

WDEF WisdomTree Europe Defence UCITS ETF - EUR Acc

Investment Objective

The WisdomTree Europe Defence UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Defence UCITS Index (the "Index").

Index Description

The Index is designed to track the performance of European companies involved in the defence sector.

The Index was developed by WisdomTree, Inc. ("WT"). Companies must conduct their primary business activities in one of the developed or emerging European countries which must be a signatory to the Treaty on the Non-Proliferation of Nuclear Weapons (commonly known as the Non-Proliferation Treaty or "NPT") as outlined in the Index methodology. The selection of European companies within the Index is based on their revenue exposure to the defence sector. The Index further seeks to exclude companies that are involved in certain controversial weapons, such as antipersonnel mines, cluster munitions, chemical and biological weapons, depleted uranium weapons and white phosphorus weapons and those that support nuclear weapons programmes to states outside the Treaty on the Non-Proliferation of Nuclear Weapons (commonly known as the Non-Proliferation Treaty or "NPT"). Additionally, the Index seeks to exclude companies that violate certain commonly accepted international norms and standards, such as such as United Nations and OECD guidelines.

A minimum of 20 stocks that meet the revenue exposure criteria as well as additional requirements such as minimum market capitalization and liquidity, are selected for inclusion. The selected companies in the Index are weighted by free-float market capitalization adjusted by the Exposure Score, following the caps and criteria outlined in the Index methodology.

The Index is rebalanced on a semi-annual basis.

Potential Benefits

Gain a unique pure-play exposure to the Europe Defence theme. The rise of geopolitical tensions globally has become a key driver of demand for increased investments into European defence companies.

The ETF offers exposure to a diversified basket of European companies involved in the defence sector.

The research for the selection and weighting of companies in the Index is conducted by WisdomTree with significant expertise in constructing thematic indices, ensuring the portfolio basket remains focused and relevant.

The ETF is UCITS compliant.

Potential Risks

Although the Index was created to select companies with a high exposure to the European defence theme, there is no guarantee this objective will be achieved.

An investment in equities may experience high volatility and should be considered as a longer-term investment.

Higher growth companies such as those that play a part in megatrends tend to trade at higher valuations. The investor should consider the risk that comes with higher valuations as part of any investment decision.

Investment risk may be concentrated in specific sectors, countries, companies or currencies.

This list does not cover all risks - further risks are disclosed in the relevant key information document and Prospectus.

Glossary

Dividend Weighted Index: an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

Fully Replicated: assets are invested in securities that match the constituents of the relevant index, in the same proportion.

Fundamentally Weighted Index: an index that weights securities on the basis of factors such as dividends or earnings.

Large Cap, Mid Cap and Small Cap: refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

Listing currency: the trading currency on the exchange.

Physical (Optimised): assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

Physically Backed: securities held by the fund are the actual securities not a derivative.

Rebalance: An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

Rebalance Frequency: The frequency by which the constituents of the index are screened and their weights changed.

Replication Method: the method by which the fund gets exposure to the benchmark index.

Share class currency or the "NAV currency": The currency that the fund's NAV is issued in.

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
