included in the purchase and sales price and are part of the gross investment performance of each Portfolio.

For the year ended 31 December 2024, the following Sub-Funds incurred separately identifiable transaction costs:

Sub-Fund	Sub-Fund	Transaction	% of Total

Note 12 Other income/expenses

Other income and other expenses relates to CSDR penalties and tax withholding.

Note 13 Auditor's Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial year ended 31 December 2024 is as follows:

	EUR
Statutory audit of company financial statements ¹	263,734
Separate report in relation to CSSF Circular 21/790 ¹	7,871
Merger report ¹	5,467
Total	277,072

1 Inclusive of VAT.

Auditor's out of pocket expenses for the financial year ended 31 December 2024 amounted to EUR Nil.

Note 14 Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the Shareholders, the Company, the Management Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Company, Management

Company and/or depositary can elect to make themselves subject to the jurisdictions of the countries in which the shares were bought and sold. The English version of the prospectus is the authoritative version. This prospectus may also be translated into other languages. To the extent that there is any inconsistency between the English language prospectus and a version in another language, the English language prospectus will prevail, except, to the extent required by the law of any jurisdiction where the shares are sold.

Cross Border Directive

On 2nd August 2021, the EU Cross Border Distribution of Funds Directive (EU 2019/1160) came into effect. Notable changes include the new concept of pre-marketing, a denotification process to cease cross-border fund marketing and changes around the local facilities available to retail investors. Where applicable, UBS Asset Management has amended its internal processes accordingly. As of 1st of August 2019, the EU Regulation on Cross-border Fund Distribution (EU 2019/ 1156) entered into force, which introduced requirements around marketing communications. On 2nd February 2022, ESMA's guidelines on marketing communications started to apply. UBS updated the content and format of marketing materials and the associated production processes to align to the revised requirements.

Central Securities Depositories Regulation

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards ("CSDR"). CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Company when it enters into in-scope transactions may result in increased operational and compliance costs being borne directly or indirectly by the Company. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

Note 15 Replication Strategy

Our approach to passive equity investment is to use full replication where possible depending on the characteristics of the benchmark index, the size of portfolio and the client's desired tracking accuracy. In some situations, the Portfolio Manager may utilize stratified sampling where the Portfolio Manager deems this to be more efficient.

We typically utilize "stratified sampling" approach for our passive fixed income funds. "Stratified sampling" is a quantitative based process, bolstered with qualitative input from our Portfolio Managers, that aims to construct an optimal portfolio that efficiently replicates benchmark risk characteristics with fewer securities that are sufficiently liquid and diversified. However, for certain cases, the optimal portfolio may be achieved by full replication.

In practice, the majority of our Equity ETFs are typically full replication (holding all or virtually all the underlying constituents at weights at or close to the index) and Fixed Income ETFs utilize stratified sampling.

As at 31 December 2024 the following Fixed Income Sub-Funds utilize full replication:

Bloomberg EUR Treasury 1-10 UCITS ETF
Bloomberg Euro Inflation Linked 1-10 UCITS ETF
Bloomberg Euro Inflation Linked 10+ UCITS ETF
Bloomberg Japan Treasury 1-3 Year Bond UCITS ETF
Bloomberg TIPS 1-10 UCITS ETF
Bloomberg TIPS 10+ UCITS ETF
Bloomberg US 1-3 Year Treasury Bond UCITS ETF
Bloomberg US 7-10 Year Treasury Bond UCITS ETF
Bloomberg US 10+ Year Treasury Bond UCITS ETF

For equity ETFs investing in emerging markets we may make use of stock substitutions such as Depository Receipts or foreign listings where we deem this to be more efficient.

Note 16 Significant events during the reporting period

Share Classes launched during period:

Sub-Funds	ETF Share Classes	Launch Date
EURO STOXX 50 ESG UCITS ETF	(EUR) A-acc	12 September 2024

Note 18 Portfolio Turnover Ratio

The Portfolio Turnover Ratio (PTR), expressed as a percentage, reflects the volume of dealing in the Sub-Fund. It is equal to the total of purchases and sales of securities netted against the value of the subscriptions and redemptions, over the average net assets of the Sub-Fund for the year.

The PTR for the year ending 31 December 2024 is as follows:

	Portfolio

Appendix I - Supplementary Information (unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the UBS (Lux) Fund Solutions annual and half-yearly reports published after 13 January 2017 detailing the UBS (Lux) Fund Solutions use of securities financing transactions. As a result, additional disclosures have been included in this appendix.

The following table details the value of securities on loan in EUR as a proportion of the Fund's Net Assets Value, as at 31 December 2024.

Sub-Funds	Securities on loan % of Net Assets	
EURO STOXX 50 UCITS ETF	2.70	2.71

The Company has collateral both bilaterally (State Street Bank and Trust) and via tri-party agents (Bank of New York and JP Morgan Chase). In the case of Bank of New York and JP Morgan Chase agents, State Street Bank and Trust delegates some collateral management duties to these tri-party agents. In all cases the depository has delegated collateral management duties to State Street Bank and Trust. State Street Bank and Trust are then permitted to further delegate responsibilities to tri-party agents if they see fit.

Appendix II - Remuneration Policy (unaudited)

Remuneration disclosure

The Board of Directors of UBS Asset Management (Europe) S.A. (the "Management Company" or the "AIFM") has adopted a remuneration framework (the "Framework") whose objectives are:

on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under

- (i) the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the "UCITS Law") transposing the UCITS Directive 2009/65/EC (the "UCITS Directive") as amended by Directive 2014/91/EU (the "UCITS V Directive");
- (ii) the Alternative Investment Fund Managers Directive ("AIFMD") 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time;
- (iii) the ESMA's guidelines on sound remuneration policies under the UCITS Directive ESMA/2016/575 and ESMA's guidelines on sound remuneration policies under the AIFMD ESMA/2016/579 both published on 14 October 2016;
- (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010;
- (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II);
- (vi) the Commission Delegated Regulation 2017/565/EU of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2):
- (vii) Regulation (EU) 2019/2088 of the European parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR");
- (viii) the CSSF Circular 23/841, transposing the ESMA Guidelines on certain aspects of the MiFID II remuneration requirements (ESMA 35-43-3565) (MiFID ESMA Guidelines).

and on the other hand, to comply with the Total Reward Principles of UBS Group.

The Framework is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management, including sustainability risk where applicable, and to be consistent with the UBS Group business strategy, objectives and values.

More details about the Framework of the Management Company/the AIFM, which describes, but not limited to, how remuneration and benefits are determined, are available at https://www.ubs.com/ame-regulatorydisclosures. The Framework is subject to an annual review by the control functions of the Management Company/the AIFM after review and update by the Human Resources department; and is approved by the Board of Directors of the Management Company/the AIFM. Last approval by the Board of Directors took place on 25 September 2024. No material change was made to the Framework.

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law and Article 20 of the AIFM Law, the Management Company/the AIFM is required to disclose at least annually certain information concerning its remuneration framework and the practices for its Identified Staff.

The Management Company/the AIFM complies with the UCITS Directive/AIFMD principles in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, the Management Company/the AIFM judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified Staff

By application of the proportionality principle for the Identified Staff, the following requirements on pay-out processes for Identified Staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements).

The deferral requirements remain however applicable when the annual variable remuneration of Identified Staff exceeds the de minimis threshold adopted by the Management Company or where an employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

Remuneration of Management Company/AIFM staff

The table below provides an overview of the aggregate total remuneration granted to employed staff as of 31 December 2024 and remunerated board members of the Management Company:

EUR 1000	Fixed remuneration	Variable remuneration	Total remuneration ¹	No of beneficiaries
All staff	15,697	4,595	20,292	134
- whereof Identified Staff	9,107	3,578	12,685	61
- thereof Senior Management ²	2,820	1,447	4,267	16
- thereof Other Identified Staff	6,287	2,131	8,417	45

¹ As per the proportionality principle applied to the Management Company, the overview reflects key aspects of total remuneration and excludes benefit, pension and severance remuneration data.

Remuneration of the delegates' identified staff

As market or regulatory practice develops, the Portfolio Manager(s) may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made and in case of changes to the identified staff and/or in case of change in the number of sub-funds over the year, this may result in disclosures in relation to the Fund not being comparable to the disclosures made in the prior year.

For the year ending 31 December 2024, the aggregate total remuneration paid by all delegated Investment Managers to their Identified Staffs in relation to the Fund amounted to EUR 437,070 of which EUR 233,067 represented the variable remuneration (7 beneficiaries).

² Senior Management includes the CEO, the Conducting Officers, the Head of Compliance, the Branch Managers and Board of Director members. Of which, 2 BoD members are employed by other UBS entities and are not eligible to any compensation for this mandate.

Appendix III - Risk Management (unaudited)

In terms of risk management the Board of Directors of the Management Company decided to adopt the commitment approach as a method of determining the global exposure.

Sustainable Finance Disclosure Regulation (unaudited)

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors is available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score)to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown as a breakdown of the E, Sand G scores, in reference to the different components that are considered for the Environmental, Social and Government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

Passive ESG: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial and ESG objectives of the fund. For passively managed strategies, an ESG benchmark would be selected for the purpose of balancing between reasonable tracking error and high ESG alignment. In order to assess the magnitude of ESG improvements, the fund's ESG performance is also shown against a selected broad market index which closely represents the parent investment universe on which the ESG benchmark is based on.

Weighted Average Carbon Intensity (tons CO2e /USDm sales): The Weighted Average Carbon Intensity (WACI)measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research.

Principal Adverse Impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

- **The periodic disclosure at the date of the financial year end for this Sub-Fund is presented in the next pages of these Financial Statements.

The periodic disclosure is the one referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852, and/or (if any), referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852.

The sustainability indicators in the annexes like the MSCI ESG Score or the Carbon Intensity (1, 2) emissions indicator for th portfolio, the reference index and the broad market index are calculated as an annual average.	е

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier
UBS (Lux) Fund Solutions – EURO STOXX 50 ESG UCITS ETF	549300XYJK1EYGOERY56

Environmental and/or social characteristics

Did this financial product have a	sustainable investment objective?
Yes	● No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.63% of sustainable investments
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 8.61% higher than that of the parent benchmark (EURO STOXX 50® Index (Net Return)) (8.20 vs 7.55)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 0.12% percent higher as per 31 December 2023 vs 31 December 2022. (8.20 vs 8.19)

2023/2022

The ESG Score (MSCI ESG Score) was 0.37% percent higher as per 31 December 2023 vs 31 December 2022. (8.19 vs 8.16)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How were the indicators for adverse impacts on sustainability factors taken into account?

The financial product exclude investments in companies which are involved in the following business activities: Controversial Weapons, Tobacco, Thermal Coal and Military Contracting.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

STOXX monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs), and Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. their underlying conventions, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
ASML Holding NV	Technology	9.54	Netherlands

	ļ		

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.99%. The minimum proportion of sustainable investments of the financial product was 71.63%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

safety and waste

management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 38.30%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The index is designed to reflect the EURO STOXX 50 Net Return index withstandardized ESG exclusion screens. The EURO STOXX 50 ESG Net Return index is a free float-adjusted market capitalization index which excludes companies that are facing controversies pertaining to ESG issues. The exclusion criteria are described in the methodology of index provider. The ESG rating is generated by Sustainalytics' research and is based on an analysis of each company's management of its environmental, social and governance (ESG) performance. The index is rebalanced on a guarterly basis and may also be rebalanced at other times in order to comply with applicable investment restrictions or to reflect corporate activity such as mergers and acquisitions. At least 90% of the securities have an ESG rating. As the investment policy of the UBS(Lux) Fund Solutions - EURO STOXX 50 ESG UCITS ETF sub-fund is to track the Index, the

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

portfolio management of the sub-fund is passive. As a result, the approach taken in relation to the consideration of ESG criteria is the one taken by STOXX and therefore dependent on the approach and methodology defined by a third party.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to that of the reference benchmark (EURO STOXX 50 ESG Net Return Index) (8.20 vs 8.20).

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to that of the reference benchmark (EURO STOXX 50 ESG Net Return Index) (8.20 vs 8.20).

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 8.61% higher than that of the parent benchmark (EURO STOXX 50® Index (Net Return)) (8.20 vs. 7.55)

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 11.05% higher than that of the parent benchmark (MSCI EMU Prime Value) (8.54 vs. 7.69)

The Weighted average carbon intensity (Scope 1+2) MSCI was 44.64% lower than that of the parent benchmark (MSCI EMU Prime Value) (64.63 vs 116.74)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score was 0.58% lower as per 31 December 2024 vs 31 December 2023. (8.54 vs 8.59)

The Weighted average carbon intensity (Scope 1+2) MSCI was 10.36 % lower lower as per 31 December 2024 vs 31 December 2023. (64.63 vs 72.10)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU Prime Value ESG Low Carbon Select Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.98%. The minimum proportion of sustainable investments of the financial product was 71.88%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

of:

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 43.31%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the total return net dividend performance of large and mid-capitalisation companies across 10 Developed Markets (DM) in the EMU. More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (8.54 vs. 8.55).

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (64.63 vs. 64.68).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (8.54 vs. 8.55).

A combined weighted Scope 1 and 2 average carbon intensity was 0.08% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (64.63 vs. 64.68).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 11.05% higher than that of the parent benchmark (MSCI EMU Prime Value) (8.54 vs. 7.69)

The Weighted average carbon intensity (Scope 1+2) MSCI was 44.64% lower than that of the parent benchmark (MSCI EMU Prime Value) (64.63 vs 116.74)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – Factor MSCI 549300I6HWB06KI3BU81 EMU Quality ESG UCITS ETF

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?			
••	Yes	• No		
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.99% of sustainable investments		
	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 10.09% higher than that of the parent benchmark (MSCI EMU Index) (8.62 vs. 7.83)

The Weighted average carbon intensity (Scope 1+2) MSCI was 75.98% lower than that of the parent benchmark (MSCI EMU Index) (21.73 vs 90.46)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score was 3.11% percent higher as per 31 December 2024 vs 31 December 2023. (8.62 vs 8.36)

The Weighted average carbon intensity (Scope 1+2) MSCI was 29.56% lower as per 31 December 2024 vs 31 December 2023. (21.73 vs 30.85)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU Quality ESG Low Carbon Select Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

No change. 0% Taxonomy Aligned Investments..

see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments made by the financial product will contribute to either environmental or social objectives or both. The financial product does not commit to a predetermined combination of environmental or social objectives, and therefore there is no minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Where the financial product does invest in environmentally sustainably investments that are not Taxonomy-aligned, this is due to the absence of necessary data to determine Taxonomy-alignment.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 30.94%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?			
••	Yes	● No		
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.67% of sustainable investments with an environmental objective in		
	sustainable under the EU Taxonomy	economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 17.45% higher than that of the parent benchmark (MSCI China Index) (5.72 vs. 4.87)

The Weighted average carbon intensity (Scope 1+2) MSCI was 75.22% lower than that of the parent benchmark (MSCI China Index) (57.43 vs. 231.72)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 3.62% higher as per 31 December 2024 vs 31 December 2023. (5.72 vs 5.52)

The combined Scope 1 and 2 average carbon intensity was 14.10% lower as per 31 December 2024 vs 31 December 2023. (57.43 vs 66.86)

2023/2022

The ESG Score (MSCI ESG Score) was 7.87% percent higher as per 31 December 2023 vs 31 December 2022. (5.52 vs 5.12)

The combined Scope 1 and 2 average carbon intensity was 16.23% higher as per 31 December 2023 vs 31 December 2022. (66.86 vs 57.52)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI China ESG Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and antibribery matters. positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors

seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+

Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.96%. The minimum proportion of sustainable investments of the financial product was 43.67%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 23.50%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI China Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation Chinese companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index.

The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.17% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (5.72 vs 5.73).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (57.43 vs 57.47).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was was 0.17% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (5.72 vs 5.73).

A combined weighted Scope 1 and 2 average carbon intensity was 0.07% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (57.43 vs 57.47).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 17.45% higher than that of the parent benchmark (MSCI China Index) (5.72 vs 4.87)

The Weighted average carbon intensity (Scope 1+2) MSCI was 75.22% lower than that of the parent benchmark (MSCI China Index) (57.43. vs 231.72)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – MSCI Emerging Markets Socially Responsible UCITS ETF Legal entity identifier 549300V0V31FTXWODA07

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?			
••	Yes	● No		
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.85% of sustainable investments		
	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 27.78% higher than that of the parent benchmark (MSCI Emerging Markets Index) (7.36 vs 5.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 78.79 % lower than that of the parent benchmark (MSCI Emerging Markets Index) (69.40 vs 327.26)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 0.14% higher as per 31 December 2024 vs 31 December 2023 (7.36 vs 7.35)

The Weighted average carbon intensity (Scope 1+2) MSCI was 7.08 % lower as per 31 December 2024 vs 31 December 2023 (69.40 vs 74.69)

2023/2022:

The ESG Score (MSCI ESG Score) was 2.99% percent higher as per 31 December 2023 vs 31 December 2022. (7.35 vs 7.14)

The combined Scope 1 and 2 average carbon intensity was 10.53% higher as per 31 December 2023 vs 31 December 2022. (74.69 vs 67.58)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Emerging Markets SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a

positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co	Technology	5.21	Taiwan
Meituan	Communication Services	4.39	Cayman

Hindustan Unilever Ltd	Non Cyclical Goods & Services	1.23	India
Qatar National Bank QPSC	Finance	1.20	Qatar

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.95%. The minimum proportion of sustainable investments of the financial product was 59.85%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities are
activities for which
low-carbon
alternatives are not
yet available and
among others have
greenhouse gas
emission levels
corresponding to
the best
performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes	:	
	In fossil gas	In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 26.70%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Emerging Markets Index. The reference benchmark is the MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Emerging Markets Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.14% lower than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (7.36 vs 7.37).

A combined weighted Scope 1 and 2 average carbon intensity was 1.18% higher than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (69.40 vs 68.59).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.14% lower than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (7.36 vs 7.37).

A combined weighted Scope 1 and 2 average carbon intensity was 1.18% higher than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (69.40 vs 68.59).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will rev

iew the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 27.78% higher than that of the parent benchmark (MSCI Emerging Markets Index) (7.36 vs 5.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 78.79% lower than that of the parent benchmark (MSCI Emerging Markets Index) (69.40 vs 327.26)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier

Socially Responsible UCITS ETF	

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	●○ 🗶 No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.47% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU		
It made sustainable investments with a social objective:%	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 12.90% higher than that of the parent benchmark (MSCI EMU Index) (8.84 vs. 7.83)

The Weighted average carbon intensity (Scope 1+2) MSCI was 72.45% lower than that of the parent benchmark (MSCI EMU Index) (24.92 vs. 90.45)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 1.73% higher as per 31 December 2024 vs 31 December 2023 (8.84 vs 8.69).

The combined Scope 1 and 2 average carbon intensity was 15.35% lower as per 31 December 2024 vs 31 December 2023 (24.92 vs 29.44).

2023/2022:

The ESG Score (MSCI ESG Score) was 1.47% lower as per 31 December 2023 vs 31 December 2022 (8.69 vs 8.82).

The combined Scope 1 and 2 average carbon intensity was 29.72% lower as per 31 December 2023 vs 31 December 2022 (29.44 vs 41.89).

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by reweighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive

trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.92%. The minimum proportion of sustainable investments of the financial product was 77.47%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

safety and waste

management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 39.72%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI EMU Index. The reference benchmark is the MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.84 vs. 8.84).

A combined weighted Scope 1 and 2 average carbon intensity was 0.73% higher than that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (24.92 vs. 24.74).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.84 vs. 8.84).

A combined weighted Scope 1 and 2 average carbon intensity was 0.73% higher than that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (24.92 vs. 24.74).

How did this financial product perform compared with the broad market index?`

The ESG Score was 12.90% higher than that of the parent benchmark (MSCI EMU Index) (8.84 vs 7.83)

The Weighted average carbon intensity (Scope 1+2) MSCI was 72.45% lower than that of the parent benchmark (MSCI EMU Index) (24.92 vs 90.45)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – MSCI Europe S49300ECBOSXHR2IZB62 Socially Responsible UCITS ETF

Environmental and/or social characteristics

Did this financial product have a	sustainable investment objective?
• • Yes	● No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 86.45% of sustainable investments
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 19.78% higher than that of the parent benchmark (MSCI Europe Index) (8.90 vs 7.43)

The Weighted average carbon intensity (Scope 1+2) MSCI was 76.64% lower than that of the parent benchmark (MSCI Europe Index) (19.59 vs 83.85)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 2.18% higher as per 31 December 2024 vs 31 December 2023 (8.90 vs 8.71)

The combined Scope 1 and 2 average carbon intensity was 23.98% lower as per 31 December 2024 vs 31 December 2023 (19.59 vs 25.77)

2023/2022:

The ESG Score (MSCI ESG Score) was 1.25% lower as per 31 December 2023 vs 31 December 2022. (8.71 vs 8.82)

The combined Scope 1 and 2 average carbon intensity was 38.48% lower as per 31 December 2023 vs 31 December 2022. (25.77 vs 41.89)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to

represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 17.07% higher than that of the parent benchmark (MSCI Japan Index) (8.64 vs 7.38)

The Weighted average carbon intensity (Scope 1+2) MSCI was 34.64% lower than that of the parent benchmark (MSCI Japan Index) (44.01 vs 67.33)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 0.23% lower as per 31 December 2024 vs 31 December 2023. (8.64 vs 8.66)

The combined Scope 1 and 2 average carbon intensity was 4.26% higher as per 31 December 2024 vs 31 December 2023. (44.01 vs 42.21)

2023/2022:

The ESG Score (MSCI ESG Score) was 5.48% higher as per 31 December 2023 vs 31 December 2022. (8.66 vs 8.21)

The combined Scope 1 and 2 average carbon intensity was 14.36% higher as per 31 December 2023 vs 31 December 2022. (42.21 vs 36.91)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Japan SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a

positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. *Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.94%. The minimum proportion of sustainable investments of the financial product was 78.82%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

management rules.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Yes: In fossil gas In nuclear energy No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 30.66%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Japan Index. The reference benchmark is the MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.64 vs. 8.65).

A combined weighted Scope 1 and 2 average carbon intensity was 0.30% higher than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (44.01 vs. 43.88).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.64 vs. 8.65).

A combined weighted Scope 1 and 2 average carbon intensity was 0.30% higher than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (44.01 vs. 43.88).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 17.07% higher than that of the parent benchmark (MSCI Japan Index) (8.64 vs. 7.38)

The Weighted average carbon intensity (Scope 1+2) MSCI was 34.64% lower than that of the parent benchmark (MSCI Japan Index) (44.01 vs. 67.33)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – MSCI Pacific 549300RBA5E83JYHLW03 Socially Responsible UCITS ETF

Environmental and/or social characteristics

Did this financial product have a	sustainable investment objective?
• • Yes	• No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.84% of sustainable investments
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 15.95% higher than that of the parent benchmark (MSCI Pacific Net Return Index) (8.58 vs 7.40)

The Weighted average carbon intensity (Scope 1+2) MSCI was 45.76% lower than that of the parent benchmark (MSCI Pacific Net Return Index) (51.39 vs 94.74)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was equal as per 31 December 2024 vs 31 December 2023 (8.58 vs 8.58)

The combined Scope 1 and 2 average carbon intensity was 9.44% lower as per 31 December 2024 vs 31 December 2023 (51.39 vs 56.75)

2023/2022:

The ESG Score (MSCI ESG Score) was 1.43% percent higher as per 31 December 2023 vs 31 December 2022. (8.58 vs 8.39)

The combined Scope 1 and 2 average carbon intensity was 31.95% higher as per 31 December 2023 vs 31 December 2022. (56.75 vs 43.01)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude

companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.97%. The minimum proportion of sustainable investments of the financial product was 74.17%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 41.10%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Switzerland IMI Extended Index. The reference benchmark is the MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Switzerland IMI Extended Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (8.32 vs 8.32).

A combined weighted Scope 1 and 2 average carbon intensity was 0.06% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (18.05 vs 18.06).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (8.32 vs 8.32).

A combined weighted Scope 1 and 2 average carbon intensity was 0.06% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (18.05 vs 18.06).

How did this financial product perform compared with the broad market index?`

The ESG Score was 8.62% higher than that of the parent benchmark (MSCI Switzerland IMI Index) (8.32 vs 7.66)

The Weighted average carbon intensity (Scope 1+2) MSCI was 79.64% lower than that of the parent benchmark (MSCI Switzerland IMI Index) (18.05 vs 88.66)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier
UBS (Lux) Fund Solutions – MSCI USA	549300A0W559VPNNI374
Socially Responsible UCITS ETF	

Environmental and/or social characteristics

Did this financial product have a	sustainable investment objective?
• • Yes	• No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.53% of sustainable investments
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 21.40% higher than that of the parent benchmark (MSCI USA Index) (8.00 vs 6.59)

The Weighted average carbon intensity (Scope 1+2) MSCI was 74.81% lower than that of the parent benchmark (MSCI USA Index) (23.76 vs 94.31)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 0.74% lower as per 31 December 2024 vs 31 December 2023 (8.00 vs 8.06)

The combined Scope 1 and 2 average carbon intensity was 21.12% lower as per 31 December 2024 vs 31 December 2023 (23.76 vs 30.12)

2023/2022:

The ESG Score (MSCI ESG Score) was 1.9% higher as per 31 December 2023 vs 31 December 2022. (8.06 vs 7.91)

The combined Scope 1 and 2 average carbon intensity was 11.65% lower as per 31 December 2023 vs 31 December 2022. (30.12 vs 34.09)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon

Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.98%. The minimum proportion of sustainable investments of the financial product was 76.53%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

#1 Aligned with E/S characteristics: 99.98%

#1B Other E/S characteristics: 23.45%

#2 Other: 0.02%

#4 Aligned with E/S characteristics: 23.45%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

Transitional activities are

objective.

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the

 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 26.08%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI USA Index. The reference benchmark is the MSCI USA SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI USA SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Index) (8.00 vs 8.00).

A combined weighted Scope 1 and 2 average carbon intensity was 0.25% higher than that of the reference benchmark (MSCI USA SRI Low Carbon Select 5% Issuer Capped Index) (23.76 vs 23.70).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The Weighted average carbon intensity (Scope 1+2) MSCI was 74.81% lower than that of the parent benchmark (MSCI USA Index) (23.76 vs 94.31)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – MSCI World Socially Responsible UCITS ETF Legal entity identifier 549300BP1CDRHWLT1S36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
• • Yes	• No	
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.79% of sustainable investments	
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 20.32% higher than that of the parent benchmark (MSCI World Index) (8.29 vs 6.89)

The Weighted average carbon intensity (Scope 1+2) MSCI was 73.29% lower than that of the parent benchmark (MSCI World Index) (25.88 vs 96.90)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 0.24% lower as per 31 December 2024 vs 31 December 2023 (8.29 vs 8.31)

The combined Scope 1 and 2 average carbon intensity was 16.84% lower as per 31 December 2024 vs 31 December 2023 (25.88 vs 31.12)

2023/2022:

The ESG Score (MSCI ESG Score) was 1.59% higher as per 31 December 2023 vs 31 December 2022. (8.31 vs 8.18)

The combined Scope 1 and 2 average carbon intensity was 4.04% lower as per 31 December 2023 vs 31 December 2022. (31.12 vs 32.43)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon

Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.95%. The minimum proportion of sustainable investments of the financial product was 76.79%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Υ	es:	
	In fossil gas	In nuclear energy
× N	lo	

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 29.48%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI World Index. The reference benchmark is the MSCI World SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI World SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI World Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks

the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (8.29 vs 8.29).

A combined weighted Scope 1 and 2 average carbon intensity was 0.50% higher than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (25.88 vs 25.75).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (8.29 vs 8.29).

A combined weighted Scope 1 and 2 average carbon intensity was 0.50% higher than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (25.88 vs 25.75).

How did this financial product perform compared with the broad market index?`

The ESG Score was 20.32% higher than that of the parent benchmark (MSCI World Index) (8.29 vs 6.89).

The Weighted average carbon intensity (Scope 1+2) MSCI was 73.29% lower than that of the parent benchmark (MSCI World Index) (25.88 vs 96.90)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

sustainable

Sustainable

practices.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	● ○ 🗶 No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	 It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.19% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective 		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG Score was 8.18% higher than that of the parent benchmark (Bloomberg Euro Area Liquid Corp 1-5 Years Index) (7.41 vs. 6.85)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 2.50% percent lower as per 31 December 2024 vs 31 December 2023. (7.41 vs. 7.60)

2023/2022

The ESG Score (MSCI ESG Score) was 5.3% percent higher as per 31 December 2023 vs 31 December 2022. (7.60 vs. 7.22)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends tomake, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESGRatings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/oranti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided

by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 42.57%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The portfolio manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index is a market capitalization weighted index. The Index represents liquid corporate bonds with a time to maturity of at least 1 year, but no more than 5 years, issued by investment grade companies that are consistent with specific values based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to

their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the Euro zone member state, as defined by Bloomberg Indices, and issuing in EUR is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 1.20% lower than that of the reference benchmark (Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index) (7.41 vs. 7.50).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 1.20% lower than that of the reference benchmark (Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index) (7.41 vs. 7.50).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.48%. The proportion of sustainable investments of the financial product was 68.15%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes	:	
	In fossil gas	In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 42.50%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfoliorisk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI Euro Area Liquid Corporates Sustainable Index is a market capitalization weighted index. The Index represents liquid corporate bonds, issued by investment grade companies that are consistent with specific values based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the Euro zone member state, as defined by Bloomberg Indices, and issuing in EUR is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.40% lower than that of the reference benchmark (Bloomberg MSCI Euro Area Liquid Corporates Sustainable Total Return Index) (7.56 vs. 7.59).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.40% lower than that of the reference benchmark (Bloomberg MSCI Euro Area Liquid Corporates Sustainable Total Return Index) (7.56 vs. 7.59).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`
The ESG Score was 13.00% higher than that of the parent benchmark (Bloomberg Euro Area Liquid Corporates Index) (7.56 vs. 6.69)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance practices.

The **EU Taxonomy** is

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier

UBS (Lux) Fund Solutions – Bloomberg MSCI Global Liquid Corporates Sustainable UCITS ETF 549300KALCR2ZL9HEI55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60.27% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG Score was 7.59% higher than that of the parent benchmark (Bloomberg Global Aggregate Corporates Total Return Index) (6.95 vs. 6.46).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 1.14% lower as per 31 December 2024 vs 31 December 2023. (6.95 vs. 7.03)

2023 /2022

The ESG Score (MSCI ESG Score) was 1.63% percent higher as per 31 December 2023 vs 31 December 2022. (7.03 vs. 6.92)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/oranti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.40%. The proportion of sustainable investments of the financial product was 60.27%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

Asset allocation describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.

 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in eco-nomic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 35.10%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The portfolio manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The parent index is the Bloomberg Global Aggregate - Corporates (Total Return).

The Bloomberg MSCI Global Liquid Corporates Sustainable Bond Index tracks the performance of US, Euro Area, UK, and Canada local currency fixed-rate, investment grade corporate debt. The index applies additional liquidity criteria to securities from each of the four markets based on minimum amount outstanding and time from issuance. The index includes issuers with MSCI ESG Ratings of BBB or higher and excludes issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy score. The index's four currency weights are rescaled monthly to match the currency exposure of a market value weighted combination of these four currencies in the Global

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Corporate Index. The index was created in December 2019, with history back-filled to January 1, 2014. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score is 0.71% lower than the reference benchmark (Bloomberg MSCI Global Liquid Corporates Sustainable Bond Index) (6.95 vs 7.00).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 27.98%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index is a market capitalization weighted index. The Index represents liquid corporate bonds with a time to maturity of at least 1 year, but no more than 5 years, issued by investment grade companies that are consistent with specific values-based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the USA, as defined by Bloomberg Indices, and issuing in USD is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.60% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index) (6.62 vs. 6.66).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.60% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index) (6.62 vs. 6.66).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 11.64% higher than that of the parent benchmark (Bloomberg US Liquid Corporates 1-5 Year Index) (6.62 vs. 5.93).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – Bloomberg MSCI US Liquid Corporates Sustainable UCITS ETF Legal entity identifier 549300BP4JBCNGDTWW69

Environmental and/or social characteristics

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 7.54% higher than that of the parent benchmark (Bloomberg MSCI US Liquid Corporates Total Return Index) (6.70 vs. 6.23)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 1.03% percent lower as per 31 December 2024 vs 31 December 2023. (6.70.vs 6.77)

2023/2022

The ESG Score (MSCI ESG Score) was 3.52% percent higher as per 31 December 2023 vs 31 December 2022. (6.77 vs. 6.54)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Assessment of good governance practices of the investee companies are performed by the index provider.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.62%. The minimum proportion of sustainable investments of the financial product was 54.81%.

describes the share of investments in specific assets.

Asset allocation

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 27.75%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The designated index (Bloomberg MSCI US Liquid Corporates Sustainable Index) is a market capitalization weighted index. The Index represents liquid corporate bonds, issued by investment grade companies that are consistent with specific values-based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the USA, as defined by Bloomberg Indices, and issuing in USD is included. The bonds are valued daily based on Bid prices, however on

rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.59% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates Sustainable Index) (6.70 vs. 6.74).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?		
••	Yes	• No	
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 86.00% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 41.54% higher than that of the parent benchmark (Bloomberg US Liquid Corporates 1-5 Year Index) (7.36 vs 5.20).

The financial product is passively managed and tracks an Index, securities are only eligible

for the Index if they meet the MSCI ESG Research Green Bond Principles. Green bonds are

committed to a stated use of proceeds and there are processes for evaluating and selecting these green projects which are funded by the bond.

The classification as green bonds is based on external providers and relates to:

-Green bonds: Use of proceeds to finance projects that advance environmental objectives (e.g. renewable energy, clean transportation).

For the Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index (Total

Return), securities are independently evaluated by MSCI ESG Research along four dimensions to determine whether they should be classified as a green bond. These eligibility criteria reflect themes articulated in the Green Bond Principles and require commitments about a bond's:

- Stated use of proceeds;
- Process for green project evaluation and selection;
- Process for management of proceeds; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Issuers with relevant environmental or social revenue would origin from:

-Environmental revenues: related to alternative energy, energy efficiency, green building, pollution prevention, sustainable water, or sustainable agriculture.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 0.81 % lower as per 31 December 2024 vs 31 December 2023 (7.36 vs 7.42).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes. The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impactson sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Securities are only eligible for the Index if they meet the MSCI ESG Research Green Bond Principles. Green bonds are committed to a stated use of proceeds and there are processes for evaluating and selecting these green projects which are funded by the bond.

How were the indicators for adverse impacts on sustainability factors taken into account?

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons. The financial product also excludes treasury or sovereign issuers that are classified as "Not Free" by Freedom House.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex

Securities are only eligible for the Index if they meet the MSCI ESG Research Green Bond Principles.

Green bonds are committed to a stated use of proceeds and there are processes for evaluating and selecting these green projects which are funded by the bond. The issuer must clearly delineate and outline either specific projects or criteria of activities to be financed which fall into one of the six eligible environmental categories. By definition of the Green Bond Principles themselves, investment into these bonds do not cause significant harm to any environmental or social investment objective.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

sustainable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 26.85%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the Bloomberg Global Aggregate Index. The Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index is based on the Bloomberg Global Aggregate Index. The Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index offers investors an objective and robust measure of the global market for fixed income securities issued to fund projects with direct environmental benefits. An independent research driven methodology is used to evaluate index-eligible green bonds to ensure they adhere to established Green Bond Principles and to classify bonds by their environmental use of proceeds. The Bloomberg MSCI Global Green Bond 1-10 Year

Sustainability Select Index shall have a higher market capitalization value percentage of Green Bonds than the Bloomberg Global Aggregate Index (Parent Benchmark).

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 1.43% lower than that of the reference benchmark (Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index) (7.36 vs 7.47).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – J.P. Morgan EMU Government ESG Liquid Bond UCITS ETF Legal entity identifier 549300L2LM976DR14286

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?		
••	Yes	● No	
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 100% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 7.54% higher than that of the parent benchmark (J.P. Morgan EMU Government Bond Index) (6.85 vs 6.37).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 6.20% higher as per 31 December 2024 vs 31 December 2023. (6.85 vs. 6.45)

2023 /2022

The ESG Score (MSCI ESG Score) was 4.07% higher as per 31 December 2023 vs 31 December 2022. (6.45 vs. 6.20)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

J.P. Morgan ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental,

social and employee

matters, respect for

human rights, anticorruption and anti-

bribery matters.

The J.P. Morgan Global EMU ESG Liquid Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into ten bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Bands 4-10 will be excluded from the index, as well as issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a upgrade.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The financial product also excludes treasury or sovereign issuers that are classified as "Not Free" by Freedom House.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Issuers identified as violating Freedom House principles will be removed from the index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 100.00%. The minimum proportion of sustainable investments of the financial product was 100.00%.

Asset allocation describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 54.08%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The J.P. Morgan EMU Government ESG Liquid Bond Index (Total Return) is based on a market capitalization weighting and designed to track the performance of liquid local government bonds issued by Eurozone governments across all level of maturities. The index further applies an environmental, social and governance (ESG) scoring and screening methodology of the issuer countries to tilt towards issuers ranked higher on ESG criteria and to underweight or remove issuers that rank lower. Countries are categorized into 10 bands based on their ESG score (1 = best, 10 = worst) and the countries in the lowest 5 ESG bands will be removed from the index. The ESG methodology is described in the methodology of the index provider. The index is rebalanced on a monthly basis.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.15% lower than the score of the reference benchmark (J.P. Morgan EMU Government ESG Liquid Bond Index) (6.85 vs. 6.86).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.15% lower than the score of the reference benchmark (J.P. Morgan EMU Government ESG Liquid Bond Index) (6.85 vs. 6.86).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 7.54% higher than that of the parent benchmark (J.P. Morgan EMU Government Bond Index (6.85 vs 6.37).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

(EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 58.68%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The J.P. Morgan Global Government ESG Liquid Bond Index (Total Return) is designed to track the performance of liquid global government bonds. The index is based on a market capitalization weighting. The index further applies an environmental, social and governance (ESG) screening and scoring of issuer countries. Countries are categorized into 10 bands based on their ESG score (1 = best, 10 = worst) and the countries in the lowest 5 ESG bands will be removed from the index.

The ESG methodology is described in the methodology of the index provider.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.16% lower than the score of the reference benchmark (J.P. Morgan Global Government ESG Liquid Bond Index) (6.24 vs 6.25).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 4.91% higher than that of the parent benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return) (4.91 vs 4.68).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

2024/2023

The ESG Score (MSCI ESG Score) was 6.30% lower as per 31 December 2024 vs 31 December 2023. (4.91 vs 5.24)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

J.P. Morgan ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The J.P. Morgan USD EM IG ESG Diversified Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into five

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Band 5 will be excluded from the index, as well as corporate issuers earning revenue from tobacco, weapons, thermal coal mining or power generation, corporate issuers identified as violating UN Global Compact (UNGC) principles and sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a one-band upgrade. Green bonds by issuers already in Band 1 will not receive any further upgrades, while those in Band 5 will still be excluded.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Corporate issuers earning revenue from tobacco, weapons, thermal coal mining, oil sands or power generation will be removed from the index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Corporate issuers identified as violating UN Global Compact (UNGC) principles will be removed from the index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 94.11%. The minimum proportion of sustainable investments of the financial product was 38.88%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invests in economic activities which are environmentally sustainable but not EU Taxonomy aligned, this is due to the absence of the required implementing legislation and in particular the absence of the necessary taxonomy-related data provided by the investee companies and of a well-defined calculation methodology. The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation section of this annex, these investments have an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 18.78%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The parent index, the J.P. Morgan USD EM IG Diversified Bond Index (Total Return) tracks instruments that are classified as investment grade (IG) in the established J.P. Morgan EMBI Global Diversified and J.P. Morgan CEMBI Broad Diversified indices, and combines them with a market capitalization based weighting.

In addition the J.P. Morgan USD EM IG ESG Diversified Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into five bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Band 5 will be excluded from the index, as well as corporate issuers earning revenue from tobacco, weapons, thermal coal mining or power generation, corporate issuers identified as violating UN Global Compact (UNGC) principles and sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a one-band upgrade. Green bonds by issuers already in Band 1 will not receive any further upgrades, while those in Band 5 will still be excluded.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.61% lower than that of the reference benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return) (4.91 vs 4.94).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.61% lower than that of the reference benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return) (4.91 vs 4.94).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 1.15% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 5-10 Total Return Index) (7.01 vs 6.93).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

2024/2023:

The ESG Score (MSCI ESG Score) was 1.13% lower as per 31 December 2024 vs 31 December 2023. (7.01 vs 7.09)

2023/2022:

The ESG Score (MSCI ESG Score) was 2.75% higher as per 31 December 2023 vs 31 December 2022. (7.09 vs 6.90)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Inrate Controversies monitoring tests the company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 96.38%. The proportion of sustainable investments of the financial product was 58.43%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational
 expenditure
 (OpEx) reflecting
 green operational
 activities of
 investee
 companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 34.93%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The SBI® ESG Foreign AAA-BBB 5-10 Total Return Index mirrors developments in the CHF bond markets and encompasses investment grade-rated bonds with a fixed coupon that are listed on SIX Swiss Exchange, that are issued in CHF currency from issuers domiciled outside of Switzerland and that have a term to maturity of 5 to less than 10 years. The index is rebalanced on a monthly basis and may also be rebalanced at other times in order to comply with applicable investment restrictions or to reflect corporate activity such as mergers and acquisitions.

In contrast to the SBI® Foreign AAA–BBB 5–10 Total Return Index the SBI® ESG Foreign AAA–BBB 5–10 Total Return Index applies additionally a ESG screening and scoring of issuers is

based on the Inrate ESG methodology, removing those with a lower Inrate ESG rating then C+, those that are involved in controversies and those that are involved in restricted business activities based on given revenues thresholds.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.43% lower than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 5-10 Total Return) (7.01 vs 7.04).

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.43% lower than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 5-10 Total Return) (7.01 vs 7.04).

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 1.15% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 5-10 Total Return Index) (7.01 vs 6.93).

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/8522020/852

Product name:

Legal entity identifier:

Sustainable investment objective

Did this financial product have a sustainable investment objective?							
• • X Yes	• No						
investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective						
x it made sustainable investments with a social objective: 99.25%	It promoted E/S characteristics, but did not make any sustainable investments						

environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852

establishing a list of

Sustainable

investment means

an investment in an economic activity

that contributes to an environmental or social objective,

provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The financial product has sustainable investment as its objective and aims track, before expenses, the price and income performance of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return)(the "Index"). An independent research-driven screening is used by the Index provider to evaluate index-eligible issuer which must be a Multilateral Development Bank, having a credit quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

The Reference Benchmark (the "Index") designated for the purpose of attaining the sustainable investment objective of this financial product is the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return).

How did the sustainability indicators perform?

The attainment of the sustainable investment objective is measured using the following

indicators respectively:

• Whether the issuer of the securities is classified as a Multilateral Development Bank Issuer.

A Multilateral Development Bank (MDB) is an international financial institution chartered by two or more countries for the purpose of encouraging economic development in poorer nations. Multilateral development banks consist of member nations from developed and developing countries. MDBs provide loans and grants to member nations to fund projects that support social and economic development, such as the building of new roads or providing clean water to communities. MDBs are supranational institutions set up by sovereign states, which are their shareholders The objective of the use of proceeds of the MDBs are very aligned to the SDG 17.

Please note that while the Reference Benchmark is provided by Solactive, the Portfolio manager will rely on data provided by MSCI. As a result, there might be a discrepancy between the figures disclosed by the Portfolio manager and the Reference Benchmark provider.

...and compared to previous periods?

The investments in Multilateral Development Banks were 99% in 2024 versus 99% per 31 December 2023.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

FThe financial product is passively managed and tracks an Index, securities are only eligible for the Index if they meet the rule set by the index methodology that the index-eligible issuer which must be a Multilateral Development Bank, having a credit quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

Unlike commercial banks, MDBs do not seek to maximize profits for their shareholders. Instead, they prioritize development goals (aligned with the SDG 17), such as ending extreme poverty and reducing economic inequality. They often lend at low or no interest or provide grants to fund projects in infrastructure, energy, education, environmental sustainability, and other areas that promote development.

How were the indicators for adverse impacts on sustainability factors taken into account?

The sub-fund excludes exposure to controversial weapons (anti-personnel mines, clustermunitions, chemical weapons and biological weapons).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

There is no controversies screening on the index issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

The issuer of all securities held by the financial product is classified as a Multilateral Development Bank and due to the nature of these supranational institutions, not all principal adverse impact indicators are relevant.

At present and where relevant, exclusions are based on the following PAI indicators:

- "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons.
- UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

 (CapEx) showing
 the green
 investments
 made by investee
 companies, e.g.
 for a transition to
 a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 99.25%

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU
Taxonomy.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments for hedging purposes including in the event of a re-balance of the index constituents by the index provider.

What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the index on a regular basis and the Portfolio manager will track the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of its investment objective it seeks to achieve.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the Index by applying stratified sampling managing the tracking error.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The broad market index is the Solactive World All Bond IG Index.

The Solactive GlobalMultilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return) offers investors exposure to Multilateral Development Banks (known as supranationals) which are backed by multiple sovereigns incl. all G7 countries. Bonds issued by the MDBs are mostly AAA-rated and the credit risk profile and returns are comparable to US Treasuries while the MDB providing guarantees and knowledge for developing countries to end global poverty and to promote sustainable economic growth (aligned to the SDG 17). The Parent Index provides a broad-based measure of the global fixed income markets.

The Solactive World All Bond IG Index give access to the global investment grade universe, a multicurrency, flexible and comprehensive benchmark to track global investable bonds as well as securitized debt instruments.

The Solactive World All Bond IG Index give access to the global investment grade universe, a multicurrency, flexible and comprehensive benchmark to track global investable bonds as well as securitized debt instruments. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The investments in Multilateral Development Banks Issuer was 0.28% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index) (99.61 vs 99.89).

How did this financial product perform compared with the reference benchmark?

The investments in Multilateral Development Banks Issuer was 0.28% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index) (99.61 vs 99.89).

How did this financial product perform compared with the broad market index?

The investments in Multilateral Development Banks Issuer was 2.56% higher than that of the parent benchmark (Solactive World All Bond IG Index) (99.61 vs 97.12).

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a,of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/8522020/852

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification system laid down in

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective						
It made sustainable investments with a social objective: 99.36%	It promoted E/S characteristics, but did not make any sustainable investments						

To what extent was the sustainable investment objective of this financial product met?

This financial product has sustainable investment as its objective and aims to track, before expenses, the price and income performance of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index (Total Return) (the "Index"). An independent research-driven screening is used by the Index provider to evaluate index-eligible issuer which must be a Multilateral Development Bank, having a credit quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Reference Benchmark (the "Index") designated for the purpose of attaining the sustainable investment objective of this financial product is the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index (Total Return).

How did the sustainability indicators perform?

The Reference Benchmark (the "Index") designated for the purpose of attaining the sustainable investment objective of this financial product is the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index (Total Return).

The following indicators are used to measure the attainment of the sustainable investment objective

• Whether the issuer of the securities is classified as a Multilateral Development Bank Issuer.

A minimum of 90% of the financial product's assets were invested in securities of the reference benchmark.

In 2024 the investment in Multilateral Development Banks was more than 99%.

Multilateral Development Bank (MDB) is an international financial institution chartered by two or more countries for the purpose of encouraging economic development in poorer nations. Multilateral development banks consist of member nations from developed and developing countries. MDBs provide loans and grants to member nations to fund projects that support social and economic development, such as the building of new roads or providing clean water to communities. MDBs are supranational institutions set up by sovereign states, which are their shareholders The objective of the use of proceeds of the MDBs are very aligned to the SDG 17.

Please note that while the Reference Benchmark is provided by Solactive, the Portfolio manager will rely on data provided by MSCI. As a result, there might be a discrepancy between the figures disclosed by the Portfolio manager and the Reference Benchmark provider.

...and compared to previous periods?

The investments in Multilateral Development Banks were 99% in 2024 versus 99% per 31 December 2023.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The financial product is passively managed and tracks an Index, securities are only eligible for the Index if they meet the rule set by the index methodology that the index-eligible issuer which must be a Multilateral Development Bank, having a credit quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

Unlike commercial banks, MDBs do not seek to maximize profits for their shareholders. Instead, they prioritize development goals (aligned with the SDG 17), such as ending extreme poverty and reducing economic inequality. They often lend at low or no interest or provide grants to fund projects in infrastructure, energy, education, environmental sustainability, and other areas that promote development.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The sub-fund excludes exposure to controversial weapons (anti-personnel mines, clustermunitions, chemical weapons and biological weapons).

—— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

There is no controversies screening on the index issuers.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

The issuer of all securities held by the financial product is classified as a Multilateral Development Bank and due to the nature of these supranational institutions, not all principal adverse impact indicators are relevant.

At present and where relevant, exclusions are based on the following PAI indicators: "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons.
- UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2024

Largest investments	Sector	% Assets*	Country

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2024.

What was the asset allocation?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
- capital
 expenditure
 (CapEx) showing
 the green
 investments
 made by investee
 companies, e.g.
 for a transition to
 a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 99.36%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the Index by applying stratified sampling managing the tracking error.

The investment manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the

sustainable objective.

How did the reference benchmark differ from a broad market index?

The broad market index is the Solactive World All Bond IG Index.

The Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index offers investors exposure to Multilateral Development Banks (known as supranationals) which are backed by multiple sovereigns incl. all G7 countries. Bonds issued by the MDBs are mostly AAA-rated and the credit risk profile and returns are comparable to US Treasuries while the MDB providing guarantees and knowledge for developing countries to end global poverty and to promote sustainable economic growth (aligned to the SDG 17).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective? The investments in Multilateral Development Banks Issuer was 0.31% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index) (99.69 vs 100).

How did this financial product perform compared with the reference benchmark?

The investments in Multilateral Development Banks Issuer was 0.31% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index) (99.69 vs 100).

How did this financial product perform compared with the broad market index?

The investments in Multilateral Development Banks Issuer was 1.59% higher than that of the parent benchmark (Solactive World All Bond IG Index) (99.69 vs 98.13).
