

3DEL WisdomTree DAX 3x Daily Leveraged

Investment Objective

WisdomTree DAX® 30 3x Daily Leveraged is a fully collateralised, UCITS eligible Exchange Traded Product (ETP). The ETP tracks the LevDAX® x3 TR index, providing three times the daily performance of the DAX index, adjusted to reflect fees and costs inherent to maintaining a leveraged position in stocks.

WisdomTree DAX 3x Daily Leveraged is a fully collateralised, UCITS eligible Exchange Traded Product (ETP) designed to provide investors with a leveraged exposure to the DAX. The ETP tracks the LevDAX x3 TR Index (LEV DAX3), providing a total return comprised of 3 times the daily performance of the DAX® Index, adjusted to reflect fees and costs inherent to maintaining a leveraged position in stocks. For example, if the DAX® Index rises by 1% over a day, then the ETP will rise by 3%, excluding fees. However if the DAX® Index falls by 1% over a day, then the ETP will fall by 3%, excluding fees.

Index Description

For example, if the DAX rises by 1% over a day, then the ETP will rise by 3%, excluding fees. However if the DAX falls by 1% over a day, then the ETP will fall by 3%, excluding fees.

The LevDAX x3 TR Index aims to replicate the daily performance of the DAX® multiplied daily by three and adjusted to reflect certain inherent costs of maintaining the leveraged positions required to achieve that aim.

The DAX® is an index of 30 selected German blue chip stocks traded on the Frankfurt Stock Exchange. The index is open to companies with juristic headquarters in Germany or to companies with operating headquarters in Germany with a major share of their stock exchange turnover at the Frankfurt Stock Exchange and juristic headquarters in the European Union or in an EFTA state. The equities use free float shares in the index calculation. The DAX has a base value of 1,000 as of December 31, 1987. As of June 18, 1999 only XETRA equity prices are used to calculate all DAX indices. The DAX index is calculated in EUR. The level of the DAX® index is calculated on a gross total return basis.

Performance

Index	LevDAX® x3 AR (TR)
Index Provider	STOXX
Index Currency	EUR
Index Bloomberg Code	LEV DAX3

Potential Benefits

Magnify your returns in one simple trade.

Liquid. Trades like an equity on exchange, with multiple authorised participants (APs) and market makers (MMs).

You cannot lose more than the amount invested, and an intraday rebalance mechanism is built-in to cushion the largest intra-day falls.

Simple to trade, no need for futures, no need to borrow cash or short stocks. Transparent structure with world class service providers and fully collateralised.

Gain a leveraged exposure to the performance of DAX.

Magnify your returns in one simple trade.

UCITS eligible and fully collateralised.

Transparent performance and fees.

Easy to invest: Everything in one product which does not require the investor to manage futures, borrow cash or short stocks.

Risk Management: You cannot lose more than the amount invested.

Liquidity: Trades on exchange, with multiple authorised participants (APs) and market makers (MMs).

Potential Risks

Investing in Short and Leveraged ETPs is only suitable for sophisticated and/or informed investors who understand leverage, daily rebalancing and compounded daily returns and are willing to magnify potential losses.

Investors can lose the full value of their initial investment, however they cannot lose more than their initial investment.

Losses are magnified due to the nature of leveraged returns. Therefore, Short and Leveraged ETPs are only suitable for investors willing to take a high level of risk.

Transparent, cost-efficient and fully collateralised ETC structure.

Daily compounding may result in returns which an investor may not expect, if the investor has not fully understood how a WisdomTree ETP works.

An investment in an ETP involves a degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this ETP as an investment to their own circumstances.

This ETP is structured as a debt security and not as shares (equity) and can be created and redeemed on demand by authorised participants and traded on exchange just like shares in a company. This ETP is not a UCITS product.

Investing in Short and Leveraged ETPs is only suitable for sophisticated and/or informed investors who understand leverage, daily rebalancing and compounded daily returns and are willing to magnify potential losses. Short and Leveraged ETPs are only intended for investors who understand the risks involved in investing in an ETP with short or leveraged exposure and who intend to invest on a short term basis. Any investment in a short or leveraged ETP should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in daily leveraged ETPs held for a period of longer than the recommended holding period of one day, may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor over the same period. Daily compounding may result in returns which an investor may not expect, if the investor has not fully understood how a daily leveraged ETP works. Potential losses in leveraged ETPs may be magnified in comparison to investments that do not incorporate leverage. In extreme volatility, returns of leveraged ETPs, even over one day, may under-perform the return of the underlying unleveraged index multiplied by the ETP's leverage factor because of protection mechanisms within the ETP structure, intended to protect against intra-day market crashes. For more information see here.

Market Risk: The value of securities in this ETP is directly affected by increases and decreases in the value of the Index. Accordingly, the value of a security may go up or down and a security holder may lose some or all of the amount invested but can not lose more than the amount invested.

Liquidity risk: There can be no certainty that securities can always be bought or sold on a stock exchange or that the market price at which the securities may be traded on a stock exchange will always accurately reflect the performance of the Index.

Currency Risk: The price of securities in this ETP is generally quoted in EUR. To the extent that a security holder purchases securities in another currency, the value will be affected by changes in the exchange rate.

Counterparty risk: The Issuer is reliant on there being swap counterparties available to enter into swap agreements on a continuing basis and, if no swap counterparties are willing to do so, the ETP will not be able to achieve its investment policy of tracking the performance of the Index.

Credit Risk: The Issuer is subject to the risk that third party service providers may fail to return property or collateral belonging to the Issuer or pay money due to the issuer. The ETP is backed by swaps. The payment obligations of the swap counterparties to the Issuer are protected by collateral held which is marked to market daily. The collateral is held in segregated accounts at The Bank of New York Mellon. In the event a swap counterparty defaults, the proceeds from realisation of the collateral may be less than what the investor expects. Details of the collateral held can be found in the Collateral section of the WisdomTree website (www.wisdomtree.com).

Please see the risks factors section of the Prospectus for a more detailed discussion of the potential risks

This document is marketing material. Investors should read the prospectus of the Issuer (the "Prospectus") and the key information document ("KID") before investing and should refer to the section of the Prospectus titled "Risk Factors" for further details of risks associated with an investment in this product.

Glossary

Authorised participant: Banks or other financial institutions that act as intermediaries between issuers of securities and other investors or intermediaries. Authorised participants subscribe for and redeem securities directly with the Issuer and buy and sell those securities to investors intermediaries either directly or via stock exchanges.

Collateral held: Cash or other transferable securities which are held independently to reduce the Issuer's credit risk in respect of any single counterparty. For example, if the Index (tracked by the ETP) increases, the amount owed to the Issuer by the swap counterparty increases and therefore additional collateral is transferred by the swap counterparty to reduce the increased risk to the ETP of that counterparty.

Exposure: An ETC has exposure to an index or commodity if its value is directly affected by movements in the price of that index commodity. Exposure to an index or commodity can be achieved in various different ways. This ETC aims to provide exposure to the Index using swaps.

Market Makers: Banks or other financial institutions that act as intermediaries between buyers and sellers of securities. They buy and sell securities to investors intermediaries either directly or via stock exchanges.

Swap counterparty: Typically a large bank or financial institution with whom the Issuer enters into swaps

Where a product is not authorised or its distribution is restricted in your jurisdiction, it is the responsibility of any person or entity in possession of this information to inform themselves of, and comply with, all relevant restrictions. Before making any investment, investors should seek appropriate legal, regulatory, tax and investment advice to assess the suitability and implications of investing in these products. Information about WisdomTree products is available at wisdomtree.eu. WisdomTree does not offer investment advice tailored to individual circumstances. Past performance is not a reliable indicator of future performance. Any historical performance included in this document may be based on back testing. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of such strategy would have been. Back tested performance is purely hypothetical and is provided in this document solely for informational purposes. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. The value of any investment may be affected by exchange rate movements. Any decision to invest should be based on the information contained in the appropriate prospectus and after seeking independent investment, tax and legal advice. The content of this document does not constitute investment advice nor an offer for sale nor a solicitation of an offer to buy any product or make any investment.

An investment in exchange-traded products (“ETPs”) is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements. **Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor. Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled “Risk Factors” in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange-traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.**

WisdomTree Multi Asset Issuer PLC (the "Issuer") issues products under a Prospectus ("WTMA Prospectus") approved by the Central Bank of Ireland, drawn up in accordance with the Directive 2003/71/EC. The WTMA Prospectus has been passported to various European jurisdictions including the UK, Italy and Germany and is available on this document.

WisdomTree Multi Asset Issuer PLC Exchange Traded Products ("ETPs") are suitable for financially sophisticated investors who wish to take a view on the underlying indices and can understand the risks of investing in products offering leveraged or short exposures.

ETPs offering daily leveraged or daily short exposures ("Leveraged ETPs") are products which feature specific risks that prospective investors should understand before investing in them. Higher volatility of the underlying indices and holding periods longer than a day may have an adverse impact on the performance of Leveraged ETPs. As such, Leveraged ETPs are intended for financially sophisticated investors who wish to take a short-term view on the underlying indices and understand such risks. As a consequence, WisdomTree is not promoting or marketing WisdomTree Multi Asset Issuer PLC ETPs to retail clients. Investors should refer to the section entitled "Risk Factors" and "Economic Overview of the ETP Securities" in the WTMA Prospectus for further details of these and other risks associated with an investment in Leveraged ETPs and consult their financial advisors as needed. Neither WisdomTree, nor the Issuer has assessed the suitability of any Leveraged ETPs for investors other than the relevant Authorised Participants.

While many leveraged WisdomTree Multi Asset Issuer PLC ETPs reset the leverage or short exposure on a daily basis, certain WisdomTree Multi Asset Issuer PLC ETPs utilise leverage in longer term strategies, where leveraged exposures may be reset monthly. These products are also only suitable for financially sophisticated investors who have understood the specific risks within the prospectus of the relevant product.
