### Physical Replication

Xtrackers Galaxy Physical Bitcoin ETC securities are backed by a direct investment in the underlying physical Bitcoin. The issuer has direct and sole ownership of the Bitcoin, which is stored in institutional-grade cold storage custody solutions. Each physical ETC security entitles the holder to a specified quantity of Bitcoin (the "Coin Entitlement") of the segregated pool owned by the issuer. The value of the security is a function of the Coin Entitlement, the Bitcoin spot price and any applicable fees.

### Limited-Recourse Assets

In respect of each series of ETC securities, the underlying physical Bitcoin (Secured Property) is owned by the issuer and held through the secured account custodian(s). It is further secured in favour of the trustee on behalf of the security holders. Each series of ETC securities will have recourse only to the respective secured property in relation to such series after the relevant service providers have been paid any outstanding amounts in relation to such series. Such secured property is not available to satisfy the claims in relation to a different series of ETC securities (i.e., is "ring-fenced").

### Key Risks of Xtrackers Galaxy Physical Bitcoin ETCs

- Non-principal protected investments: Xtrackers Galaxy Physical Bitcoin ETC securities are non-principal protected investments, therefore an investor's capital will be at risk up to a total loss.
- Distinct risks of cryptocurrencies: Prices of cryptocurrencies are extremely volatile when compared to most (if not all) traditional asset classes. Cryptocurrencies face distinct market, technical, operational, legal, regulatory, cryptocurrency custody, hacking, fraud and blockchain risks.
- Market volatility affects investments: The value of the ETC securities depend on the underlying bitcoin/Ether price. It may go down as well as up and past performance is not a good indicator of future performance.
- Deduction of fees and no accrual of interest: Investments in cryptocurrency ETC securities will not accrue any interest and performance is subject to the deduction of the applicable fees.
- Debt security: Investing in ETC securities will not make an investor the owner of the Underlying.
- Counterparty risk: The ETC program relies on many counterparties which leads to counterparty risk.
- Secondary market pricing: Pricing of the ETC securities on the secondary market may be at a significant discount or premium compared to the Value per ETC Security (intrinsic value) published by the Issuer.
- Exchange rate: The price of Cryptocurrencies is generally quoted in US dollars. If a security holder values cryptocurrencies in another currency, the value will be affected by changes in the exchange rate.
