Ongoing Charges Figure[†] 0.07%

[†] The Ongoing Charges Figure (OCF) covers administration, audit, depository, legal, registration and regulatory expenses incurred in respect of the Funds. When you invest with any fund manager, you pay a number of charges, starting with the Annual Management Charge (AMC) which covers the fund manager's costs of managing the fund. The AMC plus ongoing running costs and other operational expenses make up the fund's total 'ongoing charges figure'.

Objectives and investment policy

- The Fund aims to preserve capital, maintain a high level of liquidity within the Fund's portfolio of assets and provide a return in line with Euro money market rates. Money invested in the Fund is not protected or guaranteed.
- The Fund is a Short-Term Variable NAV Money Market Fund in accordance with the EU Money Market Fund Regulation and will comply with the investment and diversification restrictions set out in the Fund Supplement.
- The Fund employs an "active management" strategy in seeking to achieve its objective by investing in securities that are eligible assets according to Article 9 of the EU MMFR. The Fund seeks to primarily invest in high-quality EUR denominated Treasury Bills (short-term securities issued by Governments), Agency and Supranational issued commercial paper (unsecured short-term debt instruments issued by corporations or other entities including public or local authorities), Time Deposits (fixed term investment that gathers interest over the period of its term) and reverse repurchase agreements (instruments under which the Fund acquires ownership of securities from a seller who agrees to repurchase the securities at a mutually agreed date and at an agreed repurchase price).
- The Fund may measure its performance against the compounded Euro Short-Term Rate (€STR), the rate published by the European Central Bank, which reflects the wholesale euro unsecured overnight borrowing costs of banks located in the Euro area. The Investment Manager has discretion to select the Fund's investments and is not restricted to selecting investments from any benchmark.
- The securities held by the Fund may be issued or guaranteed by Governments, Government Agencies or Local Authorities (including those that do not participate in the Economic and Monetary Union (EMU)), Supranational bodies or corporate issuers.
- The weighted average maturity of the Fund's portfolio will not exceed 60 days, and the weighted average life of the Fund's portfolio will not exceed 120 days. At least 7.5% of the Fund's portfolio will be daily maturing assets, reverse repurchase agreements or cash which may be terminated or withdrawn by giving prior notice of one working day. At least 15% of the Fund's portfolio will be comprised of weekly maturing assets, reverse repurchase agreements or cash which may be terminated or withdrawn by giving prior notice of five working days and money market instruments or units or shares in other money market funds provided they can be redeemed and settled within five working days (provided such money market instrument or units or shares will only constitute a maximum of 7.5% of the weekly maturing assets).
- The Fund will only invest in EUR denominated securities (which may include securities from issuers inside and outside the EMU) that are high credit quality pursuant to the Manager's internal credit quality assessment procedure and with a maturity at issuance or residual term to maturity of 397 days or less.
- Information on the Fund's portfolio can be found at [https:// www.ie.vanguard/ products](https://www.ie.vanguard/products). The Indicative Net Asset Value for the Fund is calculated throughout the trading day and is published on Bloomberg or Reuters.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

Past performance is not a reliable indicator of future results.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid- offer spread which should be considered fully before investing.

An investment in a money market fund is not a guaranteed investment. An investment in a money market fund is different from an investment in deposits, as the amount invested in a money market fund is capable of fluctuation. Money market funds do not rely on external support for guaranteeing the liquidity of the money market fund or stabilising the Net Asset Value per share. The risk of loss of the amount invested shall be borne by the investor.
