

NCLR WisdomTree Uranium and Nuclear Energy UCITS ETF - USD Acc

Investment Objective

The WisdomTree Uranium and Nuclear Energy UCITS ETF (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Uranium and Nuclear Energy UCITS Index (the "Index"). The Index is designed to track the performance of companies involved in the uranium and nuclear energy industry.

Index Description

The Index is designed to track the performance of companies involved in the uranium and nuclear energy industry.

The Index was developed by WisdomTree, Inc. ("WT"). Companies are classified as Upstream, Midstream or Innovator categories based on their exposure to uranium and nuclear activities. The Index further seeks to exclude companies that do not meet WisdomTree's ESG (environmental, social, and governance) criteria.

A minimum of 20 stocks that meet the revenue exposure criteria as well as additional requirements such as minimum market capitalization and liquidity, are selected for inclusion.

The Index has a target weight allocation for Upstream, Midstream and Innovators categories at 60%, 25% and 15%, respectively. Within each category, companies are weighted by market capitalization adjusted by the Exposure Score, following the caps and criteria outlined in the Index methodology.

The Index is rebalanced on a semi-annual basis.

Potential Benefits

Gain a unique, high-conviction approach for investing in uranium and nuclear energy companies.

Nuclear energy is vital to the future sustainable energy mix, as requirements for energy increase, scaling up reliable sources of clean energy will be essential.

The ETF offers exposure to a diversified basket of companies which have involvement in the uranium and nuclear energy market such as uranium mining, building nuclear infrastructure or conducting advanced research on future nuclear technologies.

The research for the selection and weighting of companies in the Index is conducted by WisdomTree with significant expertise in constructing thematic indices, ensuring the portfolio basket remains focused and relevant.

The ETF is UCITS compliant.

Potential Risks

Although the Index was created to select companies with a high exposure to the uranium and nuclear energy theme, there is no guarantee this objective will be achieved.

An investment in equities may experience high volatility and should be considered as a longer term investment.

Higher growth companies such as those that play a part in megatrends tend to trade at higher valuations. The investor should consider the risk that comes with higher valuations as part of any investment decision.

Investment risk may be concentrated in specific sectors, countries, companies or currencies.

This list does not cover all risks - further risks are disclosed in the relevant key information document and Prospectus.

Glossary

Dividend Weighted Index: an index that determines the weight of its constituents using the dividends paid by the security rather than another variable (the most common is Market Cap weighted indices).

Fully Replicated: assets are invested in securities that match the constituents of the relevant index, in the same proportion.

Fundamentally Weighted Index: an index that weights securities on the basis of factors such as dividends or earnings.

Large Cap, Mid Cap and Small Cap: refers to market capitalisation and is calculated by multiplying the price of a stock by the number of shares outstanding.

Listing currency: the trading currency on the exchange.

Physical (Optimised): assets are predominantly invested in securities that are constituents of the index, but may also hold securities whose characteristics closely resemble the characteristics of the index.

Physically Backed: securities held by the fund are the actual securities not a derivative.

Rebalance: An index is created by applying a certain set of selection and weighting rules of countries, sectors and stocks at a certain frequency. A Rebalance is when WisdomTree re-applies its rules based selection and weighting process.

Rebalance Frequency: The frequency by which the constituents of the index are screened and their weights changed.

Replication Method: the method by which the fund gets exposure to the benchmark index.

Share class currency or the "NAV currency": The currency that the fund's NAV is issued in.

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating a fund. The TER consists primarily of management fees plus other expenses such as trustee, custody and operating expenses. It does not cover the swap fee. The TER is expressed as a percentage of the fund's total net asset value.
