Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. The Fund is exposed to less economically developed economies (known as frontier / pre-emerging markets) which involve much greater risks than well-developed economies and emerging markets. Political unrest, less government regulation, economic downturn and limited liquidity may be much more likely and could therefore affect the value of your investment.
